Hello to Randy and the rest that have signed up.
I think this is a great idea.
My home page is Yahoo and I put a pointer to here on it.
I couldn't get things to transmit last night to get on the net but I
did listen.

I started a picture file and put a small picture in it. I don't know how much they will let up upload.

## 4. New poll for BoeingRadioClub

Yahoo group: BEARSAmateurRadioClub
Date: 2007-01-11 10:09:49 UTC
From: BoeingRadioClub@yahoogroups.com
Topic: 4  Message: 4

Enter your vote today! A new poll has been created for the
BoeingRadioClub group:

The BEARS Field Day in 2006 was very well attended.

Are you likely to attend and invite more friends and
family to the 2007 BEAR Field Day at SBEA Lake?

o Yes, I will attend and bring a friend(s)!
o Yes, I will attend!
o I cannot attend due to a schedule conflict.
o I won't attend. I didn't have a good time at the 2006 BEARS Field Day.

To vote, please visit the following web page:
http://groups.yahoo.com/group/BoeingRadioClub/surveys?id=12498645

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

## 5. Back to work!

From: KA0MR
Topic: 5  Message: 5

Dear Boeing members:
To those of you that have been following my recent operations I was released to go back to work Monday and went back on Thirsday with limited duties. Full duty in 2 weeks. I appreciated all of the cards and prayers form everyone.

I really miss being able to be a member of the club and miss all the activities the club had.

To those that will be able to attend the St. Joseph, MO hamfest will be Saturday Jan. 20 at the Ramada Inn just off Interstate 29. I look forward to seeing all club memebrs that are able to make it.

Bob KA0MR
Liberty,MO

BEARS Members and Friends,

Last evening, Steve Heyroth (Pres), Harvey Jones (VP), Charles Rasico (member), and Randy Wing (Trustee) briefed the SBEA Board of Directors on a proposal to relocate the BEARS station, towers, and antennas to the SBEA Lake. (I've attached the power point pitch that we briefed.)

I was pleased with the excitement and the level of questions we received from the SBEA. The board asked about where we put the station, if there would be interference with their residential neighbors, about insurance, about how we would protect the station and equipment from the members and vice versa, whether we would offer free ham radio training to the SBEA members. They also insisted that members who would use the station become SBEA members. The SBEA Lake has an agreement to allow emergency services the ability to train at the lake; this sometimes preempts social activities - we noted that we'd like to be PART of the training!

Although they were going to deliberate on the decision to proceed after we left, I am encouraged and hopeful that we will get the go ahead to plan the next steps forward. The next steps forward include planning out the location of the station and towers, getting approval for the building or trailer that we will establish as our station. After we get those things identified, we will probably have to go through some kind of approval process on the towers. The SBEA Lake is commercial property and may require some coordination with the city to allow the towers. The director has had experience working through this process on similar lake construction.

The SBEA board suggested two locations for the BEARS station at the lake: Near the north east corner of the SBEA Lake property (near the north end of the field day 2006 area) or on the island in the middle of the Lake. The island at the middle of the lake is actually connected to the lake property by a thin isthmus. Currently, no one is allowed on the island. The island has power to a 12x12 brick building! The building needs work, we may still need to add on to it, but there is a lot of space out there for towers and antennas.

I don't want to get too excited, but I don't think this first SBEA meeting could have gone much better! I will keep you informed on this developing topic.

Before the meeting, Harvey, Charles and I stepped out the size of our area for Field Day 2007. Harvey took several pictures of the area that I will ask Steve Canfield to upload to our BEARS web site. Charles has tested out a computer logging system for field day that will allow a wireless connection between all our field day stations to a central log. This will

allow a LOT of capability at each station to review how well we are doing as Field Day develops. The software looks easy to use - Charles will be briefing it at (possibly) the February 2007 BEARS meeting.

The BEARS 2007 Field Day central will be located in the air conditioned pavilion at the SBEA Lake. This is located in a wonderful shady area on the north side of the lake. I am absolutely ecstatic that we have this location tentatively scheduled. The inside of the building will be a little noisy for voice operations - so I am still expecting our voice stations to be located in the shade outside. The digital and morse code stations will be located inside the air conditioned pavilion - as will the food, pop, and entertainment. The SBEA Lake social committee meets in late January and will confirm this date. I've explained to the SBEA director that this is the only weekend of the year that Field Day can be held on - because it is a national date. Currently there is no conflict for this date, so again, I am confident that we are in good shape for Field Day.

Denys Fredrickson sent me a note saying he had been hospitalized for three months (he just got out) with a very vicious virus. If you have a moment, send him an email - His email address is: denysgf@.... Bob Bailey is still recovering from his persistent heart problems - he would also welcome get well messages at: BBailey21@.... [note to Steve Canfield - if you include this email on the web page, please remove the direct references to club member's email addresses.]

Earlier this evening, I made my first contact with a South African station on 80m. This is the longest 80m contact I've ever made on 80m - 9176 miles. The 80m band was in great shape! If your station is capable of 80m operation, listen in on 3790 - 3800 khz from about 8 pm to midnight for European and African 80m contacts. Listen in just before sunrise for communications with Japan, Korea, and Russia.

Respectfully submitted,

Randy Wing, N0LD

BEARS Trustee

HAM RADIO IN SPACE: PEHUENSAT - 1 ON THE AIR

The Pehuensat One ham radio satellite is on the air. Reports are coming in from all over the world of the reception of signals from this latest ham radio bird and so far all are good.

The satellite was launched on the 10th January from the Satish Dhawan Space Centre in India. It transmits on 145.825 MHz FM voice in English, Spanish and Hindi followed by AX25 1200 bps packet.

To have a quick glance at next passes in your location and time, visit www.amsat.org.ar . Then click on the revolving globe, then on your location, then on Pehuensat. We will have more ham radio space related news later on in this weeks report. (Via Press Release)

## 16. BEARS meeting and notes

Yahoo group: BEARSAmateurRadioClub
Date: 2007-01-30 16:43:29 UTC
From: Wing, Randy
Topic: 16  Message: 16

BEARS Members and Friends,

The February 2007 meeting of the BEARS will be held on Thursday, February 1, 2007 at 5:00 PM in room E203 of the 4501 Bldg.
Agenda includes:
1. BEARS collaboration with the Rockwell Collins Amateur Radio Club
Lawrence Robinson KC0ODK and Max Parkhurst will present information on the B-29 "DOC" project - especially the radios they have restored and need our help in mounting inside "Doc".

2. Amateur Radio Test Session sponsored by the Valley Center Amateur Radio Club will be held 24 February 2007, Saturday, 0900 to 1200. Please note that the 20 February session has been canceled. This is a new day, new time, and new place. Location is:

Kansas Masonic Home Auditorium
402 So. Martinson ( 1 block west of Seneca and Maple )
Wichita, Kansas.

Talk in will be provided on the K0FFR repeater, 147.390+ .

Pre-registration is required. "No Walk-ins will be allowed"

Contact Henry Monton, w0ie@arrl.net ( Contact a club officer for Henry's phone number, or get an instruction sheet from Derby Radio Shack. )

3. Discussion about the potential future home of the BEARS at the SBEA Lake

4. Existing shack status

5. Field Day preparations

6. Wx Spotter class is 13 February 2007 at 7:00 PM at the Sedgwick County Extension Building located at 21st & Ridge. Several BEARS SKYWARN members will be going - you are invited, too.

As always you can find information about the BEARS at:

http://www.boeingradioclub.org/

Bob,

Drop the list a note now and then! I get asked how well you are doing quite frequently... Has work been a challenge? Does it look like you are "over" some of these relapses?

Hope you are well - next time I travel to Iowa to see my family I will contact you and arrange a short visit - if you have time!

Subject: Feb 24th Test Session

Are we having fun yet?? I've made arrangements for yet another place to hold our February 24th session. I have received the two volunteer VEs for the special evening session. There will be three and only 3 examinees at that session. I'm asking the VEs to try to get there by 8:30 AM to help set the room up the morning of the 24th. We have 24 people registered. If anyone knows of anyone else who is planning on testing make sure I have their registration in my hand. "It's in the mail" or "I sent an email" will not work, and they not be permitted to sit for an exam. Anyone receiving this is either a Volunteer Examiner (VE) for W5YI, or is registered to sit for an exam with us on February 24th, 2007.

Sponsored by Valley Center Amateur Radio Club

** no walk-ins allowed, pre-registration is required **

When: February 24, 2007 from 9:00 AM to 12:00 noon

(February 20th session at Valley Center is cancelled)

Where: Sweetbriar Bingo Hall

2349 N. Amidon (NE area of Sweetbriar Shopping Center)

Wichita, KS

Talk-in: K0FFR Repeater. 147.390 +

(from 21st and Amidon go North to 2nd or 3rd entrance on left and enter Sweetbriar shopping center. Bingo hall is on your right about 200 feet from street. Look for cars with antennas and Valley Center ARC sign)

What to bring:

Picture ID (drivers license, military ID, etc).

Proof of social security number must be shown.

Provide a Copy of license / CSCE, if applicable for us to keep. $14.00 cash (we no longer accept personal checks).

Notes:

We furnish pencils, pens, and required application forms. Bring your own calculator. No cell phones or HTs permitted in the exam room. Make sure we have valid phone#. If you are submitting a CSCE for credit, make sure it is dated no earlier than February 25, 2006 (365 days).

For Questions: (316) 684-6968 or w0ie@...

Subject: W5YI VEs

Randy,

Would you do me a favor and poll the BEARS for W5YI volunteer examiners? I just sent in Kerry's paperwork, but I know there are at least 2 others that are W5YI VEs. Our count is now 37 to test on the 24th and a CERT class finishing the evening of the 27th and needing to tested. I could use a few more VEs.

tnx,

Henry - W0IE

## 25. New Callsign

Yahoo group: BEARSAmateurRadioClub
Date: 2007-02-13 23:13:08 UTC
From: KA0MR
Topic: 25  Message: 25

Since my callsign of KA0MR stood for KAnsas zero MoundRidge I felt it was time to change since I now live in Missouri. This time I decided to get a call idicating my class of Extra. I was granted today the vanity call of WE0Z. No particular reason for this call except it was available and is easy to send on CW should I attempt CW after all we don't need to know cw anymore:) (just kidding don't blow a 50 amp fuse you spark gappers).
Anyway old friends be prepared to not hear my old call anymore.
It has died-dead.
Bob WE0Z (KA0MR)

From: Wing, Randy
Topic: 27  Message: 27

Congratulations to Jim Kernan! He just became listed as an EXTRA class amateur radio operator.

While Jim Enix and Jim Kernan were in Palmdale last week it seems they had time for Jim to take his morse code test and the Extra class written.

It says a lot that Jim had studied long and hard on the morse code and wanted to take the test before the 23 February 2007 deadline. Congratulations for being one of the last hams to take his morse code test!

I just wanted to send you a reminder regarding this years weather and safety presentation, "Storm Fury on the Plains". This years presentation will be on March 1st at Augusta High School in the Auditorium. The presentation will begin at 6:30 pm. As in years past, the presentation has received a makeover to add more information to the program. The program will last about one and a half to two hours. Please try and make some time in your schedule to attend this years presentation. If this time frame does not work for you, here is a web link showing other presentations in the vicinity.

http://www.crh.noaa.gov/ict/?n=spottertalks

Please help spread the word by telling those you feel might be interested of the upcoming presentation.

Thanks for your time and efforts in reporting severe weather.

Chance Hayes

## 32. BEARS membership

Yahoo group: BEARSAmateurRadioClub
Date: 2007-02-22 15:16:27 UTC
From: Wing, Randy
Topic: 32  Message: 32

BEARS members and friends,

Our club is facing some challenges this year - all surmountable if we have a little of your time.

1. Please subscribe/resubscribe to the club. Our 2007 recreation allotment is being discussed - I believe that they will ask us periodically this year to prove our membership. You can help by sending in your membership fee to Jim Enix or any of the officers. As in all budgets, our recreation budget may be challenged. In fact, all recreation budgets may be challenged. By affirming that we are a large and viable club, it will give your officers and recreation staff a lot of ammunition to keep our allotment high or even perhaps justify a temporary increase to help fund the relocation of the shack.

2. Encourage Boeing Employees and friends to join the BEARS. What a great time for ham radio! It has never been easier to become a ham! Let's swell our ranks if we can. Think about who you could talk our club up to... this will probably help us more than almost anything else on this list.

3. Please attend meetings. Our last meeting was fairly well attended, about 15 people. With the DOC radio project beginning, the shack being relocated, and Field Day preparations starting, we have a lot of important issues to discuss. These are all fun activities, don't miss out! The next BEARS meeting is March 1, 2007 at 5:00 PM. Building 4501, room E203. Which leads me to...

4. Be prepared to volunteer. I know many of you have commitments outside the club - and that your spare time is precious. There are many ways to help the club that do not involve moving equipment, staying awake 24 hours during Field Day, or some of the other things we do in the name of the club... We need help with the membership accounting, creating a club inventory, looking for the right equipment online, ordering equipment for the club, checking the equipment out that it works, etc. These can be wedged in anywhere in your schedule - they do not require Saturdays or evenings.

5. SBEA Shack Relocation Help. James Whitfield and I met with the SBEA / BEARS committee on Friday - they have approved us putting in writing what we recommend to the SBEA for locations of our shack and towers. James and I are working on that - and we need help. If you have the capability to draw a set of landscape views of where we would like to put the towers... let me know, we need you! I would like a front view, a side view, and a top/down view to present to them. The picture would include a representation of guy wire locations, base locations, the

towers, the feedlines, power lines, etc. It will probably be used eventually to show the city what we have in mind for the construction. It doesn't have to be professional, but it does need to get across the idea what we are doing.

6. DOC. Please contact James Whitfield and Steve Heyroth if you want to be part of the team that puts operational radios on the B-29 DOC aircraft. All kinds of talent is required - technical, organizational, etc. If you cc: me, I am keeping up to date a mailing list for that team.

If any of these strike your fancy, please reply to the officers on this email and give the officers an idea what you would like to do!

# 33. FW: Storm Fury on the Plains - Weather and Safety Presentation

Yahoo group: BEARSAmateurRadioClub
Date: 2007-02-22 18:26:05 UTC
From: Wing, Randy
Topic: 33  Message: 33
Attachments: 1 described; binary payloads are missing from this source WARC

Several people have noted that the date of this Weather and Safety Presentation directly conflicts with the BEARS meeting next Thursday, March 1, 2007 at 5:00 PM. I apologize for the conflict. There are SEVERAL alternatives to this time in all of the counties surrounding Sedgwick and Butler county. Please check this website for more information. <http://www.crh.noaa.gov/ict/?n=spottertalks> http://www.crh.noaa.gov/ict/?n=spottertalks

I recommend that you attend the BEARS meeting - there are several alternatives to the Augusta meeting I noted in the attached. :)

Thank you,

Randy, N0LD

Date: 2007-02-27 17:19:47 UTC
From: Wing, Randy
Topic: 32  Message: 38
Attachments: 2 described; binary payloads are missing from this source WARC

BEARS Club members:

Dennis Gaskill is our BEARS membership chairman.

When you update your membership, please print out BOTH the attached forms and send the appropriate $ to Dennis Gaskill (ONLY) at ...

> Dennis Gaskill
> 7250 SW 55th Terrace
> Augusta, Ks 67010
>
Thank you! Another way to do it is to fill them out and bring them to the Thursday, March 1, 2007 5:00 PM meeting and to give them to Dennis.

Dennis is keeping our membership roster (paid/unpaid) status on the BEARS Yahoo Web Group web site.... This is a GREAT way to pass files, photos, messages that we don't wish the general public to view. I limit membership to people I know that are part of the club - or who have a need to know. That means no junk mail. That means you can share messages with the rest of the people who sign up as a member of this Yahoo Group. Go to: http://groups.yahoo.com/group/BoeingRadioClub/ to sign up. Dennis also has the membership forms there, too.

# 39. BEARS

Yahoo group: BEARSAmateurRadioClub
Date: 2007-02-28 00:37:22 UTC
From: Randy
Topic: 39  Message: 39

Demian DeHoet took and passed the Technician class license test on Saturday. He is a former Novice that has now rejoined the ranks of active amateurs. The license database does not show his license yet, perhaps we will know his call by the March meeting. He is looking forward to continuing the study group for upgrade to General.

James Enix, Charles Rasico, Mark Breichessen (Radio Shack owner), and Carl (Radio Shack technician) took and passed their General class license test on Saturday.

At the Douglass High School Speaker Day, 7 high schoolers expressed interest in becoming hams... I have given them five books so far - I need to give them a couple more - but they are all actively seeking their technician licenses. (Henry? Any chance of teaching a Technician class?)

Congratulations to everyone and thanks to James Whitfield for the noon ham radio mentoring sessions!

Randy, N0LD

Today we picked up a rack of equipment from the "Bunny Wash" destined for the B-29 DOC... It has been cleaned up a little and is ready for some diagnosis... Any takers? Send a note to James Whitfield and Steve Heyroth.

Randy

I need to double check, but I think that the equipment is "B" version.

Maybe we got a chunk out of an old Buff instead of DOC.

James

AN/ARC-3

I would recommend a complete mailing. It is still free through Boeing mail. I would mail out any cards not yet passed out and maybe a membership certificate to those that are members. Send out an application form to those not yet signed up. I would also make a mailing to past members and retiree to drum up some business. Might also tell everyone about the possible move to the lake. A come fish, talk, have a barbeque and in general have a good time type letter at the lake. Pass the word that it is just the beginning of getting better. I would even add a free membership to those that get their first ticket. Remind them that we have a phone patch.

If I were new to the club, I would want to know about being a member of this lake thing is. I know that right now if you are working at Sprit or Boeing or retired from either you can be a member. But how about those that are associate members and don't fit into the slot? Is there a provision for them? If they don't want to be a BEA member, can they still participate in club events at the lake? These are questions that need to be addressed. A reminder of when and where the club meets as well as the time of the radio net.

To those that are DX members, we need a new letter maybe twice a year just to give them something for their money and support. I membership certificate would be nice to have. It is nice to be appreciated other than giving money.

Might also list upcoming events. Also just simply say we really need their support. I am off my soap box now.

Kerry

# 47. Reminder: Weather Briefing at the Zoo on Tuesday, March 13th at 7:00 PM

Yahoo group: BEARSAmateurRadioClub
Date: 2007-03-12 12:44:28 UTC
From: Wing, Randy
Topic: 47  Message: 47

Tuesday March 13 Wichita, KS
(Sedgwick County) 7:00pm CDT Talk will be held at the Sedgwick County Extension Building located at 21st & Ridge.

Yesterday, I met with Sherry Weir who will be taking over the volunteer SKYWARN coordinator position from Ron Farthing. Ron is retiring from the volunteer coordinator position after many decades of faithful service. I accepted Sherry's offer to be her volunteer assistant coordinator for SKYWARN. Since I travel on business a couple of times nearly every month, I've asked Jim Enix, KC0QIE, to help both Sherry and I. Jim will share the assistant coordinator title with me.

I will be creating a new Yahoo Groups account for SKYWARN members in the Wichita NWS territory. If anyone is interested in becoming a SKYWARN volunteer at the NWS or of becoming a severe weather spotter, the above noted Weather Presentation is considered a pre-requisite. If you can't attend Tuesday night, there are other Wx presentations in the area - you can find them at: http://www.crh.noaa.gov/ict/outreach/spottertalks.php

If you feel you don't understand what a SKYWARN volunteer does - so you are hesitant about volunteering - please drop me a note and I will make it a point to meet with you and answer your questions personally.

Thank you,

Randy Wing, N0LD

# 51. New poll for BoeingRadioClub

Yahoo group: BEARSAmateurRadioClub
Date: 2007-03-24 11:23:57 UTC
From: BoeingRadioClub@yahoogroups.com
Topic: 4  Message: 51

Enter your vote today! A new poll has been created for the
BoeingRadioClub group:

What would improve your personal attendance at club meetings?

o More frequent celebrity speakers
o Programs/demonstrations on a new ham radio topic
o Meetings scheduled on a different day
o Shorter meetings
o New activities like antenna or kit building

To vote, please visit the following web page:
http://groups.yahoo.com/group/BoeingRadioClub/surveys?id=12544732

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

From: w0on
Topic: 4  Message: 52

I think the pole is a good idea. I really don't see anything wrong with the meetings. I have a hard time making meetings due to outside activities.

I didn't vote as I felt the club was trying to do all these things already. It is harder to get club involvement as you move closer to summer. It picks up again in the fall. It is sort of a life cycle that I have seen in my 43 years in ham radio.

The club reminder that you send the day of or the day before is the biggest help I can think of. I then put it on my calendar. Some time I get so involved with work I simply forget to look.

Kerry

# 53. Meetings

Yahoo group: BEARSAmateurRadioClub
Date: 2007-03-27 13:48:35 UTC
From: tgattisr
Topic: 53  Message: 53

I generally agree with Kerry's comments.

My biggest problem is that I just forget. Email reminders work wonders for my attendance. I just got up from my chair and marked 5 April on my calendar! Now all I have to do is remember to look at it. I am impressed with the quality of most of the programs and can't suggest anything in that area (Yes,I know that is kind of a cop-out). Sometimes the meetings run a little long but I am ok with that. I enjoy the "eyeball QSO" and plan for 1 to 2 hours once a month. I am looking forward to the next meetings and what is being planned for Field Day! Last year was great. Having it "close to home" is an advantage for a lot of reasons. One of the biggest is the opportunity to expose more non-hams (in particular, the younger ones) to what amateur radio is and does. I think the digital modes will help grab the introverts who hang back and don't just grab a mike (like me). They are the ones most likely to be interested in the technology of ham radio. It takes all kinds to make a community.
And, since I have not said it in a while to the club officers and those others that make those meetings and our other events work, THANKS!!

Terry

# 54. BEARS April 2007 Meeting Cancelled - New Club Activities scheduled

Yahoo group: BEARSAmateurRadioClub
Date: 2007-03-28 02:30:25 UTC
From: Randy
Topic: 54  Message: 54

BEARS Members and Friends,

During the weekly BEARS net on 146.895- on Tuesday, March 27, 2007 at 8:00 PM the officers voted to not have the April 2007 meeting to encourage members to: 1) attend the Weather briefing (a requirement for SKYWARN membership), and/or 2) support the removal of the HF antennas from the Spirit Ham Radio shack.

April, 2007 - Upcoming

Day

City, State

Time

Location

05

Wichita, KS
(Sedgwick County)

7:00pm CDT

Talk will be held at the Sedgwick County Extension Building at 21st & Ridge.

The extension building is on the SW corner of the 21st and Ridge intersection. The Weather briefing is provided by the National Weather Service of Wichita, KS and includes dramatic footage of tornados and severe weather. It is focused on weather spotting activities, but it is entertaining and educating if you don't wish to participate in those activities.

I intend to take down the antennas from the Spirit Shack sometime during the first two weeks of April (an arbitrary goal depending on the weather, volunteerism, and my schedule). I intend to start removal either on a Saturday or a weeknight after 4 PM. If you can help, please let me know. I need to make a list of people, arrange for Spirit passes, and schedule a time. I'm asking for you to tell me by Thursday, March 29, 2007 close of business. I will keep you informed.

Randy Wing, N0LD

BEARS Trustee

# 59. April 2007 BEARS Meeting - Venue Change

Yahoo group: BEARSAmateurRadioClub
Date: 2007-04-04 11:47:59 UTC
From: Wing, Randy
Topic: 59  Message: 59

BEARS members and friends:

The April 2007 BEARS meeting will not be held at the usual time and place - instead, members are encouraged to attend the National Weather Service's annual weather briefing at the Sedgwick County Extension Building on the southeast corner of Ridge and 21st in northwest Wichita at 7:00 PM.

(note: if you would like to assist the SKYWARN volunteers, this weather briefing is considered to be a pre-requisite; if you are interested in working as part of SKYWARN, please contact Jim Enix or myself)

The BEARS maintain a website at www.boeingradioclub.org. On this website is a helpful Calendar of BEARS and other ham radio events for the 2007 year. In addition, If you haven't done so already, I encourage our club members and friends to subscribe to the BoeingRadioclub at the Yahoo Group site: http://groups.yahoo.com/group/BoeingRadioClub/. If you need help subscribing, please drop me an email and I will help.

I am meeting with the SBEA today to discuss the plans for the tower and shack placement at the lake. I will continue to provide status updates on the shack move.

Randy, N0LD
BEARS Trustee

# 66. Kerry Steffens taken to the hospital

Yahoo group: BEARSAmateurRadioClub
Date: 2007-04-18 16:10:52 UTC
From: Wing, Randy
Topic: 66  Message: 66

BEARS members and friends,

This morning, Kerry Steffens was taken to the hospital - he had some internal bleeding last night and was light headed this morning. He has recently had a colonoscopy and had some polyps removed - the doctors and Kerry believes that this is probably a natural result of that. However, they are admitting him for observation at St. Joe. It probably is too early to visit him, but if his stay is longer than a day, I will inform you.

Kerry wanted everyone to know he is in great spirits! And expects to be through this quickly.

Get well, man!

Randy, N0LD

# 72. I saw Bob Bailey today!

Yahoo group: BEARSAmateurRadioClub
Date: 2007-04-22 02:48:58 UTC
From: Randy
Topic: 72  Message: 72

Jim and Jacob Enix and I travelled to the Ararat Hamfest it KC, MO today. We walked in the front door and almost immediately saw Bob! He is is great condition - proudly showed his chest scar - he has been through a lot in the past year!

He walked with the Enix's and myself for a long time - talking of his new home and his new life that he enjoys immensely. He noted he has a vertical in his back yard but there is some local RFI that he hasn't resolved yet.

I uploaded a picture to the Yahoo web site - if you want to see a recent picture of Bob!

By the way, he says "hi" to everyone - and especially noted a big thank you for the get well cards we sent him from the BEARS.

It was really great seeing Bob - his callsign recently changed to WE0Z.

Randy

# 75. BEARS Meeting and Field Day T-shirts

Yahoo group: BEARSAmateurRadioClub
Date: 2007-04-26 20:08:52 UTC
From: Randy
Topic: 75  Message: 75

The next BEARS meeting will be on 3 May 2007 at our usual location.

Nick Farlow, KB0YHT, nick1163@..., will be coordinating T-shirt sales for Field Day. He will be sending a detailed message out regarding the details - links to the shirt design, etc. Meanwhile. Consider what you want:

1) The number of t-shirts
2) The sizes
3) $12 apiece for the Field Day T-shirts

Subject: BEARS Meeting Agenda for May 3

Randy, please send out the following agenda for the BEARS meeting Thursday, May 3:

1. Shack Relocation Plan
2. Field Day (June 23) Plan (including orders for t-shirts and pins)
3. The BEARS Yahoo information group
4. National Weather Service SKYWARN activities
5. Potential involvement in Boeing Family Day June 16
6. Drawing for a highly-coveted door prize

Thanks,
Steve K5MNZ

# 82. BEARS May 2007 Minutes

Yahoo group: BEARSAmateurRadioClub
Date: 2007-05-04 08:29:27 UTC
From: Randy Wing
Topic: 82  Message: 82
Attachments: 1 described; binary payloads are missing from this source WARC

BEARS Members and Friends,

BEARS 3 May 2007 Minutes

Approximately 15 people were in attendance. Jim Enix acquired the door prize and brought cookies and soft drinks to the meeting.

Agenda:

1. BEARS Shack Relocation

Steve Heyroth, president and Randy Wing, trustee discussed the proposed agreement between the SBEA and the BEARS. The SBEA has asked that all BEARS members that use the Lake and BEARS proposed new facilities be SBEA Members or enter the SBEA Lake under an existing SBEA member's card. After discussion, Randy Wing proposed acceptance of the SBEA's membership agreement. Terry Gattis seconded. The vote passed unanimously.

Further discussion of the draft plan for moving to the lake was lead by Randy Wing. (I have uploaded it to the BEARS Yahoo group) The plan is composed of three steering committees to build detailed plans. The committees are:

a. Tower Committee - Randy Wing, Jim Enix

b. RV Committee - Harvey Jones, Terry Gattis, Jimmy Williams, Steve Heyroth, James Whitfield

c. Non-Profit Committee - Nick Farlow, Charles Rasico

I have asked the first person in each list above to kickoff the committees and get a few members to help plan their subplans and coordinate them with the other committees. If the committees are urged to have a vote for the formal leader. I have added the people who volunteered at the meeting to join a committee. If you'd like to be a member of one of the committees, the committee leader pro-tem's email address is in the "to" part of this email message or on the BEARS Yahoo group. Important note: The committees are not responsible for all the work - just the planning. Everyone will be encouraged to volunteer for the work parties.

2. BEARS Field Day

Field Day is slated for 23-24 June 2007. You are invited to join us anytime on Friday, June 22, 2007 (but no earlier than 11 AM) for early setup, testing out of the computer network, tent setup, antenna and radio trials, and the jam session (bring instruments). We are going to encourage people to bring your own food and beverages for the weekend - The club will provide

a meal on Saturday night (23rd) at 6 PM. Randy Wing will coordinate with the Station Captains to ensure adequate planning for Field Day - The Station Captains (email addresses in the "to:" part of the email) are:

a. 10m Steve Canfield
b. 15m / 160m James Whitfield
c. 20m George Pinick
d. 20m Digital Harvey Jones
e. 40m Jim Kernan
f. 40m Digital Dennis Gaskill
g. 80m Jim Enix
h. GOTA Charles Rasico
i. Safety Officer Terry Gattis

Jim Williams ultra quiet generator will power the radios in the air conditioned pavilion (GOTA, 10m, 40m Digital, 20m Digital). The clubs Honda generator (pretty quiet) will power the other stations. If you are coming to field day, please send an email with station preference to Randy Wing at N0LD@... and to the station captain whom you'd like to help setup. Affiliating yourself with a station does not prevent you from operating at another station - it is just there to help ensure that we man the setup, operation, and teardown of the station effectively. Discuss your operating plans with each captain.

Something we plan to do this year a little differently than last year is to send our "extra" GOTA members around to each of the other stations to get some "elmering" from those experienced operators. This plan was developed after we did a lessons-learned discussion last August and we learned that we didn't talk nearly enough to them.

3. SKYWARN Discussion

Randy Wing noted the recent SKYWARN membership drives and the volunteer work that is being done to establish a thriving SKYWARN group. 5 members of the club are active in that organization. If you are interested in participating, contact Randy Wing or Jim Enix. More information at: http://tech.groups.yahoo.com/group/SKYWARNICTNWSServedArea/.

4. BEARS New Email List

A number of email list cleanup activities are underway to reduce time spent maintaining email lists and improving member services. Specifically, Randy Wing is sending invitations to every club member to join the BEARS Yahoo Group. Members are encouraged to signup home email addresses and work email addresses as required. As membership in that group increases, Randy will remove you from the old manually maintained email lists. For more information: http://groups.yahoo.com/group/BoeingRadioClub.

5. Boeing Family Day

This year Boeing Family Day is slated for 16 June 2007 - the same day as the Radio Shack Sidewalk Sale in Derby. If anyone can volunteer - for all or

part of the day - please contact Randy.

6. Discussion of the recent Joplin QRP Hamfest

Dennis Gaskill discussed the recent Joplin QRP Hamfest. Highlights included an audio CW QSO contest, inexpensive QRP kits, international visitors, Surface Mount Devices (SMD) and how to properly seat them on a board, and more.

7. Award of Door Prize

Dennis Gaskill, KC0IFQ, won the Door prize - a LARGE TYPE Repeater Directory.. :-)

Meeting adjourned about 6:20 PM. Several members stayed later to chat.

Randy Wing, N0LD

Topic: 84  Message: 84

I am very pleased that so many of you have elected to migrate to the BoeingRadioClub@yahoogroups.com. This will substantially ease the process for club officers to maintain and communicate with the list - and YOU are able to send emails to the list as well!

Everyone is usually shy in communicating in writing - with the exception being that if someone angers them they find it easier to communicate their frustration... :)

I don't think we need formal rules - we are used to communicating with each via email and the web. But let me say NOW so no one can say I changed the rules AFTER they said something....

Rule 1. "Treat everyone with respect."

An individual's ability to post to the entire list will be conditional based on the trustee (moderator) and his assessment of everyone following the rule above. I will take recommendations from the BEARS officers if it ever becomes necessary to block someone from sending emails to the group. Rules may be added later if necessary. Rules may be retroactive... :)

# 85. tilt-over flagpole

Yahoo group: BEARSAmateurRadioClub
Date: 2007-05-08 18:37:07 UTC
From: n5gui
Topic: 85  Message: 85

I was at Minneha Elementary school last night for my grandaughter's string concert. As I was leaving I noticed the flagpole, which I thought could have some HAM radio application.

The pole was about 30 feet high and had the cleat mounted above head level. The interesting part was that it was mounted in a pivoting base with a counterweight. The bolt through the counterweight was the same size as the pivot bolt.

I don't see much need for a tilt over feature on a flagpole. I suppose that it would make it easier to do maintenance on the top of the pole. However it did look to be suitable for amateur radio work for those of us that stopped climbing towers ( at least 20 years ago in my case ).

I know that the plans are for tall guyed towers at the new shack location, but something like this might be good for some wire antennas in various directions.

Subject: [BoeingRadioClub] BEARS May 2007 Minutes

BEARS Members and Friends,

BEARS 3 May 2007 Minutes

Approximately 15 people were in attendance. Jim Enix acquired the door prize and brought cookies and soft drinks to the meeting.

Agenda:

1.. BEARS Shack Relocation

Steve Heyroth, president and Randy Wing, trustee discussed the proposed agreement between the SBEA and the BEARS. The SBEA has asked that all BEARS members that use the Lake and BEARS proposed new facilities be SBEA Members or enter the SBEA Lake under an existing SBEA member's card. After discussion, Randy Wing proposed acceptance of the SBEA's membership agreement. Terry Gattis seconded. The vote passed unanimously.

Further discussion of the draft plan for moving to the lake was lead by Randy Wing. (I have uploaded it to the BEARS Yahoo group) The plan is composed of three steering committees to build detailed plans. The committees are:

a. Tower Committee - Randy Wing, Jim Enix

b. RV Committee - Harvey Jones, Terry Gattis, Jimmy Williams, Steve Heyroth, James Whitfield

c. Non-Profit Committee - Nick Farlow, Charles Rasico

I have asked the first person in each list above to kickoff the committees and get a few members to help plan their subplans and coordinate them with the other committees. If the

committees are urged to have a vote for the formal leader. I have added the people who volunteered at the meeting to join a committee. If you'd like to be a member of one of the committees, the committee leader pro-tem's email address is in the "to" part of this email message or on the BEARS Yahoo group. Important note: The committees are not responsible for all the work - just the planning. Everyone will be encouraged to volunteer for the work parties.

2.. BEARS Field Day

Field Day is slated for 23-24 June 2007. You are invited to join us anytime on Friday, June 22, 2007 (but no earlier than 11 AM) for early setup, testing out of the computer network, tent setup, antenna and radio trials, and the jam session (bring instruments). We are going to encourage people to bring your own food and beverages for the weekend - The club will provide a meal on Saturday night (23rd) at 6 PM. Randy Wing will coordinate with the Station Captains to ensure adequate planning for Field Day - The Station Captains (email addresses in the "to:" part of the email) are:

1.. 10m Steve Canfield
2.. 15m / 160m James Whitfield
3.. 20m George Pinick
4.. 20m Digital Harvey Jones
5.. 40m Jim Kernan
6.. 40m Digital Dennis Gaskill
7.. 80m Jim Enix
8.. GOTA Charles Rasico
9.. Safety Officer Terry Gattis

Jim Williams ultra quiet generator will power the radios in the air conditioned pavilion (GOTA, 10m, 40m Digital, 20m Digital). The clubs Honda generator (pretty quiet) will power the other stations. If you are coming to field day, please send an email with station preference to Randy Wing at N0LD@... and to the station captain whom you'd like to help setup. Affiliating yourself with a station does not prevent you from operating at another station - it is just there to help ensure that we man the setup, operation, and teardown of the station effectively. Discuss your operating plans with each captain.

Something we plan to do this year a little differently than last year is to send our "extra" GOTA members around to each of the other stations to get some "elmering" from those experienced operators. This plan was developed after we did a lessons-learned discussion last August and we learned that we didn't talk nearly enough to them.

3.. SKYWARN Discussion

Randy Wing noted the recent SKYWARN membership drives and the volunteer work that is being done to establish a thriving SKYWARN group. 5 members of the club are active in that organization. If you are interested in participating, contact Randy Wing or Jim Enix. More information at: http://tech.groups.yahoo.com/group/SKYWARNICTNWSServedArea/.

4.. BEARS New Email List

A number of email list cleanup activities are underway to reduce time spent maintaining email lists and improving member services. Specifically, Randy Wing is sending invitations to every club member to join the BEARS Yahoo Group. Members are encouraged to signup home email addresses and work email addresses as required. As membership in that group

increases, Randy will remove you from the old manually maintained email lists. For more information: http://groups.yahoo.com/group/BoeingRadioClub.

5.. Boeing Family Day

This year Boeing Family Day is slated for 16 June 2007 - the same day as the Radio Shack Sidewalk Sale in Derby. If anyone can volunteer - for all or part of the day - please contact Randy.

6.. Discussion of the recent Joplin QRP Hamfest

Dennis Gaskill discussed the recent Joplin QRP Hamfest. Highlights included an audio CW QSO contest, inexpensive QRP kits, international visitors, Surface Mount Devices (SMD) and how to properly seat them on a board, and more.

7.. Award of Door Prize

Dennis Gaskill, KC0IFQ, won the Door prize - a LARGE TYPE Repeater Directory.. J

Meeting adjourned about 6:20 PM. Several members stayed later to chat.

Randy Wing, N0LD

BEARS Wichita, KS Trustee

# 93. Tuesday's Net

Yahoo group: BEARSAmateurRadioClub
Date: 2007-05-17 11:54:56 UTC
From: Harvey Jones
Topic: 93  Message: 93

The BEARS club had their radio net last Tuesday Night. Check ins included:

AC0EG - Harvey Jones (VP), Net Control
KB0YHT - Nick Farlow (Club Secretary)
KC0QIE - Jim Enix (Treasurer)
N0LD - Randy Wing (Trustee)
KC0IFQ - Dennis Gaskel
KB0YWM - Dexter Schnebly

Dennis noted that 6 meters was open, which could be the reason for the low attendance at the Net tonight.

This was a quick net check-in, no announcements this week.

Come and join us on the net each week. They are quick and a good time to say hello.

73's

Harvey Jones

BEARS members,

We have received request to set up a diplay at family day this year west of the lake. It might be a good thing to show our support of Boeing Wichita as the BEARS.

I need to have some idea of who is willing to help out June 16 at Boeing.

We will need people to help set up and take down the antenna, equipment and answer questions.

I do not expect you to spend the whole time there since the Radio Shack sidewalk sale is also this weekend. If you can stop by on your way to or from the sidewalk sale for a short time it would be greatly appreciated.

Thank you in advance!
Please e-mail Randy Wing if you can help out. n0ld@...

I believe it is more about us looking for new members than about supporting Boeing-Wichita.

I understand the thought, though. I have thought about it a lot. They also have been giving us money for almost 30 years. Sometimes LARGE amounts. So it is tough for me to forget the decades they HAVE supported us.

From: Dennis Gaskill
Topic: 108  Message: 108

Steve has poured the footing for a tower at his house.
He needs the help of 3 or 4 good men to help position the
tower plate on the bolts in the footing.
It shouldn't take long to do. It's just with a little help, it will
make the job easy. We can follow Steve home after the meeting.
Of course when I put my tower up I won't expect any payback..... much.
Let Steve know if you can help. Observers welcome.

The June Monthly meeeting of the BEARS will be on Thursday, June 7, 2007
at 5:00 PM in room E203 of the 4501 building. We will be handing out
the ordered Field Day T-shirts and going over Field Day planning.

BEARS Field Day - Tentative Agenda

Friday 22 June 2007

11:00 AM Start Setup - SBEA Lake - 4226 S. Gold (2 blocks south of MacArthur between Broadway and Seneca)

1:00 PM First Radio Station Setup begins

5:00 PM Pizza run by one volunteer

6:00 PM Get On The Air (GOTA) Familiarization

7:00 PM Logging demonstration rehearsal

8:00 PM Testing of PC Logging at all Stations

8:00 PM Tele-printer transcript of Field Day message

10:00 PM Sleepover - If you wish

Saturday 23 June 2007

8:00 AM Informal Breakfast

10:00 AM All-Participants-in-Field Day Meeting <- all FD attendees please be present

Noon - All BEARS FD Station Net

1:00 PM Field Day Operation Begins

4:00 PM Field Day Demonstrations

5:00 PM Supper

Sunday 24 June 2007

8:00 AM Breakfast - provided by the Boy Scouts

10:00 AM Field Day Demonstrations

1:00 PM FD Operation Stops <- all FD attendees asked to help cleanup

2:00 PM FD Clean Up Complete

Boy Scout Troop 736 would like the opportunity to thank the BEARS club for all their JOTA help by providing a Breakfast on 24 June. They will serve the typical Scout Breakfast, Pancakes and Mountain Man Casseroles.

Steve Heyroth, Thank everyone for me Please. It was awkward but we managed to move it and walk it into place. The bolts lined up with gentle persuasion.

# 113. Introduction in order...

Yahoo group: BEARSAmateurRadioClub
Date: 2007-06-08 16:43:15 UTC
From: .--/---../.-../--
Topic: 113  Message: 113

Guys and Gals-

At yesterday's BEARS meeting, it was going long, so I kept my mouth shut. I attended a meeting in January maybe I think I joined then. I'm not sure and flipping someone $10 I would not have memory of. So let me know if I'm official, and if not, who gets my $10- I'm only paying one person this time. Secondly, if I joined, I need to sign up my son, N8NCC, however he's in West Virginia visiting relatives. N8NCC lives with me and is a Junior at Derby High School.

Well, who the hell is W8LM? Quickest way to answer that is to go to QRZ.com and look up W8LM. Same goes for N8NCC.

Field Days- it just isn't going to be the same. I come from the "big guns" Last 2-3 years PCARC (Portsmouth, New Hampshire) K1R placed in the top 5 ALL CLASSES... not bad for a 5A club and located in a far corner of the USA. When I was in Detroit, USECA group 17A would roast 2 pigs, mess hall was a 40ft tent and made the front page of the DETROIT NEWS because they had a Field Day Wedding, 2 hams got married (M&F by the way). The operator sign in would be over 350 licensed operators. The 10 meter station parachuted into the Field day circle and only used what they landed with for the entire weekend, even water. When I operated W2AE (American Eagle) RAGS (Radio Amateurs of Greater Syracuse) FD. I worked 24 states and 4 countries on 6 meters. I did better than the 20 meter station that year.

Now for the real purpose of this post:

Relatives (WB2KAO & WA2DKC) have sold me their old camper. It's a 1992 Travelcraft on a Ford E350 chassis. The purchase included a KENWOOD TS-570D (HF) and TM-V7 (VHF/UHF) radios. They are mounted on the co-pilot side of the dash. The antenna is a 8 foot whip and SGC autotuner.
I drove this rig back from Rochester, NY Memorial Day weekend 1634 miles. I am in the process of restoring the 14 yo camper and wish to bring it to BEARS FD.

Now I do not expect to offer it to the club, or step on toes. As I am not about to disrupt the great plans that seeming have been made. Rather inform members that it should be there along with myself and some people I've invited. My plans are to "kind of" participate in FD. Perhaps call it a R&R station (w/ adult beverages if permitted). I may party more than participate. I can CQFD at 2-4am.

What I can offer to the group, IF YOU'D LIKE TO SEE IT- is my 15 Meter 4 square...it has a whopping 30 db F/B and is easily built. Perhaps 6-10-15 meters can be used when the 160 meter station is nill.

I am NOT asking to change your 7A class, but I'll have a rig or two there. Perhaps a demonstration of a QRP backpack as I have a FT-817 and some cute iambic paddles.

I plan on bringing this to the BEARS field day.

I also have some video and such about my old group Port City Amateur Radio Club if you ever need a program.

So- what say? (Black balled all ready?)

Larry W8LM

# 114. FW: Boeing 787 Rollout Special Event

Yahoo group: BEARSAmateurRadioClub
Date: 2007-06-08 18:30:38 UTC
From: Wing, Randy
Topic: 114  Message: 114

From: McLauchlin, Mark A
Sent: Thursday, June 07, 2007 5:09 PM
To: Barrett, Steven W; Blaho, Neil R; Violette, Daniel R; Propper, S D; Shults, Duane; McLauchlin, Mark A; Minear, Daniel J; Mitchell, Ed; Steve Canfield (BEARS Wichita KC0AHN); Swann, Roger C; Van Dusen, Scott S; Wells, Thomas E; Wing, Randy; Winslow, Brian A
Subject: Boeing 787 Rollout Special Event
Importance: High

All,

The rollout ceremony for Boeing's newest commercial jet, the 787, will be on July 8, 2007. To commemorate the event, The Boeing Employees Amateur Radio Operators North Society (BEARONS), will have a special event station on the air that day. We will be using our club call, W7FLY, for the event. Details as we know them today can be found at the following link:

http://mysite.verizon.net/evernhamms91/specialevent.htm

We would like to know if any of the other Boeing amateur radio clubs are interested in operating the special event with us? The ideal situation would be to have ALL of the Boeing clubs on the air simultaneously (each using their own callsign), much like what was done for the Boeing - McDonnell Douglas merger special event. The formal announcement for the special event will appear in the upcoming edition of QST and is already listed on the ARRL website, as well as on E-Ham. We plan on placing an additional announcement on QRZ as the date draws nearer. We're on a short fuse here especially since Field Day is upcoming so if you're interested in participating along with us drop me a reply e-mail as soon as possible so that we can iron out the additional specific details.

A certificate listing all of the participating stations will be used as the event QSL. We will probably use one of the official Boeing PR photos of the rollout as the basis for the certificate.

Our e-mail distribution list has a couple of Boeing amateur clubs M.I.A - does anyone have contact info for the clubs in Tulsa (KD5TFS), or Mesa (call unknown)?? The trustee of record for Tulsa, Robert Busch AD5JL, is not listed in BLUES. Are there any other Boeing amateur clubs that we've missed?

You're definitely not blackballed. There will be lots of "spare" and "extra" rigs at FD and, when some of our scheduled ops don't interfere (eating, sleeping, etc) it will be great to have you operate and demo. I'm interested in seeing the mobile installation, and maybe the antenna and/or the QRP backpack could be a club program sometime. I've been woefully remiss in providing interesting program material (hoping I'd get impeached?). I'll check the membership roster and see if we got you and your son registered--if not, I'll reply by e-mail. Look forward to your participation and your enthusiasm.

73,

Steve

As Field Day approaches, because of the rain and occupational duties, I have not made any progress on my camper or antennas and such. I was out of town 3 days last week.

I have invited a few people to FD as I would like to take the camper, hang out- I did get the fridge working over the weekend along with repairing the electricity both AC and DC. Look like it was a lightening hit- blew Aux power change over relay.

I am on call this weekend and therefore, I could be called out to KC,MO or OK,OK and we contract with 2-4 hour responses. I get a call, I have to move at the drop of a hat.

I hesitate to make any commitments as If I'm there and can help out, fine, but to predict what my weekend will be like is impossible.

I may come and go all weekend- I have extended a number of invites to non-hams.

I would especially like to a least attend the Boy Scout breakfast.

Sorry I could not be more definite. I show and there is nothing to eat, I'll survive.

Next year when I'm better settled I'll participate more.

Topic: 126  Message: 126

I am happy to report that Field Day preparations are nearly complete! We are on track to begin Field Day setup on Friday - if you can join us early afternoon on Friday or anytime on Friday.... please do so at the SBEA Lake.

BEARS Field Day is located at the SBEA Lake ☐ 4226 S. Gold (2 blocks south of MacArthur between Broadway and Seneca). Carefully copy this full link into a browser if you need a map to the site...

http://www.mapquest.com/maps/map.adp?address=4226%20S%20Gold%20St&city=Wichita&state=KS&zipcode=67217%2d3626&country=US&title=%3cb%20class%3d%22fn%20org%22%3e4226%20S%20Gold%20St%3c%2fb%3e%3cbr%20%2f%3e%20%3cspan%20style%3d%22display%3ainline%3bmargin%2dbottom%3a0px%3b%22%20class%3d%22locality%22%3eWichita%3c%2fspan%3e%2c%20%3cspan%20style%3d%22display%3ainline%3bmargin%2dbottom%3a0px%3b%22%20class%3d%22region%22%3eKS%3c%2fspan%3e%20%3cspan%20style%3d%22display%3ainline%3bmargin%2dbottom%3a0px%3b%22%20class%3d%22postal%2dcode%22%3e67217%2d3626%3c%2fspan%3e%2c%20%20%3cspan%20style%3d%22display%3ainline%3bmargin%2dbottom%3a0px%3b%22%20class%3d%22country%2dname%22%3eUS%3c%2fspan%3e%3c%2fspan%3e&cid=lfmaplink2&name=&dtype=s

One thing good about having field day in Wichita - we can come and go a little bit - to sleep in our own beds if you don't like to rough it.

In a previous email I posted the Field Day schedule. I will post it again at the bottom of this email... The bottom line - please attend! as frequently and as much as you can. Bring an interested friend. Spark some interest in one of our most favorite of pasttimes...

BEARS Field Day - Agenda

Friday 22 June 2007

11:00 AM Randy Arrives - begin tent setup with
Ben and Samantha's friends -
if you need help with your tent
at any time you arrive - say so!

1:00 PM First Radio Station Setup begins

5:00 PM Pizza run by one volunteer

6:00 PM Get On The Air (GOTA) Familiarization

7:00 PM Logging demonstration rehearsal

8:00 PM Testing of PC Logging at all Stations

8:00 PM Tele-printer transcript of Field Day message
(Harvey, please double check the time...)

10:00 PM Sleepover - If you wish

Saturday 23 June 2007

8:00 AM Informal Breakfast

10:00 AM All-Participants-in-Field Day Meeting <- all FD attendees
please be present if possible by this time

Noon ☐ All BEARS FD Station Net

1:00 PM Field Day Operation Begins

4:00 PM Field Day Demonstrations

5:00 PM Supper

Sunday 24 June 2007

8:00 AM Breakfast ☐ provided by the Boy Scouts
Pancakes & Mountain Man Casseroles

10:00 AM Field Day Demonstrations

1:00 PM FD Operation Stops <☐ all FD attendees asked to help cleanup

2:00 PM FD Clean Up Complete

Larry Macionski W8LM YES YES

Guests (1-2) YES YES

I will be there off and On. I am on-call for the company this weekend-
so this could change at the drop of a hat.
I am most likely to operate 2AM to Sunrise Sunday Morning. Then stay
for Boy Scout breakfast, then head home for shuteye, if I pull an all
nighter. I joined the employee association today.

I am bringing my "new" 1992 camper I got from WB2KAO and WA2DKC,and am
refurbishing. It is a work in progress, but has HF -and VHF/UHF on board.

If I can park close or in the FD area, AC would be nice via an
extension cord. The rigs are on the coach battery, but the camper
needs AC for AC....

# 135. Whether To Invest In A BEARS Club Station

Yahoo group: BEARSAmateurRadioClub
Date: 2007-06-27 13:28:27 UTC
From: Wing, Randy
Topic: 135  Message: 135

To: BEARS Membership
Jun 27, 2007
From: Steve Heyroth
Subject: Whether To Invest In A Club Station

First let me express my pleasure with our club's participation in last weekend's ARRL Field Day. We had a great membership turnout, a wide and interesting variety of antennas, equipment and operating modes, several guests, good food and lots of fun. My thanks to Randy, N0LD, and everyone else who planned, organized, and participated. After Field Day I feel more strongly than ever that committing our funds, time and effort to a permanent operating location (at the SBEA Lake or anywhere else) may not be the best thing for our club to do, and that is the subject of this letter.

Subsequent to the Spirit divestiture and the determination that we needed to vacate our club station on Spirit property, we studied numerous options for a new club location. The option that emerged as the best choice was the use of a member-donated Recreational Vehicle (RV) which would be placed in a permanent location at the Spirit-Boeing Employees Association (SBEA) Lake. We participated in numerous meetings with the SBEA board, and negotiated a preliminary agreement that defines our privileges and responsibilities in this new location. Our club would be responsible for installing the RV, installing our antennas, purchasing insurance and paying for power as well as for routine maintenance and repairs.

The likely loss of company funding for recreational clubs, as well as the consideration of the commitment of time and effort to this installation and maintenance, caused several of the club officers to begin to wonder if this was the best way to go. At least one alternative to a permanent location would be investing in deployability - purchasing protective deployable cases for our radio equipment, designing deployable antennas, perhaps developing a deployable repeater, and other related activities. In my opinion, this kind of investment fits our club's "personality" - we enjoy Field Day, remote operations such as Boy Scout JOTA and the Argonia Rocket Launch, and we offer emergency communications support - better than a permanent operating location which, although it was conveniently located and wonderfully equipped, was seldom used by more than a handful of members.

We have several thousand dollars in the bank which, conservatively managed, could last a long time and equip a portable/deployable capability for many bands and modes. The initial investment in the permanent location would deplete our funds significantly, and the annual operating expenses (power and insurance) would exceed annual dues

income, so we'd eventually face a difficult financial decision.

So, before proceeding with establishing a club station at the SBEA Lake, I'd like to invite some comment from the membership. I urge you to reply to me and/or any of the officers stating your recommendation on the permanent operating location at the SBEA Lake. Please make your replies no later than July 16, 2007. The officers want to do what the membership wants - please communicate with us and make your opinion known.

Subject: Whether To Invest In A Club Station

Being a "new" member and having traveled about the USA for 40 or so years. I have had a chance to join and participate in a number of clubs.

W8FT the Findlay, Ohio group was bequeathed a chicken farm. They turned it into a club house and since it is next to Interstate 75 the revenue they receive from the 2 lighted billboards, (and antenna ends) pays the upkeep. They have 3 towers on the 5 acre property and the 180ft tower is home to their repeater and a couple of commercial machines.

W1WQM Port City Amateur Radio club "partnered" with the Pisquata Rod and Gun Club. The gun club needed funds and upkeep, they had a meeting hall as big as a 3 bedroom home, with an empty basement and 17 acres for the gun range. The antennas fly above the gun range and the basement has a 3 operator position ham shack and workshop.

The Shenandoah Valley ARC has a 2 bedroom home in Winchester, Va. with an 80 ft tower and 2 garages.

Other groups have decided to buy a van or a motor home and all of them find the same thing... Insurance is expensive or impossible to obtain. Why? because old Mort will take it out on Tuesday and wreck it. Mort will tell the cop he's been licensed for 66 years. A ham license is not a drivers license. Ham clubs don't check drivers licenses.

I know 2 clubs promoting "GO KITS"- However when you discuss the go kit with them, they will repeatedly state.... If a club has more than one "Go kit" they need to be identical. That way, when a guy leaves his home shack, he will be familiar with the go kit, no matter which one he gets. Again old Mort can't remember 5-6 different rigs.

The practical alternative and the reason for this post is to suggest that IF.....IF something beyond the "go kits" is discussed, my I suggest this:

A number of groups are purchasing enclosed cargo trailers. They add air conditioning, awnings and build in shelves and mount 1-2-3 radio operating locations. Today many hams have pickups and can tow a trailer. The insurance when in motion is of the tow vehicle. By outfitting a trailer, there is a radio room on wheels ready to go. Antennas and tower sections can be stored on the roof. It can be taken to Field Days or deployed in an emergency or for demonstrations. The trailers with the "beaver tail" rear door allows wheel chair access.

I am making this suggestion only in that I agree that a permanent location has many disadvantages. A communications trailer offers mobility, even if for instance, it sits at SBEA lake and is hooked to some dipoles in the trees. Then if needed, unscrew the coax and hook to the pickup.

I will further say, people who investigated this were talking $10,000 less the radio's. A 8x8x20ft all aluminum V nosed tandem axle beaver tail trailer with electric brakes is $7,000.

In my position, new to the club, new to the area, and I think everyone saw my new old camper at FD complete with radios. I've got more than what I need. So, it's your money and your decision. I agree that given options and todays climate a BEARS Club station, whatever it is, needs to be portable, suitcase or RV.

So my vote would be for anything but a fixed location. The day of a 101 pound AM transmitter is over. (Heathkit DX100) Portability is a forgone conclusion today. At the same time I would also insist for a quarter master to insure and maintain an equipment inventory. Too many clubs "loose things" simply because of officer and membership turnover.

It's your club, you decide. I'm only offering a suggestion.

73,

Larry W8LM

# 137. RE: [BoeingRadioClub] Re: Whether To Invest In A BEARS Club Station

From: Steffens, Kerry W
Topic: 135  Message: 137

I hate to admit that Larry has a good idea just because it wasn't mine I guess. :-)

I agree that what ever the club does, should be low maintenance and cost. The RACES van is almost perfect as an operation center but it is high up-keep. The more moveable parts and mechanical things, the more to go wrong. What Larry is talking about is what the State is using for their disaster teams. They were on display at the State Fair last year.

The WARC has two enclosed trailers. I think that they are used more to permanently store and move at a moments notice to a required site. The good and bad is that both are cramped for head room, but on the good side is that antennas can be stored on the roof without needing ladders to access them.

What would be neat to have a trailer to keep and carry supplies and also a taller one to set up just as a command center with a front or aft mounted generator. The event would determine whether one or both would be needed. The command center could be pulled to an event put up the antenna and start operating in a short while. This is more what we do. For other exceptions, we could pull the extra trailer and have the whole enchilada.

I would ask permission for a parking site and possibly a permanent tower. Preferably a self-supporting tower that requires no guy wires. Put in power and pay per day or just run our generators to exercise them. A repeater is just a plus, but not necessary for our survival.

We honestly did not use our shack. We would be more likely to use a trailer at the lake. That is my approach. Thanks Larry for the idea.

Kerry

From: Sam Patton
Topic: 135  Message: 138

Here is my 2 cents on this.

I have been considering for some time a mobile trailer with antennas attached for quick set up and teardown.

I have seen a couple of these on line and went looking again after reading this thread but cannot find them quickly tonight.

I like the Idea of a trailer based unit. For the Ham shack. I think we need to look at how we could transport and set up the antennas too.

Now for the suggestion that may not be real popular.

I would not be adverse to entertaining a dues increase inorder to make this all happen.

I know that my overall participation has not been as much as some of you but I think we need to continue this club.

The big thing I am concerned about is what and where do we set up our repeater.

Sam

The practical alternative and the reason for this post is to suggest that IF.....IF something beyond the "go kits" is discussed, my I suggest this:

A number of groups are purchasing enclosed cargo trailers. They add air conditioning, awnings and build in shelves and mount 1-2-3 radio operating locations. Today many hams have pickups and can tow a trailer. The insurance when in motion is of the tow vehicle. By outfitting a trailer, there is a radio room on wheels ready to go. Antennas and tower sections can be stored on the roof. It can be taken to Field Days or deployed in an emergency or for demonstrations. The trailers with the "beaver tail" rear door allows wheel chair access.

I am making this suggestion only in that I agree that a permanent location has many disadvantages. A communications trailer offers mobility, even if for instance, it sits at SBEA lake and is hooked to some dipoles in the trees. Then if needed, unscrew the coax and hook to the pickup.

I will further say, people who investigated this were talking $10,000 less the radio's. A 8x8x20ft all aluminum V nosed tandem axle beaver tail trailer with electric brakes is $7,000.

In my position, new to the club, new to the area, and I think everyone saw my new old camper at FD complete with radios. I've got more than what I need. So, it's your money and your decision. I agree that given options and todays climate a BEARS Club station, whatever it is, needs to be portable, suitcase or RV.

So my vote would be for anything but a fixed location. The day of a 101 pound AM transmitter is over. (Heathkit DX100) Portability is a forgone conclusion today. At the same time I would also insist for a quarter master to insure and maintain an equipment inventory. Too many clubs "loose things" simply because of officer and membership turnover.

It's your club, you decide. I'm only offering a suggestion.

73,

Larry W8LM

# 139. Re: [BoeingRadioClub] Whether To Invest In A BEARS Club Station

Yahoo group: BEARSAmateurRadioClub

I would like to add some thoughts to the discussion of go kits and / or a trailer.

On any option, please think through to the problem of "where ya' gonna' put it?" There will need to be space for either trailer, or go kits, that would provide security and accessibility. Either way the club will need to decide what we can keep and what we must give up.

Go kits certainly have their merits. They could be organized various ways, perhaps as complete stations for each of the club transceivers: transceiver, power supply, tuner, feedline, antenna, supports, and accessories. An alternate might be separate kits so that a transceiver can be matched to a specific antenna: HF vertical, HF multi-band dipole, VHF antennas -- match those to a tranceiver plus power supply module and accessories ( key, headphones, logbook, light and fan ) -- feedlines and tuners might be in separate modules, or included as part of the tranceiver modules. Things like computers for digital modes, generators, and antenna masts probably fit better into their own catagory. Add on modules, like extra feedline, would be needed for situations where the "basic" kit won't be enough. All of this will require organization, and the discipline to maintain the equipment in not only working order, but in standard configuration. Chaos will rule if each time the equipment is used, it comes back with the various parts in different modules, the antenna ropes cut to different lengths, or as always happens, parts missing. ( Perfect example is the tent stakes for the screen tents. A few years ago, when I went through the tents to see which were serviceable, none had the correct number of stakes, so one, which also had a broken zipper, was canabalized to outfit the others. We were still short some, but they were much more serviceable. The hardest part of that job was finding a readble set of instruction in order to know what they were supposed to have. And need I repeat the need for standard configuration? If we had six different types of tents, we would have had six unservicable tents rather than five serviceable ones and a quickly diminishing bag of spare parts. )

A trailer will focus the problems in to one package. In effect, by placing all of the eggs into one basket, instead of a set of go kits, we would have one big kit. There is plenty of room for decisions to be made. Is it to be sized for equipment storage and transportation or should it be large enough to have multiple operating stations inside? One suggestion that has been made was an aluminum utility trailer ( that was noted as having limited headroom ) with a rear ramp for wheel chair access. The estimated cost in the suggestion was about double the club's current resources, but not beyond the horse trading and money raising skills that I believe exist within the club. There would be additional costs to install equipment, but that, too, can be taken care of by the talents in the club, if there is enough interest in getting the job done.

Let me suggest some alternatives. It doesn't need to be a new trailer. My own two decade plus experience with a 14 foot long, double axle, six horse stock trailer, which was made of steel, says that the club's equipment weighs less, and takes up less room than the designed load. It has a further advantage in that it won't start kicking and fighting while you are driving a 70 miles per hour. Head room was never a problem, and the very rugged construction allowed us to add a hay rack over the top. By comparison, adding a tilt up,

crank up tower would be easy. At many "horse" activities, similar trailers came with fence panels hooked to the side to make a corral at the campsite. Surely, there would be no problem adding masts for additional antennas and equipment boxes for feedline and power cables. The floorboards of a stock trailer are typically 2 X 6 and can be readily replace if damaged or rotted. It also allows easy access with common power tools to route power and RF lines under the floor ( But be sure they are waterproof, and don't hang down to snag anything. ) The steel sides of a stock trailer can be cut and sealed, but it takes better tools. The "shell" will form a rugged weatherproof shape, but the insides will need fixing up. Insulation board and paneling can make a cozy and soundproofed facility for multiple operating stations. I strongly recommend air conditioning and a quiet generator that can handle the load.

In reality, I think we will not be able to choose between a set of go kits and a trailer. There will be times when the trailer would be too much, so we would need to designate one transceiver for smaller functions ( in essence a go kit that spends most of the time at one station in the trailer ). It is still going to stress the resources of the club, but probably not as much as trying to put up towers and a shack.

Subject: [BoeingRadioClub] Whether To Invest In A BEARS Club Station

To: BEARS Membership
Jun 27, 2007
From: Steve Heyroth
Subject: Whether To Invest In A Club Station

First let me express my pleasure with our club's participation in last weekend's ARRL Field Day. We had a great membership turnout, a wide and interesting variety of antennas, equipment and operating modes, several guests, good food and lots of fun. My thanks to Randy, N0LD, and everyone else who planned, organized, and participated. After Field Day I feel more strongly than ever that committing our funds, time and effort to a permanent operating location (at the SBEA Lake or anywhere else) may not be the best thing for our club to do, and that is the subject of this letter.

Subsequent to the Spirit divestiture and the determination that we needed to vacate our club station on Spirit property, we studied numerous options for a new club location. The option that emerged as the best choice was the use of a member-donated Recreational Vehicle (RV) which would be placed in a permanent location at the Spirit-Boeing Employees Association (SBEA) Lake. We participated in numerous meetings with the SBEA board, and negotiated a preliminary agreement that defines our privileges and responsibilities in this new location. Our club would be responsible for installing the RV, installing our antennas, purchasing insurance and paying for power as well as for routine maintenance and repairs.

The likely loss of company funding for recreational clubs, as well as the consideration of the commitment of time and effort to this installation and maintenance, caused several of the club officers to begin to wonder if this was the best way to go. At least one alternative to a permanent location would be investing in deployability - purchasing protective deployable cases for our radio equipment, designing deployable antennas, perhaps developing a deployable repeater, and other related activities. In my opinion, this kind of investment fits our club's "personality" - we enjoy Field Day, remote operations such as Boy Scout JOTA and the Argonia Rocket Launch, and we offer emergency communications support - better than a permanent operating location which, although it was conveniently located and wonderfully equipped, was seldom used by more than a handful of members.

We have several thousand dollars in the bank which, conservatively managed, could last a long time and equip a portable/deployable capability for many bands and modes. The initial investment in the permanent location would deplete our funds significantly, and the annual operating expenses (power and insurance) would exceed annual dues income, so we'd eventually face a difficult financial decision.

So, before proceeding with establishing a club station at the SBEA Lake, I'd like to invite some comment from the membership. I urge you to reply to me and/or any of the officers stating your recommendation on the permanent operating location at the SBEA Lake. Please make your replies no later than July 16, 2007. The officers want to do what the membership wants - please communicate with us and make your opinion known.

"Get the Message?"

I have been an amateur radio operator for many years, but I have never seen or heard anything like this beofre. it was a beautiful day, so i had my window open while sending Morse code to Alaska.

All of the sudden, a northern mockingbird landed on my window shelf and began mimicking the code coming out of my ham radio speaker. It was amazing. The bird came back to my window off and on for 3 months. I never got tired of hearing that mockingbird singing its song ... in Morse code.

I am not sure what sort of Ideas you think this might provide.

They seem to have too many trees to be able to get a decent signal out.

They had a campfire, so they probably didn't need the air conditioning like
we did.

I was very curious about the white PVC thingy between the two CW ops,
visible to the viewer's right of the yellow case on the CW operator's table.
It looked like it might be an acoustic CW filter.

Did it give you any ideas?

Good job on the Field Day Soapbox.

Randy <winger55552001@...> wrote: http://www.arrl.org/contests/soapbox/?con_id=133

The Field Day Soapbox entry is viewable at the ARRL contest web site? I apologize if I didn?t get a picture of you in there ? if you think I missed anything that should have been in here, I am quite amenable to adding it!

# 161. PITCAIRN ISLAND

Yahoo group: BEARSAmateurRadioClub
Date: 2007-07-24 02:45:25 UTC
From: Dennis Gaskill
Topic: 161  Message: 161

VP6TD Tom Dixon, a visting New Zealander, has been on 20m PSK-31 the last few nights after dark. 9:00pm local till 11:00pm or so. I worked him Saturday night at 11:00pm. He is on right now tonight (Monday) at 9:00pm.
He works Split +/- 500hz. So if your software supports more than one signal Just monitor his signal with one channel and then try calling him with another channel in the split window. Just don't try and work him simplex. Using Split spreads out the callers and everyone can hear Tom. He is normally at the top or bottom of the band. I set my radio on USB 14.070 Mhz the bottom of band. The top of the band is about 2KHz to 3KH up. I was running about 50 watts to the Butternut vertical.
For those who don't know about Pitcairn, It is the Island that the "Mutiny On the Bounty" crew settled.

The August Issue of "World Radio" had an article written by Lawrence N0UU who was island hopping on the National Geographic Endeavour. He would stop when the ship stopped and set up his radio.....anyway he mentioned meeting Tom VP6TC and Betty Christian . I get the impression that you get burnt out working the pileups every time you get on the air, so they are not as active. Lawrence worked about 338 OSO's in 338 minutes .... then he had to leave because of the ships schedule.

# 166. Planning for Fall Jamboree On The Air (JOTA)

Yahoo group: BEARSAmateurRadioClub
Date: 2007-07-26 02:13:53 UTC
From: Harvey Jones
Topic: 166  Message: 166

To all:

JOTA is where all the scouts of the world get on the radio and try to communicate. I have made arrangement for the BEARS to support the Boy Scouts of America Quivira Council for JOTA. JOTA is the third weekend of Oct this year and will be at Scout camp KANZA, which is a little south-west of Hutchinson. We are being added to the WEBELOs Woods event for Cub Scouts as one of the breakouts. We will have our run of the mess hall with both fields, north and south for antennas. This is a increase of antenna area and operating room from last yet. The organizers are expect up to 300 WEBELO Scouts Saturday and Sunday, so we will be seeing 30 to 40 boys each hour Saturday.

I need help!!!!!!

I am planning two dipole antennas, one vertical and 1 two meter antenna. I hope to have 2 to 3 radios at the event to handle the boys. I need two people per radio, with one operating the radio with the boys and one person keeping logs and providing QSL cards. The Scouts have a copy of the special JOTA cards from two years ago and are making copies for us. I can also use volunteers in Wichita, on 2M if distance isn't doing well.

Anyone interested?????

# 167. Bike Rides

Yahoo group: BEARSAmateurRadioClub
Date: 2007-07-26 02:28:13 UTC
From: Randy Friend
Topic: 167  Message: 167

Roger, N6ZOP, is organizing the ham radio support for two bike rides:

Aug 26 HeartSprings Bike Ride - 0700 to around 1400

Sept 8 and 9 MS-150 bike ride.
Starts in Derby and over nights in Winfield,
then back to Derby.

Both of these rides need people with mobile radios due to the terrain. Hand helds will have difficultly. If people want to team up with people with mobile radios, that would work, too. I have a spare mobile radio if someone would like to use it to support the cause.

Let me know which rides you could help out on and whether you need to team with someone or not.

# 171. Free motor driven Tower !!!

Yahoo group: BEARSAmateurRadioClub
Date: 2007-08-01 00:40:42 UTC
From: Randy
Topic: 171  Message: 171

Bill Purcell, N5QOJ, would like to offer a tower for free to a ham radio operator who is a BEARS member or a BEARS friend. If no one is interested he may offer it to a wider ham radio population. The tower is offered as-is. You can contact Bill at 316-944-8773.

Bill purchased the tower from a Bartlesville, OK ham who moved to Texas about 18 years ago. Bill was unable to put the tower up in Bartlesville - so it came with him when he moved to Wichita about 8 years ago. The tower has some surface rust - Bill feels the rust has not affected the tower unduly - but a good sanding and painting is in order. The tower has two 40 foot sections that telescope - offering a tower in the approximately 65+ foot range when fully extended. You will need a trailer capable of handling 2 40 foot sections to move it. The tower and the motor has been outside the full 18 years - the motor may need replacement - he has never run the motor.

The tilting base and guy wire has been stored inside and is without any rust.

Bill said that brand new the tower was worth well over $1500. He is not sure he has the original documentation - but he is looking for it.

Bill is located on the west side of Wichita, KS.

# 178. Steve Heyroth's son Rich Heyroth

Yahoo group: BEARSAmateurRadioClub
Date: 2007-08-08 12:16:52 UTC
From: Randy Friend
Topic: 178  Message: 178

Steve,

I have been in contact with many of the BEARS over the last few days and I wanted to assure you that we have been praying for Rich, yourself, and your family. I know that you may not read this until well after the events of this week play out. We didn't know for sure how to pass on to you that we care deeply - calling you seemed to be an unnecessary burden - so we are choosing this method for now.

If there is anything we can do to help, please ask.

Randy for the BEARS

P.S. I've included these links for the BEARS members / friends who may not have heard the news yet. I've placed them in reverse order from the time that they were posted.

Yahoo group: BEARSAmateurRadioClub
Date: 2007-08-09 12:05:22 UTC
From: Randy
Topic: 179  Message: 179

Dear BEARS Friends,

Please continue to keep the Heyroth family in your prayers. Not only did they lose Rich but Steve's father in Texas also passed away this week.

Steve Heyroth's father's service will be held in Texas on Saturday. A family-only service for Rich will be held at a church in Topeka on Monday and tentatively at 5 p.m. on Monday there will be a public service at a school gym in Topeka.

As I learn more I will pass it on.

Randy, N0LD

# 181. Visual and Radio Meteor Showers coming!

Yahoo group: BEARSAmateurRadioClub
Date: 2007-08-11 11:19:50 UTC
From: Randy
Topic: 181  Message: 181

http://www.space.com/searchforlife/070809_seti_aurigids.html

I added this link to our Links page - The Aurigid meteor shower has only happened a few times in our life time - and it is set to happen again on 1 September at about 6:00 AM to 7:00 AM.

A good way to practice seeing meteor showers is to see the best one of the year is to see the Perseid meteor shower this Sunday night after sunset... peaking at 2:00 AM. Around midnight it will begin to "really good"... Look east.

If you view either of these showers, please let us know... Meteor showers can be "viewed" virtually by turning your 2m and 6m beams to the east (generally) during these events and listening on the calling frequencies of 144.200 USB or 50.125 USB... You just might hear "pings" - if so - you have from a few seconds to a minute to use the ionization to make a contact...

If you want to do this - please talk to me more, I can provide further hints on how to do this. I've also added Calendar events to remind you of these events closer to the date.

Randy, N0LD

# 182. Perseid Meteor Shower, 8/12/2007, 10:00 pm

http://groups.yahoo.com/group/BoeingRadioClub/cal

Perseid Meteor Shower
Sunday August 12, 2007
10:00 pm - 4:00 am
(The next reminder for this event will be sent in 22 hours, 3 minutes.)
Location: Perseid meteor shower

Notes:
The Perseid meteor shower is historically one of the best meteor showers of the year. Look east at sunset. Significantly noticeable improvement in meteor viewing around 11:30 PM - peaking at 2:00 AM. Many visible meteors - predicted peaking at over 1 or 2 a minute. Meteors can also cause ionization that can allow 2m and 6m contacts in the 500 - 1000 mile range. If you view or listen to this event on your radio, please report your findings to the group!

Reminder from: BoeingRadioClub Yahoo! Group
http://groups.yahoo.com/group/BoeingRadioClub/cal

Rare Meteor Shower on September 1, 2007
Saturday September 1, 2007
5:00 am - 7:00 am
(The next reminder for this event will be sent in 1 day, 12 hours, 4 minutes.)

Notes:
The Aurigid meteor shower has only been seen three times in the past century. It is slated to be one of the best meteor showers of the year peaking at 100 meteors an hour. Look east starting at about 5 AM. The shower is supposed to be peak at 6:00 AM and be over by 7 AM. Because sunrise is going to conflict with this - we maybe be only able to see the beginning of the shwoer. But on the radio - it should still be affecting 2m and 6m propagation. Listen to 144.200 and 50.125 for pings and contacts. If you view or listen to this event on your radio, please report your findings to the group!

# 194. Scouts Jamboree On The Air - Need Radio Operations to help scouts

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-02 14:43:29 UTC
From: Harvey Jones
Topic: 194  Message: 194

To Bears;

Jamboree-on-the-air will be the third weekend of Oct this year ( all day on the 20th ).

I received this note from the organizers of this Year's Webelos Woods "This Woods is shaping up to be the biggest Webelos event the council has. Woods is being promoted in White Buffalo, High Plains, Santa Fe Trail , Mohawk, and Lakota districts. We will most likely exceed 300 youth for a one weekend event. Only Trappers and encampment can get higher numbers. "

The BEARS are supporting one of the stations the boys will be cycled through as part of the Webelos Woods activity. We were a big hit last year, and we were just a "time off" activity for the boys. The organizers received so much positive feedback that we are a major part of the activities. Just think, we will be exposing up to 300 Webelos age scouts to Amateur Radio on Jamboree On the Air.

I am planning 4 radios, one at each corner of the Dining Hall. I hope to get 2 multi-band dipoles and 2 multi-band verticals antennas up, but that will depend on the number of volunteers.

I will need help in running the stations for this event. The more the better. This will be out at Camp Kanza, which is just a little south west of Hutchinson. I will provide good detailed maps. I need volunteer names by 15 Sept to add our volunteers to the "Staff" list for T-Shirts. Yes, the organizers consider us stall. You can still volunteer after 15 Sept, shirts not needed.

Please send me a note if you wish to volunteer. This is a great way to spread the interest of Amateur Radio to a large group of boys.

# 202. September 2007 BEARS Minutes

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-07 14:19:44 UTC
From: Randy
Topic: 202  Message: 202

Here is a synopsis of the September BEARS meeting held last night at 5:00 PM in room E203 of the 4509 building on 47th street:

Harvey requested that anyone interested in helping at the Boy Scout Jamboree on the Air (JOTA) on 19th and 20th of October this year please let him know right away... There will be 300 boy scouts in attendance. The location is about 25 miles SW of Hutchinson. T-shirts will be provided to people who identify themselves right away to Harvey. There are openings for people who wish to help by:

1. Setting up - Friday, September 19th about 5:00 PM

2. Operators needed on location at the camp - at least 4 NEEDED Friday September 19th - overnight campout. 8 operators DESIRED. Bring camping gear - tent and sleeping bag.

3. Operators needed at home - to operate 2m FM from your home - to ensure we always have a radio contact - we need at least 2 people for Friday evening and all day Saturday - you can run a partial shift - just let Harvey know your hours.

4. Operators needed on location at the camp - In place NLT 7:30 AM - total of 8 operators strongly desired (total - including the ones in #2 above).

5. Tear down - I'm expecting that the operators will stay to tear down. But we will probably start (partially) down at 5 PM on Saturday, October 20th and finish tearing down about 8 PM. Some operators can leave a little early if they have to - please coordinate that with Harvey.

Harvey's email address is hg_jones@... (hg_jones at yahoo dot com).

We only have three operators at this time (Harvey, Randy, Dennis G). Please help!

---

Steve Heyroth reported that Nick Farlow and himself attended a Recreation meeting today that had some interesting information. To make a long story short - we may still get funded next year! Derek McLuckey noted that the Recreation department has some pretty fixed costs that are amortized across all Boeing sites - and that by our site not participating in the recreation clubs that the costs will still be assessed to our site anyway. So if that isn't going to change, he may re-instate funding for the recreation clubs. It will be incumbent on

us to verify club membership rules, etc. It is a little too early to say that this is over - but it does look brighter. Steve Heyroth asked all club members to let Derek work this - don't send Derek a bunch of emails inquiring status. If you feel you need to - request that it go through Steve. Randy Wing to talk to Sandy at the SBEA at let her know what is going on.

---

If you want to help out with the MS Run on Saturday, September 8/9th, please let Randy Wing know TODAY by noon.

---

Antenna take down is going to take place after work sometime in the next two weeks - if you want to help - NOW is the time to tell Randy so that he can prepare temporary badges with Spirit.

---

Steve Heyroth gave a presentation on APRSpoint and Microsoft "Streets and Trips". His demonstration was with a Kenwood handy-talky with a TNC hooked to his laptop and a gps receiver (came with Streets and Trips). If you have already have a laptop and an TNC-ready handy-talky then you are close to being ready to go mobile! He noted there are other ways to get GPS/APRS ready. He recommended going to: http://skynet.entz.net/webpages/shorty/kcaprs/ for more information.

---

Dennis Gaskill provided an excellent video on soldering SMCs... Pretty easy and cool. I believe he uploaded the site to the BEARS Yahoo group - so you can see it there if you missed it... you'll need broadband internet - dialup will be a "challenge".

Along with that video - there was a review of Ham Radio Deluxe. If your HF or FM based radio has a USB or Serial port - this is THE software to help you control your radio - especially if you have an FT-857, FT-100, ICOM 706, or a similar radio that has a lot of capability but a dearth of buttons, knobs, and dials... :) If you are interested in knowing more: http://hrd.ham-radio.ch/

---

Steve Heyroth also presented a hands on demo of a $22 case that might make a good radio carrying case. The manufacturer is CaseGard. If you are interested in helping Steve with his study for the club, please contact him.

---

We had 16 members attend the meeting - thanks! There is a VHF/UHF contest starting at 1:00 PM on Saturday and it goes through 10:00 PM on

Sunday. Get on the air and give some contacts to the local participating people! 144.200, 432.100, 50.125 USB are all good starting points for making contacts. Dave Powers, KA0KCI, will be roving.

Respectfully submitted,

Randy Wing, N0LD
BEARS Trustee

Subject: 19th Annual Enid Hamfest

Hey everybody I hope this Email reaches you well. It's time again to start gearing up for the annual hamfest event scheduled in only 58 days (as of 9-5-07)! A few announcements first,

1) The Enid Hamfest has installed a new Message / Forum board on the website, it can be reached just off the main page http://www.enidhamfest.com/ or you can go directly to it http://www.enidhamfest.com/bbs so I would ask that you please take a minute and register there and share with everyone. Also let your friends know about it. And when you register watch your SPAM or JUNK mailbox because the Forum will send you a message with instructions and I have been told that the messages have been ending up in some of the SPAM boxes. and that brings me to my second point.

2) Please forward this message to everyone and let them know about the Enid Hamfest like I said above messages are ending up in the SPAM and JUNK boxes and not getting read. This will help us get the word out.

If anyone has any questions, PLEASE feel free to email myself n5uby@... or Tom N5LWT enidhamfest@yahoo.com

Thanks again for your continuing and dedicated support of this event!

Thanks, Jeff Worth
n5uby@...

# 206. BEARS Work Day

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-11 20:10:26 UTC
From: Wing, Randy
Topic: 206  Message: 206

Thursday, September 13, 2007 is BEARS Antenna Tear Down Work Party Day

We are going to remove the HF tower (including the 6m beam and the Log Periodic and the Ameritron DX-LB Plus (long wire)).

We are going to work from roughly 3:10 PM through 7:00 PM. If you are interested in helping, YOU MUST send me an email on Wednesday to BoeingRadioClub@yahoogroups.com or to winger555520012@... and say so... I have to send a note to Spirit Security first thing Thursday morning.

Because Spirit security closes at 4:00 PM, I'd like to meet at 3:10 PM at Spirit Security to coordinate temporary passes. For this event, lets limit ourselves to Boeing and/or Spirit employees and/or retirees. If you cannot meet at security at 3:10 PM - you need to be there before 4:00 PM - after that it will be lucky if they let anyone in - because the Security Pass people go home at 4:00 PM.

I need (please tell me if you possess):

1. Someone with a 20 foot plus long trailer - to haul away antennas.
2. Someone with experience climbing a tower - I'd like a helper. I have a spare climbing belt, but if you have one, bring it.
3. A couple sets of tools - especially pliers, crescent wrench, 3/8, 7/16, 1/2, and 9/15 inch wrenches.
4. Rope (2) - each 100 ft long - for taking antennas off the roof of the building and to the ground.
5. Roof personnel - at least 3 (in addition to me and another climber)
6. Roof personnel - at least 2 more to rig antennas to be lowered to the ground.
7. Ground personnel - at least 2 to receive antennas on the ground.
8. Ground personnel - at least 2 to mark antennas BEFORE they are dismanteled, draw a diagram describing how the antennas go together, an putting the instructions and connectors (screws, bolts, etc.) in a coffee can. If someone has a camera - we can take a few pictures before during and after disassembly.
9. Need about a dozen coffee cans with lids.

Please REPLY ALL to anyone who wants to help. Let's get it done while the weather is beautiful!

I've read references on this for a week or so. I assume it is really microwave energy up in the natural ressonance/absorbance band of salt water, this would be inefficient to generate-probably would work on any water. I wonder was the energy balance to do this is? To get methanol from corn is a net energy loss after you add all the stuff you gotta do to get there, it really isn't a very viable energy source. I wonder if the energy from burning the free hydrogen is more than the energy to generate the required rf energy?

# 212. Re: BEARS Work Day

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-12 03:22:46 UTC
From: James Whitfield
Topic: 206  Message: 212

Randy and all:

I will join you for the take down. If it makes any difference to Spirit, I am now a Boeing retiree ( as of 1 September ) instead of a "former employee". I have no identification that will prove that is my current status.

On the list of things that you have asked for:

Camera. If you can co-ordinate the use of a camera on Spirit property, I can bring my Sony with two 1Gig memory sticks. It should be worth almost 800 5 Mpixel pictures ( it would take at least three CDs to hold all of them ). It has 12X zoom and I got quite a bit of recent experience with it on the trip to Yellowstone and back.

Tools: I will bundle a set of US&Metric wrenches and such.

Ropes: I have lots of 3/16 inch lines, which may need to be doubled to be used. I would hope someone else has better selection that what I have. I will plan on bringing them so we will have plenty of the lighter lines to use as guide lines to control twisting and swaying of the equipment as it is brought down.

Coffee Cans: I will talley what I have and bring them. ( Mary will probably cheer that I am getting them out of the shop! )

I would rather work at ground level, but I can work on the roof.

Here are some suggestions for your consideration:

Work gloves
Step Ladder or extension ladder.
Block and tackle
"Come-along"
Tape to mark and label parts
Permanent Markers to write on tape and / or metal parts
Also make labels that can be photographed to explain what is being photographed ( parts as well as proceedures )
Paper to make notes, sketches, and labels
Boxes to hold the coffee cans
plastic bags -- snack and sandwich size with zipper seal

Be sure everyone brings hats, sunglasses, sun screen, and water.

I am sure there are other ideas to consider.

See Y'all there.

James

# 213. Re: Using RF to burn sea water - possible new fuel?

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-12 12:49:43 UTC
From: .--/---../.-../--
Topic: 207  Message: 213

I read this with interest. I'm assuming that the best possible
frequency that is most productive for the generation of hydrogen will
be in the amateur band. Once Ford and GM build those cars, the band
will be useless for amateur radio and the FCC will ignore the rights
of hams and as usual side with the $$$$ claiming it's a part 15
unintentional radiator.

40 years ago in high school chemistry we used electricity to separate
oxygen from hydrogen in water...we used a touch of salt to improve
conduction and speed the process. So exactly what is new???
Is he irradiating the salt water, or impregnating the rf emmiter
within the solution?
I recall my instructor stating we had to use DC as hydrogen would
accumulate at one electrode and oxygen at the other...the use of AC
would intermix the gases. Further, because it is RF the oxygen and
hydrogen is mixed- but is that at the proper ratio for maximum
combustion, and probably most determental, an unburned residue would
be the salt crystals themselves- so the combustion chamber would need
cleaning of the residue salt..
No problem if you were driving the car to the drive-in for french fries..

I believe the innovation to look at that is most viable for appearing
in your automobile. is the Scuderi Engine..

http://www.scuderigroup.com/

Their claims are that they can double HP or fuel economy. It works
with any fuel...

That means my 3/4 GMC pickup would be getting 44-48 MPG..

James,

Thank you, bring the camera - I have asked for clearance. If we don't get it - we won't use it.

Thank you for bringing tools.

Thank you for the ropes - we might not need all of them - but we WILL use some of them.

Thank you for the coffee cans...

Ground level it is for you. I NEED someone down there - probably Kerry, too.

I appreciate your suggestions, I'll go to the store tonight.

Randy

3. A couple sets of tools - especially pliers, crescent wrench, 3/8, 7/16, 1/2, and 9/15 inch wrenches.
4. Rope (2) - each 100 ft long - for taking antennas off the roof of the building and to the ground.
5. Roof personnel - at least 3 (in addition to me and another climber)
6. Roof personnel - at least 2 more to rig antennas to be lowered to the ground.
7. Ground personnel - at least 2 to receive antennas on the ground.
8. Ground personnel - at least 2 to mark antennas BEFORE they are dismanteled, draw a diagram describing how the antennas go together, an putting the instructions and connectors (screws, bolts, etc.) in a coffee can. If someone has a camera - we can take a few pictures before during and after disassembly.
9. Need about a dozen coffee cans with lids.

Please REPLY ALL to anyone who wants to help. Let's get it done while the weather is beautiful!

Randy, can you have a Spirit employee with you? This is the only way I can get you a camera permit.

-----Original Message-----

To: Ornelas, Karen S (SN)
Subject: RE: Work Party on the BEARS Antennas

Karen,
We could issue a Temporary Permit to the Spirit person who will be escorting them. We can't give a permit to non-Spirit people. The escort would have to be with them while they have the camera on-site. Just have the escort stop by and see us. We'll have them fill out a form and issue them a permit.

Thanx!
Tc

Subject: Work Party on the BEARS Antennas

Karen,

1. As we discussed, these are the people that will require temporary passes for the Boeing Employees Amateur Radio Society (BEARS) workstation. We expect to come by at about 3:10 PM tomorrow to Spirit Security - would you be so kind as to be available at about that time to ease this process? I'll call you at 316-209-4467 if I have any problems.... Please note my cell phone number if you need to contact me: 316-371-2293.

James Enix
Nick Farlow
Dennis Gaskill
Kerry Steffens
James Whitfield (Boeing retiree)
Randy Wing

(Randy Wing has a Spirit Badge - but I'm not sure it works on some of the doors in the building NEXT to the BEARS radio room (access to a bathroom for the group). Could this be added to my badge?

2. We really need to have a camera to take pictures of the antennas as we take them apart. Any concern with us bringing a camera in to ONLY use it on our antennas and club equipment? (this will ease in putting them back together)

3. We will need to drive a truck and a 20 ft trailer behind the Spirit fence near the SE corner of the same building that Boeing Surplus was located in - just north of the nacelle building. We will be disassembling and packing several antennas and supplies that comprised our amateur radio facility. If there is anything we should bring with us to allow this to happen, please advise.

Thank you for your help!

# 221. BEARS WorkParty - Results!

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-16 04:01:42 UTC
From: Randy
Topic: 221  Message: 221

I would like to send a ton of thanks to the members who were able to come out and help take down the exterior antennas at the BEARS shack:

Jim Enix
Nick Farlow
Dennis Gaskill
Terry Gattis
Don Rice - the Spirit Frequency Allocation Manager
Kerry Steffens
James Whitfield
Randy Wing

All of the antennas and all of the towers are now down. There remains some cleanup in the shack(s). If you can help do this, it would be welcome. Don Rice has offered to help us out in these final cleanup activities. If you can help, please volunteer.

Thank you again to some pretty dedicated help. This was about 4 1/2 hours of hard work. Special thanks to Kerry Steffens for use of his large trailer.

Randy, N0LD

From: Harvey Jones
Topic: 194  Message: 223
Attachments: 1 described; binary payloads are missing from this source WARC

JOTA update:

I need a list of folks that want Webelos Woods staff shirts by the 18th of Sept. I have to turn the names and sizes in on 19 Sept.

I have the following folks that have expressed interest in becoming staff at the event:
George Pinick
Randy Wing
Harvey Jones
James Whitfield
Dennis Gaskill
Joseph Jones

There is a $10 cost to being a part of JOTA at KANZA to cover the food and shirt. Bring $10 to event.

I need at least 8 for the event. You don't need staff shirts to participate, so come even if you don't get a shirt. The more adults we have the more breaks we get. If you can only make part day, let me know so we can plan others to come in.

If you can't make KANZA, please tune into the 82 repeater during the 20th and join in. We will have at least one station dedicated to 2M. If HF is bad, we may try other Wichita repeaters, so tune to 82. Sam Patton will be tied in part of the day. Please send me your availability for 2M Scout contacts.

Where is Camp KANZA? Type the address below in your friendly mapping software. We will be in the Dining Hall (Smith Lodge). Let me know if you have problems. I have also attached a map of KANZA, and will put up on the BEARs Yahoo Group.

Kanza
10367 S. Sterling Rd
Abbyville, KS 67510

Event Outline:

-- Oct 19th about 5PM - Setup antennas and radios. We need as much help as we can get. Bring a tent if you wish to spend the night.

-- Oct 20th -- Activities start about 8:30AM so we need the operators on-site no later then 8:00PM. KANZA is about a 1 hour drive from west Wichita.

-- Oct 20th -- We will be seeing about 300 boys throughout the day, so all 4 stations will be busy. The day ends about 5:00PM when we will start tear-down. What we don't get down Sat we will finish Sunday.
JOBS: One operator per station to work with shy boys to talk on radio. Another operator to maintain records. We will have cards and logs to fill out.

I expect to use the Club KC0AHN call for this event.

SUMMARY:
1. Need confirms of names for setup Friday
2. Need confirms of names and shirt sizes for Saturday. Shirts will be ordered on 19 Sept, but you don't need a shirt to join in.
3. Need confirms of names for Wichita 2meter for Saturday

Much Thanks for all your help. The look of excitement on the Scouts faces make this all worthwhile.

To Bears;

Jamboree-on-the-air will be the third weekend of Oct this year ( all day on the 20th ).

I received this note from the organizers of this Year's Webelos Woods "This Woods is shaping up to be the biggest Webelos event the council has. Woods is being promoted in White Buffalo, High Plains, Santa Fe Trail , Mohawk, and Lakota districts. We will most likely exceed 300 youth for a one weekend event. Only Trappers and encampment can get higher numbers. "

The BEARS are supporting one of the stations the boys will be cycled through as part of the Webelos Woods activity. We were a big hit last year, and we were just a "time off" activity for the boys. The organizers received so much positive feedback that we are a major part of the activities. Just think, we will be exposing up to 300 Webelos age scouts to Amateur Radio on Jamboree On the Air.

I am planning 4 radios, one at each corner of the Dining Hall. I hope to get 2 multi-band dipoles and 2 multi-band verticals antennas up, but that will depend on the number of volunteers.

I will need help in running the stations for this event. The more the better. This will be out at Camp Kanza, which is just a little south west of Hutchinson. I will provide good detailed maps. I need volunteer names by 15 Sept to add our volunteers to the "Staff" list for T-Shirts. Yes, the organizers consider us stall. You can still volunteer after 15 Sept, shirts not needed.

Please send me a note if you wish to volunteer. This is a great way to spread the interest of Amateur Radio to a large group of boys.

Subject: [BoeingRadioClub] Scouts Jamboree On The Air - Need Radio Operations to help scouts

JOTA update:

I need a list of folks that want Webelos Woods staff shirts by the 18th of Sept. I have to turn the names and sizes in on 19 Sept.

I have the following folks that have expressed interest in becoming staff at the event:
George Pinick
Randy Wing
Harvey Jones
James Whitfield
Dennis Gaskill
Joseph Jones

There is a $10 cost to being a part of JOTA at KANZA to cover the food and shirt. Bring $10 to event.

I need at least 8 for the event. You don't need staff shirts to participate, so come even if you don't get a shirt. The more adults we have the more breaks we get. If you can only make part day, let me know so we can plan others to come in.

If you can't make KANZA, please tune into the 82 repeater during the 20th and join in. We will have at least one station dedicated to 2M. If HF is bad, we may try other Wichita repeaters, so tune to 82. Sam Patton will be tied in part of the day. Please send me your availability for 2M Scout contacts.

Where is Camp KANZA? Type the address below in your friendly mapping software. We will be in the Dining Hall (Smith Lodge). Let me know if you have problems. I have also attached a map of KANZA, and will put up on the BEARs Yahoo Group.

Kanza
10367 S. Sterling Rd
Abbyville, KS 67510

Event Outline:

-- Oct 19th about 5PM - Setup antennas and radios. We need as much help as we can get. Bring a tent if you wish to spend the night.

-- Oct 20th -- Activities start about 8:30AM so we need the operators on-site no later then 8:00PM. KANZA is about a 1 hour drive from west Wichita.

-- Oct 20th -- We will be seeing about 300 boys throughout the day, so all 4 stations will be busy. The day ends about 5:00PM when we will start tear-down. What we don't get down Sat we will finish Sunday.
JOBS: One operator per station to work with shy boys to talk on radio. Another operator to maintain records. We will have cards and logs to fill out.

I expect to use the Club KC0AHN call for this event.

SUMMARY:
1. Need confirms of names for setup Friday
2. Need confirms of names and shirt sizes for Saturday. Shirts will be ordered on 19 Sept, but you don't need a shirt to join in.
3. Need confirms of names for Wichita 2meter for Saturday

Much Thanks for all your help. The look of excitement on the Scouts faces make this all worthwhile.

Subject: Scouts Jamboree On The Air - Need Radio Operations to help scouts

To Bears;

Jamboree-on- the-air will be the third weekend of Oct this year ( all day on the 20th ).

I received this note from the organizers of this Year's Webelos Woods "This Woods is shaping up to be the biggest Webelos event the council has. Woods is being promoted in White Buffalo, High Plains, Santa Fe Trail , Mohawk, and Lakota districts. We will most likely exceed 300 youth for a one weekend event. Only Trappers and encampment can get higher numbers. "

The BEARS are supporting one of the stations the boys will be cycled through as part of the Webelos Woods activity. We were a big hit last year, and we were just a "time off" activity for the boys. The organizers received so much positive feedback that we are a major part of the activities. Just think, we will be exposing up to 300 Webelos age scouts to Amateur Radio on Jamboree On the Air.

I am planning 4 radios, one at each corner of the Dining Hall. I hope to get 2 multi-band dipoles and 2 multi-band verticals antennas up, but that will depend on the number of volunteers.

I will need help in running the stations for this event. The more the better. This will be out at Camp Kanza, which is just a little south west of Hutchinson. I will provide good detailed maps. I need volunteer names by 15 Sept to add our volunteers to the "Staff" list for T-Shirts. Yes, the organizers consider us stall. You can still volunteer after 15 Sept, shirts not needed.

Please send me a note if you wish to volunteer. This is a great way to spread the interest of Amateur Radio to a large group of boys.

Subject: [BoeingRadioClub] BEARS WorkParty - Results!

I would like to send a ton of thanks to the members who were able to come out and help take down the exterior antennas at the BEARS shack:

Jim Enix
Nick Farlow
Dennis Gaskill
Terry Gattis
Don Rice - the Spirit Frequency Allocation Manager
Kerry Steffens
James Whitfield
Randy Wing

All of the antennas and all of the towers are now down. There remains some cleanup in the shack(s). If you can help do this, it would be welcome. Don Rice has offered to help us out in these final cleanup activities. If you can help, please volunteer.

Thank you again to some pretty dedicated help. This was about 4 1/2 hours of hard work. Special thanks to Kerry Steffens for use of his large trailer.

Randy, N0LD

Hi Randy,

Perhaps you know hams who would like to respond

to requests from emergency services needing ham

radio ops and would help if they only knew.

As you know, during our last disaster I used the KAR

newsletter to put out a call for the Salvation Army for

radio operators. This worked well but we need more

Kansas hams on the KAR mailing to receive the CALL.

I need you to simply FWD this to hams you think would

answer a call for hams in an disaster. All they have to

do is subscribe to KAR by a email to >>> w0oyh@...

or you could send me their email address.

TU 4 UR help and the best of 73,

Orlan w0oyh - KAR ed

# 237. FW: BEARS shack cleanup

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-26 16:20:32 UTC
From: Wing, Randy
Topic: 237  Message: 237

BEARS members and Friends,

Don Rice (Spirit Frequency Allocation manager) has volunteered to escort us on Thursday, September 27th at 3:00 PM (probably just an hour or worse case two hours this time) so that we can get the coax and some of the remaining material from the shack. If someone has a vehicle or trailer that we can use it would be helpful to remove the coach and the chair (Kerry - what do you want us to do with them?).

I'll need names by COB today - I'll send a note to Don tomorrow morning with the request. I think we need about 6 people to make quick work of this - 2 on the roof, 2 on the ground, 2 in the shack. More people would reduce the time - this won't be a heavy lifting exercise.

Don,

Would you be able to escort us for another BEARS shack cleanup party? I think we could get all the non-heavy items taken care of - then we could work on the davenport and chair at another time?

Thursday? Friday?

If you could, we would set it up through security and list you as our focal. We could probably get by with two vehicles inside the lot this time. And a LOT less time. We'd pull the coax through the roof vents and take it with us.

Yahoo group: BEARSAmateurRadioClub
Date: 2007-09-28 00:59:54 UTC
From: Randy
Topic: 239  Message: 240

BEARS members and friends,

I want to publicly thank all six BEARS volunteers for the 3 - 5:30 PM shack teardown work today. Two pickup loads and a van load of BEARS equipment were removed. All coax has been removed and stored until we can determine what to do with it. Thank you to those of you who volunteered:

Jim Enix
Dennis Gaskill
Terry Gattis
Kerry Steffens

James Whitfield

Randy Wing

I want to THANK YOU strongly - you guys have really given a lot to the club with your past help at tower teardown and now the shack teardown. There is very little left in the shack of value. We did save all the membership records, several valuable manuals, many years of BEAR FACTS newsletters, and more. We removed all the magazines, books, furniture, etc from the downstairs rooms. The antenna and equipment storage room is left. If you want to help salvage material from that room there will be ONE more work session to remove that equipment. Hopefully in time for the October 6, 2007 hamfest.

I am going to recommend to the club officers that for the equipment that we deem "surplus" that all club members who helped teardown get first shot at purchasing the equipment, coax, antennas, etc.

# 242. BEARS meeting on Thursday, October 4th at 5:00 PM

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-01 17:25:35 UTC
From: Randy Friend
Topic: 242  Message: 242

For those of you interested in helping at Jamboree On The Air (JOTA) on 19-20 October 2007, please attend a coordination meeting at 4:30 PM at the same location.

BEARS monthly meeting 5:00 room E203 of 4501 Bldg. on 4 October 2007.

Randy, N0LD

# 243. Re: [BoeingRadioClub] BEARS meeting on Thursday, October 4th at 5:00 PM

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-01 17:46:13 UTC
From: Harvey Jones
Topic: 242  Message: 243

To all:

Looking for those attending at Camp Kanza for JOTA and those that will just tie in from home on 2Meter. I will have a 2M signup sheet to sign up for a time slot. We hope to keep 2 repeaters busy so I need lots of help.

Thanks

Harvey Jones

# 247. JOTA Planning Meeting - All Welcome

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-04 01:59:50 UTC
From: jones_hg
Topic: 247  Message: 247

To BEARS:

This years JOTA event will be having a planning meeting at 4:30 at the BEAR club meeting room, just 30 minutes before BEARS meeting. We need help in setup, teardown, mentors for scout operators and instructors, so come join the fun.

AGENDA:
- Station Setup Discussions
- Station review

Signups for 2M support to be part of the BEARS Meeting

Thanks

Harvey Jones

# 251. Net, Shack, AM note, Loyd Willisam did you receive this?

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-10 15:14:31 UTC
From: Wing, Randy
Topic: 251  Message: 251

BEARS members and friends,

Thank you for checking into the net last night - Steve Heyroth took net control because of my remote location (Douglass HS) - thanks! There were 11 or 12 checkins.

I am planning a 1 November 2007 Shack cleanup at 3 PM (Thursday afternoon) - it should just take a couple of hours - I would like everyone who is interested in the material in the storeroom to be there - instead of throwing away a ton of antenna building materials, we have decided to give it away. Anything not picked up during that day will be hauled to the dumpster. Goal: Anything we want removed; declaration of Shack closing, and a short memorial service. Please reply to the list if you can help that day - and we will work your clearances...

Randy, N0LD
BEARS Trustee

---

Bill Benton forwards the following link and notes:

http://www.amwindow.org/pix/htm/w4ebg.htm

Years ago I used to listen to this guy and another ham named Walt have AM QSOs on 75 meters. Walt(WB4AOE) was in hickory KY and Con(W4EBG) was in Paduccah,KY. It was widely assumed that they ran more power than the legal limit. Walt would often blow into the mike and say:"Hello test, Ah yes, 10000 volts at 1ampere." They were constantly being jammed and as the night drug on vulgar outbursts were common. Both men had their licenses pulled by the FCC.

Occasionally in QST you see Con and Walt tapes advertised for sale.

---

Loyd, did you receive this email?

# 256. Oct 20th is JOTA Weekend

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-14 17:52:04 UTC
From: Harvey Jones
Topic: 256  Message: 256

To all:

Remember us on 20 Oct. Many of the club members will be out at Camp Kanza helping WEBELOS get on the air. Others will be listening on the 82, and Newton and BEARS repeaters for our calls. Please join in. I have very few that have signed up and need more to step in. If you don't hear us on BEARS, it is because we are to far away and couldn't make the connection. Just tune to the .82 repeater to contact us. We will be using the club call, kc0ahn, for the event.

We could still use adults out at Kanza. I put a map up on the YAHOO sight. You are welcome to stop by anytime Saturday. We do start around 9:00 AM, but could use help anytime throughout the day to give us more breaks.

We will also be on the following frequencies throughout the day:

80M at 3.690 & 3.940 MHz
40M at 7.090 & 7.190 MHz
20M at 14.290 MHz
2M at 146.61 MHz
2M at 146.895 MHz
2M at 146.82 MHz

Thanks for all your support.

# 261. JOTA 2007 -- Wow!

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-21 19:39:22 UTC
From: Randy
Topic: 261  Message: 261

BEARS members and friends,

Thank you, Harvey, for organizing a world class JOTA event! Harvey and James put a lot of work into antenna and radio planning to ensure success for this event. Harvey treated it like a mini-field day - which I am sure you can imagine that with 4 stations it was bigger and more complex than an average field day station.

346 cub scouts went through the program which included 7 hour long training sessions. Each training session was lead off by James Whitfield, N5GUI, presenting information about JOTA's 50 year anniversary, how ham radio works, and what can be done with ham radio. Harvey Jones, AC0EG then broke the 50 person group up into 4-6 person groups and distributed them to one of the four stations. The four stations were manned by:

HF-1: Dennis Gaskill, KC0IFQ and two Scout Staff Helpers

HF-2: Jay Lies, KZ0P and George Pinnick, WA0GNC

VHF-1: Tom Carr, KG0BB and Ben Wing, KC0YJI

VHF-2: Randy Wing, N0LD and Samantha Wing, KC0MTM

The station setup began at 1:00 PM on Friday, October 19, 2007 with Harvey Jones and James Whitfield. They were joined by Randy Wing at 2:00 PM, Dennis Gaskill at 5:00 PM, and Samantha and Benjamin Wing at 5:30 PM. All antennas were up and tested by 7:00 PM.

Jay Lies, George Pinnick, and Tom Carr joined us in the morning at 8:30 AM. Samantha Wing left at 5:00 PM. The last training session ended at 6 PM. Everyone helped strike the masts and antennas - they were all on the ground and loaded into vehicles by 7:00 PM. We finished loading all the radios, training supplies, and our sore bodies into the cars about 8:35 PM.

We had four stations/antennas:

HF-1: ICOM 706 feeding a 20m half square at 30 ft. both owned and built by Dennis Gaskill

HF-2: Ten-Tec Omni-D owned by George Pinnick and the BEARS DX-LB Plus at 30 ft.

VHF-1: Yaesu FT-857 owned by Harvey Jones feeding a 2m Ringo Ranger at 30 ft. owned by James Whitfield

VHF-2: Yaesu FT-100 feeding a 4 element 2m vertical beam at 30 ft. both owned by Randy Wing

Sam Patton joined us on the 146.940 repeater for a training session in the afternoon from Wichita!

Harvey will add many details, but I wanted to give you an idea of the event - this was an aggressive undertaking that was well received and went very very well.

Randy Wing, N0LD

Nancy,

It was clear that Denys really enjoyed the club! He attended many club meetings, Field Days, and social events as he could. He always had something positive to contribute to the BEARS.

I remember last years Field Day; we located the teenagers station in a central location, but many of the regular members were located in tents (to keep the radios from interfering with one another). Denys asked us to improve the situation by rotating the teenagers... this year we improved the field day with some of the teenagers being assigned to outlying stations.

Denys wanted us to attend school events and teach ham radio there more... we ended up helping a high school make contact with the Space Shuttle.... Jim Enix and I also ended up teaching it as a special event at Douglass HS. His encouragement contributed to the BEARS attending Boy Scout Jamboree on the Air - we did it for the 5th year this year. 346 boy scouts! Whew.

Denys always wanted the clubs to get jackets with the BEARS logo on them. I wish we could have done that...

Nancy, the whole BEARS club morns with you - Denys will be missed. If there is anything we can do, please let us know.

Randy Wing, N0LD
BEARS Trustee

Hello,
My name is Nancy Fredrickson. I am the daughter of Denys Fredrickson, W0BMW. I just wanted to let the Bears Club know that Denys went to be with his Lord Sunday morning, October 21, 2007. He really enjoyed Ham Radio ever since he was in high school in the 40's. I remember many a 'Ham Hunt' when I was a child. This club was important to him. Thank you all for being part of his life.

# 265. Riley Retiring

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-25 00:26:47 UTC
From: Randy
Topic: 265  Message: 265

"FCC amateur radio enforcement chief Riley Hollingsworth, K4ZDH, has announced that he will retire from the Commission in early January. Hollingsworth has been in charge of FCC amateur rules enforcement since 1998

and has held the title of Special Counsel for Amateur Radio since 1999. He has spearheaded nearly a decade of revitalized FCC enforcement activities on

the ham bands, after some 15 years of "benign neglect" by the Commission. Hollingsworth assured CQ that the FCC's active enforcement of amateur radio rules will continue even after his retirement.

Hollingsworth is a native of South Carolina and holds a Master's degree in political science from the University of South Carolina as well as a law degree from Wake Forest University Law School. Prior to taking the reins of amateur radio rules enforcement, Hollingsworth served in several other FCC positions, including Deputy Chief of Licensing and Assistant Chief of the Wireless Telecommunications Bureau. He works out of the FCC's Gettysburg, Pennsylvania office."

That's not good news, as Riley has (IMHO) done a really fine job in that position, and the FCC will be hard-pressed to find anyone to fill his shoes half as well.....

73, Jerry K3BZ - from the CQ newsroom

# 266. 10.5GHz radar gun modification

Yahoo group: BEARSAmateurRadioClub
Date: 2007-10-28 21:28:58 UTC
From: n5gui
Topic: 266  Message: 266

Some time ago Dave Powers told a BEARS meeting that there is a 10.5 GHz "Hot Wheels" radar gun available. The price has gone down and they are now available for $17 in the local Wal Mart.

I have also searched the web for information about the product and "hack" into it. Some interesting pictures are available showing what is inside and how to open them up ( they have plastic plugs glued into the holes for the screws used to assemble the devices )

I am wondering if anyone locally has tried to modify them or would be interested in trying to modify them for amateur radio work.

The best guess I have made for them is they operate as continuous wave 10.525 GHz doppler radar. If I got the math right that means that the frequency of the return echo is shifted 70 Hz for each meter per second that an object is moving toward the source. There was a report on the web that the output was pulsed, but I am guessing that the system turns on the radar to take a sample, then processes the sample onto the display, then takes another sample. That way the transmitter is not wasting energy by transmitting when the system cannot use the return echo. I certainly would welcome some input from anyone that understands it better.

The goal would be to demonstrate a communications link on the 10 GHz amateur band. It is not immediately obvious that the system could be amplitude modulated, but it seems likely that it can be pulse modulated at an audio frequency. That suggests that an AFSK version of a digital mode, such as RTTY, PSK31, or MFSK ( Olivia or Domino? ) would be possible, much like light communication with LED or diode lasers.

This is an area that is completely new to me, but the critical components to an experimenter's system are readily available at a good price. The price would seem to be a closeout, so I would not expect them to be available for very long.

The BEARS are meeting tonight at our usual location at 5:00 PM in room E203 of the 4501 Bldg. See you there!

On the agenda - final nominations for BEARS officers for 2008. So far, the following people have agreed to run for officers - but several of these officers would appreciate anyone else who wanted to step in and run for office. So don't let this list stop you from volunteering! :) We are looking for an election coordinator - someone who isn't an officer candidate - who would ensure the election is run per the BEARS constitution.

Thanks Randy,

What did you and Havey decide about the trailer? It is a good idea but I feel that we should wait until next year to see if we are funded and how much we do recieve.

I still think that we would be better off with something like St. Louis, but we do not have the support to do so now.

From: Wing, Randy
Topic: 282  Message: 282

Congratulations to Dave Powers, KA0KCI for his volunteering to become an ARRL approved WAS (Worked All State) checker. The ARRL approves one WAS checker per club. So if you have worked 50 states on any band, please coordinate with Dave Powers as needed.

Again, thank you, Dave, for volunteering for this important position. As the newer hams start using their HF privileges, I imagine that this will be a handy capability to have locally!

# 283. ARRL November Sweepstakes this weekend!

Yahoo group: BEARSAmateurRadioClub
Date: 2007-11-14 16:22:55 UTC
From: Wing, Randy
Topic: 283  Message: 283

This weekend is the ARRL November Sweepstakes. To those of you who have never heard this contest, it can be initially daunting to understand what is going on. This email is intended to help you understand and get in there and make a few contacts!

If you haven't operated - it isn't hard, but you need to know the ARRL Sections (same as Field Day - e.g. ETX, KS, IA, OR, EWA, NNJ, EMA, SCV, ORG, AZ, ID, etc.) and you need to know the "exchange". The exchange is defined as the information you must copy from the person you are making a contact with - and the information you must provide to that person.

http://www.arrl.org/contests/rules/2007/novss.html

The exchange is documented in the attached web page, but a summary is:

4.1. A consecutive serial number;
4.2. Precedence;
1. 4.2.1. "Q" for Single Op QRP (5 Watts output or less);
2. 4.2.2. "A" for Single Op Low Power (up to 150 W output);
3. 4.2.3. "B" for Single Op High Power (greater than 150 W output);

4. 4.2.4. "U" for Single Op Unlimited;
5. 4.2.5. "M" for Multi-Op;
6. 4.2.6. "S" for School Club;
4.3 Your Callsign;
4.4. Check (the last two digits of the year you were first licensed);
4.5. ARRL/RAC Section
(Example: NU1AW would respond to W1AW's call by sending: W1AW 123 B NU1AW 71 CT, which indicates QSO number 123, B for Single Op High Power, NU1AW, first licensed in 1971, and in the Connecticut section.)

For me, I might use: 001 B N0LD 96 KS.... This would mean - a serial number (starting with one and incrementing for each contact), B for high power, my callsign, 96 for 1996 the year I was first licensed, and KS for Kansas.

This is a great contest for working Worked All States (WAS) so that Dave Powers can help you get 'checked'.... :)

You can work any or all of the following bands, 160m, 80m, 40m, 20m, 15m, 10m. 160, 80, and 40m are best at night. The others are best in the daylight. However, this is a guide.... Contests sometimes break this rule.... :)

See you on the air - it starts at 3:00 PM Central Standard Time on Saturday, November 17 through 9:00 PM Sunday, November 19th. You have to stand down 6 hours during this 30 hour time - if you plan to turn in your contest score.

There is a multioperator category for those of you who might want to team up.

# 285. Talking Dog for Sale - regards from Steve Heyroth

Yahoo group: BEARSAmateurRadioClub
Date: 2007-11-26 09:22:13 UTC
From: Randy
Topic: 285  Message: 285

During a recent trip my wife and I were on we drove around the back woods of East Texas. On one back road I saw a sign in front of a broken down shanty style house: "Talking Dog for Sale." Well I needed a break so I stopped to see what the deal was. I went into the backyard and see a nice looking Labrador retriever sitting there.

"You talk?" I ask.

"Yep," the Lab replies.

Well after I got over the shock of hearing a dog talk, I asked "So, what's your story?"

"Ah shucks there ain't much to tell. Is that a VUU screwdriver antenna on your truck out there?"

"How did you know that," I ask?

The Lab looks up and says, "Well, I'm a ham radio operator. I got my Ticket when I was a young pup and in no time at all I had my 5 band DXCC in Phone and CW.

The CIA heard about me and asked me to do some spy work for them. I would hang around the communications centers and with my keen hearing I could copy the transmissions. Because no one figured a dog would be eavesdropping, I was one of their most valuable spies for eight years." Copying high speed CW all day really tired me out and I knew I wasn't getting any younger.

So, I decided to settle down. I retired from the CIA (8 dog years is 56 CIA years) and joined a ham radio club. In fact I won first place in the Oklahoma QSO Party two years in a row. Then I sired a mess of puppies and got away from Ham Radio for a while. I sure miss my radio. Why don't you buy me and I'll be your CW operator in the Texas QSO Party?

I said "let me see what I can do." I went back in and ask the owner what he wants for the dog.

"Ten dollars," the guy says.

"Ten dollars? This dog is amazing! Why on earth are you selling him so cheap?"

"Because he's a liar. He never did any of that stuff. He's just a No-Code Technician."

The Lab looks up and says, "Well, I'm a ham radio operator. I got my Ticket when I was a young pup and in no time at all I had my 5 band DXCC in Phone and CW.

The CIA heard about me and asked me to do some spy work for them. I would hang around the communications centers and with my keen hearing I could copy the transmissions. Because no one figured a dog would be eavesdropping, I was one of their most valuable spies for eight years." Copying high speed CW all day really tired me out and I knew I wasn't getting any younger.

So, I decided to settle down. I retired from the CIA (8 dog years is 56 CIA years) and joined a ham radio club. In fact I won first place in the Oklahoma QSO Party two years in a row. Then I sired a mess of puppies and got away from Ham Radio for a while. I sure miss my radio. Why don't you buy me and I'll be your CW operator in the Texas QSO Party?

I said "let me see what I can do." I went back in and ask the owner what he wants for the dog.

"Ten dollars," the guy says.

"Ten dollars? This dog is amazing! Why on earth are you selling him so cheap?"

"Because he's a liar. He never did any of that stuff. He's just a No-Code Technician."

# 287. Banquet Attendance

Yahoo group: BEARSAmateurRadioClub

From: Randy
Topic: 287  Message: 287

BEARS Members and friends,

If you would like to attend the BEARS Banquet on Thursday night at 6:30 PM, please let Jim Enix know! We need a head count.

Location:

Copy this URL and paste it to Internet Explorer...

http://www.mapquest.com/maps/map.adp?latlongtype=internal&addtohistory=&latitude=SXsrAOYDRr6UWvUYZ6RgPA%3d%3d&longitude=rPlvL0N7TEwvi7K7AK6DyQ%3d%3d&name=Johnny%20Carino%27s%20Italian&country=US&address=3213%20N%20Toben%20St&city=Wichita&state=KS&zipcode=67226&phone=316%2d636%2d4411&spurl=0&&q=johnny%20carinos&qc=%28All%29%20Restaurants

Johnny Carinos Italian
3213 N. Toben St.
Wichita, KS
316-363-4411

Take the Webb St. exit from the 96 bypass and go north to 31st St. Then go west on 31st to get to the restaurant.

Thank you Nick Farlow and Jim Enix for coordinating the banquet!

Randy Wing, N0LD

# 288. Monthly BEARS / Wichita, KS Meeting, 12/6/2007, 5:00 pm

We do not meet at 4501 this month. See following:

Boeing Employees Amateur Radio Society of Wichita

Annual Christmas Party for 2007

Thursday December 6th

6:30 P.M. to 9:00 P.M.

At

Johnny Carinos Italian

3213 N Toben St

Wichita, KS (316) 363-4411

Tell the waitress that you are with the BEARS club. As we are a group there will likely be a 15% gratuity added to each bill, you can donate more if you like.

Driving instructions: Johnny Carinos Italian restaurant is located in East Wichita just North of the K96 West on ramp and Webb Road. Go just North of the on ramp and turn West on E. 31 Street N. This becomes Toben Street at the road bend. (Second road past Teds on the left, next to the car dealer ship.)

We need a head count to let the restaurant know about how many are coming. Let us know as soon as possible. Walk-ins are still ok - so be sure to come. Contact:

Nick Farlow KBØYHT Jim Enix KCØQIE

# 290. Evaluation of noise canceling headphones JVC HA-NC80

Yahoo group: BEARSAmateurRadioClub
Date: 2007-12-09 04:16:36 UTC
From: Randy
Topic: 290  Message: 290

James would like your thoughts on noise cancelling headphones.

Randy

Subject: Evaluation of noise canceling headphones JVC HA-NC80

Randy

I would like your comments, and perhaps this could be sent out to BEARS for comment / help.

One of the after Thanksgiving specials that I saw was for JVC noise canceling headphones model HA-NC80. I knew that I would be flying to California soon. The price of the special was low enough that I bought a set to try to reduce some of the stress from the noise on the flight.

I got them home and tried them out in the relative quite of my home. They look like a rather typical set of on the ear headphones. The soft pads blocked some, but certainly not much of the local sound sources. They are bigger than in-the-ear (ear buds) types but they are not as big as the big "cans" that surround the ears and rest on the sides of the head. Either of those two types would block more noise. Time to turn on the noise cancelling circuit. The headphones have a selector switch for canceling either low frequency noise or a wide spectrum of noise. I got more noticeable effect in the wide switch position. I could tell they reduced some sound, but I could not tell how they would help with the aircraft noise.

I have a noise canceling Heil headset for my amateur radio equipment that provides good ear coverage and hearing protection even when the active circuit is turned off. However they are more expensive than my round trip ticket, so I leave them at home. Besides, I don't want to have to explain to the flight crew that the boom microphone is not connected to anything, since if obviously lookes like it should be connected to a transmitter when I am wearing the headset.

As it turns out, I was in an excellent position to evaluate the headphones: Seat 29F on an MD-80. That is about 4 rows forward of the engines. After the flight crew announced permission to use "approved" electronic devices, I got the headphones out, put them on to compare the cabin noise with and without the headphones on my ears. Then I turned on the noise cancel

system.

The response was immediate, obvious, and grossly dissappointing. The "low" setting of the switch had no apearant effect, but the "wide" setting eliminated a rushing sound, which I would attribute to the airstream going past the aircraft. Had that been the primary noise source, I would have been very pleased. As it was, perhaps as much as, ten percent of the cabin noise, I was underwhelmed. What I had was deep and pervasisive throbbing of the engines, just a few feet in back of me. I tried to put some music, or other audio on to see if they were more effective when the speakers are being driven, which is something that I notice with my Heil. Unfortunately, I only had an FM radio to drive them, and it would not pickup a station in the aircraft at altitude. I was dissappointed, and the rest of the flight was uncomfortable with the noise level. I made some crude earplugs from a tissue. They helped about as much as the headphones, so I used them both. The noise just overwhelmed them.

In spite of that, I was puzzled by a sound that I did hear, which I can only describe as a high pitched hum, certainly over 10KHz, maybe over 15KHz. It may have been from the engines, some aircraft source, or even possibly an artifact from the headphones. I know that I could not hear it without the headphones in the noise canceling mode. But the level of noise was such that it may have been there, and I was just not aware of it, unless the noise canceling circuit cut back on the ambient levels.

On the return flight, I packed the headphones in my checked bags, used a set of foam earplugs like are used on the flightline, and I was a lot more comfortable. That may have been as much from the fact the aircraft was less than one quarter full, and I was seated in row 10, a long way from the engines.

After I got home, and rested a few days from the trip, I took the earphones to the YMCA when I was walking around the gym track. They were very effective in cutting the noise of the little kids playing on the gym floor - basketball on one end and gymnastics on the other. I also used the FM radio successfully. Much better, but not what I call a good test for the headphones: The seemed to be effective on that sort of noise, but I was walking at a pace intended to work up a sweat, not concentrate on the sounds coming to my ears.

So, the headphones do work, just not for the purpose that I had hoped. What I would like to do is try to evaluate the headphones for use in an amateur radio environment. Maybe even compare them to my Heil and its predesessor, a set of earbuds worn inside a set of gun range hearing protectors. Perhaps we can setup a test environment like the dining hall at Camp Kanza with dozens of Cub Scouts and four radio stations running simumtaneously. If the results show anything useful, perhaps there is a chance for a QST article.

Any ideas?

James

# 292. For Sale Computer Stuff- Almost Free & Some Free

Yahoo group: BEARSAmateurRadioClub
Date: 2007-12-12 17:02:10 UTC
From: .--/---../.-../--
Topic: 292  Message: 292

Guys-

I'm unpacking from my move last year. I found the following computer stuff. Some of it is Free some of it does have some value..All of it is not worth keeping till the next hamfest.

HP 692C Inkjet printer- Not turned on for over a year. Assumed for parts only- condition unknown.- I bought a Cannon when I first came here. Probably the cartridges are dry now..$5.

Logictech Trackball - Model Tracman Marble+ PS2 $5

2 Sets of computer style sound card amplified stereo speakers. Plug into 120Vac and are probably 2-3-4 watts... $2 per set...

Now for the Free Stuff----
2 PS2 style used keyboards
1 PS2 mouse New in the box
1 ps2 mouse
1 Microsoft Intellimouse RECEIVER- USB (needs wireless mouse)
1 Serial mouse

Offered to the BEARS membership first, in 48 hours I'll post it on Wichita Cheep Cycle and let the masses scurry over it.

I monitor 146.94 in the shack...my QTH is close to Boeing- under a mile.

Good job, Sherry and Dexter.

I sure am glad they had the good looking members of the 15M team in that photograph. If it is the same one on the soapbox, then it shows my ICOM 745 and Radio Shack earphones - much better for the photo than my face.

Did the photographer get any credit?

# 299. 4 digit multimeter

Yahoo group: BEARSAmateurRadioClub
Date: 2007-12-20 02:36:51 UTC
From: tgattisr
Topic: 299  Message: 299

How would you like to have a 4 digit multimeter?
200 mv to 1000v DC, 200 and 750 AC, 200 microamp to 200 ma, 10 amp,
hFE for npn and pnp,diode test, 200 to 2000K ohms, battery test
1.5v@4ma and 9v @ 25 ma. 30 ohm resistor 1% read 30.1 ohms. Read 13.66
VDC vs 13.677 on my "good" meter.
Now, would you like to have it (with battery) for $2.87.
One for the car, one for the field day pack, one for ???
Harbor Freight - Seneca and Pawnee.
They have a pile of them now but probably not for long.

Terry

New YouTube PSK31 tutorial videos

Randy K7AGE has recently put a couple of new PSK31 tutorial videos on YouTube.

PSK31 Transmitter Level Adjustment
http://www.youtube.com/watch?v=I3CwHaX7t5M

PSK31 - Operating
http://www.youtube.com/watch?v=ZaAXMzGIUGA

Randy has previously posted several other PSK31 tutorial videos
Part 1: Introduction to PSK31 - Receiving
Part 2: Sample of 20 meter activity for PSK31 introduction
Part 3: Video Soundcard Interfacing

They can be seen at
http://www.southgatearc.org/news/september2007/psk31_introduction.htm

# 308. 2008 BEARS Calendar

Yahoo group: BEARSAmateurRadioClub
Date: 2008-01-07 02:30:00 UTC
From: Randy
Topic: 308  Message: 308

Thanks to the work of several BEARS members, we have a 2008 BEARS calendar uploaded to:

BEARS web site <http://boeingradioclub.org/calendar.htm>

BEARS <http://f1.grp.yahoofs.com/v1/oIeBR1j-b3w1pL9pTTB7ZFwCQrVamwk5uS0YjU4lJ3foGV--ZrVZXpqoUxjUv84Epbz6M2rjJREvU27XfG2-Hg/BEARS%20Ham%20Radio%20Event%20Calendar%20for%202008v1.htm> Yahoo web site (under the FILES section on the left hand side of the screen)

If you would like additional material added to it - material you think other BEARS members would like to know - please let me or a BEARS officer know.

Please note that the calendar is color coded:

Green: Contests

Blue: Hamfest or interesting BEARS related events

Black: BEARS events

We've added links where that might help you.

# 309. For Sale: MFJ259B Antenna Analyzer

Yahoo group: BEARSAmateurRadioClub
Date: 2008-01-07 16:52:16 UTC
From: .--/---../.-../--
Topic: 309  Message: 309

OK Guys-

I was relocating a cable TV cable for a widow of a ham this weekend. She showed me what was left of his basement shack. Sitting on the shelf was a MFJ-259B Antenna Analyzer.

It fired right up even though he passed over 18 months ago. She could really need the money, she was out of work 3 years. I put a lot of his stuff on e-bay a year ago for her. Never saw the shack till yesterday.

Right now on E-BAY there is one going for $177 used with a day to go..

Before I put her's on e-bay and paid the associated listing fees and paypal etc; I thought I may make it available to the membership.

It's "like new" and even has the plastic protector on the LCD display. I fired it up, it seems my dummy load SWR 1:1 to 170 Megs. I have one with nicad option in it so I don't need a second.

Now his ham shack had been ransacked by a computer type son who scooted to Las Vegas, so bits and pieces are all that is remaining. I am going to be "cleaning" it out as grieving is over and it's time to clean it out. Mostly there is consumer electronics left.

We can play with the 259B in my shack so you will be satisfied. We can compare it to mine as well. There is no box, no manual...manual can be printed from MFJ website. I have a laser printer. It DOES have the banana jack test pins for testing coils and caps..This also tests coax and is a freq. counter.

So HERE IS THE DEAL--- MFJ259B almost new...
BEARS Members first offering...
$175 cash or good check to the widow..
First come, First Serve. I'm a mile from Boeing...316-308-0833
Wednesday- 1/9 it's going to Derby Radio Shack for consignment..

Jim-

Please tell me where to send the $$$ for membership
and the amount.

If you want to squeeze me even more my 17 year old son
is N8NCC....he was not at field days last year because
#1 it was my birthday and #2 he gets to go to West
Virginia for the summer to see his grandma..

He's a junior at Derby HS..

# 313. Reduction in net reminders

Yahoo group: BEARSAmateurRadioClub
Date: 2008-01-09 14:26:25 UTC
From: Randy
Topic: 313  Message: 313

I reduced the number of "reminders" of nets from 2 to 1. For instance, I had a 1 day reminder before the net and a 15 minute reminder before the net. Now, you will receive only a 15 minute reminder before the net.

I hope this helps!

Randy,

# 314. BEARS To Support Boy Scouts Encampment April 26th - Do we make this a Club Event

Yahoo group: BEARSAmateurRadioClub
Date: 2008-01-11 00:45:26 UTC
From: jones_hg
Topic: 314  Message: 314

BEARS Invited To

Scout Encampment

26 April 2008

Quivira Council Boy Scouts is inviting the BEARS to provide a booth that shows Amateur Radio.

What is encampment?

* Encampment is a collection of Scouts from Tiger Cubs through Ventures that are interested in learning about all the activities Scouts are involved in.
* Up to 3000 Scouts, yes 3K Scouts, will be present.
* The Scouts will walk around and visit the activities they want, so this is more free-flowing, not like JOTA.
* Location is the state fair grounds in Hutchinson

What are we expected to do?

* They want us their, based on the interest the Scouts have had at the last JOTA and other events.
* We can setup any type of program we want. I expect a more free-flowing event since no real schedule will exist.
* We have the option to start Scouts off on their Radio Merit Badges.
* We can do a fox hunt, if we have enough adults.
* I haven't checked for any contests, but having people talk on the radio is always good.
* This may be an opportunity for a mention in ARRL and have people looking for us!

Is this something the club wants to support? I will organize the top level, but if we have classes or a fox hunt, I will need others to lead those efforts.

The Plan so far:

* Some of us will need to arrive Friday to set up
* All adults that support the event will be fed
* We man the booth and hold our activities all day Saturday
* Saturday night has a program we are invited to. I hear it is a professional magic show.
* We can tear down Saturday night or stay Sunday and tear down.
* If we get back to the council soon, we will have the pick of location. I asked for under cover and power, and they understand.

I am looking for Feedback!

I am looking for Ideas!

I am looking for Volunteers!

Let me know.

Harvey

I note this is the weekend after Earth Day. It may be difficult to support both activities. If I had to choose one or the other, I would pick the Scout Encampment. Please count me in. I will try to make sure that I am not traveling to California that week.

As for Ideas:

I think this is a great opportunity to use the Light Beam Communication system that I have been demonstrating for several years. It is a voice communication system that is within the skill level of Scouts to build the electronics and optics. The component cost is low enough that each troop could have at least one pair. They can also safely use it without direct supervision or license. It is a good first step on the path to VHF amateur radio and then on to HF. I think it would be much more attractive to the Scouts than a code practice ocillator. But if I am wrong and the Scouts prefer Morse Code over voice, then we can compare the light beam communicator to a heliograph that was used in Kansas in the 1800s along with the telegraph. There is an annual Venture Scout activity called On Target that is very popular in the Mountain States, where the Scouts make and use signal mirrors and heliographs.

Heliograph requires an outdoor setup and sunshine. Light beam communicator would work a little better indoors. Either could be set up to communicate between buildings, you just have to keep the light beams above the crowds. If there is an opportunity to demonstrate after dark, we could do that too.

If you don't want to go that high tech, we have the code practice oscillators that the BEARS made up a few years ago. I can scrounge up a few parts so that we could demonstrate building a few during the day. Maybe "raffle" them off. That would show what it is like to build a simple electronic kit.

If you want a really cool PSK31 ( or MFSK ) demonstration, we should set up a computer to drive a speaker for transmit and a directional microphone for receive. Then set up another PSK31 station to communicate back and forth. It demonstrated the technology better than an actual radio contact. Doesn't require a license. Only requires a computer with a sound card, the speaker and microphone.

There's a HXT242 Radio Shack 2 meter FM mobile that looks new that belongs to her down at Radio Shack in Derby. I was told it's 50 watts. Mark and I checked it out and put it on the used shelf there.. She also has about 5-6 years of QST's and lots of cassette and CD recording gear and audio type stuff. He was also into country western.

BEARS...

Minutes from the February 7, 2008 5:00 PM BEARS Meeting...

Larry, W8LM, am_fm_radio@..., requested that if anyone wants to
purchase the following to please contact him immediately - he is going to
put these products on sale on EBAY tomorrow:

SWAN 350
500 picofarad variable capacitors for $50 each
A 1000 KV 20-1100 item for $60 each.

James Whitfield presented a 2m ground plane antenna with a 5 foot PVC (what
else?) mount with Christmas tree stand - pretty innovative. For details,
contact him at n5gui@....

Randy Wing, N0LD, talked about advance preparations for field day. Jim Enix
has reserved the air conditioned pavilion at the BEA Lake again! Whoo hoo!
We discussed a few proposed changes for field day - this is still up for
input - so don't be afraid to drop a message to the group (public) or to me
privately (n0ld@...):

1. James Whitfield to attempt a 80m / 160m rhombic
(diamond loop) antenna. James is leading a group
Of BEARS members who have interest in this antenna -
So far: Larry, W8LM; Jimmy Williams, K5NN; Kerry
Steffens. If you are interested in contributing to
the design and/or construction - please contact
James at n5gui@....

2. Discussed W8JK 10m antenna with horizontal polarized
gain over 4 db. James Whitfield and Jimmy Williams to
discuss if it is a worthwhile addition to our Field Day
antenna collection.

3. Larry, W8LM, please decide if you could be the
80m /160m captain.

4. Jim Enix, KC0QIE, please decide if you could be the
40m voice captain.

5. If anyone wants to be ANY band/mode captain, please let
Me know!

Jay Lies has a new callsign - W0JL - very nice! Congratulations, Jay!

James Whitfield told the group about the Boy Scout event at the KS State Fairgrounds on 25 April. 4000 boy scouts will be attending! We've been asked to present ham radio demonstrations. We will NOT be putting 4000 scouts on the air - so don't worry - this isn't as hard as it sounds! The Scouts will be from 1st grade through High School age. If you are interested in helping, contact Harvey Jones at jones_hg@....

Randy Wing and Jim Enix gave three one hour long presentations at Speaker Day at the Douglass High School. We were well received - about 55 high school kids signed up for our presentation. I've included pictures. Benjamin had an accident that caused 13 stitches (staples) - absolutely NOT related to Jim's and my presentation... :)

Larry, W8LM, won the door prize - a new 15 month ham radio calendar! Congratulations Larry!

Dennis Gaskill gave a presentation on LTSpice - if you would like the links to the information he presented, please find these links which he provided. I included his email address above in case you wish to continue the conversation.

This is the LTSpice Demo

http://www.soldersmoke.com/kl7r/ltspicebasics.htm

This is where you can get "WINK" the software used to make the Demo.

http://www.debugmode.com/wink/

This is where you can get LTSpice (FREE)

http://www.linear.com/designtools/software/

Attendees tonight included:

Nick Farlow
Randy Wing
James Whitfield
Jim Enix
Kerry Steffens
George Pinick
Loyd Williams
Steve Schroeder
Charles Rasico
Dennis Gaskill
Terry Gattis
Dexter Schnebly
Larry Macionski
Jim Kernan
Jim Williams

Samantha was attending college classes and sends a note saying "hi" to everyone. Benjamin just wanted to take his pain medication and stay home...

# 339. Ducie Island DX is out there!

Yahoo group: BEARSAmateurRadioClub
Date: 2008-02-15 14:38:40 UTC
From: Wing, Randy
Topic: 339  Message: 339

I worked VP6DX Ducie Island on 10m, 12m, 15m, 20m, and 80m DX yesterday. Ducie Island is near Pitcairn Island and Henderson Island in the South Pacific. I was surprised to be able to work them on 10m and 12m - that was about 4:30 PM CST.

For more information about their location you can look at their web page: http://ducie2008.dl1mgb.com/

Or for current spot information: http://oh2aq.kolumbus.com/dxs/

Please post if you work them - they are running a kilowatt on almost every band.

Hello All!

Dory Here. I just wanted to introduce myself to this fine crowd. I was invited in by Randy today after expressing my interest in Skywarn and HAM radios. I'm a Comm/Nav Troop here at McConnell on the Boeing's 2nd finest airframe, the KC-135. I'm a C-17 maintainer by heart so you'll have to forgive me there. I've been in the USAF for 15 years this May with time on the C-141, C-17, C-5, and KC-135 at Altus, Hickam, RAF Mildenhall, and now here. I live out here in Rose Hill where I listen in on a few Skywarn repeaters and other common published frequencies using my tried and true Radio Shack Pro-60 scanner. This year I'm stepping up my lightning photography hobby and going into spotting and limited range chasing. Of course you all know you're only strong as your weakest link and mine is communications. So I decided HAM radio would be a fantastic way to meet new people and hopefully make some good friends and get words of warning out to the public.

Anyways... I'm scheduled to take my Technicians test with Henry Monton at the end of March up in Valley Center. But getting the General License is my goal and I'm looking for a good HAM setup for my truck to meet my future goals. I've been looking on Universal Radios website at the Kenwood TM-D710A but that maybe overkill. I would like NOAA alerts and as much future proofing as possible. So if anyone has any suggestions I'm all ears.

I'll be looking forward to meeting you Dory.

My Air Force time was 50 years ago, I did comm/nav repair in things like C-119s, C-124, C-54, F-86, F100, and a few others back then. Most of my time was in the Security Service in the Middle East fixing long range HF equipment. After getting my engineering Degree I did the avionics systems engineering, or helped, on things like the F-15 when it was brand new and the B-1 when it was new along with many other interesting projects.

I'm also very active in photography, taking pictures of lightning has some unique requirements, I'll be glad to share notes with you-lightning has a lot in common with photographing fireworks also.

If you miss out on the Valley Center test session, Ponca City, Ok gives tests, I believe it will be, the second Tuesday in April using the ARRL VEC.

Jim Williams

I outfitted my car truck and suv with the same radio..
a Yaesu 2800... it has 1 button weather lookup. and is
65 watts. New they come with a year guarantee...

I stay away from anything Kenwood. Problems and not
meeting specifications. These Yaesu's I bought on
special this summer $107 and free shipping NO TAX.
Gigaparts.com.

Now that I said that, My camper is going to be my
chase/ham radio vehicle. I bought it from a ham and it
did come with Kenwood all ready in it. But my home
station is ICOM and Yaesu...
A new radio that people are in awe of is the ICOM
7000. it covers everything...if you get your general.

I have a yaesu FT-100D no longer made but legendary
all band radio as well. I also have a FT817 Backpack
all band radio...currently available and very popular
in Europe...it can go into a purse... or back pack...

Yaesu very solid and just bought by Motorola.. They
make military and police radio's under the name
VERTEX...they also have a patented front end that
resists interference. Kenwoods and other non
Icom-Yaesu brands people have trouble with
interference.

My radios I own 3...my son is a ham and so is my
daughter. -
FT2800M YAESU 2M 65W MOBILE

Dory,

As you can tell from the responses. you will fit right in here. :-)

I have to say that I agree with Larry about Yaesu radios - I own almost exclusively Yaesu radios and have been happy with them. I have enjoyed very nice ICOM and Kenwood radios, too. One of the ones I really contemplated breaking the Yaesu trend I have going was the D710. Kenwood is pretty good at making APRS compatible radios - and those are quite useful in SKYWARN - and you are right - they do have a steep price tag.

If you are eventually going into HF radio - there are some mobile / smaller base rigs you might want to consider - Yaesu FT-857, ICOM-7000, a used Yaesu FT-100 or a ICOM 706MKIIG. I would advise going to a hamfest to get a feel for the different ham radios available, too. There is one coming up in March in Tulsa that I think is world class - they have testing too.

14-15

Green Country Hamfest <http://greencountryhamfest.org/> - Exhibition Center, Claremore, OK

Click on it for more details.

73,

Randy, N0LD

Hi Dory,

Welcome aboard. Stop by Radio Shack in Derby and talk to Mark. A lot of good places to get a radio. My suggestion is to sit down and work a few stations that others own. Learn about what they like and don't like. Determine what kind of budget you have and what will meet your needs. Might get a single or dual band 2/440 rig just to start and get you on the air. I bought a used one and have been very pleased. Budget goes further if you start slowly.

The Greenvalley hamfest is coming up on March 14th at Claremore Ok. You can get better buys on both new and used. Before you buy used, be sure to have it tested at the test station. Even if you don't buy anything it will give you a chance to talk and learn. The will have great buys on coax fittings.

Be sure to attend the scout encampment on the 26 of April. Randy can update you. It will provide you a lot of good ideas of what is needed. Good luck.

To: BoeingRadioClub@yahoogroups.com
Subject: RE: [BoeingRadioClub] Greetings!

Jim, well you have your priorities right, as a avid photographer myself I would probably

Go there also. The Coffey call takes place at 5:30 PM on Thursday. I agree that if we

Had some hills or trees or something to backdrop out pictures they would be more interesting.

John in Derby.

John

I knew Derby has a ham club that meets the same time as a Photography Club I belong too. I did not know, or had forgotten that it had a gathering at Braums on Thursday, what time does it meet?

That is a nice picture of the Arizona desert during a storm, a nice time exposure. Wichita has some nice storms but nearby hills so you can see the horizon clearly are in short supply for that kind of oictures!

Jim

To: BoeingRadioClub@-yahoogroups.-com
Subject: RE: [BoeingRadioClub] Greetings!

I'll be looking forward to meeting you Dory.

My Air Force time was 50 years ago, I did comm/nav repair in things like C-119s, C-124, C-54, F-86, F100, and a few others back then. Most of my time was in the Security Service in the Middle East fixing long range HF equipment. After getting my engineering Degree I did the avionics systems engineering, or helped, on things like the F-15 when it was brand new and the B-1 when it was new along with many other interesting projects.

I'm also very active in photography, taking pictures of lightning has some unique requirements, I'll be glad to share notes with you-lightning has a lot in common with photographing fireworks also.

If you miss out on the Valley Center test session, Ponca City, Ok gives tests, I believe it will be, the second Tuesday in April using the ARRL VEC.

Jim Williams

# 352. For Sale: Comm Spec SS-32 CTCSS encoder *NEW*

Yahoo group: BEARSAmateurRadioClub
Date: 2008-02-25 01:38:42 UTC
From: .--/---../.-../--
Topic: 352  Message: 352

Before I put in up for auction on E-bay, I'll ask if anyone needs it here.

It's brand new- found it with some QSL cards from 2-10 years ago.

New sealed in the plastic bag with instructions, mounting strips and
decal...used to sell of $32-35

Asking $20

I'm putting it on e-bay come Mar 1....

# 353. RE: [BoeingRadioClub] For Sale: Comm Spec SS-32 CTCSS encoder *NEW*

From: Steffens, Kerry W
Topic: 352  Message: 353

For those that don't know what a SS-32 is:

First I installed the Comm-Spec SS-32, which I had laying around. It works just fine and enables the radio to operate on repeaters, provided their PL is 100 Hz... You can install switches to change the PL tone, but that gets quite involved, rather than a small project. In my case, the two repeaters which I care to work have 100 Hz PL.

These were made around 2000. The SS-64 came out in 2004. Good PL if you have an older rig and need tone access.

Topic: 339  Message: 354

Since I reported on this earlier, I've worked them on every voice frequency from 10m - 80m... Still working on 160m and 6m - I doubt 6m will happen - but there is a chance for 160m...

A sunsport burst out today - Sunspot number is 12 - it might give a boost to 6m... who knows - maybe 160m.

# 363. SKYWARN Echolink Tests

Yahoo group: BEARSAmateurRadioClub
Date: 2008-03-10 13:10:58 UTC
From: Wing, Randy
Topic: 363  Message: 363

Wichita, KS NWS SKYWARN Echolink Test
-------- -- --- ------- -------- ----

Tonight - Monday, March 10, 2008 at 8:00 PM we will be testing Echolink for SKYWARN.

For those of you interested in the future of Echolink SKYWARN "bridges" into the Wichita, KS NWS I encourage you to participate. Look for "WX0ICT" within the Echolink stations.

For those of you not familiar with Echolink and feel there isn't time tonight to get up to speed - don't worry there will be other opportunities. We hope to add Echolink to at least one of the Tuesday night weekly SKYWARN Weather nets after we ensure we can add and subtract Echolink at will.

We will be operating Echolink on the 146.895- repeater from about 7:00 PM to 8:00 PM in preparation for the test. We will continue to use the 146.895- repeater for the Echolink/SKYWARN test from 8:00 PM until everyone has had a chance to make a contact.

We will report the results back to this forum after completion.

Sincerely,

Randy Wing, N0LD
Harvey Jones, AC0EG
Nick Farlow, KB0YHT

Thank you Randy,

I port forwarded the two ports on my wireless and the provider modem per the super great instructions provided by echolink. I set all the (3) security per same instructions. I ran out of firewalls to set and did not occur to me the provider had one also. It worked on Cox fine but not on Pixus which is wireless at 1.2 gig back to the main tower. It now makes sense they would also have a firewall there.

I could link on Cox in town but didn't have audio because of a software glitch between windows and my mother board. According to the internet was very common. Windows killed my audio control by removing the control adj. Microsoft fixed that problem this last go around (Just before Christmas) and now I have all the audio I want at half control. I reloaded with the latest and greatest Echolink but the trouble shooter would only say firewall with no name. Normally it says what firewall so you know which to look at and set.

I will stop by Pixus tonight on the way home and talk to the tech. Randy you may have solved my problem. I will be glad to pay to fix it.

73

Kerry

Kerry,

You might contact Bill, W0OQC, about Pixius and EchoLink. He
got his working after he told them what ports were needed to be
opened.

# 368. RE: [BoeingRadioClub] SKYWARN Echolink Tests

Yahoo group: BEARSAmateurRadioClub
Date: 2008-03-10 18:29:03 UTC
From: Steffens, Kerry W
Topic: 363  Message: 368

Thanks, will do. I am going to stop by Pixius tonight on the way home and talk to the tech there. I copied off the ports I need plus other web information they will need. This is my 3 machine to have echolink and the first not to work. I have had DSL, Cox and Comstat. Not a single problem with them. I got into trouble when I build my new computer 4 years ago. I least I know why the mother board was cheap. I added another sound card but it didn't help. The two conflicted. I was thrilled when I got a sound Icon after my last windows update. All my audio problems cleared up at the same time. If this works, I am going to get the new usb head set I have been looking at. I think it has a vox feature. Need to take a closer look at it now. No more plugging into the back of the computer.

Kerry,

You might contact Bill, W0OQC, about Pixius and EchoLink. He got his working after he told them what ports were needed to be opened.

Joe, N0KTA

Steffens, Kerry W wrote:

Thank you Randy,

I port forwarded the two ports on my wireless and the provider modem per the super great instructions provided by echolink. I set all the (3) security per same instructions. I ran out of firewalls to set and did not occur to me the provider had one also. It worked on Cox fine but not on Pixus which is wireless at 1.2 gig back to the main tower. It now makes sense they would also have a firewall there.

I could link on Cox in town but didn't have audio because of a software glitch between windows and my mother board. According to the internet was very common. Windows killed my audio control by removing the control adj. Microsoft fixed that problem this last go around (Just before Christmas) and now I have all the audio I want at half control. I reloaded with the latest and greatest Echolink but the trouble shooter would only say firewall with no name. Normally it says what firewall so you know which to look at and set.

I will stop by Pixus tonight on the way home and talk to the
tech. Randy you may have solved my problem. I will be glad to pay to
fix it.

Wichita, KS NWS SKYWARN Echolink Test
-------- -- --- ------- -------- ----

Tonight - Monday, March 10, 2008 at 8:00 PM we will be
testing
Echolink for SKYWARN.

For those of you interested in the future of Echolink
SKYWARN "bridges" into the Wichita, KS NWS I encourage
you to
participate. Look for "WX0ICT" within the Echolink
stations.

For those of you not familiar with Echolink and feel
there isn't
time tonight to get up to speed - don't worry there will
be other
opportunities. We ho! pe to add Echolink to at least one
of the
Tuesday night weekly SKYWARN Weather nets after we

ensure we can add
and subtract Echolink at will.

We will be operating Echolink on the 146.895- repeater
from about
7:00 PM to 8:00 PM in preparation for the test. We will
continue to
use the 146.895- repeater for the Echolink/SKYWARN test
from 8:00 PM
until everyone has had a chance to make a contact.

We will report the results back to this forum after
completion.

Sincerely,

Randy Wing, N0LD

From: terracoat
Topic: 369  Message: 369

Well I settled on a radio. A friend at work was raised in a HAM family and he had high praises on Yaesu. So I ordered a FT-8900R. I wanted a wide range radio to take full advantage of my license. Pretty good deal since it comes with the extension to relocate the RT some 20 foot away from the control panel. I also bought a Diamond CR8900 antenna which is matched up to the radio. I may need some help tuning it so if anyones game for a short time please let me know.

Dory

From: Am Fm
Topic: 371  Message: 380

Thanks John, kind of new here and rely on looking in
the yellow pages for things and recommendations from
hams..

# 382. Greater Wichita Field Day

Yahoo group: BEARSAmateurRadioClub
Date: 2008-03-21 20:57:56 UTC
From: Wing, Randy
Topic: 382  Message: 382

Great news everyone!

I filed for a special callsign for Field Day - "N0W".

I also filed for a special event that will be published with the June QST - hopefully - at LEAST it will be on their website!

Jun 27-Jun 29, 1800Z-1800Z, Wichita, KS. Boeing Employees Amateur Radio Society, N0W. 1st Greater Wichita Field Day. 14.250. QSL. Randy Wing, 13038 SW 186th St., Rose Hill, KS 67133-8559. www.boeingradioclub.org

This should make calling CQ a little easier on Field Day!

If you know of any hams that don't have plans for our Field Day 27-29 June 2008 - please invite them - but let me know, too!

Randy Wing, N0LD
Field Day Coordinator

Look in Wichita. the map location is based on Newington CT (I think). if you are an ARRL member logged into the site - it comes up defaulted to your home address.

# 389. Field Day Location SBEA Lake...

Yahoo group: BEARSAmateurRadioClub
Date: 2008-03-23 16:51:54 UTC
From: Am Fm
Topic: 383  Message: 389

Guys and Randy Mostly,

In the past week, my son, N8NCC's grandma back in WV was hospitalized, and is now resting in a nursing home in Shepardstown, WV. on the banks of the Potomac.

So what does that have to do with Field Days??

Well, as soon as High school is out, Jimmy and I are going to drag back or trailer and clean out her house, then on June 4th my lady friend will fly out to Wash.DC about 40 miles away, and we'll then plate grandma's car and drive back truck, car and trailer. With grandma in the rocking chair in the back of the truck. I do not think Grandma will be able to do 12 hour days in a car but we expect to be back June 8-10.

Then we need to get Grandma into fitting housing here in Wichita and Arrange medical care, etc. It may be my place, it may be assisted living or a nursing home. Pre-field day I will be busy, or probably exausted. Reasons obvious, as I'm blowing 2 weeks vacation to do this.

That means for field day I most probably participate the over night 75 meters, as it is my favorite FD operating.

Who knows I may be there all weekend. I may have grandma and her walker. If Jimmy makes National Debate competition, that's Las Vegas the week of June 14th.

Anyhow- This past week I unloaded my trailer for the upcoming trip. I have if the club would like to borrow and use my 15 meter 4 square array, I could prepare that. It is electronically steerable from the operators desk and has 8db gain and 30 db front to back. It is ground mounted. it needs an area 25x25 to set up in, free from and in the open. Setup takes 1 man 20 minutes.

Popular thought for FD is to alternate bands V-H so cross band interference is minimized.
10H-15V-20H-40V-80H..

My project is to get a 20M Moxon in the air. If anyone would like to go in with me regarding this project, I

have been using EZNEC to model various versions
including single coax driven multi-band versions. I
just came across a picture of a F5 French ham who
claims great success all bands 20-10..documentation is
sketchy- I suspect he's thinking $$$ selling it. My
modeling of his antenna leaves dispute of his claims
at this time. If anyone is interested I've been using
antenna modeling software since buying K6STI's program
back in 1991. I own a lathe and small milling machine.
I manufactured and sold antennas prior to my wife
dying out east.

Larry,

We understand that family comes first - whatever you can put into field day
is fine - we always need operators.

The 15m 4-square sounds good enough to try! How about we worry about it
when you get back from W.DC?

Take care and safe driving.

Randy, N0LD

Subject:

The flinthills amature radio club is having a hidden transmitter hunt this Sunday. We will meet at the Augusta High school on north ohio in Augusta at 1:30 pm. Frequency is supposed to be 146.49Mhz, but is arguable in the parking lot. I usually set up at a known location first so everyone can check out their technique and equipment.

Hope Roger Bailey knows about this. His best time with a transmitter hidden in Wichita was 15 minutes. Most of that time was traffic and getting there.

I hear a few are using:

DSP-RDF <http://www.byonics.com/dsp-rdf/> The DSP-RDF Doppler Radio Direction Finder Kit By: W6DFW

http://www.byonics.com/

The county is encouraging folks to get these to located hurt hikers and such. A bit pricey for me. From the orientation we took, we were told that a transmitter could be found within 3 to 5 mins if located within radio range. Also has to be on a known frequency. My guess is it is good but not that fast. Beats triangulation at any rate.

Hope it goes well.

Am Fm,

I read about your interest in a 20 meter Moxon. Here's a url of Field
Day 2004 I spent with my friend Tom, W0IVJ,
from Boulder, CO, at his sister's place near Guthrie, OK. We erected
his homebrew 4-band Moxon and had a great
time making 647 contacts. It took us about 5 to 10 minutes to change
bands in the dark. He bought the wood locally
but brought the rest on the airplane. It worked great. His EZNEC
printouts and dimensions are included on the webpage.
I'm sure Tom would be glad to answer any questions you might have about
the Moxon. His email address in on the page.
He retired from NOAA in January. His sister used to raise horses. We
used the old horse barn for our shack.

# 397. Nominations for KS Amateur of the Year Project

Yahoo group: BEARSAmateurRadioClub
Date: 2008-04-01 17:22:32 UTC
From: Wing, Randy
Topic: 397  Message: 397

If you know of anybody who you feel deserves to be considered for Kansas Amateur of the Year, the deadline for nominations is 1st June 2008: please contact:
Stanley Creitz, WAØCCW <ailto:screitz@...>
Kansas Amateur of the Year Project
965 KS-14 Highway
Beloit, KS 67420
I am personally going to recommend: W0PWJ, Joe Krout, for his assistance with Greensburg last year. He spent over two weeks in Greensburg assisting with the Salvation Army Team Emergency Radio Network. I will be writing up a nomination for him. The end of the Greensburg support happened right at the end of May - and the deadline for the nominations was 1 June 2007 last year.

# 406. Hearing Aid

Yahoo group: BEARSAmateurRadioClub
Date: 2008-04-15 11:37:36 UTC
From: Randy Wing
Topic: 406  Message: 406

Hearing loss is something that many of us will face as we get older - I thought this article appropriate - I hope the cost comes down.

http://www.nytimes.com/2008/04/15/health/15well.html?_r=1 <http://www.nytimes.com/2008/04/15/health/15well.html?_r=1&th&emc=th&oref=slogin> &th&emc=th&oref=slogin

A summary (unless you have a free subscription to the New York Times you may not be able to go to the above link):

The Lyric is a next generation hearing aid. This improvement is achieved by placing the Lyric hearing aid very near the ear drum. By being close to the eardrum the hearing aid avoids typical hearing aid audio over-amplification - which amplifies ambient noise as much as the target audio. Once every 1 to four years a doctor replaces the Lyric with a new battery powered one. The procedure just takes a few minutes. It is currently pricey - about $3k a year.

## 408. tower?

Yahoo group: BEARSAmateurRadioClub
Date: 2008-04-17 21:02:46 UTC
From: jwjackle
Topic: 408  Message: 408

Does any one know what I could expect to pay for a used 40' three legged tower? I'm looking for one that is not a crank up. Also, does any one know where one might be and who to contact about it? I don't have all that much money to spend on something like this, but if I can find a reasonable deal I would be interested.

should be able to buy four 10 ft sections, or scrounge. Remember you will need the top peice for the rotor. The construct base and rest from scrap pipe.

From my experience:

A three legged tower range from free to $150. Price the same for 40 ft to 70 ft. Like most towers you have to take them down. Most of your cost will be finding the three concrete base pieces and getting them installed. Most of these towers are no longer made and you will not be able to get these pieces. They are designed to fit the leg pattern so not to introduce stress cracks. By the time you dig the hole. I rented a 3 foot auger on a skid-steer for $80. Finish the hole out to the 4x5 foot requirement by hand. Put rebar in the hole, run three ground (lightning protection) rods down another 6 feet and tied them off to the concrete base pieces. This keep the lightning from splitting the base open. Don't forget that you need at least 6 inchs of gravel or more in the bottome to allow the water to drain. Then poured $300 dollars worth of concrete, it is not so cheap. This was two years ago and I hear it has gone up. My free tower cost me $550 to set and the concrete leg sections with the tower came with the tower. Run three more ground rods (To help distribute the lightning) on the outside of the tower ring. You will need these rods with any tower.

Another thing you need to be aware of is that these towers do not have good wind loading. They are very light. I could not get a thrust bearing so made a sleeve using pipe. As I am only using it to support a dipole plus a 2 meter and 70 cm antenna; it works super. Standing on the top of the tower with a 10 to 15 mph breeze the top will sway about 6 inches. Structurally it is designed to with stand an 80 mph wind with loading. This is the same as most antennas are rated. Most of these towers are only rated for a wind load of 8 to 12 depending on the tower. My tower is rated at 12. My two meter, 70 cm array and mast are rated at 10. To give you an idea, a good size TV antenna is rated at 10. It mounts up rather quickly.

Another thing you need to consider is the rotor. This also adds to the wind load, but most importantly these tower tops will not handle a large rotor. A CDR 22, 45 or the older ham II will barely fit. The rotor sets close to the top. Even with a thrust bear or sleeve there is a lot of mast loading on the rotor. I used a CDR 22 for fast response and rebuilt the rotor using Ham II bearing set to handle the added force. My antennas turn in a 5 foot radius so breaking is not a problem. Some of these towers that are rated for ham use will have a wider base, cost more to install, but can handle a much larger wind load. The cost of installation will go up proportionally.

Rohm 25 will self support to 30 and if you attach to a building you can go to 40 or 50 feet depending on the building you attach to. Rohm 45 will self support to 50 feet for a light antenna and 40 with a medium

duty antenna. 45 is not easy to find, but you should be able to pick up 25 for $25 to $50 a section. It runs new for around $100 to $110 FOB. With the cost of fuel, shipping is getting pricey. If you attach to a building you can bury 1/2 a section in sand using bricks on the bottom to prevent sinking. The sand will set like concrete, but still allow you to remove the tower with out loosing the bottom section. You can pour a concrete base and use a base plate.

Crank-up towers require a rebar housing and the concrete is poured over this. The cost of this housing is around an average of 4 to 500 dollars and the cost of pouring will run about the same.

You will find the Rohm 25 is the best bang for the buck. Hope this give you some food for thought.

Subject: [BoeingRadioClub] tower?

Does any one know what I could expect to pay for a used 40' three legged tower? I'm looking for one that is not a crank up. Also, does any one know where one might be and who to contact about it? I don't have all that much money to spend on something like this, but if I can find a reasonable deal I would be interested.

When I was talking about Rohm prices I was referring to Rohm 25. When I wrote this, normally 3 legged tower is self supporting no guys and is Tri-ex. Rohm is also 3 legged, but is normally guyed.

# 415. 1 KW Emergency AC Generators $99

Yahoo group: BEARSAmateurRadioClub
Date: 2008-04-27 18:12:47 UTC
From: .--/---../.-../--
Topic: 415  Message: 415

I was at Attwoods on K15 Derby today. They were closing out on a 1 KILOWATT AC Generator for $99...THERE ARE 8 left, then no more.

I've seen these for $249, $199, $149, and $129...as they have dropped over the years to never more. These are imported, and require 50:1 gas-oil mix. 2 strokes will no longer be sold and these are the last of the 2 strokes. The industry is now selling synthetic, NO SMOKE 2 stroke oil, rated TC-W3 that is required in to use in California 2 strokes remaining.

This generator rated 10AMPS @120VAC and 10AMPS @12VDC with DC leads included.

I just inspected my kitchen fridge and it is 4.5amps, and I think it would be great for field days. Back east they are very popular in flea market parking lots.

I recall a club renting some Honda 5KW's for field day weekend and it was $50-80 back then for just a weekend. Field Days is coming...

I also have a 5KW Coleman, it burns 2.5 gallons per 8 hours. at today's cost, go figure. I figure a 1KW will burn 1/2gal per 8 hours. Plus it's a whole lot lighter. 2 stroke oil is cheep compared to gas theses days.

# 416. Things to know before using a generator.

Yahoo group: BEARSAmateurRadioClub
Date: 2008-04-28 12:43:27 UTC
From: Steffens, Kerry W
Topic: 415  Message: 416

These are very good generators for $99. Like all non-electronic safe generators care must be taken when using them. Some things you need to do before using them or any non-electronic safe generator:
1) Let them warm up and stabilize.
2) Check them for frequency and output voltage at rated load or at the load that you will be operating. There are some inexpensive testers on the market that can be bought to monitor these. I use light bulbs for the load rating that I will be using.
3) Don't let them run out of gas. As the gas runs out the voltage goes up with the speed.
4) Don't use one with a load governor. It will temporary over speed and take out your equipment.
5) Disconnect or turn off the equipment before shutting down or refueling.
6) Let the generator stabilize again after refueling.
7) Keep the generator a safe distance from the equipment or building. Remember it is a fire hazard.

Honda is electronic safe for generators up to 4 KVA. This means they generate DC and transform it to AC by means of a electronic board and a crystal oscillator. It is correct for frequency and voltage at any speed it can generate power. Be careful for Honda generators above 4 KVA as they need the same care as I mentioned above. Honda generators can be linked (synced) together for greater output capacity with a control cable.

First time in the season or use, be sure to test the voltage and frequency before you use it. Always let them warm up for at least 5 minuets before connecting to them. Check oil when you gas. Always start the season with fresh gas. Don't use any gas over 4 months old. If it takes a gas and oil mix, I renew it every 3 months. When mixing with oil, put in the oil first. Fill the can half full and shake to get a good mix. At a filling station the pressure from the hose will mix the oil. Just rotate the nozzle to mix evenly.

These generators are large alternators. At the point they change mechanically to the next ring they create a large spike. This can be seen with any good scope. These spikes can appear on some radios depending on the power supplies. Some switching supplies have problems with these. One way to control these is to use a well rated variact. The inductance in the variact will smooth the crossover spike.

RACES lost some very expensive equipment last year from the generator malfunctioning and over speeding. It had been working perfectly for 3 days. The generator was scrapped. It was replaced by a motor bought at Harbor Freight and a 100 amp car alternator. The alternator was

connected a car battery. All the equipment is now on DC, fused and zener protected. Me, I would rather have a Honda.

Remember when you hook your equipment to someone's generator or your own, it is your responsibility to make sure it is safe for your equipment. You need to be aware of what is required to be done to protect your gear. If the club or person you are with does not have the equipment to check the generator, bring your own. Everyone should have one at home and know what their equipment power equipment requirement are. Check before you use and check again at each refuel.

For what it is worth.

I would like to add a few comments to what Kerry has said.

One way to be able to insure that a generator does not put your equipment at risk is to run on deep cycle batteries for a few hours, then swap the battery, and use the generator to recharge the "spare" off line.

In a multi-station operation, such as Field Day, each station would need its own battery, but a small generator and one spare battery would be able to keep them all operating. Even after the fuel supply is used up, the stations can continue operations for a while.

Kerry W0ON and all,

Kerry makes some very good points. Many years ago at the Hazel Park (Michigan) ARC Field Days, they were running some "rental" generators...whatever happened, happened one of the 2 generators went down...it was a wet rainy day and a "newbie" know it all had a screwdriver out.

I remember it downed a TEN-TEC station, and 2 Kenwood rigs.

My station an ICOM 745 and couple of Heathkit tube rigs stayed on the air.

Why my ICOM??? I anticipated running out of gas or whatever..
My setup from the line cord was a Sears 20amp automatic battery charger, a car-RV deep cycle battery, then my rig as the rig was 12VDC..

Even today... Here in the shack I have a "cooler full of electricity"

It's a coleman cooler with 3 each 55amp hour gell cells for 165 amp hour total capacity. I found them surplus new and paid $75 for the 3- sorry back in New Hampshire.
On top of the cooler is a 400W AC inverter (usually off- it does have some hash I need to get rid of)) and on top of my roof are 2 20W solar panels. I also have sitting on the floor a microprocessor controlled Sears Battery charger. For the most part, short of a contest, the solar panels keep the batteries up.

For the cost of an HF rig power supply, a deep cycle battery and a automatic battery charger can be had. If the power goes out you'll have power, and a car battery makes a huge overvoltage protector.

Regards
Larry W8LM

# 431. BEARS Meeting replanned for next week due to weather

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-05 19:23:19 UTC
From: Harvey Jones
Topic: 431  Message: 431

To all:

The BEARS meeting is being canceled tonight due to potential weather concerns. The meeting is being rescheduled for next Thursday, same time.

Next meeting: 12 June 2008 at 5:00 same place.

Thanks

Stay safe

Harvey Jones

# 432. BEARS Meeting - Field Day!

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-09 16:18:02 UTC
From: Wing, Randy
Topic: 432  Message: 432

The BEARS meeting this week will take place on Thursday at 5:00 PM in room E203 in the 4509 building on the south side of 47th street between Oliver and K-15. Last weeks meeting was cancelled due to the severe weather.

Last minute preparations for Field Day are ongoing - there will be a report on that - please come to this meeting if you are coming to field day!

Interesting news: The Salvation Army will be visiting the Field Day site sometime during the weekend to offer cold drinks to the Greater Wichita Field Day group!

# 434. The June BEARS Meeting is canceled. A Field Day planning meeting will be held next week

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-11 22:15:52 UTC
From: Harvey Jones
Topic: 434  Message: 434

Due to traveling of the officers and Randy Wing unavailable for Field Day discussions, the June BEARS meeting is canceled. A Field Day planning meeting will be held next week.

The Field Day planning meeting notice will be sent out later this week.

Sorry for the inconvenience.

Harvey Jones

# 435. BEARS News - Please let us know if you are coming to Field Day!

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-16 17:52:51 UTC
From: Wing, Randy
Topic: 435  Message: 435

I apologize - non-Boeing Yahoo Group members did not receive the recent rescheduling/cancellation notices of the club meetings. I was on travel without my laptop and the manual distribution list I maintain was not available to the other officers nor to myself - so we could not send you notices. Nick Farlow met a few of you at the door and told you what happened - I encourage you to become members by going to http://groups.yahoo.com/group/BoeingRadioClub/ and making yourself a member of our email distribution there.

Several items to note:

1. Field Day -

A. Field Day meeting being held at 5:00 PM on Thursday, June 19th in the lobby of the 190z building (the building north of Jezzebel's on 47th street). Mandatory for field day captain's (send a representative or talk to me if you can't make it!); Recommended for everyone participating in Field Day.

B. Field Day setup begins at 12 noon on Friday, June 27th. Please REPLY ALL and let me know if you will be there for setup. I would like to have a team of about a dozen on Friday - but I absolutely need about half a dozen. I believe I have six people, right now: Harvey Jones, Randy Wing, Ben Wing, Samantha Wing, James Whitfield, and Logan Nispel. As you can imagine, it really helps to have a dozen... Let us know if you can help!

C. Field Day - please send me information about whether you intend to attend Field Day (Friday, Saturday, Sunday)... Please REPLY ALL.

D. Field Day - The Salvation Army will be bringing hamburgers and bottled water at 10 AM to 2 PM on Saturday... And it looks the Boy Scouts will be preparing breakfast on Sunday morning. Please provide a contribution - to each event by putting money in the coffee can that James Whitfield will provide for each event - we will donate to the Salvation Army and to the Boy Scouts for their efforts. We MUST have accurate head counts so each of these organizations will bring the correct amount of food. Also, James Whitfield is organizing supper for Saturday evening - It would be very good if he would purchase exactly what we need... So, we MUST have accurate head counts... Please REPLY ALL.... :)

E. Field Day - We need demonstrations - three of them - does anyone have any ham radio related demonstrations? Please REPLY ALL...

2. Jim Enix upgraded to EXTRA class at the Ham-Com hamfest in Plano, TX on Friday. Congratulations, Jim!

3. 50 mhz - 6 meters - is open to Europe!
http://www.vhfdx.net/spots/map.php?Lan=E&Frec=50&Map=W2L&mycall=&myloc=&freq=&prop=
Nick - setup that radio and antenna!

4. The Sidewalk sale is Saturday morning at the Radio Shack of Derby - I hope to see you there!

Randy and company,

I will not be there on Thursday as I have found that I need to take my wife to the Dr. for a post surgery follow-up.  I will need a stand in for 80m or someone else who really want to be a captain!

Thank you for the congratulations on my progress and I wish Sherry the best in her upgrade on Thursday.

I'm intrigued about the reference to Jezzebels to locate the meeting site!!

I hope to be there on Friday and most of the time, it is too far ahead to pin point my social event calendar to that detail. I'll see if I can confirm things with the social secretary before Thursday.

Will the lake guard be aware that a lot of non members will be entering?

A friend in Missouri sent me an interesting VHF propagation map, here's a link to it

http://www.mountainlake.k12.mn.us/ham/aprs/path.cgi?map=na

Several items to note:

1. Field Day -

A. Field Day meeting being held at 5:00 PM on Thursday, June 19th in the lobby of the 190z building (the building north of Jezzebel's
on 47th street). Mandatory for field day captain's (send a representative or talk to me if you can't make it!); Recommended for
everyone participating in Field Day.

B. Field Day setup begins at 12 noon on Friday, June 27th. Please REPLY ALL and let me know if you will be there for setup. I
would like to have a team of about a dozen on Friday - but I absolutely
need about half a dozen. I believe I have six people, right now: Harvey Jones, Randy Wing, Ben Wing, Samantha Wing, James Whitfield, and
Logan Nispel. As you can imagine, it really helps to have a dozen...
Let us know if you can help!

C. Field Day - please send me information about whether you intend to attend Field Day (Friday, Saturday, Sunday)... Please REPLY
ALL.

D. Field Day - The Salvation Army will be bringing hamburgers and bottled water at 10 AM to 2 PM on Saturday... And it looks the Boy
Scouts will be preparing breakfast on Sunday morning. Please provide a
contribution - to each event by putting money in the coffee can that
James Whitfield will provide for each event - we will donate to the

Salvation Army and to the Boy Scouts for their efforts. We MUST have
accurate head counts so each of these organizations will bring the
correct amount of food. Also, James Whitfield is organizing supper for
Saturday evening - It would be very good if he would purchase exactly
what we need... So, we MUST have accurate head counts... Please REPLY
ALL.... :)

E. Field Day - We need demonstrations - three of them - does
anyone have any ham radio related demonstrations? Please REPLY
ALL...

2. Jim Enix upgraded to EXTRA class at the Ham-Com hamfest in
Plano, TX
on Friday. Congratulations, Jim!

3. 50 mhz - 6 meters - is open to Europe!

It's a bit pre-mature as I'm still in the process of moving Grandma from WV to KS, but by the 19th I'll be firm with my commitment.

I will defiantly take the overnight 75 meters Midnight to dawn...

You can head's up us for the Boy Scout breakfast I'll have 4 in my party for that.

Could have the meeting at Jezzebels, no guard. Don't let your guard down.

I'm intrigued about the reference to Jezzebels to locate the meeting site!!

I hope to be there on Friday and most of the time, it is too far ahead to pin point my social event calendar to that detail. I'll see if I can confirm things with the social secretary before Thursday.

Will the lake guard be aware that a lot of non members will be entering?

A friend in Missouri sent me an interesting VHF propagation map, here's a link to it

The tone access on the Bears repeater is a little different than
Others When it was first installed we could enter 2 numbers with
A * and it would automatically dial our home number but I haven't
Used it for some time so I don't know what it works like now.
John in Ks. Maybe randy can tell you how to use it.

Andrea Bohl - our newest BEARS club member (and intern) was just issued KD0EKB as a call sign - listen for her on the 146.895- repeater.

For everyone using this repeater - be sure to key down for 4 seconds before talking to initiate the repeater functioning. It is called a pre-amble - and helps keep qrm from the Boeing factory off the repeater.

# 455. Greater Wichita Field Day - Instructions and Itinerary

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-23 23:07:14 UTC
From: Wing, Randy
Topic: 455  Message: 455

Thank you, everyone, for your patience!

Included at the end of this email is a near final draft of the itinerary for the Greater Wichita Field Day.

But first a few important notes:

1. Take my cell phone number with you. 316-371-2293. You never know when you might need it.

2. The SBEA Lake Guard Shack will let you into the SBEA lake Free if you say "I'm with the Field Day Group". Don't do this before 1:00 PM on Friday, June 27, 2008 or after 3:00 PM on Sunday, June 29, 2008.

3. We need people to help clean up at the end of Field Day - please plan on staying - it only takes about an hour - and it is a lot easier with 20 people or more - than it is with 3. Every year I have at least a dozen people - and it really is heart warming to know you guys cared enough to stay to help cleanup - Thanks!

4. If you don't pay to get into the lake - don't bring fishing poles... :)

5. There will be signs inside the lake to tell you where to go to find us - but trust me - it will be obvious.

6. I will take last minute attendees - but don't expect food. Deadline for letting me know you want food provided is Tuesday 5:00 PM.

7. The main Saturday meal is at 5:00 PM or so. Come to this meal if you don't come to any others!

8. Donations for the Saturday morning Salvation Army feed cannot be given directly to the Salvation Army. Look for the donation can in the building and we will donate the money to the Salvation Army. We hope you donate to the Salvation Army. All funds donated to them will go them.

9. Supper Saturday night is sponsored by the BEARS - if you want to donate it won't be turned down - but it is not required. Put your money in the pop fund jar in the refrigerator - we will use it to defray the costs of the rental, the food, and the pop.

10. We are going to collect orders for Sunday morning McDonald's breakfast - give your orders to James Whitfield by 8 PM Saturday night - or you may be on your own for breakfast! He will have a numbered menu. James is a facilitator but will need money with your order... :)

11. Friday activities are optional, but fun! Bring a deck of cards or a board game. You are welcome to camp overnight with us. There are bathroom and shower facilities within 30 yards of the air conditioned pavilion.

12. Recommend all stations have a handheld tuned to 146.535. We will try to communicate between stations that way.

13. Water and pop will be provided - please donate $0.25 each to defray the cost. Donation can in the refrigerator.

14. After coordination with your primary station captain - you are welcome to visit any of the 7 HF stations and the VHF station. We are operating 7A Kansas - our callsign is N0W - November Zero Whiskey. We are a special event station!

15. Please send digital pictures regarding Field Day to Randy Wing at n0ld@...t

Itinerary:

6/27 1:00 PM Friday Start setup at the Lake (we have about 15 people slated to help setup)

6/27 5:00 PM Friday Coordinate pizza orders (runner will go get the pizzas - bring a few $)

6/27 6:00 PM Friday Break for supper

6/27 7:00 PM Friday Everyone gets to know each other; bring a guitar if you have one

6/27 8:00 PM Friday Get On The Air (GOTA) Team introduced to Field Day operation techniques
All team members present are familiarized with the equipment
Harvey Jones records the Field Day Bulletin - watch him on 40m PSK
Roger Bailey records the Field Day Bulletin - watch him on 20m PSK

6/28 10:00 AM Sat Mandatory Team Captain meeting in the Pavillion
Request all team members be present for any last minute announcements
Salvation Army arrives to serve lunch - consider a donation within building
Last minute preparations finalized

6/28 10:30 AM Sat National Weather Service Personality - Chance Hayes - arrives

6/28 11:00 AM Sat Sedgwick County Commisioner Gwen Welshimer - arrives - request that anyone who talks to Gwen remember that we are

promoting ham radio and
nothing else. :)

6/28 11:30 AM Sat Demonstrations to Served agency members

6/28 12:45 PM Sat All team members report to your primary station
assignments - please
coordinate with each Station Captain on when you
can operate. Priority
will be given to morse code operators. Please
don't leave stations unattended.

6/28 1:00 PM Sat Field Day commences!

6/28 1:30 PM Sat Served Agency representatives depart

6/28 2:00 PM Sat Salvation Army Canteen departs

6/28 5:00 PM Sat Field Day Supper! Whoo Hooo! All leftovers
will go in the refrigerator for the
night crew

6/28 6:00 PM Sat Good time for the night operators to select
breakfast items and pay
James Whitfield for them

6/28 6-7 PM Sat Jim Enix and Jay Lies check into the Kansas Side
Band net on 80m and
sends a message to the Kansas Section manager
regarding Field Day

6/29 8:00 AM Sun You'd better have those breakfast items ordered
via James Whitfield - he is
leaving for McDonald's about then.

6/29 9:00 AM Sun Breakfast

6/29 12:00 Noon Sun Clean up of all non-Station Field Day equipment
and the area

6/29 1:00 PM Sun Field Day Ends - Cleanup of all antennas and
station equipment begins

6/29 2:00 PM Sun Cleanup Complete!

Andrea Bohl - our newest BEARS club member (and intern) was just issued
KD0EKB as a call sign - listen for her on the 146.895- repeater.

For everyone using this repeater - be sure to key down for 4 seconds
before talking to initiate the repeater functioning. It is called a
pre-amble - and helps keep qrm from the Boeing factory off the repeater.

Subject: [BoeingRadioClub] Greater Wichita Field Day - Instructions and Itinerary

Thank you, everyone, for your patience!

Included at the end of this email is a near final draft of the itinerary for the Greater Wichita Field Day.

But first a few important notes:

1. Take my cell phone number with you. 316-371-2293. You never know when you might need it.

2. The SBEA Lake Guard Shack will let you into the SBEA lake Free if you say "I'm with the Field Day Group". Don't do this before 1:00 PM on Friday, June 27, 2008 or after 3:00 PM on Sunday, June 29, 2008.

3. We need people to help clean up at the end of Field Day - please plan on staying - it only takes about an hour - and it is a lot easier with 20 people or more - than it is with 3. Every year I have at least a dozen people - and it really is heart warming to know you guys cared enough to stay to help cleanup - Thanks!

4. If you don't pay to get into the lake - don't bring fishing poles... :)

5. There will be signs inside the lake to tell you where to go to find us - but trust me - it will be obvious.

6. I will take last minute attendees - but don't expect food. Deadline for letting me know you want food provided is Tuesday 5:00 PM.

7. The main Saturday meal is at 5:00 PM or so. Come to this meal if you don't come to any others!

8. Donations for the Saturday morning Salvation Army feed cannot be given directly to the Salvation Army. Look for the donation can in the building and we will donate the money to the Salvation Army. We hope you donate to the Salvation Army. All funds donated to them will go them.

9. Supper Saturday night is sponsored by the BEARS - if you want to donate it won't be turned down - but it is not required. Put your money in the pop fund jar in the refrigerator - we will use it to defray the costs of the rental, the food, and the pop.

10. We are going to collect orders for Sunday morning McDonald's breakfast - give your orders to James Whitfield by 8 PM Saturday night - or you may be on your own for breakfast! He will have a numbered menu. James is a facilitator but will need money with your order... :)

11. Friday activities are optional, but fun! Bring a deck of cards or a board game. You are welcome to camp overnight with us. There are bathroom and shower facilities within 30 yards of the air conditioned pavilion.

12. Recommend all stations have a handheld tuned to 146.535. We will try to communicate between stations that way.

13. Water and pop will be provided - please donate $0.25 each to defray the cost. Donation can in the refrigerator.

14. After coordination with your primary station captain - you are welcome to visit any of the 7 HF stations and the VHF station. We are operating 7A Kansas - our callsign is N0W - November Zero Whiskey. We are a special event station!

15. Please send digital pictures regarding Field Day to Randy Wing at n0ld@... <mailto:n0ld%40arrl.net>

Itinerary:

6/27 1:00 PM Friday Start setup at the Lake (we have about 15 people slated to help setup)

6/27 5:00 PM Friday Coordinate pizza orders (runner will go get the pizzas - bring a few $)

6/27 6:00 PM Friday Break for supper

6/27 7:00 PM Friday Everyone gets to know each other; bring a guitar if you have one

6/27 8:00 PM Friday Get On The Air (GOTA) Team introduced to Field Day operation techniques
All team members present are familiarized with the equipment
Harvey Jones records the Field Day Bulletin - watch him on 40m PSK

Roger Bailey records the Field Day Bulletin -
watch him on 20m PSK

6/28 10:00 AM Sat Mandatory Team Captain meeting in the Pavillion
Request all team members be present for any last
minute announcements
Salvation Army arrives to serve lunch - consider
a donation within building
Last minute preparations finalized

6/28 10:30 AM Sat National Weather Service Personality - Chance
Hayes - arrives

6/28 11:00 AM Sat Sedgwick County Commisioner Gwen Welshimer -
arrives - request that
anyone who talks to Gwen remember that we are
promoting ham radio and
nothing else. :)

6/28 11:30 AM Sat Demonstrations to Served agency members

6/28 12:45 PM Sat All team members report to your primary station
assignments - please
coordinate with each Station Captain on when you
can operate. Priority
will be given to morse code operators. Please
don't leave stations unattended.

6/28 1:00 PM Sat Field Day commences!

6/28 1:30 PM Sat Served Agency representatives depart

6/28 2:00 PM Sat Salvation Army Canteen departs

6/28 5:00 PM Sat Field Day Supper! Whoo Hooo! All leftovers
will go in the refrigerator for the
night crew

6/28 6:00 PM Sat Good time for the night operators to select
breakfast items and pay
James Whitfield for them

6/28 6-7 PM Sat Jim Enix and Jay Lies check into the Kansas Side
Band net on 80m and
sends a message to the Kansas Section manager
regarding Field Day

6/29 8:00 AM Sun You'd better have those breakfast items ordered
via James Whitfield - he is
leaving for McDonald's about then.

6/29 9:00 AM Sun Breakfast

6/29 12:00 Noon Sun Clean up of all non-Station Field Day equipment and the area

6/29 1:00 PM Sun Field Day Ends - Cleanup of all antennas and station equipment begins

6/29 2:00 PM Sun Cleanup Complete!

I'm not 100% certain on if I can get over there but we cut back our hours today from 12 hour shifts to 8's. That is still on shaky ground and the weekends are anyone's guess! I love my job. I'll try my best to pop in for a couple hours and perhaps longer if I actually get a weekend. Don't worry about putting me on a meal sheet or anything.

Subject: [BoeingRadioClub] BEARS News - Please let us know if you are coming to Field Day!

I apologize - non-Boeing Yahoo Group members did not receive the recent rescheduling/cancellation notices of the club meetings. I was on travel without my laptop and the manual distribution list I maintain was not available to the other officers nor to myself - so we could not send you notices. Nick Farlow met a few of you at the door and told you what happened - I encourage you to become members by going to http://groups.yahoo.com/group/BoeingRadioClub/ and making yourself a member of our email distribution there.

Several items to note:

1. Field Day -

A. Field Day meeting being held at 5:00 PM on Thursday, June 19th in the lobby of the 190z building (the building north of Jezzebel's on 47th street). Mandatory for field day captain's (send a representative or talk to me if you can't make it!); Recommended for everyone participating in Field Day.

B. Field Day setup begins at 12 noon on Friday, June 27th.
Please REPLY ALL and let me know if you will be there for setup. I would like to have a team of about a dozen on Friday - but I absolutely need about half a dozen. I believe I have six people, right now:

Harvey Jones, Randy Wing, Ben Wing, Samantha Wing, James Whitfield, and Logan Nispel. As you can imagine, it really helps to have a dozen... Let us know if you can help!

C. Field Day - please send me information about whether you intend to attend Field Day (Friday, Saturday, Sunday)... Please REPLY ALL.

D. Field Day - The Salvation Army will be bringing hamburgers and bottled water at 10 AM to 2 PM on Saturday... And it looks the Boy Scouts will be preparing breakfast on Sunday morning. Please provide a contribution - to each event by putting money in the coffee can that James Whitfield will provide for each event - we will donate to the Salvation Army and to the Boy Scouts for their efforts. We MUST have accurate head counts so each of these organizations will bring the correct amount of food. Also, James Whitfield is organizing supper for Saturday evening - It would be very good if he would purchase exactly what we need... So, we MUST have accurate head counts... Please REPLY ALL.... :)

E. Field Day - We need demonstrations - three of them - does anyone have any ham radio related demonstrations? Please REPLY ALL...

2. Jim Enix upgraded to EXTRA class at the Ham-Com hamfest in Plano, TX on Friday. Congratulations, Jim!

3. 50 mhz - 6 meters - is open to Europe!

Randy and all

I will be down on Friday afternoon but it will be at least 4 - 5 PM before I can get there.

I also plan to attend Sat from around 10 until at least 2 or even a little later. It all depends on some other things going on at work.

I see the Salvation Army will be feeding on Sat please put down for that but I am pretty sure I will not be there late Saturday.

See you there.

Sam Patton

# 470. Field Day and the Weather

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-25 21:58:12 UTC
From: Wing, Randy
Topic: 470  Message: 470

Greater Wichita Field Day and the Weather

I've attached an excerpt of the weather forecast from the National Weather Service at the bottom of this email. Please note that rain and hail are possible this weekend. I will tell everyone in advance - we are taking great steps to stay safe for field day:

1. We have assigned Steve Heyroth, K5MNZ, to be our Field Day Safety focal. Steve will make the call on all safety issues - he has more control than I do - he will be involved in operating decisions and can veto any Field Day decisions based on safety. Safety First.

2. We will be monitoring the weather radio, the local TV stations, and the radio. We will keep all the station captains up to date with the weather status. Station Captains are responsible for informing their crews. We will disconnect all radios and radio equipment and bring them into the building for safe keeping. All external power generators will be stopped and disconnected from power. Station Captains will wait for the Safety focal's "all clear" to return to operation.

3. As soon as the storm is clear - we will assess the safety of operating inside the building and then outside the building. We will NOT operate equipment while standing in water or on wet ground.

4. I am recommending that everyone who plans on camping at the lake on Friday/Saturday night to still bring their equipment - but to plan on sleeping inside the building if it rains. We'll play each day by ear. Please bring some pads to sleep on - and if you have earplugs or the equivalent I recommend bringing them. Consider bringing additional clothing for comfort in case you get wet - or it gets cool. The building tends to be pretty cool.

5. If it clears up and you want to come out but don't know if we are operating, you are welcome to call me on my cell phone to find out.

Randy Wing, N0LD
Greater Wichita Field Day Coordinator 2008
316-371-2293 cell

--------- http://www.crh.noaa.gov/ict/hwo/hwo.php?day=1

.DAYS TWO THROUGH SEVEN...THURSDAY, JUNE 26th THROUGH SATURDAY, JUNE 28th

A FEW THUNDERSTORMS ARE POSSIBLE NORTH OF I-70 THURSDAY AFTERNOON. HOWEVER...THEY SHOULD BE NEITHER STRONG NOR SEVERE.

HEAT INDICES OF 100-104 ARE POSSIBLE BOTH THURSDAY AND FRIDAY AFTERNOONS IN SOUTH-CENTRAL KANSAS SOUTH OF HIGHWAY 400.

THUNDERSTORM POTENTIAL WILL INCREASE CONSIDERABLY FRIDAY AFTERNOON AND FRIDAY NIGHT...AS A COLD FRONT MOVES SOUTHEAST INTO CENTRAL KANSAS. THESE THUNDERSTORMS MAY BE SEVERE WITH LARGE HAIL...DAMAGING WINDS AND LOCALLY VERY HEAVY RAINS.

ON SATURDAY...THUNDERSTORMS ARE POSSIBLE OVER PRIMARILY SOUTH-CENTRAL AND SOUTHEAST KANSAS AS THE COLD FRONT CONTINUES ITS TREK INTO OKLAHOMA. ALONG AND SOUTH OF HIGHWAY 400 THE THUNDERSTORMS MAY BE QUITE STRONG WITH THREE QUARTER INCH DIAMETER HAIL AND WINDS AROUND 50 MPH.

For those of you INSIDE the Boeing firewall - this is the Field Day publicity release - click on attachment for Steve's publicity release and click for the 2nd page for the Governor's Amateur Radio Week proclamation.

I uploaded many of the Field Day Coordination files to the FILEs section of the Yahoo BEARS page...
http://groups.yahoo.com/group/BoeingRadioClub/

I also forwarded these files to the WARC for distribution to their general membership.

Steve Heyroth notified the media after clearing the publicity notice with Bob Egbert - president of the WARC.

Field Day preparation is finalizing! If you haven't met your FD captain yet - I've included their email addresses - please talk with them as required!

Computer Network Coordinator - Charles Rasico
10m Captain - Steve Canfield

15m Captain - Sherry Weir
20m Captain - George Pinick
20m Digital Captain - Roger Bailey
40m Digital Captain - Harvey Jones
40m Captain - Steve Heyroth
80m Captain - Jim Enix
Get On The Air (GOTA) Captain - Samantha Wing

# 479. Field Day

Yahoo group: BEARSAmateurRadioClub
Date: 2008-06-30 14:01:06 UTC
From: Wing, Randy
Topic: 479  Message: 479

I would like to thank everyone who contributed to this Field Day's success! I will be sending a more detailed message out - one with scores and pictures and such - I know you are all interested - me too! But I was way too tired last night to put it together!

In general, we believe we made more contacts than ever before!

I was very pleased to see that WARC was in excellent attendance at both Field Day and at the special dinner on Saturday night - despite the rainfall in the morning that threatened our on-time start time. But we indeed started on time!

Poor HF conditions hurt the Saturday voice HF scores - but overnight the HF conditions dramatically improved - and we were running between 70 and 130 contacts per hour most of the morning on Sunday!

Our overnight crew did very well - keeping the stations occupied and producing. A brief 10m opening on Saturday morning netted a couple dozen surprise contacts as well!

Thank you, again, more to come!

Randy Wing

# 480. Field Day SoapBox Summary - your view!

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-01 12:43:02 UTC
From: Wing, Randy
Topic: 480  Message: 480

Greater Wichita Field Day Participant -

I've recently asked the Field Day Captains to put together Draft Soap Box entries - one of the things I've asked them to do is to put together a list of all people who worked at each station during setup, operation, teardown, etc. Please send a note to each of the station captains where you contributed and note your contribution. If you have a friend who helped at a station and you think they might be overlooked, please send a note regarding that as well. It is OK to exaggerate your work at the station; it is NOT OK to understate it... :)

Also, we had many people attend briefly during Field Day or at one of the Field Day meals - but we didn't capture all of the attendees names. If you know of someone who fit in that category I ask you to send a note to me (do not reply all, please) with their names and their callsigns (if you know it). I want to make sure we include everyone!

> Thank you!

# 481. Field Day 2008 Apologies....

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-01 15:21:39 UTC
From: .--/---../.-../--
Topic: 481  Message: 481

This year I was not at my best. Considering I came from a club that consistently places in the top 10---that's top ten ALL CLASSES..

Personal obligations limited my participation this year. Some of you were made known of those earlier in the year.

Last year I made a promise to build a few antennas, help out etc...

Family obligations prevented that. We had just returned with grandma in the rocking chair in the back of the pickup from West Virginia. Well, by next year, we should have the WV place sold. etc.

Therefore let me apologize for letting the club down, both in hardware and labor.

I am now going to make amends by offering to the club, more participation and and offer to design and build a "kick butt" antenna for 75 meters.

I operated the last 2 FD's over night on 75 meters. Our antenna is all wrong... We installed a "cloud burner" it radiates straight up...(any dipole under 1/2 wave in height above terrain does)

That just doesn't make it on 75 meters over night because the majority of FD stations are NOT LOCAL... Kansas only has a population of 3.3 million. About the same as New Hampshire. New Hampshire is just 10 counties!

We need a low angle radiator, get our signal down on the horizon, not up in the clouds. Last 2 years we hardly heard east of the Mississippi. I know from living there there are tons of Field Day sites.... they are all on 75 at night...I've been FD'ing for 40 years.

I have been using antenna modeling programs since the government released and K6STI rewrote NEC for PC's in 1991.

I have extensive modeling experience and currently use EZNEC. My offer to the club is to model, build and use an antenna and that uses the baseball backstop as a counterpoise as it sits there just outside the 75 meter tent.

I would like the opportunity to do that as well as perhaps make privy to the club over the next year my plans and progress. Since we're at the sunspot null, next year should be equal to 2007 and we have statics from 2008 as well. I believe that gives us a base line to work from to validate improvements.

As sunspots return and band conditions improve, I also have a 4 square steerable array for 15 meters. I would also like to toss that into the mix. I have used that before in Michigan and it is VERY effective with 6db gain and 30 db front to back..

So if apologies accepted can I proceed, or do we vote to black ball me for yet another club??

> Thursday July 3, 2008

Is this real or just a robot message? My recollection is that due to
Field Day no regular monthly meeting is held in July.

James

From: Randy Wing
Topic: 485  Message: 485

No matter what the latest automatic BEARS meeting notice proclaimed - there is no July meeting this week.

A long time ago, we decided not to have a July meeting because of the proximity to Field Day. The next regular meeting will be on August 7, 2008. See you then!

Randy Wing, N0LD

From: Randy
Topic: 481  Message: 486

Larry,

We appreciate the offer and we look forward to what you come up with on 80m. We are always looking for improvements. I think comparing the FD scores we get with it compared to the past two years scores is a good comparison. But you might be surprised what our 80m results turn out to be. We had coast to coast contacts on 80m.

Randy, N0LD

Subject: [BoeingRadioClub] Field Day 2008 Apologies....

This year I was not at my best. Considering I came from a club that consistently places in the top 10---that's top ten ALL CLASSES..

Personal obligations limited my participation this year. Some of you were made known of those earlier in the year.

Last year I made a promise to build a few antennas, help out etc...

Family obligations prevented that. We had just returned with grandma in the rocking chair in the back of the pickup from West Virginia. Well, by next year, we should have the WV place sold. etc.

Therefore let me apologize for letting the club down, both in hardware and labor.

I am now going to make amends by offering to the club, more participation and and offer to design and build a "kick butt" antenna for 75 meters.

I operated the last 2 FD's over night on 75 meters. Our antenna is all wrong... We installed a "cloud burner" it radiates straight up...(any dipole under 1/2 wave in height above terrain does)

That just doesn't make it on 75 meters over night because the majority of FD stations are NOT LOCAL... Kansas only has a population of 3.3 million. About the same as New Hampshire. New Hampshire is just 10 counties!

We need a low angle radiator, get our signal down on the horizon, not up in the clouds. Last 2 years we hardly heard east of the

Mississippi. I know from living there there are tons of Field Day sites.... they are all on 75 at night...I've been FD'ing for 40 years.

I have been using antenna modeling programs since the government released and K6STI rewrote NEC for PC's in 1991.

I have extensive modeling experience and currently use EZNEC. My offer to the club is to model, build and use an antenna and that uses the baseball backstop as a counterpoise as it sits there just outside the 75 meter tent.

I would like the opportunity to do that as well as perhaps make privy to the club over the next year my plans and progress. Since we're at the sunspot null, next year should be equal to 2007 and we have statics from 2008 as well. I believe that gives us a base line to work from to validate improvements.

As sunspots return and band conditions improve, I also have a 4 square steerable array for 15 meters. I would also like to toss that into the mix. I have used that before in Michigan and it is VERY effective with 6db gain and 30 db front to back..

So if apologies accepted can I proceed, or do we vote to black ball me for yet another club??

Let me begin by saying that I speak for myself, as a member rather than as the Current Past President of the BEARS.

I see nothing for which you need apologize. Amateur radio is a hobby to be enjoyed, not an obligation that must interfere with family and work.

I think that we had a very successful Field Day, none of the antennas fell down in spite of the rain and very soft ground, I didn't see as much sun burn this year, and we had fewer leftovers when it came time to clean up. Oh, and we also were able to combine the efforts of the BEARS, WARC, and some non-affiliated HAMs. Come to think of it we had a great Field Day!

Since we have had good service out of the 15M downspout vertical for two years, I hope that your four square can provide the needed characteristics as the band conditions improve in the new cycle. I will offer the downspout to anyone willing to try a 40M digital station. Better yet, I may try to re-tool the idea into a more portable version.

Don't get me wrong, I am sure that you will find interest in the improvement of the 75M setup. 75M is "not my thing", this is my letter, and I will let someone who cares about the raw score decide if effort on 75M antennas will net more points than 15M. So far I have found that if I want to build an antenna and try it out at Field Day, the BEARS have always welcomed it, and me. Come to think of it, I never did get that 160M built, much less stretch it over the lake. I guess I let the club down on that one.

Best Wishes

James

# 493. Ham Equipment for Sale

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-07 18:08:17 UTC
From: nlfredrickson
Topic: 493  Message: 493

Hi,
I am Nancy Fredrickson, daughter of Denys Fredrickson W0BMW.
Denys passed away last October. We are gearing up for a sale of his equipment. The following is a partial listing.

We will be having a garage sale July 18th and 19th @
3923 E. Funston
Wichita

If anyone is interested, you need to let us know that you are a ham operator when you come to the sale. This equipment will be in his shack, not out for the public.
After the sale, it will probably go to Radio Shack in Derby for consignment.

ICOM IC-781 serial #01094 Est current value around $1500

ICOM IC-730 serial #09094 Est current value $175.

IC-271A serial #02477 - 25 watt VHF all mode radio $200.00

ALINCO DR-600 serial #H002077 value approximately $100.00

AEA AT-3000 antenna tuner - value approximately $50.00

Heath SB-221 Linear Amplifier with manual. $665

Heath SB-610 Monitor $50.00

Tri-EX 55' crank up tower with antenna and antenna rotator. Estimated value $500 (has to be taken down.)

# 496. 2008 IARU HF World Championship

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-11 17:23:11 UTC
From: Wing, Randy
Topic: 496  Message: 496

http://www.arrl.org/contests/rules/2008/iaru.html

If you enjoyed field day and are licensed for HF - (even Technicians can operate between 28.3 - 28.5 mhz voice) - you may want to consider participating in this weekends big international contest - the IARU HF World Championship. Even if you aren't competing, this is an excellent place to obtain some international contacts! Start/Continue your way to achieving 100 countries (DXCC)!

The contest begins at 6 AM CDT on Saturday and goes through 6 AM CDT on Sunday - 24 hours. The exchange is a signal report and your ITU zone. The ITU zone for the Wichita area is "7". So your exchange would be: "59 7". People in the Caribean would say "59 11" and there are a TON of countries in that zone. Mexican contacts wil be "59 10"; Canadians will range from "59 2" through "59 5" and "59 9". The US ITU zones are 61 for Hawaii, 1 and 2 for Alaska, and 6,7,8, and 9 for the continental US. Puerto Rico will be 11, Guam will be 64.

There is an excellent free piece of software called DXVIEW that can help you identify zones... http://www.dxlabsuite.com/dxview/. It is part of a larger piece of free software called "DXLAB". I highly recommend this software if you are interested in contesting or DXing.

Please reply to me if you participate in the contest this weekend!

# 500. Nanotubes

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-13 16:56:50 UTC
From: Randy Wing
Topic: 500  Message: 500

http://www.physics.berkeley.edu/research/zettl/projects/nanoradio/radio.html

Nanotube vacuum tubes - very small vacuum tubes - less than 10,000th the width of a human hair. FUNCTIONAL! Think of the applications for monitoring the inside of the human body, nuclear reactors, aircraft engines with the emerging nano-sensor applications. It also may lower the cost of amplifiers - but I think we are a ways away from that. but who knows? Now here is a really sobering thought - what will this do to classified program security? Imagine listening devices that are even smaller than the ones today? To be truly secret - perhaps we are back into the realm of tempest tanks and white noise generators? (and what about the cone of silence aka Maxwell Smart?) :-)

Carbon nano-tubes have also been described as one of the hardest substances identified yet - A whole host of applications for new superstrong metals is emerging. One of the most interesting is the space elevator. A space elevator would lower the cost of going into orbit down to 1/100th of the current cost per pound - or lower. BUT imagine the safety precautions. :-) http://en.wikipedia.org/wiki/Space_elevator One interesting point in the link is that a space elevator is even more practical on moons and Mars - where the gravity is less.

Ok, I know that Steve Heyroth is going to send a cute pithy one liner that ties this to knife edge refraction, but I thought I'd sent it anyway.. ;)

From: Jim Williams
Topic: 497 Message: 502

Along with zero sunspots, there is a hint of a double minimum from ARRL's propagation forecast.

I've been following the zero sunspot stories, wonder if it means a hot place might freeze over?

ARRL article:

QST de W1AW

Propagation Forecast Bulletin 29 ARLP029 From Tad Cook, K7RA Seattle, WA July 11, 2008 To all radio amateurs

SB PROP ARL ARLP029

ARLP029 Propagation de K7RA

Another week, and still no sunspots. The three month moving average for daily sunspot numbers that we began reporting toward the end of cycle 23 seemed to suggest retrospectively that solar minimum occurred last fall. The daily average for the three month period centered on last October was nearly 3, or 2.967 to split some hairs.

This is an average of the 91 daily sunspot numbers from September 1 through November 30.

Following that low, November was 6.85, and between December 2007 through April 2008 the 3-month average drifted from 8.14 to 8.89.

With remaining cycle 23 spots becoming increasingly rare, and barely any cycle 24 spots, this suggested solar activity was stalling out.

Then at the end of June, a further decline, when the 3-month average centered on May dropped to 5.04.

Randy Crews, W7TJ of Spokane, Washington has an interesting observation regarding a possible double-minimum between cycles. He was looking at some charts of past sunspot cycles in W3ZZ's World Above 50 MHz column on page 90-91 in the February 2008 issue of QST.

Randy wrote, ''I noted the average period from a cycle's peak declining to its low is on average 7 years. So, linking that to our current cycle's progress, things get interesting: If you count from the 1st cycle 23 peak (April or July of 2000) we are at the 8 year mark now and past due. However, cycle 23 had a second peak November/December of 2001. We have not yet reached the 7 year mark if you count from peak #2 and that would coincide perfectly with Ken's article. Interesting enough, the NOAA propagation charts predict this fall as being the real pickup''.

When Randy mentions ''Ken's article'', he is referring to Dr. Kenneth Tapping of the Dominion Radio Astrophysical Observatory in Penticton, British Columbia, the source of our daily 10.7 cm solar flux numbers. Following a widely circulated false quote attributed to Tapping, we made available his notes on the cycle minimum to anyone who sends a blank email to SunspotMin@.... That offer still stands, and to date over 1,100 copies have been dispatched to readers who sent an email to that address.

Randy also mentions ''NOAA propagation charts'', but I suspect he means tables of predicted smoothed sunspot numbers. Those can be found at http://www.swpc.noaa.gov/ftpdir/weekly/Predict.txt and on page 8 at http://www.swpc.noaa.gov/weekly/pdf/prf1714.pdf.

So what do zero sunspots mean for HF propagation in mid-July? From my home in Seattle, the path to Japan has a Maximum Usable Frequency that varies from a low of 13.1 MHz at 1630z to a maximum of 16.8 MHz at 0530z. To Hawaii, the lowest MUF is 11.3 MHz at 1200z to highest of 17.2 MHz at 0500z. A further example is Texas to Brazil, with MUF ranging from 6.4 MHz at 0900z to 20.8 MHz at 0200z. That is all a very narrow range. With an average sunspot number of 100 for that Texas to Brazil path, low of 18.2 MHz at 0900z to 29.7 MHz at 1730z and 2100z, enough to support good 10 meter propagation.

Sporadic-e propagation on 10 and 6 meters generated more mail this week.

Jeff Hartley, N8II of Shepherdstown, West Virginia sent the following report on July 4.

''Just a quick note to mention the 6M condx on June 27-28. Around 2000Z on the 27th the Es opening began on 50 MHz here.

''I had very bad luck getting any Europeans to answer my CQ and my Euro footprint was pretty small to northern F, PA, southern G, and EI. I worked a total of about 6 stations in the mentioned countries. There were a few weak signals persisting past 2200Z (heard MM0AMW).

''Most all of the activity was on CW, long live CW!

''Saturday morning, June 28, I turned on the radio to find loud Italians all over the 50.080-50.100 segment at 1320Z. I worked quite a few in the I-4 call areas. There was a loud IZ1 who couldn't hear 3/4 of the stations calling him and I heard a weak I7.

''I worked a total of about 15 stations over 45 minutes or so and again there was surprisingly much more activity on CW than phone.

This time, I did get a few CQs answered. Also heard were S57RR, 9A1CCY, and a 9A6, but the pile-ups were big and unruly on the first

2 guys. K1HTV near DC missed the S5 due to two callers out of turn.

I would have persisted, and not let the ''breakers'' in if I were the DX''.

Joaquin Montoya, EA2CCG says on June 30 there was a nice 10 meter opening to the Caribbean with Martinique booming in, and Ecuador also. July 2 had him working his first 6 meter sporadic E skip, with a dozen European stations out to about 1500km. They were all from Poland, Denmark and Germany.

Russ Hunt, WQ3X on Kitner Hill in Upper Black Eddy, Pennsylvania mentioned on July 6 that there were great 6 and 10 meter openings on June 27-28.

He wrote:

''On 6-27 I worked the following stations on 10M SSB:

2337 LA0EM

2340 4O3A (59+)

2343 EA1ALE

2348 MW0JZE

2350 MM0SJH (59+)

''Many of these stations said they had to go to bed but didn't want to! The band remained open the following morning and most of the day.

''On 6-28 I worked two stations on 10M CW:

2152 EA7UU

2156 IT9EJW (called me after I finished with EA7UU and we went up 1 for a short exchange)

''It was amazing and really lifted my spirits!! I was running an FT-1000MP with Collins 30S-1 amp at about 1KW output into a 5 element monobander (105-BA) at 50 feet. My elevation here on Kintner Hill is about 600 feet.''

Russ heard about the 6 meter reports on a spotting network.

Jon Jones, N0JK had a July 4 report from Kansas:

''I worked TO5E (St Barts) 6 meter DXpedition on July 4!! I was operating portable in the Flint Hills of eastern Kansas from a hilltop with a 2 el Yagi and 100 watts.

''I first heard TO5E on 50.108 around 1350 UTC. Weak residual almost like scatter. He gradually built up and I heard them work K0RU EM28 on CW. Then I got through. Some QSB and I worried TO5E would drop out before finishing the QSO! But got my 559 fine and they confirmed.

''TO5E continued to build and at 1410 UTC was solid on SSB. By 1425 UTC TO5E peaked well over S-9! Oddly TO5E had few callers, CQ'd many times. I also worked KP4SQ and Julio, NP3CW at 1430 UTC.

''KP4SQ had a bigger pileup on him than TO5E did. Go figure!

''I called Larry, N0LL and my wife N0HKT on my cell phone and let them hear TO5E.

''This was the first decent Carib. Es opening I have caught this year. The opening acted more like F2 than Es in that I heard no stateside signals at first. Only the Carib. DX. Later the K4MHZ/b

FM25 appeared.

''TO5E has had some other good openings to the USA including July 1 when they worked all the way to VE7.''

Greg Andracke, W2BEE of Pine Plains, New York wrote:

''After about 52 years as a CW operator on the lower HF bands, the mention yet again in your bulletin of the activity on 6 meters prompted me to get the radio out of the closet and hook it to an HF ground-mounted vertical to see what would happen on 6.

''With a match in the 2:1 range and about 100w out, I worked N5GW, W5DNT and K5FA in short order on 7 July 08 from FN31ew at about 0045Z. Enough fun to get me to eventually put a Yagi on this band!

Scott Avery, WA6LIE of Salinas, California seemed to be very excited when he wrote to us on July 7. Why? More six meter propagation, of course.

Scott is in grid square CM96, and on July 7 he said 6 meters was ''HOT!'', from 2300-0500z. He was working East Coast stations from Pennsylvania to Florida, ''and everywhere in between''.

He worked many CN85-87 (Western Oregon and Washington), and had many pileups from CN85 (Portland, Oregon). For 6 hours, after swinging the beam to the east, he worked many upper Midwest and New England stations in EN and FN.

He didn't hear Japan, but he noticed Chip, K7JA working Japan around 0000z on 6 meters CW.

While writing the email, he said he was working K5HCT in Odessa, Texas at 0535z.

At 0610z he wrote to say six meters was still open, and he was having a long QSO with KJ6AP in Vancouver, Washington, but it was time to go to bed.

WA6LIE has set up his station to be operated remotely by others.

Details are on http://www.remotehams.com/

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/. Monthly propagation charts

between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/. Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for July 3 through 9 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 65.5, 65.4, 65.1, 66.1, 65.5, 65.5, and 66 with a mean of 65.6. Estimated planetary A indices were 4, 4, 7, 4, 3, 2 and 4 with a mean of 7. Estimated mid-latitude A indices were 3, 3, 7, 5, 2, 1 and 3 with a mean of 3.4.

While I wish that I had the eloquence that you have come to expect
from Steve Heyroth, I will have to settle for a comment on your story.

I reviewed the link about the nanotube radio, what I found there
suggests to me that your characterization of them as "vacuum" tubes
is perhaps misleading. Certainly they are not what came to my mind
when I read "very small vacuum tubes".

I want to point this not to criticize the way you described it (
which did hasten my effort to read the article ) but rather to point
out that this seems to be a significantly different technology. From
what I read it seems to be as different from vacuum tubes or bipolar
transistors,or field effect transistors. It is a new technology with
a new future.

There is a line about oldies like me not keeping up, but I can't seem
to make sense of it.

Best Wishes

I'm with you James, it isn't tubes or transistors, it does have some of the trappings of surface acoustic wave devices, I'm not sure that technology is being pursued much anymore. There was an article awhile back (I haven't a clue how far) that described the use of nanotubes for computer memory.

I wonder how you really put nanotubes together to build Arthur C. Clarks elevator to synchronous orbit?

Quick note before I begin, there is an alternate sugestion that uses a rotating cable system and counterweight that does not require synchronous orbit.

It may be a long stretch of my imagination to try to think like a an engineer a few hundred years in the future, but here is what comes to my mind:

I see carbon nanotubes as long molecular filaments which will need to be bound together to form long threads. Perhaps the recipe can be controlled well enough that the tubes have "barbs" so they will not slide past each other ( maybe an extra large atom trapped periodically in the nanotube molicule, maybe a sequence of electromagnetic poles that will attract another 'tube in the proper alignment... I told you I was stretching my imagination.... ). It would also help if the 'tubes had a high probability of self repairing if the molecular structure gets damaged by radiation.

Anyway, a manufacturing process in orbit for threads, then cables, would be necessary. The threads would need some form of protective overcoating, if the function is not provided by the "binder" needed to hold the threads together. The cables would need to assembled into a size that can be transported, probably not long enough for the full span, which means some attachment on the ends. Probably not strong enough for the entire load, so they need to be ganged together. The number of cable sets would need to increase as you get closer to the "synchronous" altitude to hold up the weight of the system.

This will then require a transportation system to bring the raw materials to the manufacturing site ( or sites ) and transport the cables to the construction site. The "economy" of space travel is such that it may actually be "cheaper" to produce the threads and cable at the source of raw material, say the asteroid belt, than to lift the finished product from the surface of the Moon ( certainly

better than lifting from the Earth ).

The cables would need to be assembled into a structure, probably in such a way that cables could be replaced should they be damaged -- which also suggests the need for standard size(s) and a depot for spares.

Many ideas. Hard to summarize in one note.

KANSAS CITY, Kan. - A 66-year-old man and his son are electrocuted while trying to put up an antenna behind a home in Kansas City, Kan.

Police said the men were electrocuted in the mishap Sunday afternoon outside their home, where high voltage electric lines hung over the backyard. A metal antenna similar to those used by ham radio operators lay on the ground near the rear property line.

Neighbor Deneka Kirkwood said she heard a loud pop at about 1 p.m., and 15 minutes later a little was pounding on her door saying, "Please help me. My father and grandfather are dead."

Kirkwood's brother, Byron, and a neighbor tried to administer CPR to the men until emergency crews arrived, but it was too late.

The men's names have not been released.

# 509. QELF?

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-16 16:09:25 UTC
From: n5gui
Topic: 509  Message: 509

Randy (N0LD) and the group:

http://www.arrl.org/news/features/2008/07/15/10212/?nc=1

I read the above article on the ARRL website and it reminded me of an oddball idea ( more oddball than most ) that I had at an Earth Day activity the BEARS had a few years ago. Note in the article, a gigantic Morse Code Key was built and used to attract attention and promote amateur radio.

The idea came to me when the BEARS were set up to demonstrate amateur radio during Earth Day in a location across from the Sedgwick County Zoo's elephant compound. During a break in the demonstrations to the attendees at Earth Day, I watched the elephants and thought that a picture of an elephant with its foot on an oversized telegraph key would certainly attract a lot of attention. I didn't follow up, either by building the large key or asking the zoo if such a picture would be permitted.

Reading this article, I was reminded of the idea and even tacked on a Q code for the caption. The article included the classic, if tongue in cheek, "QLF?" which is reported to mean "Are you sending with your left foot?" The picture I had in mind would document "QELF" as messages sent by an elephant's left foot.....

Best wishes.

They have eliminated the morse code requirement, so maybe a giant Morse Code Key would attract a lot of attention.

As city leaders look to address speeding in the Stone Lakes subdivision off Taylorsville Road, one neighborhood boy is taking it upon himself to hold speeders accountable.

Advertisement<http://www.courier-journal.com/graphics/adlabel_horz.gif>

After numerous complaints about speeders, Metro Councilman Stuart Benson commissioned a traffic study for the area. "We probably get 10 calls for speeding there for every one in any other neighborhood," said Angela Webster, Benson's legislative aide.

In the meantime, 11-year-old Landon Wilburn got an idea. He and his friends had often yelled at speeders to slow down, to no avail.

Then last month, Landon began pointing a Hot Wheels-brand radar gun at them and charting their speeds. The orange radar gun, which costs $30 to $40 at toy stores -- although Landon traded toys with a neighbor for his -- can clock the speed of almost anything from baseballs to cars.

Landon also began wearing an orange safety vest and carrying a battery-operated flashlight with a built-in siren.

George Ayers, 61, who lives on Stone Lakes Drive, said he could not believe his eyes when he first saw Landon with the radar gun. He initially didn't recognize the boy and, judging by drivers' reactions, he thought he might be a police officer.

"When I saw it happening, I got the biggest kick out of it," Ayers said. "People were locking up their brakes when they saw him."

Ayers, who knew Benson had received lots of complaints about speeding in Stone Lakes, told him, "You wouldn't believe what Landon is doing."

The speed limit on nearby Taylorsville Road is 55 mph, but Landon found that several drivers approached that speed through his neighborhood, where it is posted at 25 mph.

The city's traffic study found there were enough speeders on Stone Lakes Drive to meet the standards for adding speed humps, which force drivers to slow down. They are flatter and wider than traditional speed bumps.

The Metro Council recently adopted a policy for speed humps, and the first two sets have been installed on Sudbury Lane between Breckenridge and Hunsinger lanes, and on Trail Ridge Road off Barbour Lane.

Preliminary approval has been given for four speed humps along Stone Lakes Drive, although 70 percent of its residents must sign a petition before they are installed, Webster said.

Each speed hump and its accompanying signs and markings cost about $1,800. Benson's office would use neighborhood development money to pay for half, but the developer or the homeowners association will have to pay the rest.

Ayers said he will sign the petition.

"We have tried everything else," he said, including putting up signs, talking about it in the neighborhood newsletters and asking police for more patrols on the street.

Landon's parents, Bryan and Julia Wilburn, moved to the subdivision 10 years ago, and many developments have sprung up around them off Taylorsville Road between the Snyder Freeway and Tucker Station Road.

"It has grown a ton and the traffic has gotten progressively worse," Julia Wilburn said.

They have eliminated the morse code requirement, so maybe a giant Morse Code Key would attract a lot of attention.

<http://www.arrl.org/news/features/2008/07/15/10212/?nc=1>

I read the above article on the ARRL website and it reminded me of an oddball idea ( more oddball than most ) that I had at an Earth Day activity the BEARS had a few years ago. Note in the article, a gigantic Morse Code Key was built and used to attract attention and promote amateur radio.

The idea came to me when the BEARS were set up to demonstrate amateur radio during Earth Day in a location across from the Sedgwick County Zoo's elephant compound. During a break in the demonstrations to the attendees at Earth Day, I watched the elephants and thought that a picture of an elephant with its foot on an oversized telegraph key would certainly attract a lot of attention. I didn't follow up, either by building the large key or asking the zoo if such a picture would be permitted.

Reading this article, I was reminded of the idea and even tacked on a Q code for the caption. The article included the classic, if tongue in cheek, "QLF?" which is reported to mean "Are you sending with your left foot?" The picture I had in mind would document "QELF" as messages sent by an elephant's left foot.....

Best wishes.

A friend who taught me a lot about the practical aspects of ham radio (Bill Fortune, W5LX, silent key for years) was a sparks operator on a freighter in the Pacific before WW1. He was telling me about the commercial spark gap station in Bombay, India. It had everything keyed using a really long straight key. The way it was rigged the key gap was over a foot, the spark crashed and arced almost the full length of travel and you could hear the crash of the arc about as far as the radio could reach. After his first typhoon he quit , moved back to Arkansas and started repairing Model T cars for a living.

Two things to start.

1. From the article, the key was scaled up from the size of a round wooden stool seat that was to be used for the knob. Therefore we should look for a suitable knob.

2. We need someone to talk to the Zoo to find out if they would permit us to setup the photograph with an elephant.

# 515. Field day comments at the Board of County Commissioners Meeting

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-20 04:02:09 UTC
From: Terry
Topic: 515  Message: 515

County Commissioner Gwen Welshimer made some comments on our field day activities at the County Commissioners meeting on 2 July 08.
Here are some links.

This one should take you right to the meeting video. It is located at about 1:14:50 into the session, almost at the end.

http://sedgwick.granicus.com/MediaPlayer.php?view_id=2&clip_id=1589
<http://sedgwick.granicus.com/MediaPlayer.php?view_id=2&clip_id=1589>

If not, the list of all the recent meeting is at the following link.
Look for 2 July 2008.

Subject: Heart Spring bike ride + MS 150 bike ride.

Hello Everyone

I would like to invite everyone to help out on one or both of these bike rides.
If you know someone that wants to help please forward this email to them or give them the info.
You can send me an email or give me a call. I need to know how much help I have for both rides.
My contact info is below.

HeartSpring bike ride Aug 24. 0700 to 1200 Lunch will be served
This ride takes about 10 people to do it the right way.
The equipment for this ride
2 meter mobiles work the best.

MS150 bike ride Sept 13 and 14 0700 to the end of the day.
They do serve lunch and a great dinner on Saturday.
This ride starts in Derby and will stop in Winfield that night, then return back to Derby on the 14th.
If you can put in a few hours, That will be a big help
This ride takes about 15 people to do it the right way.
The equipment for this ride
2 meter mobiles work the best.

Thanks to all

This is a draft of the SOAPBOX entry. Many of you contributed - and I don't remember your name - please take a moment to respond with any additional notes and your name (if ommited or misspelled). I appreciate everything you did for field day!

Randy Wing, N0LD

The Greater Wichita Field Day (GWFD) - 2008

An Introduction by Randy Wing, N0LD

Over 60 people from the Boeing Employees Amateur Radio Society (BEARS), Wichita Amateur Radio Club (WARC), Salvation Army Team Emergency Radio Network (SATERN), and SKYWARN joined forces for a very successful Field Day weekend! The rainy weather on Saturday morning and slow contacts all day Saturday were the challenges we faced. A special event callsign - N0W - November Zero Whiskey - was chosen to commemorate our combined field day and to have an easily remembered callsign. Thank you to everyone who contributed, attended, encouraged, and provided help during field day!

(I want to let everyone know that I am sorry in advance for omissions - the mistakes are all mine.) Please send me a note and I will correct it before I upload it to the ARRL Soapbox.)

Setup - Friday

Setup began at 1:00 PM on Friday, June 27th and went on until we had a barbeque supper prepared by Samantha Wing and Evan Fischer about 5:30 PM. We continued setup after that until about 8:00 PM and then took a break for ice cream at Braum's. We put up antennas, radios, and tents for 10m, 15m, 20m digital, and 40m digital. The extension cords were run to the tables and the planned positions of the generators. Our generators were turned on and tested. Charlie Rasico setup the network router and we setup the computers inside the air conditioned pavilion for testing. Roger Bailey setup his 20m digital station - and wow, is it complete! Roger's truck is well equipped - but he didn't use those antennas - he setup a very tall multi-band vertical - his own generator, and an air conditioned tent complete with TV - oh and a digital ham radio station.. J The GOTA team - with some advice from their Elmer (Randy Wing) - setup the GOTA equipment. The people that assisted during the Friday setup included: Roger Bailey, Steve Canfield, Nick Farlow, Evan Fischer, Catherine French, Harvey Jones, Charlie Rasico, Dan Rasico, Dexter Schnebly, Ben Stranghoner, Sherry Weir, Ben Wing, Randy Wing, Samantha Wing, James Whitfield, and Mary Whitfield. The temperature was in the 90s as was the humidity - the tents were absolutely miserable during the night - so my GOTA members persuaded me to setup our sleeping bags on air mattresses in the air conditioned pavilion.

Setup - Saturday

Saturday morning began with the sound of thunder as Sherry Weir woke the GOTA team up. We hurriedly woke everyone up and got everyone in the tents to safety. The station captains secured their stations. As people slowly trickled and the slow drizzle and lightning continued throughout the morning the station captains began to worry that we might not be able to start field day on time. About 11 AM however, the lightning had stopped; the storm moved on. Everyone scurried to setup the 20m beam, the 40m dipole, and the 80m near-vertical-incidence antenna. The captains who had waited until Saturday morning to setup were pressed for time - but we got everything DRIED in the transmission tents before we turned the generators on! The 20m beam had a problem - the elements hadn't been tightened sufficiently and a high SWR forced a takedown and a re-tightening.

6-Meter Station

Captain: Randy Wing. Four contacts! Three local! A 4 element 6m beam at 10 feet with a 25 watt Ranger 6m mobile radio.

10-Meter Station

Captain: Steve Canfield. Loyd Williams, Randy Wing, Nick Farlow, Jim Enix, Charles Rasico. A 10m Ringo Ranger at 35 feet netted a handful of contacts on Sunday morning.

15-Meter Station

Captain: Sherry Weir. Andera Bohl, Dexter Schnebly, Jack ?, and Everett Hastie. A 15m vertical - made from a downspout (lovingly engineered by James Whitfield) served on 15m. Like 10m, 15m was slow - but it picked up a little on Sunday morning.

20-Meter Station

Captain: George Pinick. Charles Davis, Charlie Hill, Jim Kernan, Jay Lies, James Macioniski, and Phil Tatsukawa. Ten Tec Omni D radio with a 3 element 20m beam with an Armstrong rotator. When we started to operate, the VSWR on 20M was 5:1. We had to take the beam down to find the problem - the hardware on the connections to the driven element were only "finger tight". After the aluminum tubing and connecting straps were polished with steel wool, the connections were put back together. Eureka! A VSWR of 1.5:1 !! We hoisted it back into the air with less than an hour lost performing the antenna maintenance.

20-Meter Digital Station

Captain: Roger Bailey. Roger had a unique station - a pickup truck towing a large enclosed trailer that contained a tent with plywood sides, an air conditioner, a TV set, a wi-fi internet antenna to reach into our main computer almost 100 yards away. Roger also demonstrated an impressive compressed air tennis ball launching device that shot a tennis ball about 100 yards with ease - designed to put a line over a tree. Roger made over 100 PSK-31 contacts on 20m. Roger recorded the ARRL message, too.

40-Meter Voice and CW Station

Captain: Steve Heyroth. Andrea Bohl, Charles Davis, Nick Farlow, Catherine French, Terry Gattis, Jimmy Macioniski, Phil Tatsukawa, Thomas TBD, and Jimmy Williams. The 40-meter station was situated at the west end of the operating area. Setup was delayed by rain and thunder on Saturday morning, but progressed quickly once begun. The KC0IFQ 40-meter dipole was supported in the center by a 30-foot aluminum mast, and at the ends by 15-foot fiberglass masts. Participating in setup were James N5GUI, Steve K5MNZ and TBD.

Rig was the K5MNZ Icom 706 and LDG autotuner, running 100 watts powered by the quiet K5NN Honda generator. Primary mode was Voice. Operators included two out-of-town visitors, Phil and Charles, who were in Wichita for a square dance convention that occurs annually on the same weekend as Field Day. Their tradition is to find a Field Day site and combine their dancing with some guest operating. Nice to have you, guys. The band was noisy and crowded Saturday afternoon but much quieter (but still 40 meters!) Sunday morning. Jimmy N8NCC operated at a 100+-QSO-per-hour rate for long stretches of Sunday morning and really pumped up our score and section count. Andrea KD0EKB made her first HF contacts ever. Nick KB0YHT kept the position on the air throughout the night, alternating voice ops with Jimmy K5NN operating CW. Most of the time we had one person operating and one logging, and I really came to appreciate our electronic logging program and wireless-linked server.

Sunday morning passed quickly with good band conditions and plentiful operators. Teardown was accomplished expeditiously by James Whitfield, Bill Benton, Jimmy Williams, and Steve K5MNZ.

40-Meter Digital Station

Captain: Harvey Jones. Andrea Boh, Jack TBD. The system was manned the entire event, with slightly over 100 contacts in the 24 hour period. Harvey used his FT-857 and auto-tuner with a Hy Gain vertical antenna that stood about 30 feet tall. Harvey recorded the ARRL message, too.

80-Meter Station

Captain: Jim Enix. Ron Cowan, Nick Farlow, Larry Macionski, Woody Thompson, Loyd Williams, and several walk-up field attendees. The radio was an ICOM 756 PRO II and a 102 ft long dipole in an inverted V configuration with the peak at 30 feet and the ends about 5 feet off the ground. Ben Stranhorner, Jim Kernan, Lloyd Williams, Charles Rasico, James Whitfield, and Randy Wing, were instrumental in getting this station operational and packing it away. A highlight of the event was Ron Cowan, KB0DTI, KS Section Manager, operating CW and voice for a good portion of the night and morning. Ron used our 80m station to run the Kansas Net on Sunday morning.

We had antenna-tuning problems with the ICOM, which was resolved by the use of an LDG tuner. In the end we made contacts across the US and Canada. The furthest contact was with a station in Hawaii in early Sunday morning - not bad for a "compromise" antenna!

Next time I believe that a sheet of plywood would be a benefit to those of us who are lucky enough to find gopher holes with chair legs. I also would like to have a sign in sheet for those who work the station. I apologies to those who I missed this time. Because of the 80m antenna problems several offers have been made to provide a better antennas for the station. If all works as claimed next FD will be great on 80m.

Based on lessons learned from 2007 we made sure that the station had a key this year. It did come in handy Sunday morning. My thanks to Ron Cowen for his CW skills and taking time from his family to visit various field day sites.

Antenna setup/take down

Roger Bailey, Jim Enix, Evan Fischer, Steve Heyroth, Harvey Jones, Joey Jones, Jim Kernan, Logan Nispel, Charles Rasico, Jack TBD, Ben Stranghoner, Sherry Weir, James Whitfield, Mary Whitfield, Jimmy Williams, Ben Wing, Randy Wing, and Samantha Wing walked the grounds, loaded vehicles, and ensured the building was swept and clean. Cleanup began about noon and completed about 3 PM. It was wonderful having so many stay to finish the event!

Food

Evan Fischer and Samantha Wing prepared a meal hosted by Randy Wing on Friday night. The Salvation Army donated a meal on Saturday morning. James Whitfield and Mary Whitfield organized a (BEARS hosted) 60 person supper event for Saturday evening and a smaller Sunday morning breakfast feed. Leftovers from these meals were enthusiastically raided from the refrigerator through Field Day. Asking for an (optional) $0.25 donation for each bottled water or pop actually resulted in our beverages breaking even this year!

In Summary.

Every Field Day we learn a few new things as we progress up the learning curve and make higher scores. Sometimes we re-learn things that we should have learned last time. J Here are just a few:

1. We need a dedicated CW station - we had several CW operators who would have operated had they not had to kick off some of the voice operators.
2. The GOTA antenna was too close to the 20m voice and the 20m digital - there was a lot of interference. This severely limited the number of GOTA contacts in comparison to years past.
3. Improve our antennas every year - we didn't have two dipoles for 40m and it would have helped! We knew our 80m antenna could be improved, but somehow we just didn't have the time.
4. Captains noted that signing up operators for band-time-slots would be a good best practice.
5. A dinner bell should be rung when food is served! A coffee pot should be operational at all times!
6. A sheet of plywood as a floor is a good recommendation for future

station captains.
7. A signup sheet - so that each captain knows who operated and when - would be a good addition in the future.

In spite of some challenges, by combining our local clubs Field Day events into the Greater Wichita Field Day we had some true successes!

1. Sherry Weir provided a SKYWARN display that provided a good show and tell for visitors.
2. Taking field day pictures at planned times during the event was a super idea - I'm sure we'll get wide exposure. We had pictures of the Saturday morning attendees, SATERN attendees, and SKYWARN attendees. They will be available by the first week of August from a server - so that you can download any that you'd like.
3. By posting our Field Day location into the ARRL Field Day location finder, ham attendees at the National Square Dance competition drew in hams from California (K6PMT - Phil Tatsukawa) and Texas (KD5KOD - Charles Davis) to our field day event!
4. Similarly, a few new hams found our GWFD event and learned about field day!
5. No one went hungry! Food was plentiful and was well received by everyone - in fact, our attendance peaked during the Saturday evening barbeque!
6. Gwen Welshimer, Sedgwick (Kansas) County Commisioner attended around noon on Saturday. Gwen met with Chance Hayes (Wichita, KS National Weather Service) and learned how vital amateur radio is to the NWS and to the local community. Chance noted that the number of SKYWARN affiliated ham radio operators has grown to over 125 this year. Chance explained how SKYWARN operators are linked to the NWS by amateur radio and provide valuable on-the-spot observations that contribute to timely severe weather warnings to the public.
7. Gwen Welshimer also noted that the Salvation Army van had attended in the morning and fed the GWFD team lunch - a reverse "served agency"! (Field Day attendees passed the hat - a good sized donation was made to the Salvation Army).
8. Gwen Welshimer, on 3 July 2008, briefed the Sedgwick County Commissioners on her visit to our GWFD site and on the value that ham radio volunteers provide to the local community through their served government agencies. You can see video of this at about 1:14:50 into the session, almost at the end.

<http://sedgwick.granicus.com/MediaPlayer.php?view_id=2&clip_id=1589>
http://sedgwick.granicus.com/MediaPlayer.php?view_id=2&clip_id=1589

9. The local ABC Affiliate, KAKE, interviewed a few Field Day attendees - the spot was shown on the 6 pm news on Saturday, June 28, 2008!

Nice job, Randy

A couple of comments
You have me on the 40 Meter team and I was not able to do anything for
it this year.
Please remove me.
The County Commission meeting was on 2 July, not 3 July.

Thanks again for a nice writeup.

Terry K9TAG

Captnkliegle is Kriss Kliegle KA1GJU... a buddy of mine, W1WQM repeater guy and editor of the Port City Long Wire Newsletter of the Port City Amateur Radio Club.

The flying boat is right now flying in Upstate NY having left New Hampshire.. I do not know the destination..(OSHKOSH maybe???) I wanted to post this ASAP..

In real life Kriss is a pilot for American Airlines ...He flys a lot of Logan (Boston) to Hethro (London) Chicago and Dallas..His Older Brother has the Boston to the Virgin Islands gig!..what nice duty...

# 523. Cool your shack -Give away...Air Conditioner

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-26 17:19:36 UTC
From: .--/---../.-../--
Topic: 523  Message: 523

I have a 17500 BTU 220VAC Sears Kenmore air conditioner.

Digital read out and REMOTE CONTROL ...Mfg. date 4/02

Uses R-22 It was working great till Tuesday when it quit cooling.. it runs, you can adjust temp... then the compressor kicks in for 2 seconds kicks out and the fans run till you unplug and start over...

Bar room lawyers have told me it's just low of freon and needs recharging, as it's been wall mounted since I bought the house..

I don't have the tools or the time. Phone calls to repairmen, told me 4-5 days and a $98 show up fee..so that evening I just went to Sears and bought at $499 replacement. Because Jimmy's 81 year old grandma is living with us and has health problems especially in 100 degree WX...

So I've got it on Wichita Cheep Cycle for $50... The electronic controller on the web sells for $138..the "dual starter capacitor" is 98 bucks etc...

I figure a ham that likes to tinker has some air conditioning gauges and access to R22 can get it running.. Like I said, I had to keep Grandma cool. So I made a split decision and threw money at the problem.

bonafied HAM....come and get it before it sells on Wichita Cheep Cycle.. that's a Ham give Away...I need to get it gone. BTW--does not fit in a Camary trunk.. got pickup? It's 26x18x24 and about 60-80 pounds. I also have the new window mounting "curtains" from the new one, I replaced a wall mounting.

# 525. Greater Wichita Field Day - N0W Scoring Package Submitted & Soapbox Entry Posted

Yahoo group: BEARSAmateurRadioClub
Date: 2008-07-28 11:41:53 UTC
From: Randy Wing
Topic: 525  Message: 525
Attachments: 1 described; binary payloads are missing from this source WARC

I submitted the Greater Wichita Field Day scoring package to the ARRL this morning. Complete with evidence for all of the bonus points. Total score was 4522 points - the highest Field Day score we have achieved yet!

I also finished the complete Soapbox entry and posted it to the ARRL web site. If for some reason this attached link doesn't take you to the soapbox for our field day - try a search on (N0W).
http://www.remote.arrl.org/contests/soapbox/?con_id=155 I included a composite list of "lessons learned" from this years Field Day - if you have others, please email them to me.

I've included a chart that shows the scores over the past several years.

Here is a 2008 breakdown of QSOs by band:

N0W KC0MTM (GOTA)

6m Phone 4

10m Phone 16

15m CW 18

15m Digital 3

15m Phone 42 15m Phone 11

20m Digital 108

20m Phone 227 20m Phone 5

40m CW 44

40m Digital 102

40m Phone 323 40m Phone 48

80m Phone 96

Respectfully submitted,

Randy Wing, N0LD

Greater Wichita Field Day Coordinator 2008

# 527. BEARS Meeting - reminder!

Yahoo group: BEARSAmateurRadioClub
Date: 2008-08-03 00:01:07 UTC
From: Randy
Topic: 527  Message: 527

On Thursday, August 7, 2008 at 5 PM in Room E203 of 4501 Bldg. on the south side of 47th St. a couple of blocks west of Oliver St. the BEARS will meet.

Three items are on the agenda:

1. A speaker from KG&E will speak regarding wind power.

2. Charlie Rasico will demonstrate the new BEARS website.

3. A little information on Field Day will be discussed. Bring your ideas for improvements for next year...

The club provides cookies and soft drinks at the meeting. All BEARS Members, friends, and relatives are welcome to attend.

Randy Wing, N0LD

# 539. Apartment for rent -Antenna's possible...

Yahoo group: BEARSAmateurRadioClub
Date: 2008-08-29 13:51:52 UTC
From: .--/---../.-../--
Topic: 539  Message: 539

A ham (IVAN WB0WJM) widow friend told me she had a 1 bedroom apt. to rent again. I asked her about Antennas...here is her answer:

Larry,
I do not have a problem with a Ham radio antenna as long as it does not interfere with my or the neighbors TV's & phones. Ivan's would bleed over sometimes when I was on the phone or watching TV. The rent will be $575 & includes Trash, Cable & wireless internet

This is so close to the 13th Street Riverside cafe Saturday morning breakfast you can walk to it. It is 1 bedroom and has a finished basement that has plenty of ham radio storage...perfect for a shack that's bigger than a bedroom. It would be perfect for a single guy or couple..I routed the cable and did some fixup last year...

I think the heat/central air is shared as well.

Call me for further-

Larry W8LM

# 540. Club Meeting and Steve Heyroth

Yahoo group: BEARSAmateurRadioClub
Date: 2008-08-31 20:58:59 UTC
From: Randy
Topic: 540  Message: 540

The BEARS Club meeting is this Thursday night, September 4, 2008 at 5:00 PM in room E203 of the 4501 Building. There will be a program on digital communications - more on that this week.

*** Very Important ***

Steve Heyroth is retiring on 26 September 2008. His wife Cathy has invited the BEARS to a retirement party at 6:30 PM on the same day. The location and details will be announced later - however, I would like to ask EVERYONE in the BEARS to please attend the BEARS meeting on September 4, 2008. We will be taking a group photograph of the BEARS at this meeting to give to Steve Heyroth as a retirement memento. Please come! We will take the photograph early in the meeting to avoid conflicts with those that have to leave early.

Thanks,

Randy Wing, N0LD

# 543. Jamboree-on-the-Air Support For October - NEED HELP

Yahoo group: BEARSAmateurRadioClub
Date: 2008-09-01 17:29:11 UTC
From: jones_hg
Topic: 542  Message: 543

To all:

Last year 9 Amateur Radio operators demonstrated the hobby of Amateur Radio to over 291 WEBELOS Scouts at the Quivira Council WEBELOS Woods, which happened to be the same weekend at Jamboree-On-The-Air (Scouting world wide gets on the radio and tries to make contact).

Take a look at what we did last year. I placed last year's writup in the newsgroup.

The planning is now underway for this year.::::::::::::::::::::::::::::::::::::::::::::::::::::::::

WEBELOS Woods and JOTA will again be the third weekend in Oct (17th, 18, 19th), with radio activity happening only on the 18th. Location is again Camp Kanza. The camp is currently closed for remodeling, but they will open it up for this event.

----> I need volunteers to help make this event a success for the boys. We will be seeing 2nd year WEBELOS that will remember us from last year and a new flock of 1st year WEBELOS that haven't see us before. Also this is a big event for the Council with new Packs visiting each year. Just think.... one boy some day will remember your kindness and instruction in Amateur Radio and become a HAM.

James Whitfield (N5GUI) has been our past years "Professor", standing up in front of each group of WEBELOS. James has other commitments this year and will pass his educational material on to another "Professor". I need a volunteer to be the new "Professor". Their primary job is to provide some simple facts and answer questions while we cycle boys through the stations to make a contact.

THE NEED:
1. I need names and shirt sizes (Staff Shirts) by 8 Sept. I can still take volunteers after that time, but the shirts will be ordered

2. I need someone to step up and become the new "Professor". We will help, you will not be alone.

3. I also need folks to man 2M at home. With the 82 repeater unreliable, we will look into another Wichita repeater that we can reach from Camp Kanza, stay tuned. The WEBELOS need to talk with someone. I will be generating a schedule and hope many sign up.

You don't have to be a BEARS member to become part of the fun. The key is to share the experience of Amateur Radio to as many scouts and parents as possible.

Please send me an Email below or call me if you wish to volunteer or have questions.

# 545. Sharing a moment

Yahoo group: BEARSAmateurRadioClub
Date: 2008-09-01 19:01:45 UTC
From: Randy
Topic: 545  Message: 545

I'd like to thank Jim Enix, KC0QIE and Ben Wing, KC0YJI for helping me for 6 1/2 hours yesterday. We put up a 10 wavelength (33 ft) 2m beam at 107 ft on my tower. I had to basically dismantle the top of my tower to get the beam on top - and then re-assemble it all. Ben made 3 trips up and down the tower and helped hold and lift the 70 lb HF up and down the mast. Jim did all the ground rigging and lifting with ropes and pullies. We had several neighborhood observers - and a lot of slow traffic by the house. So we had to watch our language - I only swore once - and that was when my finger tried to go inside the top of the tower with the mast. :)

I've been able to hear a Dallas, TX beacon on 2m (1.5 watts)!

This morning, with the 29 element 70cm beam and the 10 wl 2m beam, I was able to achieve my FIRST Hawaii contact via AO-07.

So, thanks again to my helpers, and we are ready for the September VHF party!

Randy Wing, N0LD

Wow guys sounds like you all had a blast out there! I may have to drive over towards your place and check out that antenna. Shoot I probably can see it out the back window if the tree wasn't in the way.

Subject: [BoeingRadioClub] Sharing a moment

I'd like to thank Jim Enix, KC0QIE and Ben Wing, KC0YJI for helping me for 6 1/2 hours yesterday. We put up a 10 wavelength (33 ft) 2m beam at 107 ft on my tower. I had to basically dismantle the top of my tower to get the beam on top - and then re-assemble it all. Ben made 3 trips up and down the tower and helped hold and lift the 70 lb HF up and down the mast. Jim did all the ground rigging and lifting with ropes and pullies. We had several neighborhood observers - and a lot of slow traffic by the house. So we had to watch our language - I only swore once - and that was when my finger tried to go inside the top of the tower with the mast. :)

I've been able to hear a Dallas, TX beacon on 2m (1.5 watts)!

This morning, with the 29 element 70cm beam and the 10 wl 2m beam, I was able to achieve my FIRST Hawaii contact via AO-07.

So, thanks again to my helpers, and we are ready for the September VHF party!

Randy, with a project that size what did you leave off so you had to lower the antenna to fix it right the second time? I've always had to I think!

# 548. 5 wavelengths vs 10 wavelengths

Yahoo group: BEARSAmateurRadioClub
Date: 2008-09-02 21:06:51 UTC
From: Randy Friend
Topic: 548  Message: 548

I recently sent out a note to the BEARS that claimed my new 2m antenna was 10 wavelengths. It is actually 5 wavelengths.  I apologize for the error.  The actual antenna is an M2  2M5WL http://www.m2inc.com/index2.html

33 feet = 5 wavelengths x 2m/wavelength x 1.093 yards/m x 3 feet/yard.

Sorry for the error, I was so excited - it just SEEMED twice as big.  :)

From: Steffens, Kerry W
Topic: 545  Message: 554

Unless you operate or have operated VHF/UHF with this kind of antenna it is really hard to explain. If you are a person that thrives on DX then you can understand the thrill of this kind of operation. Long hours but the rewards are great. You are doing something that only a few can do. When I lived in KC during the 70s I called the SWOT Net. Every Wednesday night I worked 9 states. My max was 14 states in a single evening. About the same height as Randy. 110 feet.

http://home.swbell.net/wd5djt/

As far as the tower is concerned, you sure learn really quick to have a jin pole with a rope and bucket. A long ways down to retrieve that bolt you dropped. Back in the 70s we called they guys that worked towers - Tower Monkeys. During that time, I got my extra spending money putting up Rohn and Triex towers. To answer Jims question, you didn't forget the second time up. Your memory improves each time you climb it. Not sure if it was the fresh air or the number of steps up. :-)

# 557. RE: Sharing a moment AND VHF/UHF contest this weekend!

Yahoo group: BEARSAmateurRadioClub
Date: 2008-09-08 14:52:31 UTC
From: Wing, Randy
Topic: 545  Message: 557

Jimmy,

I didn't have to re-lower the mast to fix it... (in the past I have had to) I did a LOT of preparation on the ground - I even wrote up a script of steps involved to execute this antenna change out. I'm glad i didn't know it was going to take so long - OR I might have broken in up into two separate days on the tower.

I received the 70 amp power supply in the mail on friday - so the 200 watt 2m amplifier is now fully powered (with headroom for a future 300 watt amplifier). Looks like it will be an interesting VHF contest this upcoming weekend. I encourage all members who have SSB or FM capability to be on the air at 1:00 PM on Saturday - the contest goes through 10 PM on Sunday evening. If anyone else is going to be "on" for the contest, let us know!

If you do operate FM simplex - it is important to note that you cannot use 146.52 or the adjacent 145.505 and 146.535 frequencies. I recommend calling on 146.55. 446.000 is the FM calling frequency. Rules can be found here: http://www.arrl.org/contests/rules/2008/sepvhf.html

# 569. Congratulations K5WIV

Yahoo group: BEARSAmateurRadioClub
Date: 2008-10-08 20:19:21 UTC
From: Wing, Randy
Topic: 569  Message: 569

Congratulations to BEARS Member Jack Sargeant (K5WIV) for passing his Extra exam in August! He did it without studying - he took 5 practice exams - all of which he passed without studying. Great job, Jack!

Randy Wing, N0LD

# 570. October BEARs Meeting - Minutes

Yahoo group: BEARSAmateurRadioClub
Date: 2008-10-08 20:40:25 UTC
From: Randy
Topic: 570  Message: 570

BEARS and friends:

The 2 October 2008 BEARS Meeting was quite interesting! The meeting started promptly at 5:00 PM.

1. Discussion of the Wichita Area Hamfest scheduled for 8 AM on October
4th at 2349 N. Amidon

2. Requests for help for the Boy Scout Jamboree On The Air (JOTA) - we
still need help as follows (contact Harvey Jones):

a. On the afternoon of October 17 (setup and preparation at Camp Kanza)

b. All day on October 18
1) helping boy scouts get on the air (both at Camp Kanza and at
home),
2) teaching 10-12 year olds about ham radio,
3) takedown

3. We discussed the shack and the potential for the Boeing Auxilliary
Communication Service (BACS) to provide an avenue for the Security folks
to want us with them... In work.

4. We seriously need volunteers for officers. We have a core of active
members who have worn out the term limits on officer-ships. If you would like to help us, please contact me - Randy Wing, at 316-371-2293
or via email at n0ld@.... (If you think someone should be volunteered, do the same.) I ask you to seriously consider performing
this service for the club - these roles are NOT time consuming - perhaps
4 hours of dedicated meetings and 2 hours of coordination/paperwork (beyond going to club events). President, Vice-President, Treasurer, Secretary positions are open this year. If we don't get nominations, I
am going to call YOU and ask YOU to volunteer.

5. Mark Breicheisen (KB0MOF) gave a really nice presentation on how the

Radio Shack of Derby came about, how he came to own it, and some of the
issues facing ham radio today (new & young hams needed - discounts for
learning material - talk to him, availability of used radio equipment,
and the analog to digital TV transition in February).

6. George Pinick (WA0GNC) gave an involving presentation on how to
diagnose and repair an ASTRON Power Supply. Lots of circuit analysis,
discussion of potential problems, repair strategy and tactics.

7. Next months presentation (6 November 2008) will be provided by Bill
Briles (W0OQC) on the new AMSAT Satellite.

8. Randy Wing, Harvey Jones, and James Whitfield discussed the efforts
they are making to prepare for 2009 Field Day by providing an automated,
computer driven way to decode/encode morse code to enhance our score on
80m, 40m, and 20m. The club is purchasing a kit for James to put
together so that we can prove the concept in advance.

9. The BEARS Banquet is scheduled for 4 December 2008 at Spears West
(4323 W. Maple near Towne West). Steve Heyroth and his wife will be
attending - if you missed your chance to say goodbye when he retired,
this is your last best chance.

10. Mark Breicheisen (KB0MOF) sponsored a drawing for an ARRL World
Map. It was drawn by: George Pinnick.

11. The club sponsored a doorprize for $10 at the Derby Radio Shack.
It was drawn by: Steve Schroeder.

We had 13 attendees - I'd like to request that everyone make a good
attempt at attending next month's meeting - this month's meeting was a
real joy!

# 571. Fw: Latest BEARS information

Yahoo group: BEARSAmateurRadioClub
Date: 2008-10-13 01:45:40 UTC
From: Harvey Jones
Topic: 571  Message: 571

To all:

I am in need of help at WEBELOS Woods this weekend. I need at least 2 or 3 more licensed Amateur Radio operators to keep 4 stations going. So far I have the following volunteers:

Harvey Jones
Randy Wing
Samantha Wing
George Pinick
Dexter Schnebly

If I left you off, let me know ASAP.

I also have 3 un-licensed helpers. I need 2 people per station.

The professor job is also still open. If we can't find someone to help as professor, one of us will take the job and that makes the 3 additional people that much more needed. Please look at your schedule next week and see if you can find time to spread the word of Amateur Radio to a group of scouts.

Just think, one of them may become an operator some day.

Harvey Jones

# 574. Jamboree On The Air - WEBELOS Woods - Need help from those at home.

Yahoo group: BEARSAmateurRadioClub
Date: 2008-10-17 02:58:10 UTC
From: jones_hg
Topic: 574  Message: 574

JOTA 2008

Hutchinson Kansas WEBELOS Woods JOTA

Over 350 WEBEOLS attending WEBELOS Woods will have an opportunity to talk on the Radio. We need as much help from those at the other end as we can get. Each boy will get 2 to 3 minutes on the radio. We will be cycling through them all.

Start time is 18 Oct from 9:00 AM Central to 6:00 PM Central.

We will get a new flock of boys every hour.

We will try the Scout JOTA frequencies first every hour, unless we have an ongoing QSO.

Please join us:

Band SSB (Phone)
80M 3.690 & 3.940 MHz
40M 7.090 & 7.190 MHz
20M 14.290 MHz

We will also be talking on local repeaters for Wichita Kansas:

Band FM Comments
2M 146.61 MHz Newton ARC, IRLP hook-up
2M 146.895 MHz BEARS
2M 146.82 WARC
2M 146.94 TEC-NI-CHAT

Thank you for your help

Harvey Jones

From: Jim Williams
Topic: 574  Message: 575

Harvey, out of the ARRL DX bulletin:

WAZILAND, 3DA0. David, GI4FUM and Daniel, ZS6JR will be QRV as 3DA0DJ and 3DA0EI, respectively, until October 27. In addition, Daniel will be active as 3DA0JOTA during JOTA

EGYPT, SU. Look for special event station SU8JOTA to be QRV from the Cairo International Scout Centre during JOTA.

TUNISIA, 3V. During JOTA, look for 3V8SM to be QRV from Djerba Island, IOTA AF-083, as well as 3V8CB, 3V8SQ and 3V8ST.

There are probably more like these, all listed are all African stations, 20 meters might be worth looking at, especially in the morning up through early afternoon

I'd think that talking to an African station would be a first class thrill

Jim

Weekly BEARS 146.895- Net
Tuesday October 21, 2008
8:00 pm - 8:15 pm
(This event repeats every week.)
Location: 146.895- Repeater

Notes:
The BEARS/Wichita, KS weekly on-the-air net takes place on the BEARS repeater located near the Boeing campus. Please tune to 146.895- mhz. for the net. All licensed amateurs are encouraged to checkin to the net. If you would like more information on the BEARS, please go to our club website: http://boeingradioclub.org/

IN THIS ISSUE

* Get The Throat Lozenges <> Ready - ARRL Phone Sweepstakes

* When the Echo's <> Q5...That's Amore - ARRL EME Contest

* NCJ News Returns by <> K0AD

* Post Your CQ WW SSB <> Photos

* 2008 Field Day Results <> Now Online

* Keeping That PC Clock <> Synced Up

* What Does It <> Mean?

NEW HF OPERATORS - THINGS TO DO

Why not drop a note to your high school or college club and encourage them to make some QSOs in the Collegiate ARC Championship? By participating in ARRL Sweepstakes, school clubs can go head to head with other clubs, just like on the gridiron.

BULLETINS

Dave G4BUO reports that he is handling the EU Sprint logs, following the demise of Paolo I2UIY as reported earlier. If your log isn't listed on the EU Sprint Logs Received page, please resend to eusprint@....

BUSTED QSOS

Your editor is embarrassed to have busted Midge K7AFO's call, name, and everything else in the October 15th issue of this newsletter's caption for the photo of I2UIY (SK).

CONTEST SUMMARY

Rules <> follow Commentary section

November 15-16

* ARRL Sweeptakes, Phone

* Collegiate ARC Championship, Phone

* ARRL EME Contest

* JT 50th Anniversary Contest

* RSGB 1.8 MHz Contest, CW

* PSK63 QSO Party

November 22-23

* LZ DX Contest

NEWS, PRESS RELEASES, AND GENERAL INTEREST

Welcome back the National Contest Journal News by Al Dewey K0AD, as the Nov/Dec issue completes his first year as editor. This current issue includes "Simplifying the Four-Square" by G3LNP, "Distributing Receiving Antennas" by K3NA, and "Tips for Tuning a Full-Size 160 Meter Vertical" by WX0B. N6XI updates his review of the increasing popular Elecraft K3 after adding the latest options. K0AD provides a first-hand report on the very successful Dayton Contest University 2008 including some interesting plans that K3LR and the CTU staff have for 2009. Rounding out the features in this issue are an article by W5WZ on "The Birth of the Louisiana Contest Club" as well as a useful tip by N4TZ/9 on "Solving the Long Rotator Cable Problem for Larger Rotators". NCJ prints complete contest results for the popular North American QSO Parties (NAQP) and Sprints--the Nov/Dec issue includes results for the July 2008 RTTY NAQP. Rounding out the Nov/Dec issue are NCJ's regular columns; NCJ Profiles by W4PA, Workshop Chronicles by K4ZA, Contest Tips - Trick - Techniques by W9XT, VHF-UHF Contesting by N0JK, Contesting 101 by K4RO, and Contesting on a Budget by K9ZO. NCJ is always looking for good ideas for articles of interest to contesters: contact K0AD at ncjeditor@... with your idea!

<http://www.arrl.org/nl/cu/image/Contest%20Update%202008%20Nov%2012/2008%20CW%20SS%20at%20W0FF007.JPG>

Beautiful fall weather at the Union, MO station of your editor's Sweepstakes hosts - Jim W0FF (pictured here in front of the HF2V and multiband quad) and Deloris K0RRO Glasscock - makes for some good times. Excellent band conditions helped a lot, too. (Photo N0AX)

The 75th running of CW Sweepstakes is history. Band conditions were good and the multipliers were out in force. As of 10 November, 955 logs have been received via email. A log counter has been added to the top of the Logs Received page, so you can watch the total grow. Scuttlebutt on various reflectors indicates folks really enjoyed themselves this year. Promotion efforts seem to have paid off; several anecdotal reports from various

Sections and Divisions indicate participation seemed higher than usual. (Thanks, Sean KX9X, ARRL Contest Branch Manager)

If you have questions about log checking in the ARRL Sweepstakes, Steve N2IC contributes this link to an informative article <http://www.arrl.org/members-only/contests/results/2006/ss-cw/myth.html> about it. The article addresses what happens to "the other station's log" when you make a mistake on your end, for example.

Steve N2CEI has issued a call for papers and presentations for the 2009 <http://www.svhfs.org/> Southeastern VHF Society Conference on April 24-25 in Charlotte NC. Steve is the program chairman again this year and will be accepting papers for the proceedings with a cutoff date of 2 March 2009. All papers should be submitted to Steve at svhfs2009@....

The old OH2AQ DX Summit goes offline on November 19, 2008 at 1000 UTC. The new DX <http://www.dxsummit.fi/> Summit Web site debuted on May 23, 2008. The site has been redeveloped from the ground up and uses the latest technology available. The new DX Summit has been ramping up steadily and today the number of hits is approaching 1 million a day. In addition to providing the same functionality as the old DX Summit, the new platform offers the necessary flexibility to easily add new features which are currently on the drawing board. (Thanks, Martti OH2BH)

Randy K5ZD, WPX Contest Manager, has noticed a lot of variation in the club names submitted in contest logs. To encourage more consistent spelling of name and improving the club scoring process, he has begun development of an "official" list of contest <http://www.cqwpx.com/clubnames.htm> club names. Please take a moment to find your club on the list and let Randy know if there are any errors or there is a more accepted spelling of the club name. The goal is to have the names on the list be what the club members want to use in their log and how they want the club name to appear in the magazine results.

Pete N4ZR reports, "I'm happy to report that the World Contest Station <http://www.conteststations.com/> Database is back from the dead, thanks to the generosity of Jamie Punderson W2QO <http://www.k12usa.com/> . Jamie and Networks <http://www.isboss.com/> & More, Inc. have donated the ASP hosting that enabled me to get it back up and running for the first time since last January. The database is as it was after the last update, in January 2008, containing descriptions of over 3000 HF contest stations worldwide. Please feel free to go to the site and update your entry. When you fill out the form, be sure to include your call, so that I can associate whatever changes you make with the proper record."

Antennex <http://www.antennex.com/news/index.html> announces the release of a new book by LB Ceibk W4RNL (SK), titled "Some Basics of Multi-Band Beam Design". In LB's words, "Most amateur literature simply passes over the subject or presents a design without much theoretical commentary. We, the outsiders who look in on multi-band beam design, view it as a mystery, as a function of secret optimizing software, as esoteric knowledge to which the average amateur is denied access. This 247-page volume simply presents what I have managed to learnabout the process over the years. I have certainly not learned everything-just enough to get started and to realize the limits of what I know."

Spanish Hams Receive New Frequency Privileges: The Union de Radioaficionados <http://www.ure.es/> Espanoles (URE), Spain's IARU Member-Society, reported that as of October 24, 2008, that country's Secretaria de Estado de Telecomunicaciones y para la

Sociedad de la Informacion (SETSI) approved an expansion on 160 meters <http://www.arrl.org/news/files/Resolucin1800y70MHz.doc> during certain events, such as international Amateur Radio contests. The new allocation, 1.810-1.830 MHz, as well as 1.850-2.000 MHz, will be available for the 2009 ARRL 160 Meter Contest, the 2009 King of Spain Contests (both SSB and CW) and the 2009 CQ 160 Meter Contest (both SSB and CW). In addition, Spanish hams were also granted privileges on the experimental portion of the 4 meter band -- 70.150-70.200 MHz running 10 W ERP -- until April 25, 2009. (Thanks to "The Daily DX" by W3UR)

<http://www.arrl.org/nl/cu/image/Contest%20Update%202008%20Nov%2012/N2NC%20at%20K3LR%20CQ%20WW%20SSB%202008%20-%20by%20N3SD.jpg>

John N2NC tackled Top Band as the K3LR team scored a pack-leading 17M points (of those reported so far) during the 2008 CQ WW SSB contest. (Photo - N3SD)

John W0UN and Lance W7GJ relate news of more solar cycle <http://www.warwickhughes.com/blog/?p=180> prognostication. This article deals with the number of "spotless days" at the bottom of the cycle, suggesting the more spotless days that occur, the weaker the subsequent cycle will be. This points to a weak Cycle 24, unfortunately. Bob N6TV found this related article from NASA <http://science.nasa.gov/headlines/y2008/07nov_signsoflife.htm> that should give some encouragement.

If you're looking for an inexpensive RS232 to CI-V interface for Icom radio control, Gary K8BE and Carolyn N8ST sell just such an interface <http://home.att.net/~n8st/rigcontrol.html> for $25 that works great according to Ken N9VV.

Along with the Web sites mentioned last week that list contest DXpeditions, don't forget about the QRZ DX <http://www.dxpub.com/> Web site! Editor Carl N4AA collects notices from travelling talkers and telegraphers, too. Collect them all and make sure you don't needlessly miss a mult!

Something you need to know: 73 + 88 = FB in hexadecimal. (Thanks, Ian N8IK)

Tom Baker K8MMM, a pioneer in VHF+ contesting passed away on Nov 1st. He was well known on 6 meters, particularly on the scatter modes. Tom was a leader and mentor to many midwestern VHF+ operators as they fired up on the "Magic Band." (Thanks, Lee WA8LRE/KZ4RR)

Web Site of the Week - UniverseToday.com <http://www.universetoday.com/> announces Space Lifestyle Magazine <http://www.newforks.net/spacelifestyle.html> . Its a free, full-color digital magazine. SLM has feature articles about all aspects of space - NewSpace, NASA, military, science and astronomy - but mostly it's about the people that make the space sector tick. Some personal information is required for registration. (From AMSAT <http://www.amsat.org/> New Service bulletin ANS-314)

WORD TO THE WISE

Precedence and Check - these two words will be heard a lot this weekend in the ARRL Phone Sweepstakes. These are very old words, predating radio, all the way back to the telegraphy days of the "wire that sings". They were carried over into the radiogram header in the early part of the 20th century. Precedence (not precedent) is an abbreviation that provides handling instructions, such as "return receipt requested". In Sweepstakes, your precedence is a single-letter category indicator; A-B-M-Q-S-U. Check in a radiogram is the number of

words and punctuation elements in a message. Check became "checksum" when the messages were transmitted as digital data. In Sweepstakes, check is the last two digits of the first year you (or the station) was first licensed. (A point of interest - next year will mark the 100th anniversary of W1MX, the MIT club station and we will see the first "lapping of the field" as checks from 1909 and 2009 make their appearance!)

SIGHTS AND SOUNDS

The contesting.com <http://contesting.com/> home page is now ready to accept your CQ WW 2008 photos! Share your fun with the world by browsing to contesting.com. On the right side of the page, click on "Add CQ WW 2008". Follow the instructions to upload your photo. (Thanks, Steve N2IC)

Something new will be added to the Web versions of the Sweepstakes writeups this year - a Soapbox contest! Each of the SS writeup authors - Steve N2IC and Kelly VE4XT - will go through the ARRL <http://www.arrl.org/contests/soapbox/> Soapbox Web page for their respective modes and pick some favorite Soapbox entries in categories such as Best Soapbox Submission, Best Contest Photo, Funniest Soapbox, Best Excuse and so forth. So make sure to add your two cents to the ARRL Soapbox Web page - it's quite easy -- including uploading a photo or two.

<http://www.arrl.org/nladclick.php?n=cu&t=i&i=2008-11-12&p=0> Ad
RESULTS AND RECORDS

The results from this year's Field Day <http://www.arrl.org/members-only/contests/results/2008/FD> are now available online, too. Dan N1ND relates that, "The addition of the online ARRL Field Day Locator site was a huge success, as more than 1500 sites were listed in this first year of use. When you scan the Online Soapbox <http://www.arrl.org/contests/soapbox/> , Field Day continues to be the most popular on-the-air event in Amateur Radio." You can find the results in the Members Only section of the ARRL Web site. (Thanks, Bryan WA7PRC and the ARRL Letter)

The remaining third of the 2007 Sweepstakes plaques were sent out Monday, October 27. If you haven't received your plaque by now, send an email to ARRL Contest Branch Manager, Sean KX9X (kx9x@...). All of the 2007 ARRL 10 Meter Contest certificates went out the door on the same day, as well.

<http://www.arrl.org/nl/cu/image/Contest%20Update%202008%20Nov%2012/CU2A.bmp>

Toni OH2UA was the operator behind the big CU2X score in the 2008 CQ WW SSB contest. His 8014 reported QSOs were the highest of any single-operator station.

There's some great reading about CQ WW and Sweepstakes on the radio-sport.net <http://www.radio-sport.net/> Web site. Site creator Jamie NS3T packages interviews and scores into great articles on the operators and contests alike. Toni CU2A's big effort in CQ WW SSB is featured and an article about CW SS looks at the different calls atop the standings this year.

John K1AR, CQ WW Committee Member, reports 3409 CQ WW SSB logs received as of 8 November, just a little under two weeks past the date of the contest!

Speaking of electronic logs - it's worth using Notepad or some other simple text editor to review your Cabrillo log before you fire it off to the sponsors. Check to be sure that your header information agrees with what the exchange says in the QSO: lines. For example, if

the header information for a Sweepstakes log says "Low-Power, Single-Op" and the exchange you sent says "U", that's confusing. If you've just downloaded a new program and are using it for the first time, be sure that you haven't left default information in the configuration and setup areas, resulting in misreporting of your QTH or other important bits of data.

Barry W5GN, Awards Manager for the CQ WW contests requests your help in properly entering your address in the Cabrillo log. Include each "line" of your address (street, city-state-zip, country) as a separate line. This helps a lot in printing the address directly on the envelope for your certificate or other award. Also be sure that your country is the last line, written in CAPITAL letters.

OPERATING TIP

QTH abbreviations are important for proper scoring in many contests--mess up an abbreviation and you can lose your Clean Sweep! This is very much an issue with operators new to contesting as is frequently the case in the ARRL November Phone Sweepstakes. If you're mentoring new operators or hosting a multi-op, make sure the proper abbreviations are used (see the ARRL Contest Branch Web page for a list of ARRL Section abbreviations). For example, is that MI in the log supposed to represent Michigan, Minnesota, Missouri, or Mississippi? Other common "busted sections" are LA/LAX, SD/SDGO, ME/MN, NTX/NWT. That last one would be a bad one to get rong!

TECHNICAL TOPICS AND INFORMATION

No need to rely on hitting the Enter key precisely in sync with the beep from WWV, there is an excellent Windows implementation of the Network Time Protocol (NTP) application <http://www.meinberg.de/english/sw/ntp.htm> available for most or all flavors of Windows. The company that makes it available manufactures time servers and radio clocks for data center and network use. Mac OS X, other UNIX versions, and Linux all have NTP built in and are usually in a reasonable configuration out of the box. With a couple of reference clocks configured (a minimum of three is required), your system's clock will always be within a few ms of UTC. (Thanks, Peter N5UWY)

<http://www.arrl.org/nl/cu/image/Contest%20Update%202008%20Nov%2012/N6TRs%20Feet%20in%20W7GGs%20Tower%20-%20Sep%202008.jpg>

Another in the "Feet At Height" series finds N6TR helping out at the W7GG station in Madras, OR. (Photo N6TR)

Tales from the recent HQ3Z expedition include a close encounter of the unwelcome kind with a hotel's mis-wired electrical sockets. Luckily, the only damage was to radio equipment and not to the operator thereof. This situation is not uncommon - don't be a casualty, carry an electrical outlet tester like this one <http://www.licensedelectrician.com/Store/AM/ST-102A.htm> , recommended by experienced DXpeditioner, Glenn K6NA. Cheap and lightweight, it checks for six common problems and should be the first thing plugged into any socket.

If you are interested in trying the free W6ELprop propagation prediction software, Carl K9LA has written a tutorial titled "Downloading and Using W6ELprop <http://mysite.verizon.net/k9la/id9.html> ". This can help you get the most out of this useful software..

Another electrical hazard to radios is presented by common "entry-level" amplifiers, such as a used Heathkit SB-200/220 or a Drake L4 or L7. Joe W4TV notes, "The keying line (PTT relay) in the SB-220 is +120 V DC. The contacts of the "Linear" or "Send" relays in most transceivers can not handle the voltage and current "spike" generated by the high voltage PTT circuits in these older amps. You will probably need to replace the "Linear" or "Send" relay in your transceiver. If you are lucky, that will be all you'll need to replace." Joe suggests a keying buffer such as the Ameritron ARB-704. Check the ratings of your radio and the specifications of the amplifier before connecting the two.

Your editor's CW Sweepstakes operation confirmed that a great "secret weapon" in domestic contests is a low dipole on 80 or 40 meters. In my case, an 80 meter inverted-vee about 20 feet high at the apex generated nearly 400 QSOs while operating low-power. A 40 meter dipole at a similar height will also generate great results. Why? The high angle of radiation from these antennas results in great regional coverage out to several hundred miles...and beyond if conditions are good. For a DX contest, these antennas don't do nearly as well, but for a temporary advantage in domestic contests, the low dipoles can't be beat.

Using sections of transmission line to match impedances is a great trick, and inexpensive, too! Here's an on-line asynchronous transformer calculator <http://www.seed-solutions.com/gregordy/Software/SMC.htm> contributed by Frank W3LPL. Joe W4TV chimes in with another online calculator <http://www.w8ji.com/transmission_line_75_ohm_to_50_ohm_transformers.htm> , too.

If you've got a fixed amount of wire to use for a radial field, how should you use it to get the best radial ground field? Lucky for you, Al Christman K3LC wrote a paper <http://www.ncjweb.com/k3lcmaxgainradials.pdf> on just this problem and published it in NCJ. You'll find it online on the NCJ Web wite. (Thanks, Frank VO1HP)

Bill W2WO notes that, "Almost everyone who runs cables underground eventually wishes they had used a conduit of some kind. It seems there are always control cables to be added, another feed line, etc, etc. Also, many of us painfully learn to use at least 3" conduit. A single coax looks very small in this size pipe, but it is certainly easier to feed new lines and pull old lines. Always leave a "messenger" cord in the conduit, with lots of slack on one end. Also, water will get into almost any simple conduit. Always allow for this by tilting the conduit, putting a little stone under it, leaving weep holes at appropriate places, a small dry well at the best spot, etc. Allow some air circulation through it, but block the entrance for small critters. "

When trying to eliminate birdies caused by a PC power supply, check to see if the power supply has an EMI filter. Many cheap (and not-so-cheap) supplies have no line filtering whatsoever. Taking a look inside often reveals that the PC board has the space for a filtered connector--and it may have been on the PC board to pass EMI certification--but is strangely not present on the manufactured version. (Minor editorial rant--I realize the FCC can't pay attention to every single, cheap PC supply, but it would seem that a few highly-publicized fines would get the attention of the corner-cutters for a while.) Corcom ac line filters are widely available and fit the ac line cord socket very nicely. They'll often do a much better job than external ferrite cores.

Technical Web Site of the Week - The past week has seen the launch of a great series of discussions about balloon- and kite-supported antennas on the QRP-L mailing list. Topics from the best type of kite to what kind of tether line. Browse the QRP-L <http://www.kkn.net/archives/html/QRP-L/> archives beginning on Nov 6th where you'll find the thread flying high.

CONVERSATION

What Does It Mean?

The ticking of the technological timepiece is loud and clear in the land of radiosport. Once limited to the relatively slow and local coverage of VHF packet networks, spotting information is now distributed at gigabit-per-second rates around the world. My finger has barely left the Enter key before the information I've uploaded is popping up on band maps around the world!

VE3NEA's CW Skimmer, now at version 1.3 and climbing, is steadily improving its ability to pick out call signs and display them across the band like a freshly-stocked candy store of potential QSOs. Even if one chooses not to use the CW decoding feature, the horizontal version of the "waterfall" display makes it easy to see the different call signs in a pileup or across the competitive field.

Not satisfied with transmitted signals, chat pages and online databases make it possible to know where a station is listening, without transmitting a single syllable. Streaming audio is available from dozens of Web-based receivers around the world. The well-connected, so to speak, can also transmit from remotely located transmitters inside and out of their home territory.

Traditional contesting depends on a lot of information being unknown - the frequency and call signs of contest stations, for example. Having to copy a station's exchange information is becoming less and less important due to pre-fill databases and automated copying tools. Being able to find stations and multipliers is still a hallmark of the top operator, but for how long?

I'll return to a question I've asked before - what does it mean to have a competitive radio activity in an environment in which stations have wide access to information about where stations are transmitting and listening and can themselves transmit and receive from nearly anywhere? The question is no longer so much "Can you find them and hear them", but "Can they hear you through the din of everybody else calling". How do we keep (or return) radio know-how at the top of the contester's skill set?

Partially tongue-in-cheek, I present the "Radio Skeet Shoot" as an example of operating rules that "go beyond" the point-and-shoot world. In this contest, the operator identifies one or more public sources of spotting information and registers them with the contest sponsor, who then records the output of that source throughout the contest. When a spot pops up on the operator's computer, a certain number of points are assigned to the spot and a countdown begins. The operator has a limited amount of time to accept the spot as a "target". The longer the delay between the spot appearing and being accepted, the smaller the value for working the spotted station. Once the spot has been accepted, the operator then has a limited number of "shots" (calls) in which to work the targeted station. With each unsuccessful shot, the point value for working the spotted station is reduced. If all shots are taken without success, no points are obtained and the target has been "missed." The sponsor then uses the recorded spot stream and information from the station's log to correlate the time of acceptance, the time logged, and the number of shots taken to verify the final point value claimed by the competitor.

How does this put radio know-how back in the contest? For starters, I can't just jump to a spot and start calling over and over again until I get through, as is the current situation. I have to make each call count. That means I have to be choosy about which spots

I accept as targets, evaluating propagation and my station and my operating abilities to make realistic choices. I have to be on the right bands with the right antennas, pointed in the right directions. I have to understand timing and how to get through a pileup. A reverse set of rules could apply to calling CQ. There might be rate thresholds or coverage bonuses or rewards for better copy. Bonuses my be given for being the "first to spot" to emphasize tuning skill. Strategically, maximizing one's score in such an environment requires a lot of savvy in different skill areas.

What other types of competitions make sense with so much information, previously unavailable, now piped into the competitor's shack for the asking? These tactics can often be evaluated will "piggybacking" on a regular contest, as long as the rules for the contest are followed by competitors in the "contest within a contest". Perhaps you could try out your own set of rules and give them a try within your club, announce them on the Internet and sign up participants, or even start your own contest. Anything is possible. With the inventive and competitive operators out there, there shouldn't be a shortage of interesting rules to try. Know what I mean?

73, Ward N0AX

The Christmas Party is 4 December 2008 at 6:15 PM at the SPEARS just NW of Towne West Mall at:

4323 W Maple
Wichita, KS

Nick put together a nice picture map on the details of the Christmas Party. It is located at the BEARS Yahoo web site in the files section.

Randy-

That's not too far away from the VFW 3115 Ham station
at the post. I'll try to come pending out of town
work, If I do, after if anyone wants to see the W0VFW
station. We can take a run over there. Dec 7th Pearl
Harbor day they will be running a special event
station.

# 595. 2009 BEARS Officers and 2008 Banquet Report

Yahoo group: BEARSAmateurRadioClub
Date: 2008-12-05 13:35:41 UTC
From: Wing, Randy
Topic: 595  Message: 595

BEARS members and friends,

The BEARS banquet last night went very well. Thanks to all who had a part in making it go well. Special thanks to Dexter Schnebly for his coordination on the banquet location, Nick Farlow for his membership and election coordination, and Harvey Jones for MCing the awards at the banquet.

Thank you to the 2008 outgoing officers:

Steve Heyroth, K5MNZ, President
Harvey Jones, AC0EG, VP
Jim Enix, KC0QIE, Treasurer
Dennis Gaskill, KC0IFQ, Secretary

Congratulations to the 2009 officers:

Jim Enix, KC0QIE, President
George Pinnick, WA0GNC, VP
Harvey Jones, AC0EG, Treasurer
Dexter Schnebly, KB0YWM Secretary

Banquet Awards:

Steve Heyroth, K5MNZ, for BEARS Ham of the Year (Radio Shack gift certificate)
Diane Force, N7NGI, for the door prize (Amateur Radio Handbook)
Jim Kernan, KC0WHI, for the most frequent BEARS net attendee (Antenna Compendium)

New Members:

Marsha Meili, KD0FIS
John Cooley, KC0CBA
Tim Force, AJ7F
Diane Force, N7NGI
Joshua Force, KD0ELB
Ben Force, KD7KNS
Rachel Force, KC0YPA

If I missed any new members let me know!

Randy,

I was a member this year, I signed up at field day. I think that I just got lost in transition.

Does the club have a station any more? I will try to twist Rogers arm to join.

No, Tim, our station did not survive the Boeing-Spirit divestiture. We have the equipment in temporary storage - we are working with Boeing security to help justify a small room for a new shack. More as that develops.

If that doesn't work out, we may store our equipment in a trailer that can be towed to special events such as Field Day, communications events, school/scout events.

Our last priority would be to sell all of it. But we will probably sell part of it when the time is right.

Randy, N0LD

Randy,

I was a member this year, I signed up at field day. I think that I just got lost in transition.

Does the club have a station any more? I will try to twist Rogers arm to join.

Tim

Subject: [BoeingRadioClub] 2009 BEARS Officers and 2008 Banquet Report

BEARS members and friends,

The BEARS banquet last night went very well. Thanks to all who had a part in making it go well. Special thanks to Dexter Schnebly for his coordination on the banquet location, Nick Farlow for his membership and election coordination, and Harvey Jones for MCing the awards at the banquet.

Thank you to the 2008 outgoing officers:

Steve Heyroth, K5MNZ, President
Harvey Jones, AC0EG, VP
Jim Enix, KC0QIE, Treasurer
Dennis Gaskill, KC0IFQ, Secretary

Congratulations to the 2009 officers:

Jim Enix, KC0QIE, President
George Pinnick, WA0GNC, VP
Harvey Jones, AC0EG, Treasurer
Dexter Schnebly, KB0YWM Secretary

Banquet Awards:

Steve Heyroth, K5MNZ, for BEARS Ham of the Year (Radio Shack gift certificate)
Diane Force, N7NGI, for the door prize (Amateur Radio Handbook)
Jim Kernan, KC0WHI, for the most frequent BEARS net attendee (Antenna Compendium)

New Members:

Marsha Meili, KD0FIS
John Cooley, KC0CBA
Tim Force, AJ7F
Diane Force, N7NGI
Joshua Force, KD0ELB
Ben Force, KD7KNS
Rachel Force, KC0YPA

If I missed any new members let me know!

Randy Wing

# 599. Field Day 2009 Thoughts

Yahoo group: BEARSAmateurRadioClub
Date: 2008-12-16 18:02:06 UTC
From: Wing, Randy
Topic: 599  Message: 599

Field Day 2009 Planning - let's start!

Within the next few weeks - I intend to start discussions with the WARC on Field Day 2009... I have cc:ed a few WARC members on this email as well - I expect more to join as the days go forward. Here is a few Field Day 2009 thoughts of mine going forward:

1. I'd like to see an even larger Field Day - with a 2 or 3 station focus on CW (some transmit/receive through computers, some by hand keying and ear). But I'd like your thoughts - we have done research and it certainly is feasible. Can I count on everyone to help again? :)

2. I'd like to see the antenna builders/designers amongst us start a discussion on some neat antennas - and fund them in building a FD antenna or two:

a. 40m gain/directionality (either through a beam or some other method)

b. 15m gain/directionality (either through a beam or some other method)

C. NVIS antenna cut for 80m

D. 80m gain/directionality (either through a wire beam or end-fed or some other method)

3. A great idea how to deconflict:

A. 20m beam (voice), 20m CW, 20m digital, + GOTA (20m voice)

B. 40m beam (voice), 40m CW, 40m digital, + GOTA (40m voice)

C. 80m (voice), 80m CW, 80m digital

I would like all volunteers for the technical committee to make themselves known to everyone by "replying all". I will help organize this group into a separate field day forum. I would like participation by any WARC members. (David Stanislaw, would you be so kind as to get this to your WARC distribution?)

I also ask anyone who wants to help coordinate with the WARC on FD decisions to send me an email note so that I can start that coordination.

Randy Wing, N0LD

# 605. Kansas QSO Party

Yahoo group: BEARSAmateurRadioClub
Date: 2009-01-02 19:03:35 UTC
From: Randy
Topic: 605  Message: 605

http://www.cqp.org/results/2007/07CQPresults.pdf

www.cqp.org

The links demonstrate a first rate QSO party - the California QSO Party - popularly term CQP. This is what it probably takes to run a State QSO party and get accolades...

Volunteers, Money for Plaques, software, and time.

I am ALL for helping out with a KS QSO party. BUT, However, we'd need a lot of volunteers - outside of the BEARS - to really pull it off... Is anyone interested? If so drop the officers an email.

Randy, N0LD

I've always enjoyed working state QSO parties and have always hoped Kansas would someday have one..  It's an excellent way to add to your county totals if you happen to be a "county" hunter.  I would most definitely go mobile and put out lots of Kansas counties... I'd also be willing to help in any other way possible...

The mother of Mark K0VFW passed away at 1:45PM local time today this Sunday. I understand she was 88.

Mark is President of W0VFW - The Veterans of Foreign Wars Post 3113 Amateur Radio Club. The post is located Anna and Douglas and it's club has a repeater on 145.27 and both 2 meters and an HF station.

Arrangements will follow.

# 613. 6m DX is in!

Yahoo group: BEARSAmateurRadioClub
Date: 2009-01-25 20:36:45 UTC
From: Randy
Topic: 613  Message: 613

Negative latitudes are south of the equator, negative longitudes are west of Greenwich
EM17KN: latitude=37.562500 longitude =-97.125000
EJ79XV: latitude =9.895833 longitude =-84.041667
Distance between EM17KN & EJ79XV is 3344.05 km (2077.990 miles), bearing 153.6 degrees

Today, I made a 6m contact with TI2ALF in San Jose, Costa Rica in EJ79 (Gus is his name). It was a rough contact, but wow! It was over 2077 miles away!

Then something odd happened - I worked TI7/N5BEK. I actually worked Costa Rica for the first time in April 2003 - with this same guy!

If you aren't on 6m, better listen in!

Recently you contacted Toyota. Below is a summary of your contact message and our response.

Thank you for allowing us to be of service to you.

Subject
routing dc power from battery to Ham(amateur radio) equipment

Discussion Thread
Response (SBak) 01/26/2009 12:09 PM
Dear Mr. J--------,

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.

We appreciate the opportunity to address your inquiry.

We apologize; we do not have information regarding an aftermarket accessory as you have described at this location.

Toyota does not recommend modifying the vehicle in any manner. Toyota vehicles meet all applicable Federal Motor Vehicle Safety Standards when they are originally distributed, and modification could affect the safety and/or operation of the vehicle and remove it from compliance with specifications and standards mandated by the Federal Government. Additionally, should a condition occur on the vehicle that can be attributed to any type of modification, the warranty on the affected components may be impacted or voided.

Please understand, when the 2006 Corolla was launched it was done so with the approval of the Federal Government certifying the vehicle and all of its components. We go through extensive R&D for each of our vehicles and we are especially concerned when a customer, such as yourself, wants to make modifications.

I hope this explains our position as it pertains to any modifications.

If we can be of further assistance, please feel free to contact us at www.toyota.com/help/contactus.html

Respectfully,

Sandra Baker
Toyota Customer Experience
Customer (Robert J--------) 01/22/2009 03:26 PM
Is there a preferred routing of DC wires from the battery terminals to accessorie radios such as HAM that will minimize any bad

interactions with the onboard computers and other Toyota devices?

# 616. Re: No Ham in the TOY

Yahoo group: BEARSAmateurRadioClub
Date: 2009-01-27 16:44:53 UTC
From: .--/---../.-../--
Topic: 615  Message: 616

Perhaps as long ago as 10 years, TOYOTA was known to have electronics such that installation of Amateur Radio equipment would cause computers to fail. One letter in QST warned that TOYOTA was not warranting a computer replacement ($400+) because they determined Amateur Radio RF caused the failure. Now you know why you do not see TOYOTA police cars.

Likewise if you check the manual that comes with your new Chrysler vehicle, you will see that there is a warning that states 2-way radio equipment with wattages exceeding 3 watts can be harmful and may effect the warranty.

Now being Detroit Born and bred, Both GM and FORD are Ham Friendly. GM offers installation assistance and have published service notes on Amateur Radio Installation. GM's employee radio club is called FIREBIRD Amateur Radio club. Regarding FORD- my brother-in-law is an audio products engineer at Ford Research in Dearborn, Mich. Quite a number of Engineers there are members of "the Tin Lizzy Amateur Radio Club" right in Dearborn, they congregate on the club repeater 147.27 and are "test dummies" for new vehicles and amateur radio. One such outcome was and is still available in or out of warranty- certain electric tank mounted fuel pumps cause RFI. Ford will replace them if Amateur radio is installed on board. The problem is virtually non-existant today as new designed fuel pumps are now standard. The test for a RF noisy fuel pumps is HF noise floor increases when the ignition is turned on, but the vehicle is not started. The pump has to run before the car starts.

In the late 70's- early 80's you could shut down a SAAB simply by transmitting about 25-40 watts on 2 meters while along side of it. SAABs were pretty popular in the east and I was living in NY at the time. Had a ton of fun doing that back then...

Not sure my offset on the Yaesu is correct or my phoenetics got mumbled, My call is KD0FIP. Please comment on my signal. Thanks, Robert

# 620. RE: [BoeingRadioClub] Tuesday net correction

Yahoo group: BEARSAmateurRadioClub
Date: 2009-01-29 13:46:20 UTC
From: Steffens, Kerry W
Topic: 619  Message: 620

I was neither the NCS control station, nor was I here to get on the net. I do know that the Net Control log does not have a place to record signal quality. BEARS does not have a training officer like ARES, RACES, or SATURN so I thought this would be a good time to provide some NET Basics. I have committed every radio sin in the book since I was a Novice 45 years ago, so I have learned most of what I know by the road of hard knocks. So here is my soap box.

Basic Net Operation for Participants

There are two words a participant should know. These are prowords and phonetics. Prowords are words like Over, Roger, Clear ... Phonetics are like Alfa, Bravo, etc ... The rule of thumb is that prowords can be used anytime but phonetics are only used in sever weather conditions and upon the request of the Net Control Station (NCS). Both acceptable prowords and phonetics can be found at ARRL.org. The only phonetic expected is "ZED" in place of "Z." If phonetics is called for by the NCS, then the ITU Zulu is used in place of Zed. The reasoning behind this is that prowords add simplicity and phonetics adds complexity. If you do use phonetics, use ITU standard words and speak them very slowly and clearly. If net control has trouble hearing you with others calling in, give your TAC call and wait for the NC response.

Never speak directly into a microphone, always across it with normal level of speech. When giving your call, always speak slowly with a slight pause between letters to give the NCS a chance to write it down. For the NCS that wears hearing aids this is very important as you only hear about 70% of what is said. A normal person hears 90% of what is said. This does not improve with age.

BEARS always has an open or what is call an information net. There are three other nets other just as important nets in the area is the SATURN, ARES and RACES net. SATURN and ARES is open and RACES with the exception of the weekly information net is closed. ARES is an amateur service which was created in 1935 by the ARRL. RACES is a federal service which was created by the Department of Defense (DOD) in 1952 and is part of FEMA. Check in to the ARES net is on HF. Up to the point of activation, you can talk to a RACES station. After activation, a RACES station is not permitted by law to respond. This is because RACES is the only amateur service permitted to be on the air during war or a declared national crisis or as directed. The protocol is very strict.

I took the following out of my Net Control Training Manual:

E. BASIC COMMUNICATION SKILLS

Communication is affected by numerous factors including personal operating skills, method of communication, noise or interference, skills of net participants and adequate resources. The most important skills of communication are those possessed by the Net Control Station.

LISTENING

Listening is at least 50% of communication. Listening means avoiding unnecessary transmission. A wise ham once said, "A ham has two ears and one mouth. Therefore he should listen twice as much as he talks." (2,37)

MICROPHONE TECHNIQUE

For optimum performance hold the mic close to your cheek and just off the side of your mouth. Talk across, rather than into, the microphone. This will reduce breath noises and "popping" sounds that can mask your speech. Speak in a normal clear calm voice. When using a repeater, be sure to leave a little extra time between pressing the push to talk switch and speaking. Pause a little longer than usual (suggestion of the author is 5 seconds) between transmission any time there is a possibility that other stations may need to check in or have emergency traffic to pass. (2,38)

BREVITY AND CLARITY

Unnecessary chatter on the part of the NCS wastes time, slows the effectiveness of the net and defeats the purpose of the net. Each communication should consist of only the information necessary to get the message across clearly and accurately. Extraneous information can distract the recipient and lead to misinterpretation and confusion. Make your transmissions sound crisp and professional like the police and fire radio dispatchers and the air traffic controllers. Do not editorialize or engage in chitchat. The Net Control Station should refrain from non-essential conversation. Be sure to say exactly what you mean. THINK BEFORE YOU SPEAK! Use specific words to ensure that your precise meaning is conveyed. Communicate one complete subject at a time. If you are sending a list or passing traffic or making an announcement keep each item separate and finish with one before going on to another. (2,39)

PLAIN LANGUAGE

All messages, transmissions and directions should be in plain language. Use of CB words, "Q" signal on phone, 10 codes or other jargon should be avoided. Pro signs (pro words) are acceptable and should be used since they are procedural terms with specific meanings used to save time and ensure that everyone understands precisely what is being said. (2,39)

PHONETICS

Imagine being neck deep in net operations and emergency communications during a catastrophe and amid all the clamor and agony of that earthquake, tornado or hurricane you're trying to understand one op who

insists on using his own brand of phonetics and another who uses the ITU standard half the time and whatever pops into my head the other half. (9,64)

Some hams like to make up their own phonetics. Nothing is more frustrating to a Net Control Station than to have a ham give his call sign in cutesy words instead of the ITU Phonetic Alphabet. This practice has no place in emergency communication. Therefore it should not be used anytime. Few hams realize that their everyday bad habits do not suddenly disappear when there is an emergency. What you do on a daily basis is what you will do unconsciously during an emergency when the adrenaline is surging. To do it right in an emergency you have to do it right on a daily basis! Professional communicators always use standardized phonetics to avoid confusion. (1,37-40)

# 621. ANNOUNCEMENT- Wichita Area Ham Club new to YAHOO GROUPS

Yahoo group: BEARSAmateurRadioClub
Date: 2009-02-03 20:37:48 UTC
From: .--/---../.-../--
Topic: 621  Message: 621

VFW Post 3115 Amateur Radio Club as of today has formed a new YAHOO GROUP.

The club has a HF-VHF station, and VHF-UHF repeaters on the air under
the club call W0VFW. It is the first club in the country sponsored by
a VFW post.

The web site is:

http://groups.yahoo.com/group/w0vfw/

Thanks- gud DX and 73's

Date: 2009-02-24 18:26:52 UTC
From: .--/---../.-../--
Topic: 630  Message: 630

Jimmy N8NCC, a senior at DERBY HS, Cadet Major & Executive Officer in his KS-61 Air Force JROTC and President of the Kitty Hawk Honor Society. He is applying for Foundation for Amateur Radio (FAR) Scholarships. He has been accepted to Wichita State in the fall.

He needs MANDITORY recommendations with his application:

1. An officer of an ARRL Affiliated Radio club.
2. A QCWA member.
3. A member of 10-10 International Net.

It is just a name, call and signature on the form, we will come to you. and you cannot be a relative, so I'm out. A recommendation is required for any of the ARRL clubs, QCWA & 10-10 scholarships.

Any help?

Larry W8LM

Space Rock 2009 DD45 Buzzes Earth

"... a small asteroid will pass close to Earth tomorrow (March 2nd) at
13:44 Universal Time.
How close? The MPC's Timothy Spahr calculates that it'll be 0.00047
astronomical unit from
Earth's center. That's only about 40,000 miles (63,500 km) up ☐ well
inside the Moon's orbit
and roughly twice the altitude of most communications satellites!"

# 638. RE: BEARS flier

Yahoo group: BEARSAmateurRadioClub
Date: 2009-03-11 14:54:23 UTC
From: Wing, Randy
Topic: 638  Message: 638

Thanks, Terry!

Could everyone please take a moment and give Terry comments on the flier?

Terry:

My comments:

1. http://www.ksqsoparty.org is the website to register the counties you will be active in for the KS QSO Party.

2. I think it would be good to mention some of the memorable programs that we have had at our meetings - that will draw people if we have good programs: a.) Dxpedition b.) Troubleshooting equipment c.)laser communications d.) antenna building, etc. (everyone please add ones you liked)

3. Perhaps the best action picture we can find of field day! And inviting people to come and participate (POC needed).

Thanks, Terry for doing this!

Want to make a flier for the KS QSO Party, too? :)

Randy

Randy,
Here is a start at a flier.
Please look at it, make comments, send it around for comments, additions, etc.
I am sending it to your house also in case it doesn't get through the Boeing filters.

Terry

My comments:

1. http://www.ksqsoparty.org is the website to register the counties you will be active in for the KS QSO Party.

2. I think it would be good to mention some of the memorable programs that we have had at our meetings - that will draw people if we have good programs: a.) Dxpedition b.) Troubleshooting equipment c.)laser communications d.) antenna building, etc. (everyone please add ones you liked)

3. Perhaps the best action picture we can find of field day! And inviting people to come and participate (POC needed).

Thanks, Terry for doing this!

Want to make a flier for the KS QSO Party, too? :)

Randy

Randy,
Here is a start at a flier.
Please look at it, make comments, send it around for comments,
additions, etc.
I am sending it to your house also in case it doesn't get through the
Boeing filters.

Terry

# 641. Green County Hamfest BEARS equipment sale

Yahoo group: BEARSAmateurRadioClub
Date: 2009-03-15 22:12:22 UTC
From: jones_hg
Topic: 641  Message: 641

To BEARS Members:

Below is the results of the BEARS sale at the Green County Hamfest.
Randy Wing, Harvey Jones and Jim Enix set up a table at the Green County Hamfest to sell off some of the old equipment. Below is what was sold.

Green County Hamfest in Claremore, OK
3/14/2009

Item Price
IF-232C $25.00
KSP-1 Spekey $10.00
Cassete Recorder $3.00
Kenwood Peakers $20.00
Kenwood Peakers $20.00
SWR Meter 2000 $90.00
Pegasus HF $225.00
Palstar Tuner $175.00
MC-85 Kenwood Mic $50.00
Odds and Ends $5.00

Total: $623.00

We still have more to go.

Harvey Jones
BEARS Treasurer

HIDDEN TRANSMITTER HUNT

Our First FOX Hunt

APRIL 25th, 2009

Rain or Shine

PRIZES & CERTIFICATES.

Fun and demonstrations.

Registration starts at 7:30AM

At the VFW parking lot

FOX Hunt Starts at 9:00AM

Geared for Beginners. Non- Ham participation encouraged!

BBQ burgers, & etc. at NOON

DF gear show & tell and tours of WØVFW start at 1PM

$5 Donation (PER PERSON) includes BBQ Burgers & Lady Auxiliary Food.

Cashbar-Drinks-Soda pop- supports the VFW Post 3115

PRIZES

Supplied by RADIO SHACK Derby

Talk-in 145.27 MHz. WØVFW/R

Hunt will be somewhere on 2 meters FM & somewhere in Sedgwick County. Test your skills. Become skilled at emergency transmitter locating, or finding interference problems. 144-148 MHz. 2 Meter Ham Band will be used. All that is needed is a vehicle, map, compass

and any programmable scanner or 2 meter FM transceiver and some sort of antenna. Come join the fun, Rules and more information at our Yahoo Group site.

Non-Hams are encouraged to participate. Non-hams can ride with, form their own team or do it alone. For Encouragement, scheduling ride-a-longs, questions or answers go to the WØVFW Yahoo Group board at www.yahoogroups.com/w0vfw. Not a Yahoo Group member? Be sure to state Transmitter hunt or your call sign in your request to join.

To RSVP on line- go to www.yahoogroups.com/w0vfw then click on APPLICATIONS in the LEFT PANEL; then click on RSVP and fill it out. To RSVP by mail- Send your information and $5.00 donation to:

WØVFW AMATEUR RADIO CLUB, c/o VFW POST 3115, 4801 W. Douglas Ave. Wichita, KS 67209.

Contact # k0vfw Marc Hammann (316)655-6053
Tentative WØVFW T-hunt rules...

1. You may hunt alone, Bring one or more NON-HAMs or hunt in HAM teams.

2. A non-Ham co-hunter is worth 5 extra points. 7 extra points if under 18. Hams under 18 worth 5 points.

3. Only a single person is qualified for the extra points. No back seats full of babies.

4. If the T-hunter is a NON-Ham hunting alone he/she gets the points.

5. If the team is all non-hams, they get to claim up to 2 non-ham extra points.

6. If the ham is under 18 and an unlicensed driver, his points can be claimed in all circumstances.

7. All hunters must register at the VFW post 3115 parking lot before hunt starts.

8. They will receive a copy of the rules, the fox frequency, alternate frequency and last minute instructions.

9. Each hunter vehicle will have its odometer checked by an official. Trip odometers set to zero.

10. Hunter vehicle will leave when the official tells them. One Vehicle will leave every 2 minutes.

11. Hunters can DF in the parking lot prior to leaving the parking lot. When handed their envelope.

12. The hunt will be limited to Sedgwick county.

13. Times will be recorded by an official at the VFW parking lot upon leaving.

14. Upon finding the FOX, Mileage and times will be recorded by the FOX assistant.

15. Each hunter may use any equipment they can carry in or upon their vehicle.

16. No one may not transmit on the FOX frequency except the FOX. Immediate Disqualification.

17. A hunter may use a fixed station for bearings, provided, if involving another operator, that operator is included as part of the team.

18. No hunter can contact another hunter or team via radio or Cell phone. Except- general chitchat and good hearted egging can be done on WØVFW/R as long as hints or the FOX location are not divulged.

19. Officials will monitor WØVFW/R. You may not divulge that you found the fox or gave up.

20. The hidden transmitter will be within 100 feet of access by standard passenger car. The hunt usually ends at 11:30 AM, unless the hider agrees to keep the T on the air for teams that haven't found it yet.

21. Non-Ham hunters must register a cell phone number with the Officials. Optional for hams.

22. The FOX will read prepared statements, go no audio from time to time and make any announcements it feels necessary. It will spend 3 minutes minimum stating the off air end of hunt time.

23. Only 1 prize per vehicle entry. Time is favored over mileage. As DF'ing in an emergency, time is of essence.

24. Time is to second. Mileage is to the 1/10 of mile.

25. Violations of the rules can ban you from all future hunts & prizes. Rulings of the Officials are FINAL.

Prize Categories-

Ham Solo

Ham plus 1

HAM Team (2 or more hams)

Non-Ham Solo

Non-HAM Team

Lowest Time 1st, 2nd Prize

Lowest Mileage 1st, 2nd Prize

Boobie Prize

Most Time

Most Mileage

Loosers Certificate of Distinction

Ham didn't find FOX

Non-Ham didn't find FOX

Calculations -

In all categories Time minus total points (1 point= 30 seconds) equals score. Mileage minus total (1 point= 1/2 mile) equal score. Example:

Non-ham team #1 -Father(5pts.) and teenager son(7pts.) take 34 minutes and 10.4 miles to find the fox.

Ham team #2 -2 Hams (0pts.) take 18 minutes and 8.6 miles to find the fox.

Team #1- 12 points to deduct. (34 min-(12pts./2) & 10.4mi-(12pts./2)) = SCORE 28 minutes and 4.4 miles.

Team #2- No points to deduct. = SCORE 18 minutes and 8.6 miles.

Team #2 Hams would win Lowest Time....Team #1 Father & son would win Lowest Mileage.

From: Steffens, Kerry W
Topic: 644  Message: 645

I would go $200 each on the TS radios. I would rather have just the 2 meter if someone wants the 70 cm. With the uncertain future for me right now I can't afford to get in to deep. At least it is an offer.

I still want the 70 cm beam. Price ?

I would take the 2 FM no tone if around $30. Is it small or big? We sold the Kenwood at the Hamfest for $20 with remote head as it had no tone.

The 94 repeater is going tone access (103.5) so be sure to set it up.

# 655. EVE ! - Radio Amateurs bounce a signal off Venus

Yahoo group: BEARSAmateurRadioClub
Date: 2009-04-03 14:48:32 UTC
From: Am Fm
Topic: 655  Message: 655

Radio Amateurs have achieved the very first reception of amateur signals bounced off the planet Venus, over 50 million km away - EVE (Earth-Venus-Earth)

On March 25th, 2009 a team from the German space organization AMSAT-DL reached another milestone.

The ground station at the Bochum observatory transmitted radio signals to Venus. After traveling almost 100 million kilometers and a round trip delay of about 5 minutes, they were clearly received as echoes from the surface of Venus.

Receiving these planetary echoes is a first for Germany and Europe. In addition, this is the farthest distance crossed by radio amateurs, over 100 times further than echoes from the moon (EME reflections).

The EVE experiment was repeated on Thursday, March 26th for several hours with good echoes from Venus. Morse code was used to transmit the well known “HI“ signature known from the AMSAT OSCAR satellites.

# 656. For Sale or Wanted-Ham Radio Related Wichita Area- on the WEB now.

Must have your name phone #, or e-mail address for replying.

Go to the w0vfw yahoo groups Home page.
On Left side click on APPLICATIONS
Then click on FOR SALE or WANTED HAM RADIO RELATED WICHITA AREA.
It's simple to post and will coax you.

73's de W8LM
PS-If you want, post it here if it's down at Derby RS on consignment too...just say so...

# 657. Sunday Meet & Greet Summary - still openings for Technician Ham Class

Yahoo group: BEARSAmateurRadioClub
Date: 2009-04-05 23:13:01 UTC
From: Am Fm
Topic: 657  Message: 657

The Sunday Meet & Greet held at the W0VFW Post 3115 VFW was well attended. We had over 30 people, and 9 signed up to the Technician Class that will start this Thursday and will run for 4 more weeks, each Thursday night.

There are still some openings as class side is limited to 30. If you could not make the Meet & Greet earlier today, but would like to sign up for the TECHNICIAN CLASS, come over to the POST 3115 VFW This Thursday, April 9th at 6:30 PM. Classes will run 7-9PM.

You can contact me directly. Do not reply to this e-mail as it goes to everyone on the Yahoo Group. Reply am_fm_radio@...

There is talk all ready about a General Class to follow later this year.

Sherry and Randy represented Skywarn, and there were a lot of eager interested people. Some even came from Oklahoma and Toronto.

We didn't demonstrate and mobile rigs as it was way cold and windy, perhaps the reason turn out was low.

There is still a chance to attend the TECHNICIAN CLASS.... So till next time...

TRANSMITTER HUNT 9AM SATURDAY APRIL 25th...$5.00 includes BBQ burgers and Lady's auxiliary Potato salad and baked beans. You do not have to be a ham to transmitter hunt. You do not have to be a member of the VFW to attend or join our group. Just be interested in ham radio or SKYWARN.. Both is fine too. w0vfw group on yahoo.

Regards-

# 662. article on handheld antenna

Yahoo group: BEARSAmateurRadioClub
Date: 2009-04-18 01:34:46 UTC
From: Catherine
Topic: 662  Message: 662

May not have a lot of application to all ham radio, but still shows some measurement techniques:

An interesting article
He just touches on near field measurements, a ham had best stay out of measurements here. Everything interacts with everything and the antenna under test becomes part of the source per parasitic radiation, absorbtion and reradiation such as in the elements in a yagi antenna. The interactions make it different everytime you move anything.
The thumb rule is put the source antenna 2-3 wavelengths away, I always used as least ten as I could still see interaction at the closer distances, besides the longer distances makes the source antenna a better point source.
He didn't really go into that vertical, horizontal and circular polarization are completely independent pattern tests
I've always had to spend more time verifying that the antenna test range is not effecting measurements, a more common problem than you would imagine. Two that are common is the source antenna not mechanically solid enough in a fixed position and verifying that the rf power into the source antenna has not changed throughout all testing and the measurement equipment has not changed.
playing with antennas is fun even when you are getting paid to do it.

HIDDEN TRANSMITTER HUNT

Our First FOX Hunt

APRIL 25th, 2009

Rain or Shine

PRIZES & CERTIFICATES.

Fun and demonstrations.

Registration starts at 7:30AM

At the VFW parking lot

FOX Hunt Starts at 9:00AM

Geared for Beginners. Non- Ham participation encouraged!

BBQ burgers, & etc. at NOON

DF gear show & tell and tours of WØVFW start at 1PM

$5 Donation (PER PERSON) includes BBQ Burgers & Lady Auxiliary Food.

Cashbar-Drinks- Soda pop- supports the VFW Post 3115

PRIZES

Supplied by RADIO SHACK Derby

Talk-in 145.27 MHz. WØVFW/R

Hunt will be somewhere on 2 meters FM & somewhere in Sedgwick County. Test your skills. Become skilled at emergency transmitter locating, or finding interference problems. 144-148 MHz. 2 Meter Ham Band will be used. All that is needed is a vehicle, map, compass and any programmable scanner or 2 meter FM transceiver and some sort of antenna. Come join the fun, Rules and more information at our Yahoo Group site.

Non-Hams are encouraged to participate. Non-hams can ride with, form their own team or do it alone. For Encouragement, scheduling ride-a-longs, questions or answers go to the WØVFW Yahoo Group board at www.yahoogroups. com/w0vfw. Not a Yahoo Group member? Be sure to state Transmitter hunt or your call sign in your request to join.

To RSVP on line- go to www.yahoogroups. com/w0vfw then click on APPLICATIONS in the LEFT PANEL; then click on RSVP and fill it out. To RSVP by mail- Send your information and $5.00 donation to:

WØVFW AMATEUR RADIO CLUB, c/o VFW POST 3115, 4801 W. Douglas Ave. Wichita, KS 67209.

Contact # k0vfw Marc Hammann (316)655-6053

Tentative WØVFW T-hunt rules…

You may hunt alone, Bring one or more NON-HAMs or hunt in HAM teams.
A non-Ham co-hunter is worth 5 extra points. 7 extra points if under 18. Hams under 18 worth 5 points.
Only a single person is qualified for the extra points. No back seats full of babies.
If the T-hunter is a NON-Ham hunting alone he/she gets the points.
If the team is all non-hams, they get to claim up to 2 non-ham extra points.
If the ham is under 18 and an unlicensed driver, his points can be claimed in all circumstances.
All hunters must register at the VFW post 3115 parking lot before hunt starts.
They will receive a copy of the rules, the fox frequency, alternate frequency and last minute instructions.
Each hunter vehicle will have its odometer checked by an official. Trip odometers set to zero.
Hunter vehicle will leave when the official tells them. One Vehicle will leave every 2 minutes.
Hunters can DF in the parking lot prior to leaving the parking lot. When handed their envelope.
The hunt will be limited to Sedgwick county.
Times will be recorded by an official at the VFW parking lot upon leaving.
Upon finding the FOX, Mileage and times will be recorded by the FOX assistant.
Each hunter may use any equipment they can carry in or upon their vehicle.
No one may not transmit on the FOX frequency except the FOX. Immediate Disqualification.
A hunter may use a fixed station for bearings, provided, if involving another operator, that operator is included as part of the team.
No hunter can contact another hunter or team via radio or Cell phone. Except- general chitchat and good hearted egging can be done on WØVFW/R as long as hints or the FOX location are not divulged.
Officials will monitor WØVFW/R. You may not divulge that you found the fox or gave up.
The hidden transmitter will be within 100 feet of access by standard passenger car. The

hunt usually ends at 11:30 AM, unless the hider agrees to keep the T on the air for teams that haven't found it yet.
Non-Ham hunters must register a cell phone number with the Officials. Optional for hams.
The FOX will read prepared statements, go no audio from time to time and make any announcements it feels necessary. It will spend 3 minutes minimum stating the off air end of hunt time.
Only 1 prize per vehicle entry. Time is favored over mileage. As DF'ing in an emergency, time is of essence.
Time is to second. Mileage is to the 1/10 of mile.
Violations of the rules can ban you from all future hunts & prizes. Rulings of the Officials are FINAL.

Prize Categories-

Ham Solo

Ham plus 1

HAM Team (2 or more hams)

Non-Ham Solo

Non-HAM Team

Lowest Time 1st, 2nd Prize

Lowest Mileage 1st, 2nd Prize

Boobie Prize

Most Time

Most Mileage

Loosers Certificate of Distinction

Ham didn't find FOX

Non-Ham didn't find FOX

Calculations –

In all categories Time minus total points (1 point= 30 seconds) equals score. Mileage minus total (1 point= 1/2 mile) equal score. Example:

Non-ham team #1 -Father(5pts. ) and teenager son(7pts.) take 34 minutes and 10.4 miles to find the fox.

Ham team #2 -2 Hams (0pts.) take 18 minutes and 8.6 miles to find the fox.

Team #1- 12 points to deduct. (34 min-(12pts./ 2) & 10.4mi-(12pts. /2)) = SCORE 28 minutes and 4.4 miles.

Team #2- No points to deduct. = SCORE 18

minutes and 8.6 miles.

Team #2 Hams would win Lowest Time….Team #1 Father & son would win Lowest Mileage.

# 672. Re: [BoeingRadioClub] VFW T-hunt 090425 Flyer

Date: 2009-05-08 14:04:17 UTC
From: Farlow, Nicholas J
Topic: 653  Message: 678
Attachments: 2 described; binary payloads are missing from this source WARC

All,
This is your last chance to order field day attire and save $$!!

I will be placing one more order, on behalf of the BEARS, for field day shirts and hats!!

Mark your calendar (right away) - put Field Day on Saturday June 27rd and Sunday 28th and keep all your appointments, vacations, etc. on other weekends

Order your ARRL Field Day T-Shirts or Hats prior to 3:00 PM on 14 May 2009. A full order includes a check or cash. T-Shirts or hats will be $10 for GWFD attendees. Shirt sizes come in S, M, L, XL, 2XL, 3XL, 4XL. (You can also order a 2009 Field Day Pin, or GOTA pins for $5 each as part of this order) http://www.arrl.org/catalog/?item=NO-0515 <http://www.arrl.org/catalog/?item=NO-0515> All items will be ordered on 14 May 2009, and you will be contacted when the order arrives, prior to field day.
Field Day Captains, you might ensure your teammates will be properly attired.

Please give me an email, US MAIL, or a call at 316-312-5222 or at 316-210-3732 to place your order if you want to save on the shipping and taxes.

Ordering from me will save you $3 per shirt plus shipping costs because the BEARs club will offset the difference!!

Thanks

Nick Farlow, KB0YHT
Greater Wichita Field Day - T-Shirt Chairman

# 680. Results of Amateur Radio Testing at VFW Post 3115 -9MAY09

Yahoo group: BEARSAmateurRadioClub
Date: 2009-05-09 18:48:19 UTC
From: Am Fm
Topic: 680  Message: 680

DO NOT REPLY TO YAHOO GROUPS

This Announcement is to inform you of the Amateur Radio Testing that occurred this morning at the VFW post 3115 by the W0VFW Amateur Radio Club:

9-Applicants applied and were Tested
6-Obtained CSCE Element 2 certificates, soon to become Technician Class Licenses.
3-Obtained CSCE Element 2 & 3 certificates, soon to become General Class Licenses.
None were licensed Amateur radio operators. All 9 will receive new Amateur Radio Licenses shortly. In a few days we will be welcoming these new Amateur Radio Operators on the air. All profess a desire to aid in public service events including SKYWARN.

We currently are working logistics to offer a GENERAL CLASS Licensing Class because of demand. It will commence before year end. Stay Tuned, that is all.

# 682. New amateurs and Weather today

Yahoo group: BEARSAmateurRadioClub
Date: 2009-05-13 15:02:31 UTC
From: Wing, Randy
Topic: 682  Message: 682

Most of these new radio amateurs are interested in SKYWARN - it is why they got their license! Please welcome these new local hams to the fold - if you hear them on a repeater, take the time to talk to them - remember how it was when you first got your license!

KD0HTD ---Sammy Fox
KD0HTE ---Jeanne Groves
KD0HTF ---Russell Groves
KD0HTG ---Joseph Jones Harvey Jones' son
KD0HTH ---Denise Ducharme
KD0HTI ---Brandon Trube
KD0HTJ ---Jon Inghram
KD0HTK ---Jeffery Wagner
KD0HTL ---Jeffery Schiffel new BEARS member

The National Weather Service Graphical HWO (http://www.crh.noaa.gov/ict/hwo/hwo.php) shows a busy afternoon and evening for our area. One of the coordinators will be watching the storms develop and pass on new information as it develops.

THUNDERSTORMS ARE EXPECTED ON WEDNESDAY AND WEDNESDAY NIGHT AS A COLD FRONT MOVES THROUGH THE AREA. SEVERE STORMS WILL BE LIKELY WEDNESDAY AFTERNOON AND WEDNESDAY EVENING MAINLY SOUTHEAST OF THE KANSAS TURNPIKE. LARGE HAIL AND DAMAGING WINDS WILL BE THE MAIN THREATS. IN ADDITION LOCALLY HEAVY RAINFALL WILL BE POSSIBLE WITH THE STRONGER STORMS. PLEASE SEE THE LATEST FLOOD WATCH FOR DETAILS.

# 683. Plectron radio receivers

Yahoo group: BEARSAmateurRadioClub
Date: 2009-05-18 15:55:38 UTC
From: Randy Friend
Topic: 683  Message: 683

If anyone has any idea what would be a cost effective way to re-crystal or replace our Plectron single frequency FM radio receivers at the National Weather Service - I would be very interested.

We currently have receivers for:  146.940, 145.130 (doesn't work and needs to), and 146.820.  I'd like to have 146.940, 145.130, 146.820, 146.610, and the one for the new upcoming repeater that will tie us into the State Line linked repeaters, and the one for the local connection into echolink/K-Link.

I am not excited about having a scanner perform these functions.  It is useful to have a dedicated radio and you can get quite good at hearing what you need to even if they are all going at once.

Randy, N0LD

# 685. Breaking the Law - Followup information

Yahoo group: BEARSAmateurRadioClub
Date: 2009-05-21 15:47:08 UTC
From: Wing, Randy
Topic: 685  Message: 685

I learned yesterday that the specific incident was with four cars as a group with SKYWARN stickers and flashing lights while speeding. They moved as a group. Several RACES spotters noted them.

The good news? I don't know of any SKYWARN members in our local SKYWARN membership that operate as a group of four. I think it unlikely that these were locals. If anyone spots any SKYWARN member speeding, please report it to myself or Sherry Weir. As much identifying information as can be provided will help.

I hope your Memorial Day weekend is safe and enjoyable!

# 688. General Class Scheduled this summer in Wichita

Yahoo group: BEARSAmateurRadioClub
Date: 2009-05-24 19:57:28 UTC
From: Am Fm
Topic: 688  Message: 688

Want to upgrade from Technician?
There will be a General Class presentation given by the members of the W0VFW amateur radio Club. They start up the week after Field Day.

The Classes will be held at
VFW Post 3115
corner of Anna and Douglas
Wichita, KS
at 7 to 9 PM every Thursday evening in July (5) and August (4) for a total of 9 classes. We expect some not to make all classes that's why we picked a total of 9 classes. That's Starting July 2nd.
Cost is $30. It includes the W0VFW study material on CD and a paid seat at the W0VFW ARRL-VE Exam session.
Study books (Gordon West, ARRL or Both) are available at Derby Radio Shack. Mention W0VFW Classes for a discount.
ARRL-VE test will be 9am on August 29th a Saturday morning and the 5th Saturday of the month.
W0VFW is air conditioned and cool beverages are available.

Those not licensed at all, can attend, our last tech test resulted in 33% passing both tests and 100% walking away, passing at least 1 exam.

To make reservations to attend...and get on the class list contact:

Larry W8LM at:

# 704. Greater Wichita Field Day - amended

Yahoo group: BEARSAmateurRadioClub
Date: 2009-06-18 23:01:50 UTC
From: Randy
Topic: 704  Message: 704

A couple of things to correct:

1. If you want to fish or paddle boat - you can without paying an admittance fee during the 1 PM Friday through 3 PM Sunday Field Day event. Paddle boat rental requires a fee for the length of time you use it.

2. If you camp in a tent - without requiring an electrical hookup - you will not be required to pay a fee - if you do it in the area north of the pavillion or on the grounds where we rented.

3. If you require an electrical hookup - you need to pay a camp fee. I believe it is $5 a day.

4. All electrical camping hookups need to register for each day they are there.

Nick will be back on Tuesday, Don.

I would think we need about 15 - 20 burgers on Friday evening.

Saturday evening - I would plan for 80 people.

Lisa has pancakes planned for breakfast on Sunday.

I will ensure that Samantha get plates and cups and water and pop for the event. If James W will bring his collection coffee cans for donations, that would be great!

Randy

# 708. Field Day Weather Challenge

Yahoo group: BEARSAmateurRadioClub
Date: 2009-06-23 20:07:39 UTC
From: Randy Friend
Topic: 708  Message: 708

Field Day Weather Challenge:

Not normally wanting to accept a Field Day "scoring challenge" - sometimes we just don't get a vote!  Please be advised that the present weather forecast calls for greater temperatures and heat indexes than we have experienced yet this year for our Field Day weekend. During Field Day set up and tear down, we will have a large quantity of bottled water and the air conditioned pavillion available.  We will take as many breaks as we need to to be safe!  There is also a lot of shade available at our location.  we will focus on working in the shady spots as long as we can.

Field Day setup begins at 1:00 PM on Friday, June 26th, 2009.

Please remember to wear a hat to protect your head, use sun screen, dress appropriately and let someone know if you are not feeling well because of the heat. We can always take a break. We have plenty of time to get done what we need to do. Drink plenty of water!! Don't worry about conserving water during setup or tear down. If we run out, we can get more.

Please also spend a few minutes to familiarize yourself with the signs of overheating and watch out for these warning signs in others.

SUNBURN: Redness and pain. In severe cases swelling of skin, blisters, fever, headaches. First Aid: Ointments for mild cases if blisters appear and do not break. If breaking occurs, apply dry sterile dressing. Serious, extensive cases should be seen by physician.

HEAT CRAMPS: Painful spasms usually in muscles of legs and abdomen possible. Heavy sweating. First Aid: Firm pressure on cramping muscles, or gentle massage to relieve spasm. Give sips of water. If nausea occurs, discontinue use.

HEAT EXHAUSTION: Heavy sweating, weakness, skin cold, pale and clammy. Pulse thready. Normal temperature possible. Fainting and vomiting. First Aid: Get victim out of sun. Lay down and loosen clothing. Apply cool, wet cloths. Fan or move victim to air conditioned room. Sips of water. If nausea occurs, discontinue use. If vomiting continues, seek immediate medical attention.

HEAT STROKE (or sunstroke): High body temperature (106° F. or higher). Hot dry skin. Rapid and strong pulse. Possible unconsciousness. First Aid: HEAT STROKE IS A SEVERE MEDICAL EMERGENCY. SUMMON EMERGENCY MEDICAL ASSISTANCE OR GET THE VICTIM TO A HOSPITAL IMMEDIATELY. DELAY CAN BE FATAL. Move the victim to a cooler environment Reduce body temperature with cold bath or sponging. Use extreme caution. Remove

clothing, use fans and air conditioners. If temperature rises again, repeat process. Do not give fluids. Persons on salt restrictive diets should consult a physician before increasing their salt intake.

73!  Despite the weather challenge - the excitement is building!

# 710. SEDAN REPEATER NOW ONLINE.....

Yahoo group: BEARSAmateurRadioClub
Date: 2009-06-26 05:14:31 UTC
From: Randy
Topic: 710  Message: 710

PLEASE CIRCULATE THE INFORMATION:

The Sedan, KS repeater 146.955 neg offset, PL tone 100 hz. is now on line. The unit was reinstalled with the kind assistance of the Kansas Alert Radio Service, Inc. and Elk County Radio Society; using the Elk County Radio Society club callsign KD0BAP. This is a cooperative effort between the aforementioned groups and Chautauqua County Emergency Management.

This repeater is open to all amateur radio operators licensed for this frequency and has a primary useage for emergency communications during severe weather events. Except during those situations the repeater is open for the free use of all.

n0ld, please post this information on the Skywarn user website.

All club website officers, please post this repeater on your website as well.

Please feel free to contact the custodian kc0nyk with any questions.

73's all

Topic: 714  Message: 714

As coordinators for the 2009 Greater Wichita Field Day event, we would like to thank all individuals, clubs and family members who helped to make the 2009 Field what it was this year.

We had good food, fun, fellowship and made some new friends. Members of the Wichita ARC, the VFW ARC, the Boeing Employees ARS, the Salvation Army Team Emergency Radio Network (SATERN), and SKYWARN all contributed and made our effort a success. Although we had some struggles with computer communications, the heat and our usual weather change we made it through another year with more ideas to improve our 2010 Field Day. Our hot meals were provided by the Salvation Army, our own cooks, Don Urban and Lisa Wing. It is much appreciated and made the Field Day much easier for all of us.

We handed out coupons for five Tech study books, and hope that see the result in new attending field day participants next year. We would like to thank those who coordinated the food service, antennas, radios and computers. It was another great field day. We expect to see the results of our effort next week.

We hope to see you at the 2010 field day, until then we will meet you on the air during the weekly net meetings .

# 715. Field Day pictures

Yahoo group: BEARSAmateurRadioClub
Date: 2009-06-30 16:18:08 UTC
From: Wing, Randy
Topic: 157  Message: 715

As I prepare the entry to the ARRL for our Greater Wichita Field Day - I want to use the best pictures available! I strongly request that anyone with pictures of our Field Day send them to harvey.jones@....

If you have more than 8 mb of pictures - please work a deal out with him to get them to him - or send them to:

Harvey Jones
9467 Wyncroft St.
Wichita, KS 67205
316-729-9575

Although there is no REAL deadline - I will be working on the entry over the weekend - and it would be nice if you could get them to him right away. If you build a CD and can't get it to him by Saturday, please drop me a note at winger55552001@... and I'll come get them.

Thanks!

Randy Wing, N0LD

Not sure, as there are a lot of my step-dad's families that I don't know about.  Originally they were from Ark City and Winfield.  But there were some other relations in other south Kansas areas that we never really knew about.  Some of the French families in Wichita are not related at all to us.

Sent E-mail press releases to media and request to Merl Teller  to attend.
Friday took pictures of setting-up helped erect James and Harvey's 40m Digital antenna
Saturday took pictures observed voice,CW and digital modes. attended James' demonstration on quick and portable 2Meter antenna
Sunday: helped adjust antenna near the store, worked GOTA with Marsha,Tried to make 10 meter contacts,  helped disassemble the antennas around the Pavilion,  Helped James and Harvey lower their antenna.
HAD A GREAT TIME and learned some things.

Friday I setup the 20m PSK station and ran it all weekend long plus
took it down on Sunday. Plus helped out with the 40M PSK antenna setup.
Saturday showed off the Tennis ball launcher to a few guys. Show PSK to
other hams.
Antenna was a Buddipole up about 28 feet with a Hygain Vertical setup as
backup. station was a Kenwood TS 2000 running about 25 watts. Computer
was a Toshiba laptop running Ham Radio Deluxe.
Had lots of fun.

Helped put up antennas Friday. Enjoyed the social talks and Don's hamburgers Friday evening
I couldn't get to the lake until Saturday afternoon, I was packing to leave for Hawaii early Sunday morning. Worked some 20 and 40 CW and then enjoyed Don's barbecued ribs Saturday evening. I couldn't stay late Saturday. I hope to consult a calender next year before making travel plans with a long lead time around field day.
I thouroughly enjoyed what time I could be there.

Randy-

Co- Captains  Larry W8LM and Jimmy N8NCC.... Set up the 75 meter station.
We were there from Noon on Friday Till Noon on Sunday....
The Antenna array were Phased Verticals...our Radial system was 1/4 mile of #16 aluminum fence wire, each vertical having 10 radials. The antenna array was designed using EZNEC 4 software by W7EL and resonated only 28kc from design. Design 3750- Actual was 3778.
Somewhere there is a video that I would like to send off back east of our set up. If I could get the URL It would be great.
Our station consisted of a Kenwood TS-570D on HF and a TM-7A on VHF/UHF for talk around.

We were 100% emergency power including our air conditioner. Given thunderstorms and ZERO Sunspots, did we do better than last year? I'd say we did as we worked more east coast sections.

Wakeup call at 05:30 heading for the Oklahoma City Hamfest in the morning.

Larry W8LM

<<N0W 2009 Score1.jpg>> <<N0W 2009 Score2.jpg>> <<N0W 2009 Score3.jpg>>
Field Day 2009 total score: 4,092 total points
--------
2,382 contact points
1,710 bonus points

Breakdown is in the attached files. Please note the following interesting facts:

1. 15m voice had more contacts than 20m voice.
2. 40m voice had the most number of voice contacts.
3. CW and Digital made 29% of the QSOs.
4. CW and Digital accounted for 41% of the contact points.

# 740. Greater Wichita Field Day Analysis Part I.

Yahoo group: BEARSAmateurRadioClub
Date: 2009-07-28 19:01:59 UTC
From: Wing, Randy
Topic: 740  Message: 740
Attachments: 1 described; binary payloads are missing from this source WARC

<<Scores.jpg>>
I've included previous year scores....

Last years score was 4,522 points... We had 4,092 pts this year. 90.4%
of last years.

Last years raw QSO total was: 1,047. We had 923 QSOs this year.
88.1% of last years.

More analysis when I am at home and can compare by band.

Gut reactions:

Downers:
1. propagation wasn't as good, (could have been +400 pts)
2. we didn't dedicate as much time to GOTA, (could have made
+100 pts or more)
3. we didn't make any solar power contacts, (100 Pts)
4. we didn't check into the KS net to pass traffic (100 Pts)
5. we had fewer attendees

Upers:
1. we had great antennas!
2. the GOTA members worked other HF stations, too, so they had
fun
3. the attendees we had were motivated
4. the CW scores were up over last year
5. we stretched ourselves - more CW operators, better network
6. we made friends that crossed the gap between amateur radio
clubs - emphasizing community service

# 746. BEARS Meeting - Field Day presentation

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-05 17:28:03 UTC
From: Wing, Randy
Topic: 746  Message: 746

The BEARS Meeting will be Thursday, August 6th at 5 PM in Room E203 of the 4501 Bldg. on the south side of 47th St. near Boeing.
This month's presentation will include a detailed look at how we did for Field Day - with some surprising results! If you participated in Field Day, I'd request that you attend - I'd like to get some pictures of who operated each station - and a picture of all the captains together, too.
The KS QSO Party is coming on 29-30 August 2009. The question has been raised - does anyone want to make it a club venture to participate - perhaps activate a missing county - or operate from someone's shack - or setup an operation at a park local. We would need to know who is willing to participate - we will discuss at the meeting - or you can send me a note at winger55552001@.... We will also be taking orders for KS QSO Party t-shirts.

# 748. KS QSO Party - T-shirts & County Activation

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-07 15:14:11 UTC
From: Randy Friend
Topic: 748 Message: 748

Orlan,

Please pass on in your monthly newsletter - or a special release.

The KS QSO Party http://www.ksqsoparty.org/ will take place 29-30 August 2009. The effort to organize and finacially fund the KS QSO Party has drawn from the Boeing Employees ARS, the Santa Fe Trail ARC, and the Hesston College ARC. We have two corporate sponsors - B&H Sales of Derby, KS and Associated Radio of Overland Park, KS. $750 in plaques, certificates, and "Kansas Consummables" are available.

In our attempts to get each county in Kansas activated for the QSO party several mobile stations are covering numerous counties. It would be a sign of strength to the non-Kansas stations if we could get at least one fixed base operation in each county - perhaps drawn from each local club or active member. There are a few counties that we have NO ONE signed up to activate: Chase, Cowley, Ellsworth, Lincoln, Republic, and Russell. This website - http://www.ksqsoparty.org/activated/ - contains the most recent activation status. Please: 1) Activate your county! 2) Register that you are going to activate your county. County hunters around the county want to know they can work all 105 counties during the KS QSO Party!

I am personally pleased to be part of the effort to put Kansas back in the QSO Party effort! We have kept the hours limited enough that it will not impose a burden on you, plus you can activate your county for only part of the weekend! A few hours will make a different to a lot of participants.

There is a T-shirt available for purchase - if you get your order to us by Saturday, August 8, 2009 at 10 AM we may be able to deliver the T-shirt to the KS ARRL Convention on Sunday, August 16th. We will get it to you at any rate - so please order and specify the size you want by sending an email to winger55552001@....

Thanks!

Randy Wing, N0LD

# 750. GWFD - Looks like we are winning the Boeing Employees Challenge!

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-07 15:36:25 UTC
From: Wing, Randy
Topic: 750  Message: 750
Attachments: 1 described; binary payloads are missing from this source WARC

Although not completely official yet (the Boeing St. Louis sponsors of the Field Day Challenge are ensuring that no one else is going to submit a score from within Boeing) it looks almost certain that we will be winning the Boeing Employees Amateur Radio Society Field Day Challenge Plaque.

This means our FD entry topped both the St. Louis and the TWO entries from Seattle. It was a hard won competition - we won by 224 points out of 4092. Details are in the "Field Day Challenge 2009.xls" file attached (or on the yahoo web site).

How about that!

Randy,

Good to hear from you.

Yes, I received your entry, and here is the status of all the entries that I have received so far. (information in blue represents information received in 2009). I am still trying to reach the other 3 clubs, but I don't expect that any of them had a Field Day operation. So, unless I receive an unexpected entry from Portland, Tulsa, or Long Beach, you will win the Challenge Plaque.

Congratulations on the fine effort. We talked about it at our last officers' meeting, and we are impressed at the turnout you had, and with your GOTA and young operator's efforts.

# 754. KS QSO Party - Base Station needed

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-07 17:17:45 UTC
From: Wing, Randy
Topic: 754  Message: 754

BEARS members and friends,

We are looking for someone who would like to host KC0AHN as a KS QSO Party Station. The only requirement is that you operate MOST of:

9 AM - 9 PM on August 29th

9 AM - 3 PM on August 30th

And be willing to let a few members (less than 6) into your house for part of the QSO Party to help.

KC0AHN is listed in the KS QSO Party rules as providing a 100 point bonus to anyone that works them. So the station will be very popular during the contest.

Please volunteer for this by sending me a note @ winger55552001@....

Randy Wing, N0LD

Mr. Cowan, KB0DTI,

I am appalled at receiving you e-mail this morning. I do not understand why any dissemination of nominee's call signs would cause you to cancel the program. The problem is the person who released the list, not the nominees.
As a current Nominee for ARRL Kansas Section Manager, I do not care who knows about it, as competition is just that. The same would hold true for Kansas Young Ham of the Year. Even though I'm sure every nominee is worthy, a "winner" should be selected, that the whole purpose.

Clearly an outstanding Young Ham in Kansas would be known locally if not through most of the state. This is something to be proud of, not keep in secrecy.

Under your nomination rules, The young ham must be 18 years old or younger. I nominated my son, Jimmy, N8NCC who is 18 and just Graduated Derby High School.
He Varsity
Lettered in both Debate and Forensics.He attained the rank of Lt. Colonel and Executive Officer in his Air Force Junior ROTC program at his High school. He is a member of the Men's Axillary of VFW post 3115, W0VFW Amateur radio Club And Boeing Employees ARS. He also Skywarn Trained and participates in various Amateur Radio Related functions in Wichita and surrounding areas. He was President of the Kitty Hawk Honor Society and won the district American Legion Constitutional Oration Contest.

I believe he worked hard last year and is worthy of nomination. Hence forth, he starts Wichita State University as a Political Science- Pre Law student, and may not have the year he had last year, nor will he be 18 next year. At 19 he is ineligible by your rules.

I am making my comments public and within the Amateur Radio Fraternity Nationally. I hope others will agree with my conclusions.

Lawrence Macionski W8LM
Life ARRL Member
Nominee
ARRL Kansas Section Manager

VE Team Leader W0VFW VFW post 3115 Amateur radio Club.

Due to the Nominees call signs being exposed, the Kansas Young Ham of
the year program has been cancelled for this year.

The nominees will be recognized for their personal achievements at the
Kansas meeting August 16th.
All nominees that were submitted for 2009 will be eligible next year.

We thank you for your interest in this program.

Ron - KB0DTI

# 757. Field Day Pictures... from the East Coast

There is pictures of my old group in New Hampshire...Post City Amateur Radio Club 52 years old. Lot's of Pictures.

These guys consistently place in the top 10 all classes for Field Days. Almost always run K1R or W1WQM the club call. Last year I think they were 5th in the country.

Maybe there's an idea or two that we can steal from them.
They got the local Fire Department to erect an emergency hospital shelter they used for operating.
They use a fire tower to mount their beams and point them right at us.
There are some pictures from the top of the fire tower. You can see Maine, New Hampshire and Massachusetts from the top. That is also the Atlantic Ocean, Great Bay it's called. The Naval Ship yard can be seen but is not pictured.

Enjoy the pictures...

K1R placed 7th last year with well over 5000 qsos - we were just under 1000 qsos.

Does anyone know of a tower (not erected solely for field day use) that we could use next year?

Randy

Topic: 757  Message: 759

Does it need to be located in Sedgwick County?

K1R placed 7th last year with well over 5000 qsos - we were just under 1000 qsos.

Does anyone know of a tower (not erected solely for field day use) that we could use next year?

There is pictures of my old group in New Hampshire... Post City Amateur Radio Club 52 years old. Lot's of Pictures.

These guys consistently place in the top 10 all classes for Field Days. Almost always run K1R or W1WQM the club call. Last year I think they were 5th in the country.

Maybe there's an idea or two that we can steal from them.
They got the local Fire Department to erect an emergency hospital shelter they used for operating.
They use a fire tower to mount their beams and point them right at us.
There are some pictures from the top of the fire tower. You can see Maine, New Hampshire and Massachusetts from the top. That is also the Atlantic Ocean, Great Bay it's called. The Naval Ship yard can be seen but is not pictured.

Enjoy the pictures...

# 768. Ms-150 Bike ride

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-21 01:38:47 UTC
From: Roger Bailey
Topic: 768  Message: 768

MS-150 Bike Ride

Hello everyone
It?s that time of year again. The MS 150 bike ride is coming up Sept 12 and 13. It starts in Derby and goes though Rose hill, Douglas, Down toward Winfield and on the Dexter for the 100 mile ride on Saturday. This is a two day ride that takes lots of help to get the job done. I need Sag drivers and rest stop people. The Sag drivers will be running in between the rest stop to pickup any riders that are having problems and take them to the next rest stop. We are the eyes for the MS people to let them know how the ride is going. Basically the rest stops we keep an eye on the riders coming in to each stop and look for riders that are having trouble. Plus if the rest stop needs more supplies like food and water. After the rest stop closes, then you might take the supplies to another rest stop that needs them or take them to Winfield so they can use them the next day. It looks like there are 9 rest stops to put someone at. Rose Hill, Douglas, Rock , Wolfe private residence, Jim?s short stop, Country View Elem school, Liberty township hall, Dexter community building and Carnes private residence. Mobile rig will be best for this ride. We will be using two repeaters. We will start with the 146.850 ? offset PL 103.5 until we can?t use it any more, then we will switch over to the 145.190 ? offset there isn?t a PL for this one.
No one has to work both days unless you would like to. The more people that work both days the easier it gets for all of us. That way everyone knows what to do. There will be the gym at Baden square in Winfield for people to spend the night. All you need is a pad and or sleeping bag. The gym floor is hard. On Saturday they will have lunch for us. Saturday evening they have a great dinner and banquet going on at Baden square. Then they turn around and serve breakfast for everyone on Sunday morning, and then they will have lunch. The food is good.
If anyone would like to help, please send an email to n6zop@... and let me know what you would like to do and what days you can work. Looks like I need 9 rest stops people and about 6 sag drivers each day. I need to know as soon as possible that way I will know just how much help I will have.
IF any of you know someone that would like to help, Please forward this email to them.

Thanks to all.

# 773. KS QSO Party - signup!

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-26 14:30:19 UTC
From: Wing, Randy
Topic: 773  Message: 773

Kansas QSO Party
http://www.ksqsoparty.org/

At the August 2009 BEARS meeting many of you expressed an interest in participating in a club station for the Kansas QSO Party this weekend. I talked with Larry, W8LM and the VFW has offered their station (W0VFW - http://www.qrz.com/db/w0vfw) for our use during the Kansas QSO Party. Thank you, Larry, and the VFW ARC! They are located at 4801 West Douglas Ave in Wichita, KS (north of Towne West).

> For those of you interested in activating KC0AHN during the KS QSO
> Party this upcoming weekend - please let me know when you are
> available to operate at the VFW station! Please send me an indication
> by this evening if possible (late submittal is OK - you just might not

> 1:00 PM - 3:00 PM -
>
The exchange for the contest is simple:
Kansas stations send signal report and county.
"CQ Kansas QSO Party" should be your call. When you make contact, provide a signal report and the county - "59 Sedgwick". Record their signal report and their state, Canadian section or "DX".
The rules are located at: http://www.ksqsoparty.org/rules/

Information on the web for the Kansas QSO Party:

1. http://www.arrl.org/contests/#corral click on August and go to the 2nd page...

2. http://www.contesting.com/ follow the Kansas State QSO Party Link

I will be running 800 watts and "Unlimited".

# 774. KS QSO Party

Yahoo group: BEARSAmateurRadioClub
Date: 2009-08-28 16:12:06 UTC
From: Wing, Randy
Topic: 774  Message: 774

BEARS members and friends,

I did not receive ANY replies to the "please signup for the KS QSO Party - KC0AHN station at the VFW this weekend" message I sent earlier this week.

Harvey and James can't operate the entire weekend.

If no one is willing to help operate the KC0AHN station, the only other option is to run it from Butler county - as I'm the only registered station in Butler county - at my house.

So I need to know quickly if anyone DID intend to operate at the VFW as KC0AHN this weekend. If not, I will eat crow and apologize to the VFW - and let them operate there as W0VFW.

Randy Wing, N0LD

From: Wing, Randy
Topic: 605  Message: 776

The BEARS will be operating the KS QSO Party (KC0AHN) from Randy Wing's house this weekend - not the VFW. Between the BEARS and the VFW we just didn't have enough operators. We will be running 750-800 watts of power this weekend. I expect to run 2 or 3 radios.

I do not have unlimited capacity for operators. If you want to come out, please call me on my cell phone well ahead of the time so that I can be prepared for you.... Thanks! I'd hate to have all of you show up at the same time!

I have already gotten confirmation from:

Catherine French - Saturday evening
Jim Enix - Saturday
Nick and Laurie Farlow - Saturday
James Whitfield - ?
Harvey Jones - Saturday

I want to thank the BEARS for helping to sponsor the Kansas QSO Party this year! It has been 7 years since a Kansas QSO Party has been held. By co-sponsoring the Kansas QSO Party, the BEARS can feel proud that we helped give some National (and even world wide) visibility to Kansas. As of midnight tonight we already have 29 logs turned in.

Bob Harder, W0BH, (who helped make some CW contacts at our Field Day this year) made over 2616 CW morse code contacts and worked dozens of Kansas counties mobile. Bob is an avid QSO Party mobile CW contester and knows the top few winners in that category. After the QSO Party, Bob called me and said that the consensus amongst those contesters is that the Kansas QSO Party was better than the Texas and Oklahoma Parties! That puts us in the big leagues.

This weekend 7 BEARS members helped man the BEARS Bonus Points contact station, KC0AHN, at my house. The contest was 18 hours long split up over two days. We employed the use of two radio stations:

1. (20m Station) My FT-847, an LDG autotuner, and a 3 element 20 meter beam at 95 feet.

2. (40m Station) The BEARS ICOM 756 PRO III, and a newly installed 102 ft long DX-LB Plus in an inverted V configuration with the feed point at 90 feet.

BEARS Operators:

Brad Cooley, KS2V
Jim Enix, KC0QIE
Catherine French, KE5CEJ
Harvey Jones, AC0EG
Marsha Meilli, KD0FIS
James Whitfield, N5GUI
Randy Wing, N0LD

We worked 46 states, 7 Canadian Provinces, and several DX stations. Longest DX was the Ukraine. We made 442 unique contacts. More as the results are computed.

Randy Wing, N0LD

I wanted to take a moment to announce a new Amateur Radio Licencee:
Jennifer Walker - KD0IWD, Technician

She is new to the radio scene, and took her test at VFW Post 3115 on Aug 29th.  She has interests in storm spotting and emergency response.  She plans to join RACES, SkyWarn, and will be attending many of the local HAM events.

Subject: Sept Contest and Midwest Mania! approach
Sent: Sep 10, 2009 9:07 AM

Hello Kansas VHF'er:

Here is one last ping prior to this weekend. Yes, the ARRL Sept Contest is this weekend. And yes, Midwest Mania!--a special effort to increase activity across the Great Plains--is rolling.

I've been pleased by the interest shown by fixed stations AND rovers. 28 fixed stations have told me they will be on and specifically looking for more Great Plains activity than most years. 4 or 5 of those are portable operations from nice high ground.

Eleven Rovers (east of the Rockies Front Range) have pledged to go out! KK6MC/R, KA0KCI/R, WR0I/R, KR5J/R, KR0VER/R, N0LP/R, KD0S/R, W3DHJ/R, WD5AGO/R, KB0QGT/R and W9FZ/R.

What we need:
1. Fixed stations to get on the air from within the Great Plains. (Let me know you'll be on and I'll add you to the
list)

2. Fixed stations from outside the Great Plains to point out into that region, listen, and tune around. There ARE stations to work! (Let me know you'll be on and I'll add you to the list)

3. Rovers in the Great Plains (more are welcome), get out on to the roads and be safe. (If you've not updated your plans with me, please send them along for posting on the webpage)

If you send me your info, please send along your callsign, grid, and bands operated or your rover schedule to the best of your estimation.

I will make updates to the
http://www.w9fz.com/midwestmania09/
website on Thurs and Friday nights. After that, I'll be busy :-) .
Today and tomorrow, I'm personally spending my daytimes finding good places to operate in EN00/10 EM09/19/08/18.

Again, the response has been better than I hoped for! This weekend should be fun!
See you on the air,

73 Bruce Richardson W9FZ/R

Randy

Mary and I were out garage sale shopping today ( one of the many benefits of retirement..... That and having 8 grandkids to find bargains for..... ) when I saw something that might be of interest to the VHF and up community.

At or near 846 Zeta Ct, there is a direct TV dish and mounts priced at $10.
I cannot use it and I don't really know if that is a good price. The dish looked to be in excellant shape. I can only assume that it is close enough to a paraboloid shape to be useable as a reflector. For whatever value it is, the mount had three doorknob like things in a row.

If anyone cannot get out to look at it to see if they want it, I will be glad to stop by and hold it for them. Like I said, I cannot use it, so it cannot stay at my house.

I will be listening in on this WEBEX on Monday.

Any BEARS member or friend is welcome to check in to this separately - or in my office in room 3013 at 4:30 PM on Monday September 21st.

If you are a Boeing employee - you can join me in my office. If we have more than 4 people we'll move it to a conference room.

[Attachment(s) from Wing, Randy included below]

I will be listening in on this WEBEX on Monday.

Any BEARS member or friend is welcome to check in to this separately - or in my office in room 3013 at 4:30 PM on Monday September 21st.

If you are a Boeing employee - you can join me in my office. If we have more than 4 people we'll move it to a conference room.

Randy

From: Farlow, Nicholas J
Topic: 795  Message: 798

For the non-Boeing folks who would like to view this,

Please go to the regular BEARS meeting area (roomE203 in the southside learning center) at 4:30 on Monday, Sept 21. If the room changes, the monitor outside the room will list the new location.

Marsha Meili will present this web-ex from the computer already in the room.

Thanks
Nick

If you have webex at home you can do that. You can call in and listen - but you'll miss out on the presentation.

I don't have a good way to bring in a bunch of people into Boeing for this.

# 801. KSQSOPARTY SOAPBOX and Log progress

Yahoo group: BEARSAmateurRadioClub
Date: 2009-09-25 14:31:05 UTC
From: Wing, Randy
Topic: 801  Message: 801

http://www.ksqsoparty.org/soapbox/

We've added a new section for the SOAPBOX comments from the Kansas QSO Party. (Thanks, Kent)! The Soapbox provides a way for contest participants to submit comments (when they submit their score). The comments are overwhelmingly positive. The mobile contesters really made a huge difference in the way people viewed our Kansas QSO Party.

We have confirmed 143 logs so far - I believe there are over 50 (as many as 70) new logs in my email box awaiting handling. I expect a minor rush of submittals this weekend - so having over 200 submitted logs seems likely. This is almost double what we expected! Clearly, Kansas counties are in demand.

As we complete log handling - so far I've scored 59 of 143 logs (41%) - I'll compose a set of statistics that ought to prove interesting. I am starting to farm out a few of the tasks associated with handling, scoring, and checking logs. If you have any unique skills or desires to help, let me know! (n0ld@...).

If everyone would thank our sponsors it would really help next year when we'll also need financial support. (especially Radio Shack of Derby and Associated Radio in KC)

# 802. GROL/Radar Endorsements and PAMA.org

Yahoo group: BEARSAmateurRadioClub
Date: 2009-09-28 03:09:01 UTC
From: Dory Hayes
Topic: 801  Message: 802

I'm getting close to retirement out of the Air Force and I am starting get things lined up for an Avionics or Telecommunications career on the outside. Right now I am Communication/Navigation/Mission Systems here at McConnell on the KC135. I was looking at getting my General Radiotelephone Operations License and Radar Endorsement since tere are a couple fliers up here in the work center for classes. I plan on taking the class but I was wondering if GROL is the same things as General Class in amateur radio? Also is this worth having?

When I was looking up more information on these certifications I came across a website called PAMA.org (Professional Aviation Maintenance Association). Is anyone here a member of PAMA? I gave them a look over and seen they was working with the SAE. Anyone have any input on them?

Anyways, sorry about being rather nonexistent since I joined, deployments and a busy schedule seem to take up all my time. So I'm glad that I'm starting on this down hill slope now.

That raises a question in my mind, do you need the commercial radiotelephone liscense to work on commercial aircraft avionics? I suspicion the answer is yes.
I took that test years ago and it wasn't has hard as the amateur extra test, both have been totally restructured now though.

From: Steffens, Kerry W
Topic: 801  Message: 804

They have dropped the requirement for phone license in broadcast stations. I assume it is still required for 2-way such as CB and commercial but am not sure. I do not know of any license required for avionics.

To answer Dory's question: You will know more than a general class with what you learn and the experience you now have. Just some differences than an Extra. I do not think there is anything on smith charts and limited antennas questions. With minimal study you can pass both ham exams.

The license does not give you enough to get the ham ticket without studying for your ham license. You will know the material and about a week or two to brush up on the questions and you will be ready for the ham exam also.

I got my commerical license over 30 years ago and have had my extra for 15. The commerical was much harder than any ham exam. I thought that my advanced ticket was almost as hard. I have held all 5 tickets. Not saying that is good, but you sure grew in the hobby in steps.

worth having?

When I was looking up more information on these certifications I came across
a website called PAMA.org (Professional Aviation Maintenance Association).
Is anyone here a member of PAMA? I gave them a look over and seen they was
working with the SAE. Anyone have any input on them?

Anyways, sorry about being rather nonexistent since I joined, deployments and a busy schedule seem to take up all my time. So I'm glad that I'm starting on this down hill slope now.

Thanks all, that clarifies the difference between the two. I'm going to try and take this GROL/RE course and upgrade my Technicians to General soon. My ARRL study material should be current since I bought it later 08.

Far as earning a living, with the KC-x tanker talks back on, I'm hoping I can get in on this provided Boeing wins the contract. Do you all have any recommendations for what I should be doing now or just rely on my experience to land a job in this same career field?

I will be checking with Embry Riddle tomorrow to see what they recommend.

# 807. AT&T slams Morse Code

Yahoo group: BEARSAmateurRadioClub
Date: 2009-09-28 14:25:02 UTC
From: n5gui
Topic: 807  Message: 807

I just saw an AT&T ad on the CNN web page that showed a cartoon hand tapping out Morse on what I would call a cartoon of a pump handle key. As it taps out the characters LOL the cartoon shows above the dots and dashes which are then translated to letters. Then it has a tag line something to the effect of " If this is your idea of instant messaging, then you need to upgrade your internet connection."

I am sure that some advertising genius thought this would be cute, and therefore profitable. It would seem he didn't know, or for that matter care about the demonstration of Morse Code "racing against twiddle thumb texting by champion high schoolers on one of the late night national talk shows.

Classic: Idiots selling to people who know even less and who would rather latch onto a catchphrase or jingle instead of any knowledge.

Catherine,
I have an AJ14 tuner that I built a long time ago and I plan to keep forever.

I used to have an AA-151 that I built but had to sell it for something else long ago.

If your items are still available and you don't want to try some other channel, I would like to have them.
Thanks
Terry Gattis K9TAG

From: L M
Topic: 818  Message: 818

W0VFW next VE TESTING is scheduled for every 5th Saturday of the month..
This time it's Halloween...OCT 31st.

VE testing...Oct 31st, Doors open at 8am. Testing Starts at 9am..
Walkin's OK... ARRL VE FEE is $15.00

Location:
VFW POST 3115
4801 West Douglas
Wichita, KS 67209

W0VFW is the only VFW post sponsored ARC in the USA... Out meetings are 7pm on the last Monday of the Month...

Stop on by, members get a key to the club station on site. You need not be a member of the VFW or it's Auxiliary but we'd be glad to tell you all about them as well.

BTW- if you're a ARRL VE or another VE (we'll tell you how to get instant ARRL accreditation) and would like to participate in the testing program, please contact us.

Larry W8LM
W0VFW VE Team Leader

# 821. JOTA 17 Oct - Need Hams to talk with Scouts

Yahoo group: BEARSAmateurRadioClub
Date: 2009-10-14 01:57:34 UTC
From: Harvey Jones
Topic: 821  Message: 821

To all:

A group of Hams will be traveling to Scout Camp Kanza this weekend to operate a station as a part of the Scouts Webelos Woods.  We will be seeing over 300 Webelos and could use fellow Hams to talk with these scouts.  Operating times are 17 Oct from 9:00 AM to 6:00 PM.  To find out what repeaters and HF frequencies we are using, go to http://jota.whitebuffalodistrict.info.  We will be updating this throughout the day as we move around the bands.  If you hear that the band is busy, try again in 30 minutes.

We will be operating as KC0AHN.

If you are with another scout unit, look us up and try to contact us.  We would love to talk with you.

Take care

Good job, everybody
Field day is a multi-dimensional effort and the CW, digital contacts and bonus points seem to have taken us over the top.
Good planning and team execution.
On top of that, we had fun and nobody got hurt! Should be some way to add points for that.
James, next year I will help you more with that straight solar powered station. That will be unique.
Terry

# 830. Radio kits?

Yahoo group: BEARSAmateurRadioClub
Date: 2009-10-19 05:26:50 UTC
From: impact9@impact9.com
Topic: 830  Message: 830

Anyone have any experience with ham radio kits? I think it would be a blast building one. Might even be able to get my son into something besides xbox. I have component level repair experience so I just need suggestions on kits that have good instructions.

Dory,

There are a lot of different kits to choose from... from CW practice keys all the way to radios (K2 and K3) and amplifiers.

I've built a 40m CW radio - with not much prior experience. It was a blast... almost got my wife into doing it - she enjoyed the multi-color electronics parts.

Choose something you like and give it a try!

Randy, N0LD

I'm having a hard time tracking down a descent kit. The 2m/6m kit I did find was discontinued. Other kits for HF bands, which is what I want, are modular and too modern. I like tried and true equipment and would love to build a old school HF rig.

I don't know any kits with good instructions anymore. I occasionally build a Ramsey Kit. Pretty simple to build. I modify them for my own use as I can't make a board as cheap as they sell the kits.

http://www.ramseyelectronics.com/

My latest project in the to do pile is a Ramsey VOX for my FT847. I have a modified 2 board version which I drew up to include anti-vox for my AM station. Both will be set up to use my Heil head set. If anyone wants a schematic let me know and I will send it to you. A built and tested version will be available by spring. One thing when you build up kits or anything that you use a power brick on, be sure to pop in a three terminal regulator in to take care of the non-loaded over voltage.

For old kits, watch for them at hamfest. I see them every once in a while. I saw on in Tulsa and one here at the Tech-Ni-Chat/Valley Center. Enid is coming up first weekend of November. You have to hope all the parts are there.

Dory,

There is a lot of experience within the group building kits, particularly of the QRP variety.

I would like to add to the other suggestions that have been posted here the "PSK-80 Warbler" which was a club group buy a few years ago. There are several members that ordered and built the kit, so you should have many people to talk to if you should need some help.

It is complete 80M transceiver for PSK-31 mode that will run less than 5 watts of power. In my experience it was more parts but easier to construct than a TenTec 40M QRP CW transceiver. It has very little adjustment to get on the air.

The prices on kits have risen roughly 50% in the last ten years, but I think that the PSK-80 Warbler is the best kit in its price range. The kit that I received had the surface mounted ICs already installed, but I am not sure that is still the standard practice.

The kit is available from Small Wonder Labs. I should point out that they also supply PSK-31 transceiver kits for 40M, 30M, and 20, that are similar in function and power, but have very different board layout as well as price.

If a transceiver is more of a project than you had in mind, there are some very useful station accessories and test equipment for you to consider.

I wish you many hours of enjoyment.

STAY AWAY FROM RAMSEY ELECTRONICS..

K1SWL --- Short Wave Labs.... on the internet. He sells the NJ QRP warbler. 80M psk31 transceiver for $52.
NORCAL.... Northern California QRP club...

Check here for the whole world of ham radio kits..

# 837. New FM Satellite!

Yahoo group: BEARSAmateurRadioClub
Date: 2009-10-20 15:45:12 UTC
From: Wing, Randy
Topic: 837  Message: 837

http://www.n2yo.com/?s=35870

There is a new FM satellite in operation! SumbandilaSat. There is even a pass after 11:00 AM today!

http://forums.qrz.com/showthread.php?t=222358

The satellite has an uplink 145.880 MHz and a downlink 435.350 MHz

You can talk through this satellite if you have FM radio(s) with a long whip antenna or better:

A. Handheld dual band radio that supports transmission on 2m and reception on 70cm

B. Mobile dual band radio that supports transmission on 2m and reception on 70cm

C. Two separate radios - a 2m and a 70 cm

If you have a 2m/70cm radio that allows you to transmit on 2m and listen on 70cm, program these "pairs" into your radio:

Transmit Receive Memory Channel

145.885 435.360 1
145.880 435.355 2
145.880 435.350 3
145.880 435.345 4
145.875 435.340 5

Start listening for the satellite on memory channel 1 and test 2 and 3 occasionally if you aren't hearing the signal.

When you get a clear signal - you are ready to attempt transmission! Give your callsign and grid out and wait for a return call to you. Copy their callsign and grid.

Good luck, and report back to us if you make contact with this satellite!

Randy, N0LD

# 852. BEARS Dinner

Yahoo group: BEARSAmateurRadioClub
Date: 2009-12-03 20:36:00 UTC
From: Wing, Randy
Topic: 852  Message: 852

BEARS Dinner is tonight at 6 pm at Timberline (east).

The BEARS calendar reminder said 5 pm - that is old - do not pay attention to that!

Randy Wing
Boeing Mission Planning Systems
Deputy Program Manager

From: Jim Williams
Topic: 852  Message: 853

I never got a calender reminder for the dinner itself, just a meeting I knew wasn't going to happen per monthly schedule. It may be interesting getting there tonight now.

SB SPCL @ ARL $ARLX002
ARLX002 IARU Region 2 Requests Frequencies Be Kept Clear After
Massive Earthquake Strikes Haiti

ZCZC AX02
QST de W1AW
Special Bulletin 2  ARLX002
From ARRL Headquarters
Newington CT  January 13, 2010
To all radio amateurs

SB SPCL ARL ARLX002
ARLX002 IARU Region 2 Requests Frequencies Be Kept Clear After
Massive Earthquake Strikes Haiti

On Tuesday, January 12 at 4:53 PM Haiti time (2153 UTC), a magnitude
7.0 earthquake hit 10 miles (15 kilometers) west of Port-au-Prince,
the island nation's capital. Communications in and out of Haiti have
been disrupted. No word has been received as of yet from any of
Haitian Amateur Radio operators. The ARRL encourages US amateurs to
be aware of the emergency operations on the following frequencies:
7.045 and 3.720 MHz (IARU Region 2 nets), 14.265, 7.265 and 3.977
MHz (SATERN nets), and 14.300 MHz (Intercontinental Assistance and
Traffic Net).  The International Radio Emergency Support Coalition
(IRESC) is also active on EchoLink node 278173.

IARU Region 2 Area C Emergency Coordinator, Arnie Coro, CO2KK, is
coordinating a multi-national response by hams. There are organized
nets on 7.045 and 3.720 MHz; amateurs are asked to monitor the
frequencies, but to also keep them clear of non-essential traffic.
Amateur Radio operators should also be aware that emergency traffic
pertaining to the Haitian earthquake is expected on the SATERN
frequencies of 14.265 MHz, 7.265 MHz and 3977 MHz, according to

SATERN's leader, Major Pat McPherson. The Salvation Army is accepting health and welfare traffic requests on its Web site.

"As late as 9:45 PM local time (0245 UTC), we have not been able to contact any amateur or emergency services stations in Haiti," Coro said in an e-mail. "Amateurs from Cuba, the Dominican Republic, Puerto Rico and Venezuela are monitoring the 40 meter band frequency. We are still keeping watch on 7.045 MHz, hoping that someone in Haiti may have access to a transceiver and at least a car battery to run it," but so far. no HH stations have checked in.

Tuesday's quake was felt in the Dominican Republic, which shares the island of Hispaniola with Haiti, and in Eastern Cuba, but no major damage was reported in either place.

The January 13 edition of The Daily DX reported that the Rev John Henault, HH6JH, made contact late Wednesday morning with the Intercontinental Assistance and Traffic Net (IATN) on 14.300 MHz; this is the IARU Global Center of Activity frequency for emergency communications. He said that he was safe, but had no power and no phone service. He was operating on battery power and hoping to get a generator running later in the day. The edition also noted that Pierre Petry, HH2/HB9AMO -- who was in Cap Haitien (about 140 km north of Port-au-Prince) is "okay"; Petry is in Haiti working for the United Nations World Food Program. Later today, he will be traveling to the capital.

The UN's 9000 peacekeepers in Haiti -- many of whom are from Brazil -- were distracted from aid efforts by their own tragedy: Many spent the night hunting for survivors in the ruins of their headquarters. "It would appear that everyone who was in the building, including my friend Hedi Annabi, the United Nations' Secretary General's special envoy, and everyone with him and around him, are dead," French Foreign Minister Bernard Kouchner said Wednesday, speaking on French radio. UN peacekeeping chief Alain Le Roy would not confirm that Annabi was dead, but said he was among more than 100 people missing in the rubble of its headquarters. He said only about 10 people had been pulled out, many of them badly injured. Fewer than five bodies had been pulled from the rubble, he said.

The United Nations said the capital's main airport was "fully operational" and that relief flights would begin on Wednesday, January 13.

The situation in Haiti is still chaotic. More information will be posted as soon as possible. Information is being validated and shared between many amateur groups and news sources as it unfolds.

The list of weather meetings might interest someone
Jim

---
From: Konkel, DeAnn [mailto:dkonkel@...]
Sent: Wednesday, January 20, 2010 2:18 PM
To: undisclosed-recipients:
Subject: CERT - Team Info
Importance: High

Good Afternoon,

I hope that everyone had a wonderful holiday season and is ready to start the new year! Because of a family emergency, the third Thursday for a team meeting snuck up on me; therefore, we will NOT have a team meeting this month. Please mark your calendars for February 18th for the next meeting. We will be hold committee meetings over the next couple of weeks so be looking for a schedule of those meetings as well in case you'd like to join one of the committees.

I know that many of you received an application in the mail just before the holidays and there has been some confusion regarding them. I originally used a much short (and less detailed) application for the first few CERT classes that were taught so many of you completed that application. Later the legal department asked that I use the standard Emergency Management application (the really long one). I apologize for any confusion this may have caused some of you that thought you had already completed the application. Please complete the application and return it to me (if you have not done so). Also, do not hesitate to contact me if you have any questions regarding the application. Also, be sure to remember to let me know if you make any changes to phone numbers (home, work, cell), mailing address, or email address.

Also, I know it's hard to believe, but severe weather will be upon us soon and classes for severe weather safety have been scheduled. Remember these classes are FREE to all residents so I hope that everyone will have an opportunity to attend one. Cody Charvat with Emergency Management will deliver all of the classes listed below with the exception of the class on March 9th at Northwest High school. Mr. Chance Hayes (who developed the class) with the National Weather Service will present the March 9th class. All of the classes will start at

7:00 pm unless otherwise noted.

a.. Thursday, February 18 - Mount Hope Community Building, 105 S. Ohio St. - Mt. Hope, KS
b.. Thursday, February 25 - Goddard City Building, 118 N. Main St. - Goddard, KS
c.. Monday, March 1 - Haysville Middle School, 900 W. Grand Ave. - Haysville, KS
d.. Tuesday, March 2 - Park City Senior Center, 6100 N. Hydraulic St. - Park City, KS
e.. Thursday, March 4 - Colwich City Building, 310 S. Second St. - Colwich, KS
f.. Saturday, March 6 - Mulvane Fire Station, 910 E. Main St. (10 a.m.) - Mulvane, KS
g.. Monday, March 8 - Valley Center City Hall, 121 S. Meridian St. - Valley Center, KS
h.. Tuesday, March 9 - Wichita Northwest High School, 1220 N. Tyler Rd. - Wichita, KS
i.. Wednesday, March 10 - Bentley City Building, 150 S. Wichita St. - Bentley, KS
j.. Thursday, March 11 - Eastborough City Building, #1 Douglas Ave. - Eastborough, KS
k.. Monday, March 15 - Kechi City Hall, 220 W. Kechi Rd. - Kechi, KS
l.. Tuesday, March 16 - Clearwater Fire Station, 319 W. Ross St. - Clearwater, KS
m.. Wednesday, March 17 - McConnell AFB Theater, Open to base personnel only (1 p.m.) - Wichita, KS
n.. Wednesday, March 17 - Viola City Building, Main St. & Wilson St. - Viola, KS
o.. Thursday, March 18 - Derby Police Department, 229 N. Baltimore St. - Derby, KS
p.. Tuesday, March 23 - Andale City Hall, 326 N. Main St. - Andale, KS
q.. Wednesday, March 24 - Oaklawn Community Center, 2937 E. Oaklawn Dr. - Wichita, KS
r.. Monday, March 30 - Maize City Hall, 10100 W. Grady - Maize, KS
s.. Monday, April 5 - Garden Plain Senior Center, 1006 N. Main St. - Garden Plain, KS
t.. Tuesday, April 6 - Cheney City Hall, 131 N. Main St. - Cheney, KS
u.. Thursday, April 8 - Sedgwick Community Center, 520 Commercial St. - Sedgwick, KS
v.. Thursday, April 15 - Bel Aire City Building, 7651 W. Central Park Ave. - Bel Aire, KS
Hope to see everyone on February 18th. ~ DeAnn

# 877. KS QSO Party Results

Yahoo group: BEARSAmateurRadioClub
Date: 2010-01-25 19:19:05 UTC
From: Randy
Topic: 877  Message: 877

The Kansas QSO Party results have been posted on the KS QSO Party Web site:

www.ksqsoparty.org

Thanks to everyone who helped make this a great contest!

Interesting points:

- 150 logs were received!
- All Plaques had qualifying entries
- Phenomenal Mobile scores!
- Youth Award

I am happy to report we are in the process of ordering the plaques, sending the Kansas Konsumable awards, and preparing and sending the certificates.

Thank you for your patience. A special thank you to Kent Stutzman, KB0RWI, for being a high quality, responsive, adaptable webmaster!

Yes, we are in the process of organizing for the Kansas QSO Party for 2010!

Randy Wing, N0LD Delbert Sawyer, K0DDS Bob Harder, W0BH

# 888. New Madrid Fault & Thursday BEARS meeting

Yahoo group: BEARSAmateurRadioClub
Date: 2010-03-01 19:58:31 UTC
From: Wing, Randy
Topic: 888  Message: 888

A reminder that the next BEARS meeting is this Thursday at 5 PM. Robert Johnstone, James Whitfield, and Harvey Jones will discuss PSK-31 and different methods of running it.

In a non-related note, I am forwarding a message from Kerry Steffens about RACES preparation for a future New Madrid Earthquake. He invites anyone who is interested to attend tomorrow night.

Randy, N0LD

---
From: Steffens, Kerry W
Sent: Monday, March 01, 2010 8:11 AM
To: Enix, James T; Farlow, Nicholas J; James; Jones, Harvey G; Wing, Randy
Subject: Chuck Willis - Presentation on the New Madrid Fault

Sedgwick County RACES
Serving the Community

Presentation on the New Madrid Fault

Where: EOC located at 714 North Main
Time: Shorty after 7:00 PM
When: Tuesday, March 2, 2010
Presenter: Chuck Willis

You may have heard about the Madrid Fault or saw the article in the paper a week ago, but did you know it will affect us right here in Wichita? Come join RACES members as our guest to learn how this will impact you.

Every two years RACES and emergency management joins the VA hospital and Air Force in a milti state drill to test our resources and hospitals to respond to a Madrid fault disaster. This event will take place on April 8th, 2010. To further test our ability to respond, a local disaster will occur at the same time frame. Learn why this training is important and why we participate.

The emergency communications center (EOC) is a secure building which contains 911 and other emergency communications. For this reason you will need to phone 660-5969 or call on 146.940 MHz (+) and tell them you are waiting to be let in. A member will open the doors for you. Park in the east side parking lot and come to the North or right hand door as you face the building.

Brad Cooley donated a repeater to the BEARS club. Thanks, Brad!

It has 2m cans, power supply, 6 foot cabinet with rack, repeater, tones, etc. It could be used as a backup to the existing BEARS repeater or we could tie it into the Kansas-Oklahoma Repeater link or the K-Link or we could use it for some other worthy use - like an Echolink based repeater or IRLP based repeater.

Everyone, please discuss the possibilities by sending notes to everyone right here!

Also, lets thank the heck out of Brad for providing this repeater. He'd like to see it go to some good use.

Randy, N0LD

First item of business would be to determine if it is a backup...or if it will have it's own frequency. If it will have it's own frequency THEN...we need to apply for COORDINATION..

At that point IF a frequency is available, and we meet various requirements of the coordinator we can proceed.

One of those requirements is where to place the repeater. HAAT and such.

Everyone knows I've come from other areas of the country and been involved with the second repeater ever on the air... 146.91 Syracuse (GE Land Mobile) years ago, and the largest repeater in Detroit 146.64. One of the reasons those repeaters were such successes is that they had great locations. 147.30 Bluemont VA repeater covered 4 states and DC... that was 1 repeater..Still to this day it is SKYWARN for N0AA -the National Weather Service headquarters.

Traveling about Wichita and Sedgwick county. I have noticed that the Hyatt in downtown is owned by the city and DOES NOT have any antennas on top. It would give HT coverage for miles around downtown ....and that is the center of the population density for 50 miles around. The advantage of rooftop repeaters is short coax runs to the antenna.
The city would almost have to allow the repeater on top of the Hyatt because of the emergency communications nature of ham radio. Citizens would agree if informed as such.

Is is an urgent matter? NO- this area has many under utilized repeaters in the area compared to other areas of the country. Many times I scan all of 2 meters for 8-10 hours and do not hear any communications at all. I wonder if it isn't a waste of electricity having so many unused repeaters in the area.

Linking local repeaters may also be advantageous. A thought. Or a data repeater...

My ramblings done- A wise choice requires many variables investigated and agreed upon.

There is a reason that the Hyatt does not have any antennas. Take a look at all the other building along the river front and you will notice that there are no antennas there also. Antennas are not present until you are so many feet from the river bank.

The city and county supports coordinated amateur radio emergency communications 100%. That is not a problem nor a hard sell. It gets much more complicated after that.

I agree that we have more repeaters than people to use them. This club is the most active club in the city. How many minutes do each of us spend on our repeater. I have a conflict on net nights so I spend maybe 10 minutes a year. I am on the 94 repeater maybe 30 minutes a year. I have never been on any of the others.

I guess one needs to have a repeater plan. 1. What will it be used for, 2. Is there a service that it will be performed, 3. Is that use or service already being supplied, 4. Can the repeater be maintained and have good access. 5. Will enough people use the repeater to make it worth while 6. Where can it be located ( already mentioned)

We have talked a few times in the past about co-supporting repeaters. Having less, but better back up machines. This would distribute cost and maintenance. Finding folks to maintain machines is going to get harder in the future. We talk about echolink which is good, but how about back up for packet and APRS. I have a digitapeater for APRS but am too close to Joe to use it. Digitapeater out in the county of surrounding towns would be good. RACES maintains one in the Western part of the county around Cheney. RACES also maintains satellite repeaters into the 94 repeater around the county. Maybe being a satellite repeater would be good. What is the best way? Maybe area hams need to be looking into what would be best served and bring the ham community closer together.

It seems to me that the person or org donating the location might want a lot of input on its use and might be a larger factor, so I would move we find a location or locations that are viable first.  That might narrow some of the other options.

Topic: 902  Message: 906

Since I said, I'm new here, I don't understand why there is no antenna's on the Hyatt. I see it as quite advantageous. #1 no proximity of other radio services, #2 since Wichita sits in a topographical bowl, next to the river (creek where I come from) would be the lowest point. Placing it 12-15 stories high, makes it ripe for local line of site coverage, where the horizon is defined. Again, it is the center of the population density for 50 miles about. I could not find a topo map on line but city fire houses are about 1250ft ASL... Places like Mt. Hope and Cheney are 1400+ASL... an antenna on top of a 12-15 story building downtown would place it 150ft HAAT and would give county wide coverage. (and abrupt defined coverage)

Given I am also a participant of W0VFW- VFW Post 3115 Amateur Radio Club, their repeater 145.27 is located on a telephone pole at the post and antenna tip is about 55 feet in the air. A site such as the Hyatt would greatly improve it's coverage area.

Kerry you've got the right ideas. FM has grown and waned since I got my first rig (Detroit Police Race Riot Surplus- they moved to UHF) in 1969. 2FM rigs today are smaller than the microphone on that 2 channel Motorola Twin V.

D-star allows voice and data at the same time...But rigs cost $500 and up... Perhaps your comment about PACKET is appropriate. The point is... one frequency for Data, one for Voice. With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add a second mode-transceiver to a station. Many of us have a rig in the car, one at home and many times a HT too.

I would like to see some sort of committee formed to investigate a 21st century look into 2FM in the Wichita/South Central Kansas area. It needs to look beyond just 1 club and one county. Perhaps an invitation should go out to each and every repeater owner, group, group of users (ATV- RACES- SKYWARN- TECH-N-CHAT- K LINK ) and I'm sure I missed 50...
I recommend even if just on this yahoo group..Kerry's 6 points..
1. What
will it be used for,
2. Is there a service that it will be performed,
3.
Is that
use or service already being supplied,
4. Can the repeater be maintained
and
have good access.
5. Will enough people use the repeater to make it
worth
while
6. Where can it be located

I'm not going to answer any of these at this time. Remember I've only been in Wichita for 4 years. I will say this. I went to the Oklahoma ARRL Convention this year and saw two  2 meter repeaters for sale. I had my commercial 450 repeater and there were two other 450

machines available. I can't remember the last time I saw that many repeaters for sale at a hamfest.

Finally, regarding the repeater that was donated, is it on a coordinated frequency pair? Can it go on the air right away?

Space Weather News for April 5, 2010
http://spaceweather.com

GEOMAGNETIC STORM: A sharp gust of solar wind hit Earth's magnetosphere today, April 5th, at approximately 0800 UT and sparked the strongest geomagnetic storm of the year. The event registered 7 on the 0-to-9 Kindex scale of magnetic disturbances. Although the storm is subsiding now, it is not over; high-latitude sky watchers should remain alert for auroras. Latest images may be found in the gallery:
http://www.spaceweather.com/aurora/gallery_01apr10_page3.htm

Summary: Solar activity continues to increase after a two-year solar minimum that ranks among the century's deepest. The return of sunspots and a resurgent solar wind is good news for aurora watchers, who are seeing some of the best displays since ~2006. See also March. 2010.

# 909. RE: [BoeingRadioClub] Repeater

Yahoo group: BEARSAmateurRadioClub
Date: 2010-04-06 12:47:45 UTC
From: Steffens, Kerry W
Topic: 902  Message: 909

Hi Larry,

It is the downtown beautification and riverfront development project that prevents antennas. You will have a hard time getting it past council as they passed an ordinance to prevent it with in so many feet of the river front. It was written to prevent cell phone antennas, but all others were included. Small security and surveillance antennas were exempted. There are some other buildings that are almost as tall. I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it. You would have to work around their maintenance schedule to work on it. A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City. The RF field from the antenna deteriorated the coax. Coax is better now, but we still had to replace it yearly. Anyway that is the reason I would not prefer to be located there. A company that leases a building has control of egress and aggress. You would have to get permission from both the property owner and from the leaser. This still doesn't mean you can't get it done. The job just got a bit tougher.

The new liability laws don't help much either. The Derby water tower would be great, but they won't permit it to be used either. Folks are getting a bit spooky about climbing on and around buildings and such. They are now requiring folks to be bonded and insured. That prevented us from getting a couple of towers that were to be given us. To be bonded and insured you have to be in the business, show you have the proper equipment and training. When I had internet installed on my own tower, Pixus sent a certified climber to install it. They wouldn't allow me to climb my own tower because of the liability. Once it was installed, they could have cared less if I climbed it or not. Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in Maize (signal hill) and was waiting for a climb to connect the new hard-line about three years ago. The tower was sold and the new owners told us to take it down and remove the equipment. That is when we changed from two antennas to one and spent another $2,500 for a combiner and filters to isolated the transmit and and receive. That repeater is now ready to go back into operation as soon as we get the power supply clamping problem repaired. The reason I brought this up is just because someone gives permission to use a site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance. Each club has to have site insurance for equipment and damage for each installation. It is not much but runs a couple hundred dollars a year. The insurance covers damage caused by the antenna, coax and possible fire. You never know what lightning will do or what a falling antenna will do. The 4 sites that I am familiar with insure for liability and coax replacement. Coax replacement today is more than the radios. The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna. After the second go around the repeater was moved to it's present location. Insurance paid for the first go around but the second was on the club. Insurance makes you keep really good equipment and maintenance logs. It is a lot of work for the trustee and secretary. These are things this club has never had to deal with. If your VFW repeater antenna received a gust of 80 mph wind, fell on a car or person, do you have insurance? Boeing says nothing, but not so else where. Some places require that

you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add a second mode-transceiver to a station. Many of us have a rig in the car, one at home and many times a HT too.

I would like to see some sort of committee formed to investigate a 21st century look into 2FM in the Wichita/South Central Kansas area. It needs to look beyond just 1 club and one county. Perhaps an invitation should go out to each and every repeater owner, group, group of users (ATV- RACES- SKYWARN- TECH-N-CHAT- K LINK ) and I'm sure I missed 50...
I recommend even if just on this yahoo group..Kerry's 6 points..
1. What will it be used for,
2. Is there a service that it will be performed,
3. Is that use or service already being supplied,
4. Can the repeater be maintained and have good access.
5. Will enough people use the repeater to make it worth while
6. Where can it be located

I'm not going to answer any of these at this time. Remember I've only been in Wichita for 4 years. I will say this. I went to the Oklahoma ARRL Convention this year and saw two 2 meter repeaters for sale. I had my commercial 450 repeater and there were two other 450 machines available. I can't remember the last time I saw that many repeaters for sale at a

hamfest.

Finally, regarding the repeater that was donated, is it on a coordinated frequency pair? Can it go on the air right away?

There is a reason that the Hyatt does not have any antennas. Take a look at all the other building along the river front and you will notice that there are no antennas there also. Antennas are not present until you are so many feet from the river bank.

The city and county supports coordinated amateur radio emergency communications 100%. That is not a problem nor a hard sell. It gets much more complicated after that.

I agree that we have more repeaters than people to use them. This club is the most active club in the city. How many minutes do each of us spend on our repeater. I have a conflict on net nights so I spend maybe 10 minutes a year. I am on the 94 repeater maybe 30 minutes a year. I have never been on any of the others.

I guess one needs to have a repeater plan. 1. What will it be used for, 2. Is there a service that it will be performed, 3. Is that use or service already being supplied, 4. Can the repeater be maintained and have good access. 5. Will enough people use the repeater to make it worth while 6. Where can it be located ( already mentioned)

We have talked a few times in the past about co-supporting repeaters. Having less, but better back up machines. This would distribute cost and maintenance. Finding folks to maintain machines is going to get harder in the future. We talk about echolink which is good, but how about back up for packet and APRS. I have a digitapeater for APRS but am too close to Joe to use it. Digitapeater out in the county of surrounding towns would be good. RACES maintains one in the Western part of the county around Cheney. RACES also maintains satellite repeaters into the 94 repeater around the county. Maybe being a satellite repeater would be good. What is the best way? Maybe area hams need to be looking into what would be best served and bring the ham community closer together.

Subject: Re: [BoeingRadioClub] Repeater

First item of business would be to determine if it is a backup...or if it will have it's own frequency. If it will have it's own frequency THEN...we need to apply for COORDINATION. .

At that point IF a frequency is available, and we meet various requirements of the coordinator we can proceed.

One of those requirements is where to place the repeater. HAAT and such.

Everyone knows I've come from other areas of the country and been involved with the second repeater ever on the air... 146.91 Syracuse (GE Land Mobile) years ago, and the largest repeater in Detroit 146.64. One of the reasons those repeaters were such successes is that they had great locations. 147.30 Bluemont VA repeater covered 4 states and DC... that was 1 repeater..Still to this day it is SKYWARN for N0AA -the National Weather Service headquarters.

Traveling about Wichita and Sedgwick county. I have noticed that the Hyatt in downtown is owned by the city and DOES NOT have any antennas on top. It would give HT coverage for miles around downtown ....and that is the center of the population density for 50 miles around. The advantage of rooftop repeaters is short coax runs to the antenna.
The city would almost have to allow the repeater on top of the Hyatt because of the emergency communications nature of ham radio. Citizens would agree if informed as such.

Is is an urgent matter? NO- this area has many under utilized repeaters in the area compared to other areas of the country. Many times I scan all of 2 meters for 8-10 hours and do not hear any communications at all. I wonder if it isn't a waste of electricity having so many unused repeaters in the area.

Linking local repeaters may also be advantageous. A thought. Or a data repeater...

My ramblings done- A wise choice requires many variables investigated and agreed upon.

Brad Cooley donated a repeater to the BEARS club. Thanks, Brad!

It has 2m cans, power supply, 6 foot cabinet with rack, repeater, tones, etc. It could be used as a backup to the existing BEARS repeater or we could tie it into the Kansas-Oklahoma Repeater link or the K-Link or we could use it for some other worthy use - like an Echolink based repeater or IRLP based repeater.

Everyone, please discuss the possibilities by sending notes to everyone right here!

Also, lets thank the heck out of Brad for providing this repeater. He'd like to see it go to some good use.

Randy, N0LD

Kerry-

Boy that sure bucks PRB-1 and the Communications Act of 1934. but oh-well, I agree the big thing is insurance...Wait?!?!? Downtown isn't beautiful??? Who they kidding??? I was in Boston at Christmas, it looks pretty good. Thank goodness Teddy spent $999 Bizzillion to put I-93 under the city... Entrance is 4 lanes exit is 2 lanes. They tiled the tunnel walls. Same tile can be found in most politicians swimming pools there..

When I was putting up my tower back in NH, the neighbors went in to city hall and said my tower would drop property values, but said nothing about the Atomic Power Plant 1/4 mile away.. The City attorney was familiar with State (W0TV) and Federal rulings and even in session told the town they HAD TO ALLOW my tower. He told me if they refused he'd quit and fight my case because the last time it went to Federal court (Cincinnati) the judge ruled that should another Amateur Radio Antenna case come in front of Federal court, he would recommend punitive damages because so many municipalities keep bringing it to court.  It stands today, even though last month there was 85 mph winds.

Kerry--- so you know- I like the Columbus, Ohio solution... They put the transmitter on the tallest building and voting receivers... then anyone, any local ham that wants to put a receiver up on their tower can do so. Last I heard they had 24 or more voting receivers all around.. HT coverage is phenomenal...Most of the receivers are on 40-60 foot towers in guys back yards...each guy maintains his "input". Some company in Columbus makes voters and they use the local manufacturers. You get an input in your neighborhood, you get in with 100 mW.

Insurance is a valid point that actually, can be had reasonably. W0VFW is insured under the ARRL club insurance. The obvious way to go is to place it under the auspices of Emergency whatever and get it on municipal land or commercial property such as AM-FM-TV broadcast, as part of "public service".

So let me ask you this......

Given our conversation, I'm surprised more have not chimed in, Would it be worthwhile to suggest, perhaps that "yet another" 2 meter repeater in Sedgwick county is not worthwhile and perhaps, another area of the state would be more accommodating. Proviso's being -open emergency service etc. Perhaps K-link...or what I ideas would you have?

I logged over 5 hours scanning 2 meters. Except to the pager call up on 146.94 and Skywarn on 146.895 and Butler county.. There was no casual conversations on any repeaters. The only casual conversation I heard was on simplex and that was yesterday.

I think we are like in purpose, to find a good home for our good fortune.  I'm wondering...

A "incase of emergency" deployable repeater...trailer mounted... battery-generator, telescoping antenna mast... etc..  Something in a "go"box...

We'd need to find a frequency hardly used... Perhaps 146.46-147.46 split. It's used in NYC.. I don't think it's popular here.

Well, I'm wondering what everyone else thinks...  my recommendations are:
1. Complete Backup for 146.895 BEARS REPEATER
2. Item 1, plus making it deployable in emergency. (even to another state etc.)
3. Someone else's idea...

Hi Larry,

It is the downtown beautification and riverfront
development project that prevents antennas.  You will have a hard
time getting it past council as they passed an ordinance to prevent it with
in so many feet of the river front.  It was written to
prevent cell phone antennas, but all others were included.  Small
security and surveillance antennas were exempted.  There are some
other buildings that are almost as tall.  I don't think I would want to be
on the old Holliday Inn building as it has a TV antenna on it.  You would
have to work around their maintenance schedule to work on it.  A club
in KC had a 34/94 repeater on what was the KCMO tower in Kansas City.
The RF field from the antenna deteriorated the coax.  Coax is better now,
but we still had to replace it yearly.  Anyway that is the reason I would
not prefer to be located there.  A company that leases a building has
control of egress and aggress.  You would have to get permission from both
the property owner and from the leaser.  This still doesn't mean you
can't get it done.  The job just got a bit tougher.

The new liability laws don't help much either.  The
Derby water tower would be great, but they won't permit it to be used
either.  Folks are getting a bit spooky about climbing on and around
buildings and such.  They are now requiring folks to be bonded and
insured.  That prevented us from getting a couple of towers that were to be
given us.  To be bonded and insured you have to be in the
business, show you have the proper equipment and training.  When I had
internet installed on my own tower, Pixus sent a certified climber to install
it.  They wouldn't allow me to climb my own tower because of the
liability.  Once it was installed, they could have cared less if I climbed
it or not.  Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in
Maize (signal hill) and was waiting for a climb to connect the new hard-line
about three years ago.  The tower was sold and the new owners told us to
take it down and remove the equipment.  That is when we changed from two
antennas to one and spent another $2,500 for a combiner and filters to isolated
the transmit and and receive.  That repeater is now ready to go back into
operation as soon as we get the power supply clamping problem repaired.
The reason I brought this up is just because someone gives permission to use a
site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance. Each club has to have site insurance for equipment and damage for each installation. It is not much but runs a couple hundred dollars a year. The insurance covers damage caused by the antenna, coax and possible fire. You never know what lightning will do or what a falling antenna will do. The 4 sites that I am familiar with insure for liability and coax replacement. Coax replacement today is more than the radios. The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna. After the second go around the repeater was moved to it's present location. Insurance paid for the first go around but the second was on the club. Insurance makes you keep really good equipment and maintenance logs. It is a lot of work for the trustee and secretary. These are things this club has never had to deal with. If your VFW repeater antenna received a gust of 80 mph wind, fell on a car or person, do you have insurance? Boeing says nothing, but not so else where. Some places require that you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

BoeingRadioClub@ yahoogroups. com
Subject: RE: [BoeingRadioClub]
Repeater

Since I said, I'm new here, I don't understand why there is no antenna's on the Hyatt. I see it as quite advantageous. #1 no proximity of other radio services, #2 since Wichita sits in a topographical bowl, next to the river (creek where I come from) would be the lowest point. Placing it 12-15 stories high, makes it ripe for local line of site coverage, where the horizon is defined. Again, it is the center of the population density for 50 miles about. I could not find a topo map on line but city fire houses are about 1250ft ASL... Places like Mt. Hope and Cheney are 1400+ASL... an antenna on top of a 12-15 story building downtown would place it 150ft HAAT and would give county wide coverage. (and abrupt defined coverage)

Given I am also a participant of
W0VFW- VFW Post 3115 Amateur Radio Club, their repeater 145.27 is located on a telephone pole at the post and antenna tip is about 55 feet in the air. A site such as the Hyatt would greatly improve it's coverage area.

Kerry you've got the right ideas. FM has grown and waned since I got my first rig (Detroit Police Race Riot Surplus- they moved to UHF) in 1969. 2FM rigs today are smaller than the microphone on that 2

channel Motorola Twin V.

D-star allows voice and data at the
same time...But rigs cost $500 and up... Perhaps your comment about PACKET
is appropriate. The point is... one frequency for Data, one for Voice.
With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add
a second mode-transceiver to a station. Many of us have a rig in the car,
one at home and many times a HT too.

I would like to see some sort
of committee formed to investigate a 21st century look into 2FM in the
Wichita/South Central Kansas area. It needs to look beyond just 1 club and
one county. Perhaps an invitation should go out to each and every repeater
owner, group, group of users (ATV- RACES- SKYWARN- TECH-N-CHAT- K LINK )
and I'm sure I missed 50...
I recommend even if just on this yahoo
group..Kerry' s 6 points..
1. What will it be used for,
2. Is
there a service that it will be performed,
3. Is that use or service
already being supplied,
4. Can the repeater be maintained and have
good access.
5. Will enough people use the repeater to make it
worth while
6. Where can it be
located

I'm not going to answer any of these at this
time. Remember I've only been in Wichita for 4 years. I will say this. I
went to the Oklahoma ARRL Convention this year and saw two  2 meter
repeaters for sale. I had my commercial 450 repeater and there were two
other 450 machines available. I can't remember the last time I saw that
many repeaters for sale at a hamfest.

Finally, regarding the
repeater that was donated, is it on a coordinated frequency pair? Can it
go on the air right away?

Larry,

I agree with you. It should be a back up repeater, but where do we put it? I think a portable repeater is always good. The club has been talking about a trailer for a very long time. I did trailer pricing a couple of years ago and pulling this together will allow the club to have some real fun. Getting the repeater up and working will save us a lot of money. If we are talking about responding, let's take a look at that.

A private group will have a hard time getting into areas under the new homeland security guidelines. Even ARES will have a hard time. The reason I say this is that we have three major non-terrorist disasters brewing here in the US. One of these we are having a practice exercise with the Air Force tomorrow. If you have been keeping up with ARES (ARRL) effort to keep the American Red Cross from doing or requiring a background check on all ham operators you may have also read that this is a homeland security requirement. Under the new law or ruling, all disaster responding organizations must have a state and federal back ground check. The reason for this is terrorism and theft (looting). To go into an area now you have to have a picture ID that shows you have the the clearance plus paper work giving you access to the area. I have credential as a Sedgwick County RACES member, American Red Cross National Response Team member, and an end responder with our church, the ladder which I paid for out of my own pocket. Sad but true that this country now has to respond with these type of credentials.

This is why RACES organizations across the county now have MOUs with all counties in the State of origin and surround States to supply assistance. The county can do this because RACES members are volunteer county employees. The county provides the background checks, supplies the badges, provides the authorization paper work to pass check lanes and gain access to these areas in need. Because ARES is not streamline and now it is up to the individual to acquire these clearance for the organization, they may be hard press to respond. Our badges have a chip in them that allow the check point to read our clearance and security information. I am not saying that our club can not respond, but just responding may be more difficult than it was even two years ago. Katrina changed everything and the Madrid Fault is going to test the limits of all our recourses in this area. That is what this multi-state drill is all about tomorrow. We are taking lessons learned from our last two drills and are implementing the changes this time.

The other problem is, who are we set up to respond to or with? There needs to be a plan and coordination. These don't work unless the system is tested. It requires all members to be trained. Frequencies and modes of operation are preassigned. Field day is great and necessary as well as a lot of fun. It is a way to make sure resources are up and ready. There is just more to it than this.

Kerry

Hi Larry,

It is the downtown beautification and riverfront development project that prevents antennas. You will have a hard time getting it past council as they passed an ordinance to prevent it with in so many feet of the river front. It was written to prevent cell phone antennas, but all others were included. Small security and surveillance antennas were exempted. There are some other buildings that are almost as tall. I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it. You would have to work around their maintenance schedule to work on it. A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City. The RF field from the antenna deteriorated the coax. Coax is better now, but we still had to replace it yearly. Anyway that is the reason I would not prefer to be located there. A company that leases a building has control of egress and aggress. You would have to get permission from both the property owner and from the leaser. This still doesn't mean you can't get it done. The job just got a bit tougher.

The new liability laws don't help much either. The Derby water tower would be great, but they won't permit it to be used either. Folks are getting a bit spooky about climbing on and around buildings and such. They are now requiring folks to be bonded and insured. That prevented us from getting a couple of towers that were to be given us. To be bonded and insured you have to be in the business, show you have the proper equipment and training. When I had internet installed on my own tower, Pixus sent a certified climber to install it. They wouldn't allow me to climb my own tower because of the liability. Once it was installed, they could have cared less if I climbed it or not. Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in Maize (signal hill) and was waiting for a climb to connect the new hard-line about three years ago. The tower was sold and the new owners told us to take it down and remove the equipment. That is when we changed from two antennas to one and spent another $2,500 for a combiner and filters to isolated the transmit and and receive. That repeater is now ready to go back into operation as soon as we get the power supply clamping problem repaired. The reason I brought this up is just because someone gives permission to use a site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance. Each club has to have site insurance for equipment and damage for each installation. It is not much but runs a couple hundred dollars a year. The insurance covers damage caused by the antenna, coax and possible fire. You never know what lightning will do or what a falling antenna will do. The 4 sites that I am familiar with insure for liability and coax replacement. Coax replacement today is more than the radios. The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna. After the second go around the repeater was moved to

it's present location. Insurance paid for the first go around but the second was on the club. Insurance makes you keep really good equipment and maintenance logs. It is a lot of work for the trustee and secretary. These are things this club has never had to deal with. If your VFW repeater antenna received a gust of 80 mph wind, fell on a car or person, do you have insurance? Boeing says nothing, but not so else where. Some places require that you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

Subject: RE: [BoeingRadioClub] Repeater

Since I said, I'm new here, I don't understand why there is no antenna's on the Hyatt. I see it as quite advantageous. #1 no proximity of other radio services, #2 since Wichita sits in a topographical bowl, next to the river (creek where I come from) would be the lowest point. Placing it 12-15 stories high, makes it ripe for local line of site coverage, where the horizon is defined. Again, it is the center of the population density for 50 miles about. I could not find a topo map on line but city fire houses are about 1250ft ASL... Places like Mt. Hope and Cheney are 1400+ASL... an antenna on top of a 12-15 story building downtown would place it 150ft HAAT and would give county wide coverage. (and abrupt defined coverage)

Given I am also a participant of W0VFW- VFW Post 3115 Amateur Radio Club, their repeater 145.27 is located on a telephone pole at the post and antenna tip is about 55 feet in the air. A site such as the Hyatt would greatly improve it's coverage area.

Kerry you've got the right ideas. FM has grown and waned since I got my first rig (Detroit Police Race Riot Surplus- they moved to UHF) in 1969. 2FM rigs today are smaller than the microphone on that 2 channel Motorola Twin V.

D-star allows voice and data at the same time...But rigs cost $500 and up... Perhaps your comment about PACKET is appropriate. The point is... one frequency for Data, one for Voice. With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add a second mode-transceiver to a station. Many of us have a rig in the car, one at home and many times a HT too.

I would like to see some sort of committee formed to investigate a 21st century look into 2FM in the Wichita/South Central Kansas area. It needs to look beyond just 1 club and one county. Perhaps an invitation should go out to each and every repeater owner, group, group of users (ATV- RACES- SKYWARN- TECH-N-CHAT- K LINK ) and I'm sure I missed 50...
I recommend even if just on this yahoo group..Kerry' s 6 points..
1. What will it be used for,
2. Is there a service that it will be performed,
3. Is that use or service already being supplied,
4. Can the repeater be maintained and have good access.
5. Will enough people use the repeater to make it worth while
6. Where can it be located

I'm not going to answer any of these at this time. Remember I've only been in Wichita for 4 years. I will say this. I went to the Oklahoma ARRL Convention this year and saw two 2 meter repeaters for sale. I had my commercial 450 repeater and there were two other 450 machines available. I can't remember the last time I saw that many repeaters for sale at a hamfest.

Finally, regarding the repeater that was donated, is it on a coordinated frequency pair? Can it go on the air right away?

There is a reason that the Hyatt does not have any antennas. Take a look at all the other building along the river front and you will notice that there are no antennas there also. Antennas are not present until you are so many feet from the river bank.

The city and county supports coordinated amateur radio emergency communications 100%. That is not a problem nor a hard sell. It gets much more complicated after that.

I agree that we have more repeaters than people to use them. This club is the most active club in the city. How many minutes do each of us spend on our repeater. I have a conflict on net nights so I spend maybe 10 minutes a year. I am on the 94 repeater maybe 30 minutes a year. I have never been on any of the others.

I guess one needs to have a repeater plan. 1. What will it be used for, 2. Is there a service that it will be performed, 3. Is that use or service already being supplied, 4. Can the repeater be maintained and have good access. 5. Will enough people use the repeater to make it worth while 6. Where can it be located ( already mentioned)

We have talked a few times in the past about co-supporting repeaters. Having less, but better back up machines. This would distribute cost and maintenance. Finding folks to maintain machines is going to get harder in the future. We talk about echolink which is good, but how about back up for packet and APRS. I have a digitapeater for APRS but am too close to Joe to use it. Digitapeater out in the county of surrounding towns would be good. RACES maintains one in the Western part of the county around Cheney. RACES also maintains satellite repeaters into the 94 repeater around the county. Maybe being a satellite repeater would be good. What is the best way? Maybe area hams need to be looking into what would be best served and bring the ham community closer together.

Subject: Re: [BoeingRadioClub] Repeater

First item of business would be to determine if it is a backup...or if it will have it's own frequency. If it will have it's own frequency THEN...we need to apply for COORDINATION.
.

At that point IF a frequency is available, and we meet various requirements of the coordinator we can proceed.

One of those requirements is where to place the repeater. HAAT and such.

Everyone knows I've come from other areas of the country and been involved with the second repeater ever on the air... 146.91 Syracuse (GE Land Mobile) years ago, and the largest repeater in Detroit 146.64. One of the reasons those repeaters were such successes is that they had great locations. 147.30 Bluemont VA repeater covered 4 states and DC... that was 1 repeater..Still to this day it is SKYWARN for N0AA -the National Weather Service headquarters.

Traveling about Wichita and Sedgwick county. I have noticed that the Hyatt in downtown is owned by the city and DOES NOT have any antennas on top. It would give HT coverage for miles around downtown ....and that is the center of the population density for 50 miles around. The advantage of rooftop repeaters is short coax runs to the antenna.
The city would almost have to allow the repeater on top of the Hyatt because of the emergency communications nature of ham radio. Citizens would agree if informed as such.

Is is an urgent matter? NO- this area has many under utilized repeaters in the area compared to other areas of the country. Many times I scan all of 2 meters for 8-10 hours and do not hear any communications at all. I wonder if it isn't a waste of electricity having so many unused repeaters in the area.

Linking local repeaters may also be advantageous. A thought. Or a data repeater...

My ramblings done- A wise choice requires many variables investigated and agreed upon.

Brad Cooley donated a repeater to the BEARS club. Thanks, Brad!

It has 2m cans, power supply, 6 foot cabinet with rack, repeater, tones, etc. It could be used as a backup to the existing BEARS repeater or we could tie it into the Kansas-Oklahoma Repeater link or the K-Link or we could use it for some other worthy use - like an Echolink based repeater or IRLP based repeater.

Everyone, please discuss the possibilities by sending notes to everyone right here!

Also, lets thank the heck out of Brad for providing this repeater. He'd like to see it go to some good use.

Larry,

I agree with you.  It should be a back up repeater, but where do we put it?  I think a portable repeater is always good.  The club has been talking about a trailer for a very long time.  I did trailer pricing a couple of years ago and pulling this together will allow the club to have some real fun.  Getting the repeater up and working will save us a lot of money.  If we are talking about responding, let's take a look at that.

A private group will have a hard time getting into areas under the new homeland security guidelines.  Even ARES will have a hard time.  The reason I say this is that we have three major non-terrorist disasters brewing here in the US.  One of these we are having a practice exercise with the Air Force tomorrow.  If you have been keeping up with ARES (ARRL) effort to keep the American Red Cross from doing or requiring a background check on all ham operators you may have also read that this is a homeland security requirement. Under the new law or ruling, all disaster responding organizations must have a state and federal back ground check.  The reason for this is terrorism and theft (looting).  To go into an area now you have to have a picture ID that shows you have the the clearance plus paper work giving you access to the area.  I have credential as a Sedgwick County RACES member, American Red Cross National Response Team member, and an end responder with our church, the ladder which I paid for out of my own pocket.  Sad but true that this country now has to respond with these type of credentials.

This is why RACES organizations across the county now have MOUs with all counties in the State of origin and surround States to supply assistance.  The county can do this because RACES members are volunteer county employees.  The county provides the background checks, supplies the badges, provides the authorization paper work to pass check lanes and gain access to these areas in need.  Because ARES is not streamline and now it is up to the individual to acquire these clearance for the organization, they may be hard press to respond.  Our badges have a chip in them that allow the check point to read our clearance and security information.  I am not saying that our club can not respond, but just responding may be more difficult than it was even two years ago.  Katrina changed everything and the Madrid Fault is going to test the limits of all our recourses in this area.  That is what this multi-state drill is all about tomorrow.  We are taking

lessons learned from our last two drills and are implementing the changes this time.

The other problem is, who are we set up to respond to or with? There needs to be a plan and coordination. These don't work unless the system is tested. It requires all members to be trained. Frequencies and modes of operation are preassigned. Field day is great and necessary as well as a lot of fun. It is a way to make sure resources are up and ready. There is just more to it than this.

Kerry

Subject: RE: [BoeingRadioClub] Repeater

Kerry-

Boy that sure bucks PRB-1 and the Communications Act of 1934. but oh-well, I agree the big thing is insurance... Wait?!?!? Downtown isn't beautiful??? Who they kidding??? I was in Boston at Christmas, it looks pretty good. Thank goodness Teddy spent $999 Bizzillion to put I-93 under the city... Entrance is 4 lanes exit is 2 lanes. They tiled the tunnel walls. Same tile can be found in most politicians swimming pools there..

When I was putting up my tower back in NH, the neighbors went in to city hall and said my tower would drop property values, but said nothing about the Atomic Power Plant 1/4 mile away.. The City attorney was familiar with State (W0TV) and Federal rulings and even in session told the town they HAD TO ALLOW my tower. He told me if they refused he'd quit and fight my case because the last time it went to Federal court (Cincinnati) the judge ruled that should another Amateur Radio Antenna case come in front of Federal court, he would recommend punitive damages because so many municipalities keep bringing it to court. It stands today, even though last month there was 85 mph winds.

Kerry--- so you know- I like the Columbus, Ohio solution... They put the transmitter on the tallest building and voting receivers... then anyone, any local ham that wants to put a receiver up on their tower can do so. Last I heard they had 24 or more voting receivers all around.. HT coverage is phenomenal.. .Most of the receivers are on 40-60 foot towers in guys back yards...each guy maintains his "input". Some company in Columbus makes voters and they use the local manufacturers. You get an input in your neighborhood, you get in with 100 mW.

Insurance is a valid point that actually, can be had reasonably. W0VFW is insured under the ARRL club insurance. The obvious way to go is to place it under the auspices of Emergency whatever and get it on municipal land or commercial property such as AM-FM-TV broadcast, as part of "public service".

So let me ask you this......

Given our conversation, I'm surprised more have not chimed in, Would it be worthwhile to suggest, perhaps that "yet another" 2 meter repeater in Sedgwick county is not worthwhile and perhaps, another area of the state would be more accommodating. Proviso's being -open emergency service etc. Perhaps K-link...or what I ideas would you have?

I logged over 5 hours scanning 2 meters. Except to the pager call up on 146.94 and Skywarn on 146.895 and Butler county.. There was no casual conversations on any repeaters. The only casual conversation I heard was on simplex and that was yesterday.

I think we are like in purpose, to find a good home for our good fortune.  I'm wondering...

A "incase of emergency" deployable repeater...trailer mounted... battery-generator, telescoping antenna mast... etc..  Something in a "go"box...

We'd need to find a frequency hardly used... Perhaps 146.46-147.46 split. It's used in NYC.. I don't think it's popular here.

Well, I'm wondering what everyone else thinks...  my recommendations are:
1. Complete Backup for 146.895 BEARS REPEATER
2. Item 1, plus making it deployable in emergency. (even to another state etc.)
3. Someone else's idea...

Hi Larry,

It is the downtown beautification and riverfront development project that prevents antennas.  You will have a hard time getting it past council as they passed an ordinance to prevent it with in so many feet of the river front.  It was written to prevent cell phone antennas, but all others were included.  Small security and surveillance antennas were exempted.  There are some other buildings that are almost as tall.  I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it.  You would have to work around their maintenance schedule to work on it.  A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City.  The RF field from the antenna deteriorated the coax.  Coax is better now, but we still had to replace it yearly.  Anyway that is the reason I would not prefer to be located there.  A company that leases a building has control of egress and aggress.  You would have to get
permission from both the property owner and from the leaser.  This still doesn't mean you can't get it done.  The job just got a bit tougher.

The new liability laws don't help much either.  The Derby water tower would be great, but they won't permit it to be used either.  Folks are getting a bit spooky about climbing on and around buildings and such.  They are now requiring folks to be bonded and insured.  That prevented us from getting a couple of towers that were to be given us.  To be bonded and insured you have to be in the business, show you have the proper equipment and training.  When I had internet installed on my own tower, Pixus sent a certified climber to install it.  They wouldn't allow me to climb my own tower because of the liability.  Once it was installed, they could have cared less if I climbed it or not.  Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in Maize (signal hill) and was waiting for a climb to connect the new hard-line about three years ago.  The tower was sold and the new owners told us to take it down and remove the equipment.  That is when we changed from two antennas to one and spent another $2,500 for a combiner and filters to isolated the

transmit and and receive.  That repeater is now ready to go back into operation as soon as we get the power supply clamping problem repaired.  The reason I brought this up is just because someone gives permission to use a site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance.  Each club has to have site insurance for equipment and damage for each installation.  It is not much but runs a couple hundred dollars a year.  The insurance covers damage caused by the antenna, coax and possible fire.  You never know what lightning will do or what a falling antenna will do.  The 4 sites that I am familiar with insure for liability and coax replacement.  Coax replacement today is more than the radios.  The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna.  After the second go around the repeater was moved to it's present location.  Insurance paid for the first go around but the second was on the club.  Insurance makes you keep really good equipment and maintenance logs.  It is a lot of work for the trustee and secretary.  These are things this club has never had to deal with.  If your VFW repeater antenna received a
gust of 80 mph wind, fell on a car or person, do you have insurance?  Boeing says nothing, but not so else where.  Some places require that you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

Kerry and Larry,

I like the idea of a portable backup repeater.  Club members, please discuss and let us know what you think.

Randy, N0LD

Larry,

I agree with you.  It should be a back up repeater, but where do we put it?  I think a portable repeater is always good.  The club has been talking about a trailer for a very long time.  I did trailer pricing a couple of years ago and pulling this together will allow the club to have some real fun.  Getting the repeater up and working will save us a lot of money.  If we are talking about responding, let's take a look at that.

A private group will have a hard time getting into areas under the new homeland security guidelines.  Even ARES will have a hard time.  The reason I say this is that we have three major non-terrorist disasters brewing here in the US.  One of these we are having a practice exercise with the Air Force tomorrow.  If you have been keeping up with ARES (ARRL) effort to keep the American Red Cross from doing or requiring a background check on all ham operators you may have also read that this is a homeland security requirement. Under the new law or ruling, all disaster responding organizations must have a state and federal back ground check.  The reason for this is terrorism and theft (looting).  To go into an area now you have to have a picture ID that shows you have the the clearance plus paper work giving you access to the area.  I have credential as a Sedgwick County RACES member, American Red Cross National Response Team member, and an end responder with our church, the ladder which I paid for out of my own pocket.  Sad but true that this country now has to respond with these type of credentials.

This is why RACES organizations across the county now have MOUs with all counties in the State of origin and surround States to supply assistance.  The county can do this because RACES members are volunteer county employees.  The county provides the background checks, supplies the badges, provides the authorization paper work to pass check lanes and gain access to these areas in need.  Because ARES is not streamline and now it is up to the individual to acquire these clearance for the organization, they may be hard press to respond.  Our badges have a chip in them that allow the check point to read our clearance and security information.  I am not saying that our club can not respond, but just responding may be more difficult than it was even two years ago.  Katrina changed everything and the Madrid Fault is going to test the limits of all our recourses in this area.  That is what this multi-state drill is all about tomorrow.  We are taking lessons learned from our last two drills and are implementing the changes this time.

The other problem is, who are we set up to respond to or with?  There needs to be a plan and coordination.  These don't work unless the system is tested.  It requires all members to be trained.  Frequencies and modes of operation are preassigned.  Field day is great and necessary as well as a lot of fun.  It is a way to make sure resources are up and ready.  There is just more to it than this.

Kerry

Kerry-

Boy that sure bucks PRB-1 and the Communications Act of 1934. but oh-well, I agree the big thing is insurance... Wait?!?!? Downtown isn't beautiful??? Who they kidding??? I was in Boston at Christmas, it looks pretty good. Thank goodness Teddy spent $999 Bizzillion to put I-93 under the city... Entrance is 4 lanes exit is 2 lanes. They tiled the tunnel walls. Same tile can be found in most politicians swimming pools there..

When I was putting up my tower back in NH, the neighbors went in to city hall and said my tower would drop property values, but said nothing about the Atomic Power Plant 1/4 mile away.. The City attorney was familiar with State (W0TV) and Federal rulings and even in session told the town they HAD TO ALLOW my tower. He told me if they refused he'd quit and fight my case because the last time it went to Federal court (Cincinnati) the judge ruled that should another Amateur Radio Antenna case come in front of Federal court, he would recommend punitive damages because so many municipalities keep bringing it to court.  It stands today, even though last month there was 85 mph winds.

Kerry--- so you know- I like the Columbus, Ohio solution... They put the transmitter on the tallest building and voting receivers... then anyone, any local ham that wants to put a receiver up on their tower can do so. Last I heard they had 24 or more voting receivers all around.. HT coverage is phenomenal.. .Most of the receivers are on 40-60 foot towers in guys back yards...each guy maintains his "input". Some company in Columbus makes voters and they use the local manufacturers. You get an input in your neighborhood, you get in with 100 mW.

Insurance is a valid point that actually, can be had reasonably. W0VFW is insured under the ARRL club insurance. The obvious way to go is to place it under the auspices of Emergency whatever and get it on municipal land or commercial property such as AM-FM-TV broadcast, as part of "public service".

So let me ask you this......

Given our conversation, I'm surprised more have not chimed in, Would it be worthwhile to suggest, perhaps that "yet another" 2 meter repeater in Sedgwick county is not worthwhile and perhaps, another area of the state would be more accommodating. Proviso's being -open emergency service etc. Perhaps K-link...or what I ideas would you have?

I logged over 5 hours scanning 2 meters. Except to the pager call up on 146.94 and Skywarn on 146.895 and Butler county.. There was no casual conversations on any repeaters. The only casual conversation I heard was on simplex and that was yesterday.

I think we are like in purpose, to find a good home for our good fortune.  I'm wondering...

A "incase of emergency" deployable repeater...trailer mounted... battery-generator, telescoping antenna mast... etc..  Something in a "go"box...

We'd need to find a frequency hardly used... Perhaps 146.46-147.46 split. It's used in NYC.. I don't think it's popular here.

Well, I'm wondering what everyone else thinks...  my recommendations are:
1. Complete Backup for 146.895 BEARS REPEATER
2. Item 1, plus making it deployable in emergency. (even to another state etc.)
3. Someone else's idea...

Hi Larry,

It is the downtown beautification and riverfront development project that prevents antennas.  You will have a hard time getting it past council as they passed an ordinance to prevent it with in so many feet of the river front.  It was written to prevent cell phone antennas, but all others were included.  Small security and surveillance antennas were exempted.  There are some other buildings that are almost as tall.  I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it.  You would have to work around their maintenance schedule to work on it.  A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City.  The RF field from the antenna deteriorated the coax.  Coax is better now, but we still had to replace it yearly.  Anyway that is the reason I would not prefer to be located there.  A company that leases a building has control of egress and aggress.  You would have to get
permission from both the property owner and from the leaser.  This still doesn't mean you can't get it done.  The job just got a bit tougher.

The new liability laws don't help much either.  The Derby water tower would be great, but they won't permit it to be used either.  Folks are getting a bit spooky about climbing on

and around buildings and such.  They are now requiring folks to be bonded and insured.  That prevented us from getting a couple of towers that were to be given us.  To be bonded and insured you have to be in the business, show you have the proper equipment and training.  When I had internet installed on my own tower, Pixus sent a certified climber to install it.  They wouldn't allow me to climb my own tower because of the liability.  Once it was installed, they could have cared less if I climbed it or not.  Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in Maize (signal hill) and was waiting for a climb to connect the new hard-line about three years ago.  The tower was sold and the new owners told us to take it down and remove the equipment.  That is when we changed from two antennas to one and spent another $2,500 for a combiner and filters to isolated the transmit and and receive.  That repeater is now ready to go back into operation as soon as we get the power supply clamping problem repaired.  The reason I brought this up is just because someone gives permission to use a site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance.  Each club has to have site insurance for equipment and damage for each installation.  It is not much but runs a couple hundred dollars a year.  The insurance covers damage caused by the antenna, coax and possible fire.  You never know what lightning will do or what a falling antenna will do.  The 4 sites that I am familiar with insure for liability and coax replacement.  Coax replacement today is more than the radios.  The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna.  After the second go around the repeater was moved to it's present location.  Insurance paid for the first go around but the second was on the club.  Insurance makes you keep really good equipment and maintenance logs.  It is a lot of work for the trustee and secretary.  These are things this club has never had to deal with.  If your VFW repeater antenna received a
gust of 80 mph wind, fell on a car or person, do you have insurance?  Boeing says nothing, but not so else where.  Some places require that you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

Subject: RE: [BoeingRadioClub] Repeater

Since I said, I'm new here, I don't understand why there is no antenna's on the Hyatt. I see it as quite advantageous. #1 no proximity of other radio services, #2 since Wichita sits in a topographical bowl, next to the river (creek where I come from) would be the lowest point. Placing it 12-15 stories high, makes it ripe for local line of site coverage, where the horizon is defined. Again, it is the center of the population density for 50 miles about. I could not find a topo map on line but city fire houses are about 1250ft ASL... Places like Mt. Hope and Cheney are 1400+ASL... an antenna on top of a 12-15 story building downtown would place it 150ft HAAT and would give county wide coverage. (and abrupt defined coverage)

Given I am also a participant of W0VFW- VFW Post 3115 Amateur Radio Club, their repeater 145.27 is located on a telephone pole at the post and antenna tip is about 55 feet in the air. A site such as the Hyatt would greatly improve it's coverage area.

Kerry you've got the right ideas. FM has grown and waned since I got my first rig (Detroit Police Race Riot Surplus- they moved to UHF) in 1969. 2FM rigs today are smaller than the microphone on that 2 channel Motorola Twin V.

D-star allows voice and data at the same time...But rigs cost $500 and up... Perhaps your comment about PACKET is appropriate. The point is... one frequency for Data, one for Voice. With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add a second mode-transceiver to a station. Many of us have a rig in the car, one at home and many times a HT too.

I would like to see some sort of committee formed to investigate a 21st century look into 2FM in the Wichita/South Central Kansas area. It needs to look beyond just 1 club and one county. Perhaps an invitation should go out to each and every repeater owner, group, group of users (ATV- RACES- SKYWARN- TECH-N-CHAT- K LINK ) and I'm sure I missed 50...
I recommend even if just on this yahoo group..Kerry' s 6 points..
1. What will it be used for,
2. Is there a service that it will be performed,
3. Is that use or service already being supplied,
4. Can the repeater be maintained and have good access.
5. Will enough people use the repeater to make it worth while
6. Where can it be located

I'm not going to answer any of these at this time. Remember I've only been in Wichita for 4 years. I will say this. I went to the Oklahoma ARRL Convention this year and saw two  2 meter repeaters for sale. I had my commercial 450 repeater and there were two other 450 machines available. I can't remember the last time I saw that many repeaters for sale at a hamfest.

Finally, regarding the repeater that was donated, is it on a coordinated frequency pair? Can it go on the air right away?

There is a reason that the Hyatt does not have any antennas.  Take a look at all the other building along the river front and you will notice that there are no antennas there also. Antennas are not present until you are so many feet from the river bank.

The city and county supports coordinated amateur radio emergency communications 100%. That is not a problem nor a hard sell.  It gets much more complicated after that.

I agree that we have more repeaters than people to use them.  This club is the most active club in the city.  How many minutes do each of us spend on our repeater.  I have a conflict on net nights so I spend maybe 10 minutes a year.  I am on the 94 repeater maybe 30 minutes a year.  I have never been on any of the others.

I guess one needs to have a repeater plan.  1. What will it be used for, 2. Is there a service that it will be performed, 3. Is that use or service already being supplied, 4. Can the repeater be maintained and have good access.  5. Will enough people use the repeater to make it worth while  6. Where can it be located ( already mentioned)

We have talked a few times in the past about co-supporting repeaters.  Having less, but better back up machines.  This would distribute cost and maintenance.  Finding folks to maintain machines is going to get harder in the future.  We talk about echolink which is good, but how about back up for packet and APRS.  I have a digitapeater for APRS but am too close to Joe to use it.  Digitapeater out in the county of surrounding towns would be good.  RACES maintains one in the Western part of the county around Cheney.  RACES also maintains satellite repeaters into the 94 repeater around the county.  Maybe being a satellite repeater would be good.  What is the best way?  Maybe area hams need to be looking into what would be best served and bring the ham community closer together.

Subject: Re: [BoeingRadioClub] Repeater

First item of business would be to determine if it is a backup...or if it will have it's own frequency. If it will have it's own frequency THEN...we need to apply for COORDINATION. .

At that point IF a frequency is available, and we meet various requirements of the coordinator we can proceed.

One of those requirements is where to place the repeater. HAAT and such.

Everyone knows I've come from other areas of the country and been involved with the second repeater ever on the air... 146.91 Syracuse (GE Land Mobile) years ago, and the largest repeater in Detroit 146.64. One of the reasons those repeaters were such successes is that they had great locations. 147.30 Bluemont VA repeater covered 4 states and DC... that was 1 repeater..Still to this day it is SKYWARN for N0AA -the National Weather Service headquarters.

Traveling about Wichita and Sedgwick county. I have noticed that the Hyatt in downtown is owned by the city and DOES NOT have any antennas on top. It would give HT coverage for miles around downtown ....and that is the center of the population density for 50 miles around. The advantage of rooftop repeaters is short coax runs to the antenna.
The city would almost have to allow the repeater on top of the Hyatt because of the emergency communications nature of ham radio. Citizens would agree if informed as such.

Is is an urgent matter? NO- this area has many under utilized repeaters in the area compared to other areas of the country. Many times I scan all of 2 meters for 8-10 hours and do not hear any communications at all. I wonder if it isn't a waste of electricity having so many unused repeaters in the area.

Linking local repeaters may also be advantageous. A thought. Or a data repeater...

My ramblings done- A wise choice requires many variables investigated and agreed upon.

Brad Cooley donated a repeater to the BEARS club.  Thanks, Brad!

It has 2m cans, power supply, 6 foot cabinet with rack, repeater, tones, etc.  It could be used as a backup to the existing BEARS repeater or we could tie it into the Kansas-Oklahoma Repeater link or the K-Link or we could use it for some other worthy use - like an Echolink based repeater or IRLP based repeater.

Everyone, please discuss the possibilities by sending notes to everyone right here!

Also, lets thank the heck out of Brad for providing this repeater.  He'd like to see it go to some good use.

Randy, N0LD

# 915. Portable Backup Repeater

Yahoo group: BEARSAmateurRadioClub
Date: 2010-04-07 20:00:14 UTC
From: n5gui
Topic: 915  Message: 915

After reading the comments on the repeater topic, I wanted to include some comments, but they are enough off that topic that I started a new thread.

Kerry pointed out that as a portable repeater, the one under discussion in the other topic would need a trailer, or at least a pallet for the repeater, power supply, generator..... a lot of stuff. It probably would need a tilt over crank up tower mounted on the trailer as well.

I do like the idea of having a trailer mounted tilt over crank up tower available for various activities, but I suggest we give some thoughts to what is needed in the lines of a portable repeater.

Emergency response seems to come in two extremes. On the low end is the grab n' go kit. Maybe a bag or a bucket with radio, battery, coax, antenna, rope, food bar, water, jacket, blanket, and few tools. At the other end is a stocked RV full of communications gear parked at a fire station where the trained response team waits for the alarm to sound.

The idea of a trailer mounted repeater is on the upper end of the scale.

But what is the goal? If the intent is to get a repeater to a remote ( not currently served by repeaters ) desaster site for operation ( something like Greensburg ) or perhaps a temporary restoration after damage to an existing repeater ( storm aftermath ), then maybe a trailer mount is the right tool. But then again, maybe not.

Many of the mobile rigs, and even some of the HTs available today have cross band capabilities. The four most common bands available for this are 10M, 6M, 2M and 70CM, but there are others as well. Two of them, a receiver on the primary transmitting at low power on the cross band and a cross band receiver transmitting at available power on the primary, spaced a short distance apart will make a very serviceable repeater system under "emergency" conditions". I use the term liberally since Kansas, indeed this whole region, is noted for lots of space and not a lot of people, even fewer HAMs. I would not want to bring upon myself the wrath of any co-ordination entity, but frankly there is plenty of spectrum available to put several temporary cross band systems to support training or real emergency situations. Co-ordination has its place. But if I was responding to an emergency and inadvertently stepped on some co-ordinated machine, I would certainly finish the emergency traffic and afterward go make my appologies.

Such a situation might be a search for a missing child or alzheimer's patient. In that case, maybe the team could make do with a bucket (or two) containing gel cell batteries ( well maintained and "topped off" on the drive to the response site ) coax, roll up J-pole antennas, accessories, manual, and yes the radios. There is also the need to put the antennas up with a reasonable height (20 to 30 feet), so along with the bucket you need a bundle of mast sections or maybe a fiberglass push up pole like I have demonstrated a few times.

It won't cover the area that trailer mounted repeater using a 100 foot tower. And you can't use its generator to brew coffee through the long night of searching. Then again, it won't

be delayed in deployment because the wrong size hitch ball is mounted on the response vehicle. In a pinch, the bucket and pole system could be deployed for a short distance on a motor scooter.

I know the previous discussion was driven by the newly available repeater. I just wanted the discussion to stay within some reasonable bounds. To me, a six foot rack and cavities, does not a "portable backup repeater" make.... Certainly not one that is convenient to store.

As I said, I really would like to have available a trailer mounted tower. And if a "portable" repeater is the means to that end, I welcome it. I can also add the generator and additional support that it will also need. It has specific capabilities that are certainly useful.

Turn the topic to a deployable repeater, there are alternatives that should be considered.

I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it. You would have to work around their maintenance schedule to work on it. A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City. The RF field from the antenna deteriorated the coax. Coax is better now, but we still had to replace it yearly. Anyway that is the reason I would not prefer to be located there. A company that leases a building has control of egress and aggress. You would have to get permission from both the property owner and from the leaser. This still doesn't mean you can't get it done. The job just got a bit tougher.

The new liability laws don't help much either. The Derby water tower would be great, but they won't permit it to be used either. Folks are getting a bit spooky about climbing on and around buildings and such. They are now requiring folks to be bonded and insured. That prevented us from getting a couple of towers that were to be given us. To be bonded and insured you have to be in the business, show you have the proper equipment and training. When I had internet installed on my own tower, Pixus sent a certified climber to install it. They wouldn't allow me to climb my own tower because of the liability. Once it was installed, they could have cared less if I climbed it or not. Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in Maize (signal hill) and was waiting for a climb to connect the new hard-line about three years ago. The tower was sold and the new owners told us to take it down and remove the equipment. That is when we changed from two antennas to one and spent another $2,500 for a combiner and filters to isolated the transmit and and receive. That repeater is now ready to go back into operation as soon as we get the power supply clamping problem repaired. The reason I brought

this up is just because someone gives permission to use a site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance. Each club has to have site insurance for equipment and damage for each installation. It is not much but runs a couple hundred dollars a year. The insurance covers damage caused by the antenna, coax and possible fire. You never know what lightning will do or what a falling antenna will do. The 4 sites that I am familiar with insure for liability and coax replacement. Coax replacement today is more than the radios. The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna. After the second go around the repeater was moved to it's present location. Insurance paid for the first go around but the second was on the club. Insurance makes you keep really good equipment and maintenance logs. It is a lot of work for the trustee and secretary. These are things this club has never had to deal with. If your VFW repeater antenna received a gust of 80 mph wind, fell on a car or person, do you have insurance? Boeing says nothing, but not so else where. Some places require that you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

Subject: RE:
[BoeingRadioClub] Repeater

Since I said, I'm new here, I don't understand why there is no antenna's on the Hyatt. I see it as quite advantageous. #1 no proximity of other radio services, #2 since Wichita sits in a topographical bowl, next to the river (creek where I come from) would be the lowest point. Placing it 12-15 stories high, makes it ripe for local line of site coverage, where the horizon is defined. Again, it is the center of the population density for 50 miles about. I could not find a topo map on line but city fire houses are about 1250ft ASL... Places like Mt. Hope and Cheney are 1400+ASL... an antenna on top of a 12-15 story building downtown would place it 150ft HAAT and would give county wide coverage. (and abrupt defined coverage)

Given I am
also a participant of W0VFW- VFW Post 3115 Amateur Radio Club,

their repeater 145.27 is located on a telephone pole at the post and antenna tip is about 55 feet in the air. A site such as the Hyatt would greatly improve it's coverage area.

Kerry
you've got the right ideas. FM has grown and waned since I got my first rig (Detroit Police Race Riot Surplus- they moved to UHF) in 1969. 2FM rigs today are smaller than the microphone on that 2 channel Motorola Twin V.

D-star allows voice and
data at the same time...But rigs cost $500 and up... Perhaps your comment about PACKET is appropriate. The point is... one frequency for Data, one for Voice. With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add a second mode-transceiver to a station. Many of us have a rig in the car, one at home and many times a HT too.

I would like to see some sort of committee
formed to investigate a 21st century look into 2FM in the Wichita/South Central Kansas area. It needs to look beyond just 1 club and one county. Perhaps an invitation should go out to each and every repeater owner, group, group of users (ATV- RACES- SKYWARN- TECH-N-CHAT- K LINK ) and I'm sure I missed 50...
I
recommend even if just on this yahoo group..Kerry' s 6
points..
1. What will it be used for,
2. Is there
a service that it will be performed,
3. Is that use or service
already being supplied,
4. Can the repeater be maintained and
have good access.
5. Will enough people use the repeater
to make it worth while
6. Where can it be
located

I'm not going to answer any of these
at this time. Remember I've only been in Wichita for 4 years. I will say this. I went to the Oklahoma ARRL Convention this year and saw two  2 meter repeaters for sale. I had my commercial 450 repeater and there were two other 450 machines available. I can't remember the last time I saw that many repeaters for sale at a hamfest.

Finally, regarding the repeater that was
donated, is it on a coordinated frequency pair? Can it go on the air right away?

There is a reason that the Hyatt
does not have any antennas.  Take a look at all the other
building along the river front and you will notice that there
are no antennas there also.  Antennas are not present until
you are so many feet from the river bank.

The city and county supports
coordinated amateur radio emergency communications 100%.
That is not a problem nor a hard sell.  It gets much more
complicated after that.

I agree that we have more
repeaters than people to use them.  This club is the most
active club in the city.  How many minutes do each of us
spend on our repeater.  I have a conflict on net nights so
I spend maybe 10 minutes a year.  I am on the 94 repeater
maybe 30 minutes a year.  I have never been on any of the
others.

I guess one needs to have a
repeater plan.  1. What will it be used for, 2. Is there a
service that it will be performed, 3. Is that use or service
already being supplied, 4. Can the repeater be maintained and
have good access.  5. Will enough people use the repeater
to make it worth while  6. Where can it be located (
already mentioned)

We
have talked a few times in the past about co-supporting
repeaters.  Having less, but better back up machines.
This would distribute cost and maintenance.  Finding folks
to maintain machines is going to get harder in the future.
We talk about echolink which is good, but how about back up for
packet and APRS.  I have a digitapeater for APRS but am too
close to Joe to use it.  Digitapeater out in the county of
surrounding towns would be good.  RACES maintains one in
the Western part of the county around Cheney.  RACES also
maintains satellite repeaters into the 94 repeater around the
county.  Maybe being

a satellite repeater would be good.  What is the best way?  Maybe area hams need to be looking into what would be best served and bring the ham community closer together.

Subject: Re: [BoeingRadioClub]
Repeater

First item of business would be to
determine if it is a backup...or if it will have it's own frequency. If it will have it's own frequency THEN...we need to apply for COORDINATION. .

At that point IF
a frequency is available, and we meet various requirements of the coordinator we can proceed.

One of those
requirements is where to place the repeater. HAAT and such.

Everyone knows I've come from other areas of
the country and been involved with the second repeater ever on the air... 146.91 Syracuse (GE Land Mobile) years ago, and the largest repeater in Detroit 146.64. One of the reasons those repeaters were such successes is that they had great locations. 147.30 Bluemont VA repeater covered 4 states and DC... that was 1 repeater..Still to this day it is SKYWARN for N0AA -the National Weather Service headquarters.

Traveling about Wichita and
Sedgwick county. I have noticed that the Hyatt in downtown is owned by the city and DOES NOT have any antennas on top. It would give HT coverage for miles around downtown ....and that is the center of the population density for 50 miles around. The advantage of rooftop repeaters is short coax runs to the antenna.
The city would almost
have to allow the repeater on top of the Hyatt because of the emergency communications nature of ham radio. Citizens would agree if informed as such.

Is is an urgent
matter? NO- this area has many under utilized repeaters in

the area compared to other areas of the country. Many times I scan all of 2 meters for 8-10 hours and do not hear any communications at all. I wonder if it isn't a waste of electricity having so many unused repeaters in the area.

Linking local repeaters may also be advantageous. A thought. Or a data repeater...

My ramblings done- A wise choice requires many variables investigated and agreed upon.

Brad Cooley donated a repeater to the BEARS club.  Thanks, Brad!

It has 2m cans, power supply, 6 foot cabinet with rack, repeater, tones, etc.  It could be used as a backup to the existing BEARS repeater or we could tie it into the Kansas-Oklahoma Repeater link or the K-Link or we could use it for some other worthy use - like an Echolink based repeater or IRLP based repeater.

Everyone, please discuss the possibilities by sending notes to everyone right here!

Also, lets thank the heck out of Brad for providing this repeater.  He'd like to see it go to some good use.

Randy,
N0LD

Larry,

I agree with you.  It should be a back up repeater, but where do we put it?  I think a portable repeater is always good.  The club has been talking about a trailer for a very long time.  I did trailer pricing a couple of years ago and pulling this together will allow the club to have some real fun.  Getting the repeater up and working will save us a lot of money.  If we are talking about responding, let's take a look at that.

A private group will have a hard time getting into areas under the new homeland security guidelines.  Even ARES will have a hard time.  The reason I say this is that we have three major non-terrorist disasters brewing here in the US.  One of these we are having a practice exercise with the Air Force tomorrow.  If you have been keeping up with ARES (ARRL) effort to keep the American Red Cross from doing or requiring a background check on all ham operators you may have also read that this is a homeland security requirement. Under the new law or ruling, all disaster responding organizations must have a state and federal back ground check.  The reason for this is terrorism and theft (looting).  To go into an area now you have to have a picture ID that shows you have the the clearance plus paper work giving you access to the
area.  I have credential as a Sedgwick County RACES member, American Red Cross National Response Team member, and an end responder with our church, the ladder which I paid for out of my own pocket.  Sad but true that this country now has to respond with these type of credentials.

This is why RACES organizations across the county now have MOUs with all counties in the State of origin and surround States to supply assistance.  The county can do this because RACES members are volunteer county employees.  The county provides the background checks, supplies the badges, provides the authorization paper work to pass check lanes and gain access to these areas in need.  Because ARES is not streamline and now it is up to the individual to acquire these clearance for the organization, they may be hard press to respond.  Our badges have a chip in them that allow the check point to read our clearance and security information.  I am not saying that our club can not respond, but just responding may be more difficult than it was even two years ago.  Katrina changed everything and the Madrid Fault is going to test the limits
of all our recourses in this area.  That is what this multi-state drill is all about tomorrow.  We are taking lessons learned from our last two drills and are implementing the changes this time.

The other problem is, who are we set up to respond to or with?  There needs to be a plan and coordination.  These don't work unless the system is tested.  It requires all members to be trained.  Frequencies and modes of operation are preassigned.  Field day is great and necessary as well as a lot of fun.  It is a way to make sure resources are up and ready. There is just more to it than this.

Kerry-

Boy that sure bucks PRB-1 and the Communications Act of 1934. but oh-well, I agree the big thing is insurance... Wait?!?!? Downtown isn't beautiful??? Who they kidding??? I was in Boston at Christmas, it looks pretty good. Thank goodness Teddy spent $999 Bizzillion to put I-93 under the city... Entrance is 4 lanes exit is 2 lanes. They tiled the tunnel walls. Same tile can be found in most politicians swimming pools there..

When I was putting up my tower back in NH, the neighbors went in to city hall and said my tower would drop property values, but said nothing about the Atomic Power Plant 1/4 mile away.. The City attorney was familiar with State (W0TV) and Federal rulings and even in session told the town they HAD TO ALLOW my tower. He told me if they refused he'd quit and fight my case because the last time it went to Federal court (Cincinnati) the judge ruled that should another Amateur Radio Antenna case come in
front of Federal court, he would recommend punitive damages because so many municipalities keep bringing it to court.  It stands today, even though last month there was 85 mph winds.

Kerry--- so you know- I like the Columbus, Ohio solution... They put the transmitter on the tallest building and voting receivers... then anyone, any local ham that wants to put a receiver up on their tower can do so. Last I heard they had 24 or more voting receivers all around.. HT coverage is phenomenal.. .Most of the receivers are on 40-60 foot towers in guys back yards...each guy maintains his "input". Some company in Columbus makes voters and they use the local manufacturers. You get an input in your neighborhood, you get in with 100 mW.

Insurance is a valid point that actually, can be had reasonably. W0VFW is insured under the ARRL club insurance. The obvious way to go is to place it under the auspices of Emergency whatever and get it on municipal
land or commercial property such as AM-FM-TV broadcast, as part of "public service".

So let me ask you this......

Given our conversation, I'm surprised more have not chimed in, Would it be worthwhile to suggest, perhaps that "yet another" 2 meter repeater in Sedgwick county is not worthwhile and perhaps, another area of the state would be more accommodating. Proviso's being -open emergency service etc. Perhaps K-link...or what I ideas would you have?

I logged over 5 hours scanning 2 meters. Except to the pager call up on 146.94 and Skywarn on 146.895 and Butler county.. There was no casual conversations on any repeaters. The only casual conversation I heard was on simplex and that was yesterday.

I think we are like in purpose, to find a good home for our good fortune.  I'm wondering...

A "incase of emergency" deployable repeater...trailer mounted... battery-generator, telescoping antenna mast... etc..
Something in a "go"box...

We'd need to find a frequency hardly used... Perhaps 146.46-147.46 split. It's used in NYC.. I don't think it's popular here.

Well, I'm wondering what everyone else thinks...  my recommendations are:
1. Complete Backup for 146.895 BEARS REPEATER
2. Item 1, plus making it deployable in emergency. (even to another state etc.)
3. Someone else's idea...

Hi Larry,

It is the downtown beautification and riverfront development project that prevents antennas.  You will have a hard time getting it past council as they passed an ordinance to prevent it with in so many feet of the river front.  It was written to prevent cell phone antennas, but all others were included.  Small security and surveillance antennas were exempted.  There are some other buildings that are almost as tall.  I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it.  You would have to work around their maintenance schedule to work on it.  A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City.  The RF field from the antenna deteriorated the coax.  Coax is better now, but we still had to replace it yearly.  Anyway
that is the reason I would not prefer to be located there.  A company that leases a building has control of egress and aggress.  You would have to get permission from both the property owner and from the leaser.  This still doesn't mean you can't get it done.  The job just got a bit tougher.

The new liability laws don't help much either.  The Derby water tower would be great, but they won't permit it to be used either.  Folks are getting a bit spooky about climbing on and around buildings and such.  They are now requiring folks to be bonded and insured. Brad Cooley donated a repeater to the BEARS club.  Thanks, Brad!

It has 2m cans, power supply, 6 foot cabinet with rack, repeater, tones, etc.  It could be used as a backup to the existing BEARS repeater or we could tie it into the Kansas-Oklahoma Repeater link or the K-Link or we could use it for some other worthy use - like an Echolink based repeater or IRLP based repeater.

Everyone, please discuss the possibilities by sending notes to everyone right here!

Also, lets thank the heck out of Brad for providing this repeater.  He'd like to see it go to some good use.

Randy, N0LD

There is a trailer company right up I-35... A cargo trailer is ideal because the liability is on the vehicle that pulls it. Some groups bought bread trucks and find insurance is out of site. Because they are insuring, 90 year old grampa...and he's 1/2 blind with a 12 year expired drivers license.

Aluma tower in Florida makes crank up, fold over aluminum towers that easily adapt to cargo trailers. They mount them  and allow them to fold over the roof.  Since we have the YARD here in Wichita, I think we could build something.

Similar to the size of the Saturn trailer they had at the KS state convention last year Randy?  Would it need (a trailer) the capacity to also transport some form of portable tower or components that would allow erection of a temporary antenna?  O.B.T.W. I can help weld, but I don't have 220 vac drop or the Equiptment here. RJ

Kerry and Larry,

I like the idea of a portable backup repeater.  Club members, please discuss and let us know what you think.

Larry,

I agree with you.  It should be a back up repeater, but where do we put it?  I think a portable repeater is always good.  The club has been talking about a trailer for a very long time.  I did trailer pricing a couple of years ago and pulling this together will allow the club to have some real fun.  Getting the repeater up and working will save us a

lot of money.  If we are talking about responding, let's take a look at that.

A private group will have a hard time getting into areas under the new homeland security guidelines.  Even ARES will have a hard time.  The reason I say this is that we have three major non-terrorist disasters brewing here in the US.  One of these we are having a practice exercise with the Air Force tomorrow.  If you have been keeping up with ARES (ARRL) effort to keep the American Red Cross from doing or requiring a background check on all ham operators you may have also read that this is a homeland security requirement. Under the new law or ruling, all disaster responding organizations must have a state and federal back ground check.  The reason for this is terrorism and theft (looting).  To go into an area now you have to have a picture ID that shows you have the the clearance plus paper work giving you access to the
area.  I have credential as a Sedgwick County RACES member, American Red Cross National Response Team member, and an end responder with our church, the ladder which I paid for out of my own pocket.  Sad but true that this country now has to respond with these type of credentials.

This is why RACES organizations across the county now have MOUs with all counties in the State of origin and surround States to supply assistance.  The county can do this because RACES members are volunteer county employees.  The county provides the background checks, supplies the badges, provides the authorization paper work to pass check lanes and gain access to these areas in need.  Because ARES is not streamline and now it is up to the individual to acquire these clearance for the organization, they may be hard press to respond.  Our badges have a chip in them that allow the check point to read our clearance and security information.  I am not saying that our club can not respond, but just responding may be more difficult than it was even two years ago.  Katrina changed everything and the Madrid Fault is going to test the limits
of all our recourses in this area.  That is what this multi-state drill is all about tomorrow.  We are taking lessons learned from our last two drills and are implementing the changes this time.

The other problem is, who are we set up to respond to or with?  There needs to be a plan and coordination.  These don't work unless the system is tested.  It requires all members to be trained.  Frequencies and modes of operation are preassigned.  Field day is great and necessary as well as a lot of fun.  It is a way to make sure resources are up and ready. There is just more to it than this.

Kerry

Kerry-

Boy that sure bucks PRB-1 and the Communications Act of 1934. but oh-well, I agree the big thing is insurance... Wait?!?!? Downtown isn't beautiful??? Who they kidding??? I was in Boston at Christmas, it looks pretty good. Thank goodness Teddy spent $999 Bizzillion to put I-93 under the city... Entrance is 4 lanes exit is 2 lanes. They tiled the tunnel walls. Same tile can be found in most politicians swimming pools there..

When I was putting up my tower back in NH, the neighbors went in to city hall and said my tower would drop property values, but said nothing about the Atomic Power Plant 1/4 mile away.. The City attorney was familiar with State (W0TV) and Federal rulings and even in session told the town they HAD TO ALLOW my tower. He told me if they refused he'd quit and fight my case because the last time it went to Federal court (Cincinnati) the judge ruled that should another Amateur Radio Antenna case come in
front of Federal court, he would recommend punitive damages because so many municipalities keep bringing it to court.  It stands today, even though last month there was 85 mph winds.

Kerry--- so you know- I like the Columbus, Ohio solution... They put the transmitter on the tallest building and voting receivers... then anyone, any local ham that wants to put a receiver up on their tower can do so. Last I heard they had 24 or more voting receivers all around.. HT coverage is phenomenal.. .Most of the receivers are on 40-60 foot towers in guys back yards...each guy maintains his "input". Some company in Columbus makes voters and they use the local manufacturers. You get an input in your neighborhood, you get in with 100 mW.

Insurance is a valid point that actually, can be had reasonably. W0VFW is insured under the ARRL club insurance. The obvious way to go is to place it under the auspices of Emergency whatever and get it on municipal
land or commercial property such as AM-FM-TV broadcast, as part of "public service".

So let me ask you this......

Given our conversation, I'm surprised more have not chimed in, Would it be worthwhile to suggest, perhaps that "yet another" 2 meter repeater in Sedgwick county is not worthwhile and perhaps, another area of the state would be more accommodating. Proviso's being -open emergency service etc. Perhaps K-link...or what I ideas would you have?

I logged over 5 hours scanning 2 meters. Except to the pager call up on 146.94 and Skywarn on 146.895 and Butler county.. There was no casual conversations on any repeaters. The only casual conversation I heard was on simplex and that was yesterday.

I think we are like in purpose, to find a good home for our good fortune.  I'm wondering...

A "incase of emergency" deployable repeater...trailer mounted... battery-generator, telescoping antenna mast... etc..
Something in a "go"box...

We'd need to find a frequency hardly used... Perhaps 146.46-147.46 split. It's used in NYC.. I don't think it's popular here.

Well, I'm wondering what everyone else thinks...  my recommendations are:
1. Complete Backup for 146.895 BEARS REPEATER
2. Item 1, plus making it deployable in emergency. (even to another state etc.)
3. Someone else's idea...

Hi Larry,

It is the downtown beautification and riverfront development project that prevents antennas. You will have a hard time getting it past council as they passed an ordinance to prevent it with in so many feet of the river front. It was written to prevent cell phone antennas, but all others were included. Small security and surveillance antennas were exempted. There are some other buildings that are almost as tall. I don't think I would want to be on the old Holliday Inn building as it has a TV antenna on it. You would have to work around their maintenance schedule to work on it. A club in KC had a 34/94 repeater on what was the KCMO tower in Kansas City. The RF field from the antenna deteriorated the coax. Coax is better now, but we still had to replace it yearly. Anyway that is the reason I would not prefer to be located there. A company that leases a building has control of egress and aggress. You would have to get permission from both the property owner and from the leaser. This still doesn't mean you can't get it done. The job just got a bit tougher.

The new liability laws don't help much either. The Derby water tower would be great, but they won't permit it to be used either. Folks are getting a bit spooky about climbing on and around buildings and such. They are now requiring folks to be bonded and insured. That prevented us from getting a couple of towers that were to be given us. To be bonded and insured you have to be in the business, show you have the proper equipment and training. When I had internet installed on my own tower, Pixus sent a certified climber to install it. They wouldn't allow me to climb my own tower because of the liability. Once it was installed, they could have cared less if I climbed it or not. Anyway this makes a new site harder to get.

The ATV (KA0TV) repeater was install at 53rd street in Maize (signal hill) and was waiting for a climb to connect the new hard-line about three years ago. The tower was sold and the new owners told us to take it down and remove the equipment. That is when we changed from two antennas to one and spent another $2,500 for a combiner and filters to isolated the transmit and and receive. That repeater is now ready to go back into operation as soon as we get the power supply clamping problem repaired. The reason I brought this up is just because someone gives permission to use a site doesn't mean you will always be able to use it.

Another thing you have to consider now is site insurance. Each club has to have site insurance for equipment and damage for each installation. It is not much but runs a couple hundred dollars a year. The insurance covers damage caused by the antenna, coax and possible fire. You never know what lightning will do or what a falling antenna will do. The 4 sites that I am familiar with insure for liability and coax replacement. Coax replacement today is more than the radios. The 34/94 repeater was located at 53rd N. and Hillside until someone shot the coax and antenna. After the second go around the repeater was moved to it's present location. Insurance paid for the first go around but the second was on the club. Insurance makes you keep really good equipment and maintenance logs. It is a lot of work for the trustee and secretary. These are things this club has never had to deal with. If your VFW repeater antenna received a gust of 80 mph wind, fell on a car or person, do you have insurance? Boeing says nothing, but not so else where. Some places require that you to post current record of insurance or provide copies for their files.

Just things to think about.

Kerry

To: BoeingRadioClub@ yahoogroups. com
Subject: RE: [BoeingRadioClub] Repeater

Since I said, I'm new here, I don't understand why there is no antenna's on the Hyatt. I see it as quite advantageous. #1 no proximity of other radio services, #2 since Wichita sits in a topographical bowl, next to the river (creek where I come from) would be the lowest point. Placing it 12-15 stories high, makes it ripe for local line of site coverage, where the horizon is defined. Again, it is the center of the population density for 50 miles about. I could not find a topo map on line but city fire houses are about 1250ft ASL... Places like Mt. Hope and Cheney are 1400+ASL... an antenna on top of a 12-15 story building downtown would place it 150ft HAAT and would give county wide coverage. (and abrupt defined coverage)

Given I am also a participant of W0VFW- VFW Post 3115 Amateur Radio Club, their repeater 145.27 is located on a telephone pole at the post and antenna tip is about 55 feet in the air. A site such as the Hyatt would
greatly improve it's coverage area.

Kerry you've got the right ideas. FM has grown and waned since I got my first rig (Detroit Police Race Riot Surplus- they moved to UHF) in 1969. 2FM rigs today are smaller than the microphone on that 2 channel Motorola Twin V.

D-star allows voice and data at the same time...But rigs cost $500 and up... Perhaps your comment about PACKET is appropriate. The point is... one frequency for Data, one for Voice. With new rigs under $120 (Yaesu 65W FT-2800M) it's easy to be able to add a second mode-transceiver to a station. Many of us have a rig in the car, one at home and many times a HT too.

I would like to see some sort of committee formed to investigate a 21st century look into 2FM in the Wichita/South Central Kansas area. It needs to look beyond just 1 club and one county. Perhaps an invitation should go out to each and every repeater owner, group, group of users (ATV- RACES- SKYWARN-
TECH-N-CHAT- K LINK ) and I'm sure I missed 50...
I recommend even if just on this yahoo group..Kerry' s 6 points..
1. What will it be used for,
2. Is there a service that it will be performed,
3. Is that use or service already being supplied,
4. Can the repeater be maintained and have good access.
5. Will enough people use the repeater to make it worth while
6. Where can it be located

I'm not going to answer any of these at this time. Remember I've only been in Wichita for 4 years. I will say this. I went to the Oklahoma ARRL Convention this year and saw two  2 meter repeaters for sale. I had my commercial 450 repeater and there were two other 450 machines available. I can't remember the last time I saw that many repeaters for sale at a hamfest.

Finally, regarding the repeater that was donated, is it on a
coordinated frequency pair? Can it go on the air right away?

There is a reason that the Hyatt does not have any antennas. Take a look at all the other building along the river front and you will notice that there are no antennas there also. Antennas are not present until you are so many feet from the river bank.

The city and county supports coordinated amateur radio emergency communications 100%. That is not a problem nor a hard sell. It gets much more complicated after that.

I agree that we have more repeaters than people to use them. This club is the most active club in the city. How many minutes do each of us spend on our repeater. I have a conflict on net nights so I spend maybe 10 minutes a year. I am on the 94 repeater maybe 30 minutes a year. I have never been on any of the others.

I guess one needs to have a repeater plan. 1. What will it be used for, 2. Is there a service that it will be performed, 3. Is that use or service already being supplied, 4. Can the repeater be maintained and have good access. 5. Will enough people use the repeater to make it worth while 6. Where can it be located ( already mentioned)

We have talked a few times in the past about co-supporting repeaters. Having less, but better back up machines. This would distribute cost and maintenance. Finding folks to maintain machines is going to get harder in the future. We talk about echolink which is good, but how about back up for packet and APRS. I have a digitapeater for APRS but am too close to Joe to use it. Digitapeater out in the county of surrounding towns would be good. RACES maintains one in the Western part of the county around Cheney. RACES also maintains satellite repeaters into the 94 repeater around the county. Maybe being a satellite repeater would be good. What is the best way? Maybe area hams need to be looking into what would be best served and bring the ham community
closer together.

Sent: Sunday, April 04, 2010 9:51 AM
To: BoeingRadioClub@ yahoogroups. com
Subject: Re: [BoeingRadioClub] Repeater

First item of business would be to determine if it is a backup...or if it will have it's own frequency. If it will have it's own frequency THEN...we need to apply for COORDINATION. .

At that point IF a frequency is available, and we meet various requirements of the coordinator we can proceed.

One of those requirements is where to place the repeater. HAAT and such.

Everyone knows I've come from other areas of the country and been involved with the second repeater ever on the air... 146.91 Syracuse (GE Land Mobile) years ago, and the largest repeater in Detroit 146.64. One of the reasons those repeaters were such successes is that they had great locations. 147.30 Bluemont VA repeater covered 4 states and DC... that was 1

repeater..Still to this day it is SKYWARN for N0AA -the National Weather Service headquarters.

Traveling about Wichita and Sedgwick county. I have noticed that the Hyatt in downtown is owned by
the city and DOES NOT have any antennas on top. It would give HT coverage for miles around downtown ....and that is the center of the population density for 50 miles around. The advantage of rooftop repeaters is short coax runs to the antenna.
The city would almost have to allow the repeater on top of the Hyatt because of the emergency communications nature of ham radio. Citizens would agree if informed as such.

Is is an urgent matter? NO- this area has many under utilized repeaters in the area compared to other areas of the country. Many times I scan all of 2 meters for 8-10 hours and do not hear any communications at all. I wonder if it isn't a waste of electricity having so many unused repeaters in the area.

Linking local repeaters may also be advantageous. A thought. Or a data repeater...

My ramblings done- A wise choice requires many variables investigated and agreed upon.

# 921. Scout Spring Camporee - Much Thanks

Yahoo group: BEARSAmateurRadioClub
Date: 2010-04-19 18:48:30 UTC
From: Harvey Jones
Topic: 921  Message: 921

To All:

A group of Wichita Amateur Radio operators went out and setup a station at the Scout White Buffalo/High Plains Spring Camporee at Lake Afton. More than 400 scouts and 100 adults attended. We were one of the events, competing with EMS, Army, Rope Bridge, Frisbee Golf and other events.

Harvey Jones, James Whitfield, Joseph Jones, and Robert Johnstone started setup just after the rain stopped Friday. Our location was a shelter without sides, so we put up tarps to enclose 3 sides of the shelter. We erected Dennis Gaskill's Arrow duel-band J-Pole at about 25feet. We erected an old Alpha-Delta DX-LB Plus using James's aluminum poles. We also erected Harvey's Hi-Gain vertical, except for the ground radials. We learned in the past that if the vertical's ground radials are up after dark, a scout will find it while walking causing damage and lost radials. Only one radio was hooked up, James's FT-8900R. We ran only 5 Watts and we were able to reach BEARS, Tech-ni-Chat, and .85 WARC. Four of the boys attended a Radio Merit badgeclass the Saturday before and completed their requirements Friday night.

The event leadership expected/hoped that the Wichita Astronomy club would come out and operate Friday eveningbut that fell through due to weather. We were the only event for the boys Friday evening. We had about 50 to 60 boys come by our shack Friday night, on into Saturday morning.

Saturday started early. We setup the BEARS ICOM 756 Pro for HF voice and Harvey's FT 857 and computer for PSK-31. Randy Wing joined the group about 1:00 PM.

About 40 more boys came by our shack on Saturday. They just meandered by, stopped in, some talked on the radio and some just asked questions. I was surprised at how popular PSK-31 was with the boys. The adults were more interested in HF. Of note, the bands are opening, we hear a lot more Europe.

Spring Camporee was our chance to introduce Scouts, 12 years old and above, to Amateur Radio. We introduced a number of the boys back as WEBELOS during JOTA/WEBELOS Woods. No instant success, but the more they see the greater chance that some day they will pick up a book, take a test, and join us in this hobby.

Next year our hope is to get more operators on Friday nightand to also work up volunteers at home to talk on HF and PSK-31 to the boys.

Many many many of you had your radio's on and spent time talking with the Scouts. For that we thank you.

With much thanks
James Whitfield (N5GUI) & Harvey Jones(AC0EG)

# 930. Membership and Release Forms and Field Day T-shirts

Yahoo group: BEARSAmateurRadioClub
Date: 2010-05-01 18:54:19 UTC
From: Randy
Topic: 930  Message: 930
Attachments: 2 described; binary payloads are missing from this source WARC

For those of you who received Harvey's email about the BEARS membership forms and release statements, this is a duplicate mailing I'm sending to people who AREN'T members of the BEARS yahoo group web site.

We'd like to ensure that everyone is renewed and that the release forms are current for all of us - after all Field Day is coming up!

If you have already renewed your membership and signed a release form this year - you can skip this email.

If you haven't, please fill out these forms and send them to nicholas.j.farlow@.... Nick has changed locations at Boeing, but if you send the check (or even the forms) to me I will see that it gets to Nick. Another prime opportunity is to attend the club meeting on Thursday, May 6, 2010 at 5 PM and we'll be poised to help.

Field Day T-shirt orders will be taken Thursday. The amount will be $13.00 for each T-Shirt. If you can't attend Thursday's meeting, please make arrangements with Nick or I as appropriate. We will send the order very soon.

# 932. Field Day Captains and Focals

Yahoo group: BEARSAmateurRadioClub
Date: 2010-05-03 19:07:56 UTC
From: Wing, Randy
Topic: 932  Message: 932

Anyone that would like to be a Field Day Captain (of a band-mode-station) or a Field Day Focal (Welcome Table, Food, Safety, Setup, TakeDown, etc.) I would appreciate it if you would send me an email promptly.

If you normally wait to be "asked" to take an organizational role, because of <name your reason>, I'd like to ask you to be altruistic and just send me a note saying "I'd like to do this". You will save me a lot of time by being proactive.

Similarly, please let me know if you are coming to Field Day - and what station you'd like to be assigned as your PRIMARY home. A PRIMARY home for Field Day gives the station captain some help to rely on... and ensures that ONE station isn't overpopulated and another is quiet. It does NOT mean you have to stay at one station the entire field day - just for the shifts that you agree to.

Thanks!

Randy

Randy, I always try to make it sometime during the day just to keep touch with all the old members. As one of the founding members we went through a lot of tight times before Boeing came through with the regular stipend. John Ahlstrom is back in the state and I am rying to get him to drive down for the field day. I am going to ask Bob Bailey to come if he is off that day.

# 943. BEARS group purchase of W1GHZ 1296 Transverter parts - Are you interested?

Yahoo group: BEARSAmateurRadioClub
Date: 2010-05-10 11:40:08 UTC
From: jones_hg
Topic: 943  Message: 943

Forwarded From Dave Powers (KA0KCI):

If you have any interest in participating in a group purchase of parts for the W1GHZ 1296 Transverter, Which consist of:

* 1 each: Local Oscillator 1152 Mhz PCB - & - Relay PCB - & - Transverter PCB with Mixer device ---------- Total approx. $35
* As Required: Surface Mount Capacitors & Resistors & MMIC amps & other listed Parts (Less Connectors) ---------- Total approx. $40

* As Required: SMA connectors for interconnection
----------\
---------- Total approx. $40

PLEASE see ---- www.w1ghz.org <http://www.w1ghz.org/> ---- for details on his transverters

* Scroll down the page a bit and click on the 2nd picture - titled - Multiband Microwave Transverters for the Rover -
* and click on ---- 1296 Mhz Transverter - Right Side Up (Low Side Injection)

* and also click on --- Microwave Update Paper

He also has a PowerPoint slide show of his presentation.

You may also find his other articles of interest.

Once the parts are assembled - they will require mounting in some type of case -

THESE ARE NOT HIGH POWER OUTPUT - THEY WILL REQUIRE AN EXTERNAL AMPLIFIER

----------\
--

I am looking at interest in these transverters ( but probably could include any of his items - 902 - 1296 - 2304 - 3456 5760 - 10368 Mhz etc.)

(he even designed a 222 Mhz transverter for 28 Mhz Intermediate Frequency - can be used with FT-817)

Paul offers discounts to clubs - (determined by how much we purchase I suspect)

I need to gather a list of who is interested in what - and check on prices -

I do not intend to make a profit from this - just facilitate a group purchase -

I will consolidate the order - get prices (including shipping) - collect money - order the items paid for - sort and distribute the parts

IF INTERESTED - send me an email stating your desire to purchase the items of your choice and I will add you to the list

If you have ANY questions - OR - concerns about surface mount soldering - email me - at ----- ka0kci@... <mailto:ka0kci@arrl.net>

73 Dave Powers - KA0KCI

From: Wing, Randy
Topic: 7  Message: 952

John,

The notice for the BEARS meeting was set up to arrive 15 minutes before the meeting. That would be emailed at 7:45 PM. I've been receiving that email reminder right at 7:46 PM. (The attached email shows that Harvey uploaded the minutes of the on-the-air net at 8:26 pm. Please send me your reminder notice - the next time you get it - if it is not received at 5:00 PM on Tuesdays.)

I changed the reminder to be sent three hours before the meeting, instead of 15 minutes before the meeting.

Randy

Space Weather News for June 12, 2010
http://spaceweather.com (http://spaceweather.com/)

ACTIVE SUNSPOT: A new sunspot has popped up and it is crackling with solar flares. Today, AR1081 has unleashed a series of M- and C-class eruptions plus at least one strong shortwave radio burst detected by amateur radio astronomers on the Pacific side of Earth. High resolution movies of the flares and an audio recording of the solar radio burst may be found at http://spaceweather.com (http://spaceweather.com/).

# 959. Greater Wichita Field Day readiness!

Yahoo group: BEARSAmateurRadioClub
Date: 2010-06-16 02:20:17 UTC
From: Randy
Topic: 959  Message: 959
Attachments: 3 described; binary payloads are missing from this source WARC

To everyone:

I've attached three files:

1. Captains Log 2010 Draft.XLS - this is for Field Day Captains to review. Please check carefully
on all pages to ensure that you can indeed bring everything that I
have tentatively assigned to you!

2. Captain's Log 2010 - Review needed.pdf - this is for everyone attending field day! Please review
through all the pages and ensure that you are assigned in an amenable position
day or night. If you aren't, please coordinate in email with your field day captain
and include me in the conversation.

3. Greater Wichita Field Day 2010 brochure.pdf - you should print this out and keep it visible in a place
where family and friends and co-workers might see it.

If I have left someone off the plan or you find a mistake, it was completely inadvertent. Tell me! Do NOT reply ALL.

We need operators. We need people who want to learn digital communications. We need GOTA members. If you have any idea who might fill these roles, let me know!

DO forward this to your friends who might be interested - let them know - that I would prefer to know who is coming to field day by Tuesday, June 22, 2010 - but come anyway if you don't tell me. We want to make sure we have enough food!

# 961. Derby sidewalk sale and swap meet reminder this Saturday til Noon.

Yahoo group: BEARSAmateurRadioClub
Date: 2010-06-18 20:01:51 UTC
From: RobertJ
Topic: 961  Message: 961

Just a reminder of the Derby sidewalk sale and swap meet this Saturday til Noon. Hope to see everyone there and we can also discuss field day some if required. West side of K15 in front of Radio Shack. (I know they now call it just Shack, but I'm and old guy). Flyers for field day?

# 962. Re: Repeater

Yahoo group: BEARSAmateurRadioClub
Date: 2010-06-19 15:24:00 UTC
From: tim_force
Topic: 902  Message: 962

Has the use of this repeater been determined? From what I can tell the thread just seamed to die.

I propose turning it into a D-Star repeater for the Wichita area. At Dayton this year I talked to a ham from the UK that has turned an analog repeater into a D-Star repeater that will register with the trust server for about $200 of additional hardware.

Field Day is growing close! I have attached attendance plans. If I didn't get it right, please let me know. The blues are ones that I am not certain of. If you are bringing someone and they aren't on this list, please let me know!

I also attached the latest Captain's log with all the station plans. There are a few yellows. Coordinate with your captains as necessary to make all the reds and yellows go away!

With as many repeaters that we have in Wichita and as little used as they are, I see no advantage in using D-Star. Proven fact that in storm conditions non D-Star repeater works better. It cost more to buy the equipment with little or no benefit at this time.

If it would be a voice repeater, I think it would be pretty neat to place it just outside of the immediate Wichita metropolitan area (maybe extreme western Sedgwick County, or eastern Reno or Kingman counties) and link it to the existing 895 repeater. I agree, placing it in Wichita would just add another repeater that is hardly used.

Ok, I am not convinced on D-Star - but we would have the only one in town - and we'd be leading the way in a new direction.

If we'd have even 20 people buy D-Star radios it would be enough to have a nuclear capability. If only 5 would in the community, I would say it isn't worthwhile.

Thoughts?

The 94 repeater has satellite repeaters that links eastern Kingman. I don't know about Reno. I agree it would be good for Skywarn to get this coverage.

If it would be a voice repeater, I think it would be pretty neat to place it just outside of the immediate Wichita metropolitan area (maybe extreme western Sedgwick County, or eastern Reno or Kingman counties) and link it to the existing 895 repeater. I agree, placing it in Wichita would just add another repeater that is hardly used.

RACES does have folks in Goddard and Cheney but I am not sure about Skywarn.

Skywarn several years ago was part of RACES. Roger Teachman manned Skywarn and all spotters reported to him. Roger's father was Radio Officer for RACES. When Roger's dad started having ill health, no one would set up to the plate to run Skywarn. Roger started out running both and finally it was just RACES. I don't know who started working as Skywarn later on but the spotters divided into two groups. Those that just wanted to spot and those that wanted to spot and work emergency management events. As RACES is a bit more involved because you interface with government agencies it requires more training. Skywarn if fun and less stressful and you only have to train for one kind of event. RACES is involved with damage assessment in order to get necessary aid to affected sites and apply for government aid. Anyway necessary but less fun.

Long story short is because Roger put the sites in with his own money the satellite repeaters went with him. Skywarn needs this coverage also. I am with Randy, I think it would be put to really good use.

From: Steffens, Kerry W
Topic: 902  Message: 973

RACES has 3 members that have D-Star and I think we have them in all the Hospitals now.

As far as RACES is concerned in the event of emergency operation. We are more concerned of having the capabilities of getting on and communicating. Non D-Star equipment is less expensive and more new hams can afford a standard radio. If a radio bites the dust, more than likely a second radio will not be D-Star combatable. A standard repeater can be worked with any radio. A D-Star repeater limits it use.

At the same time a person footing the bill should have what they want to have. If working emergencies or stormspotting is not a top priority, need to have what you want. As these repeater become more expensive and less skilled people are around to repair them, we may need to consulate sites for cost reasons. Not saying that we are there yet, but something to keep in mind. Better to have one or two well used than 8 setting idle.

Ok, I am not convinced on D-Star - but we would have the only one in town - and we'd be leading the way in a new direction.

If we'd have even 20 people buy D-Star radios it would be enough to have a nuclear capability. If only 5 would in the community, I would say it isn't worthwhile.

Thoughts?

Randy

Kerry,
Proven fact that in storm conditions non D-Star repeater works better.
What is your statement based on? In actual practice and theoretically the opposite seems to be true. Breaking squelch on analog vs Q5 on D-Star does not count as better for analog. Using the same power in narrower bandwidth increases the signal to noise ratio similar to moving from fm to ssb or ssb to cw. Also the forward error correction in the digitized voice increases performance coupled with 2 voice decoding mechanisms dependent on BER to extends range on D-Star.
Beyond that the benefits of D-Star are numerous. Dynamic call sign routing Dynamic repeater routing Standardized repeter linking Reflector linking Data embedded in the signal stream providing position data or short test messages. Also small files can be exchanged between systems. Think of D-Star as voice repeaters, APRS, Echolink coupled with digital voice to improve copy all in one package. Yes the cost is greater but with new technology it always is until it is accepted. The same happened when SSB replaced AM and when FM was introduced.

# 979. RE: [BoeingRadioClub] Re: Repeater

Yahoo group: BEARSAmateurRadioClub
Date: 2010-06-22 14:55:46 UTC
From: Steffens, Kerry W
Topic: 902  Message: 979

APRS is AFSK or Audio Frequency Shift Keying and is an FM function. That is ok as we have separate digipeaters for that function due to the nature of the operation. Same goes for regular packet, we do not need a repeater as we can set up a packet machine to digipeat and use a chain of machines to send and control messages.

AM and SSB are the best modes of operation. These modes have the greatest range and are subject to thunder storms more so than FM. Simply because the are amplitude modulated and not frequency. These modes can receive a signal when neither FM or digital can detect or detect an error free signal. FM gets noise as the signal gets weaker and digital just quits as the range and signal strength gets weaker. Digital when everything is working is great and that is maybe 95% of the time. But when conditions get bad such as heavy rain or snow it is the pits. If you are not on cable which I am not, what percentage of the time do you receive error free TV? During storms I get it about 50% of the time.

In a major disaster such as the New Madrid Fault breaking loose, there will be no Echo-Link operation as there will be no repeater links operational. For that matter there won't be any thing to supply power from the Appalachia's to the Rockies for weeks or months. This disaster is considered imminent as far as natural disasters go. Do you want to depend on a repeater that provides 95% operation that is accessible to 15% of the ham population or one that is 100% accessible that is accessible to 100% of the ham population?

In emergency management here and across the country we have looked at D-Star. It has a lot of great possibilities and I do not deny that. Some larger organizations have both. We had D-Star units installed in the local hospitals as they also work normal FM and provides future growth. We also use SSB when FM is out of range. Digital HF is great most of the time, but like D-Star does not work well under adverse conditions. The digital modes such as PSK and FMSK seem to work pretty good under adverse conditions as drop rates do not interfere with the ability to copy the intent of the message. Some Packet programs and some other digital modes will not accept a message until the error codes agree.

I base this on reading a lot of articles and the folks I talk to on the air. Many of these folks have or have used D-Star and no one is opposed to it and neither am I. I am not an authority by any means.

Amateur radio was created as a federal service to serve the community in time of need, supply trained people to the armed forces and to create international good will. The first part is Skywarn, RACES, ARES, and Saturn. First requirement of these services is using the most dependable communications to get the job done. If D-Star is it then go for it. That is what ham radio is all about.

Subject: RE: [BoeingRadioClub] Re: Repeater

With as many repeaters that we have in Wichita and as little used as they are, I see no advantage in using D-Star. Proven fact that in storm conditions non D-Star repeater works better. It cost more to buy the equipment with little or no benefit at this time.

OK!

We've made substantial progress on Field Day plans - we are back up to 9A! We have a 10/15m digital station captained by KD0DNU - Deryk!

I've included the files.

Check you attendance - on the attendance sheet - if I got a meal wrong, let me know!

Thanks!

Randy, N0LD

# 986. Solar Power

Yahoo group: BEARSAmateurRadioClub
Date: 2010-07-02 20:33:19 UTC
From: tag@earthling.net
Topic: 986  Message: 986

If you are interested in a set of solar panels, this is as cheap as I have seen them at Harbor Freight Tools.
Three panels, 45 watts total(max. I would say). $160- coupon good through 5 July 2010.
I could not get the coupon to copy here but go to the locations below and you can get it.

This is what we used to run a 100 watt SSB station at field day for about 6 1/2 hours until the sun went down (plus a battery, of course).
It would be interesting to use two or three sets to run the radio and charge batteries during the day and see how many hours we could go into the night on batteries. We were charging at about 44 watts with four panels for the first three or four hours.

That just gives you the top half of the coupon without the barcode and
bottom half. Same problem I had originally.
The first pointer I gave will give you the whole coupon. The second will
take you to the ad from Harbor Freight Tools.

Yahoo group: BEARSAmateurRadioClub
Date: 2010-08-27 17:26:24 UTC
From: Wing, Randy
Topic: 774  Message: 1000

You bet!

Just tell Jim Enix and the group when you are going to do something different! Jim and I will be monitoring 146.895- during the contest to coordinate band changes as well.

Jim, we should update the KSQSOPARTY web page with the places we will be and operate from. Do you want to do that? It would be good so that people know where to find us. I will be on 80m LSB from 9 AM to Noon each day. Please assign me another band for the remaining hours.

Randy

# 1008. DittyBopper Wine

Yahoo group: BEARSAmateurRadioClub
Date: 2010-09-14 18:54:22 UTC
From: Roger
Topic: 1008  Message: 1008

Friends let friends drink wine and operate CW.

http://www.henrysdrive.com/pdf/morsecodeshi_08.pdf

Here's a pic:

http://www.quintessentialwines.com/quintessential/catalog/view_product.jsp?product_id=1293

They also have a Chardonnay named the same.

Don't know about the Chardonnay, but the Shiraz was rated pretty good at 88 (out of 100) by one of the wine mags. Cheap, too.

Roger KE0HW

# 1011. Re: [BoeingRadioClub] DittyBopper Wine

Yahoo group: BEARSAmateurRadioClub
Date: 2010-09-14 22:53:55 UTC
From: Roger Ackeret
Topic: 1008  Message: 1011

I don't care where you buy your wine or what you buy or what and how many types they have in Australia.

This must be really hard.  I guess I got to spell it out.  This is a radio club.  I'm a CW operator, as are others in the club. I posted it BECAUSE THE WINE IS NAMED "MORSE CODE", and they said they NAMED IT AS A TRIBUTE TO CW OPERATORS, and thought others in the club would find it interesting.

So how is your post radio related?  Why are you peddlin wine on here?

Roger KE0HW
If you don't know CW, you don't know dit.

I was trying to point out what I thought was a nice tribute to Morse operators.  Apparently I failed.  Here is what they said about naming the wine.  I thought it was really cool tribute and just wanted to pass it along (from the link):

"Morse Code Shiraz

Vintage 2008

In this digital world, we remember
the craft of the postal telegraphists.

For decades their Morse signals,
dexterously delivered across Australia’s

great telegraph line, connected us
with the world and helped to save countless

lives. We honour the Morse Codian
Fraternity with this collection of gourmet

produce and fine wines."
I apologize for not being more clear.
Thanks

Bill...Any chance I could get a updated list(sheet) of the hams who attend the Derby ham radio coffee..I would like
to send them a flyer to the Wichita Area Hamfest...

Thanks in advance,

Jim K0RH

# 1018. WA STATE QSO Party is up and running for anyone interested in playing

From: Wing, Randy
Topic: 1042  Message: 1042

I believe my yahoo account was hijacked by an account I created with a different service.

I changed my password on my yahoo account - I hope that does it. So far so good. Spam emails were sent out as far as I know only early Sunday morning. If you receive another spam from (me) please let me know - privately.

As an aside - this is why everyone says to use a different password with each account you create.

I apologize for the spam.

Randy

Attachments: 1 described; binary payloads are missing from this source WARC

Find attached the scores for Field Day 2010 - 9A with under 150 watts of power...

We placed 2nd place out of five 9A stations in the USA - and we missed 1st place by 74 points!

A very strong showing this year - our best effort to date! Thanks everyone for all the effort!

Randy, N0LD

# 1052. Fwd: Bright X-ray solar flare and radio waves

Yahoo group: BEARSAmateurRadioClub
Date: 2010-11-06 22:05:39 UTC
From: Catherine
Topic: 1052  Message: 1052

FYI only

-----Original Message-----

Space Weather News for Nov. 6, 2010
http://spaceweather.com

BRIGHT SOLAR FLARE: Active sunspot 1121 has just unleashed one of the
brightest
x-ray solar flares in several years, an M5.4-class eruption at 15:36 UT
on Nov.
6th. Radiation from the flare created a wave of ionization in Earth's upper
atmosphere that altered the propagation of low-frequency radio waves.
There
was, however, no bright CME (plasma cloud) hurled in our direction, so
the event
is unlikely to produce auroras in the nights ahead. Visit
http://spaceweather.com
for a movie of the eruption and more information about this increasingly
active
sunspot.

# 1053. BEARS Banquet

Yahoo group: BEARSAmateurRadioClub
Date: 2010-11-08 14:07:53 UTC
From: Randy
Topic: 1053  Message: 1053

The 2010 BEARS Banquet is on December 2, 2010 at Timberline on the east side (like last year) at 6 PM.

Please RSVP to jamenbafre56@... – we have 30-35 seats right now, but want to ensure we have enough.

Randy, N0LD

P.S. Officers, if you'd like to make your own distribution lists – I've included the members NOT in the BEARS yahoo group in the cc: of this email.

# 1064. KS QSO Party Results for 2010

Yahoo group: BEARSAmateurRadioClub
Date: 2010-12-30 20:37:22 UTC
From: Randy
Topic: 1064  Message: 1064

http://www.ksqsoparty.org/winners/

After getting the KS QSO Party Scoring PERL script to run (in collaboration with Brian Moran), I was able to compute the 2010 scores in a fraction of the time it took me to last year. I did have to spend a little time establishing the PERL environment (a few debugging activities around that), but it is a JOY to run the script against all the logs and have it compute about 3/4 of them easily. About 10% were sent to me as paper logs... but they were sorted well to ease the visual inspection. The remaining 15% I just had to put into an excel spreadsheet, sort, look for duplicates, and score – however, since I did all the logs the hard way LAST year, I'm pretty efficient at that now.

Kent Stutzman, our web master for the KS QSO Party, has put out a new larger format for the KS QSO Party – please browse the website and if you spot anything that needs improvement, don't hesitate to drop me a note and we'll add it to our improvements list.

I plan on ordering the plaques for the KS QSO Party early next year – I've learned to let the web site scores "stew" a little – somebody may point out an error that will save us some time and money.

I think we can be proud of supporting the KS QSO Party!

Randy Wing, N0LD

# 1073. Next Thursday, February 3, 2011 BEARS Club Meeting agenda

Yahoo group: BEARSAmateurRadioClub
Date: 2011-01-18 20:37:42 UTC
From: Wing, Randy
Topic: 1073  Message: 1073

The February BEARS meeting will include a tour of KFDI by its chief engineer Mike McBride.

The normal February meeting will take place at the regular location at 5 PM on Thursday, February 3, 2011. At 5:40 PM, after going through the normal BEARS meeting with reports from the officers and new and old business, we'll draw for the door prize, then head to KFDI. No snacks will be served because of the abbreviated meeting.

KFDI has requested a head count of the people attending. Bring friend(s), your kid(s), even your husband/wife if they are interested... but please reply-all to this email with the number of people you will be bringing so that Harvey and I can determine the headcount and get word to KFDI.

If you have any ideas for future meetings, please let Harvey know! He is actively requesting the clubs help finding out what they think is interesting. The ideas do not need to be directly related to amateur radio.

73,

Randy

P.S. Map to KFDI...

# 1074. VHF-UHF Contest

Yahoo group: BEARSAmateurRadioClub
Date: 2011-01-18 22:19:56 UTC
From: Wing, Randy
Topic: 1074  Message: 1074

This weekend, I'd like to extend an offer to BEARS members to participate in the VHF/UHF contest either in their own homes - or at my home as my guest.

The contest extends from 1:00 PM Saturday through 10:00 PM on Sunday night. Anyone is welcome to attend anytime in the afternoon on Saturday and after 9 AM in the morning on Sunday through 6:00 pm. I will have 6m, 2m, 1.25m, and 70cm operational. I will have plenty of soda/pop - bring a snack if you come - a bag of chips or something is fine. We will be using the clubs FT-736R for 1.25m/222mhz operation at 20 watts.

I am in the process of finishing my ham radio room - but it isn't ready for this operation, yet. So bear with me if it looks a little messy in the basement... J As always, please RSVP so I can be ready...

Randy, N0LD

# 1099. SWE Engineering Expo

Yahoo group: BEARSAmateurRadioClub
Date: 2011-02-10 03:45:42 UTC
From: Randy
Topic: 1099  Message: 1099

One of our BEARS members, Marsha Meili, requested that I forward this to everyone. The Expo is Saturday, February 26 9 AM – Noon at the Spirit HR Service Center at 3420 South Oliver. If you have kids or grandkids that might enjoy this activity, check it out!

Randy, N0LD

From: Marsha Meili
Sent: Tuesday, February 08, 2011 8:21 PM
To: 'Randy'
Subject: SWE Engineering Expo

Randy,

Could we advertise this to the BEARs members? I mentioned on the net but this link will better communicate the event.

James –N5GUI will be presenting his workshop (I think) related to radio communications.

I will be working the Civil Engr activities and I think Brad--KS2V will be volunteering that day as well. This year it will be at Spirit instead of WSU. Great to bring kids and grandkids etc.

http://wichitaswe.org/expo/

Thanks!

Marsha

# 1100. Fw: [Propagation] M6.6 Flare

Yahoo group: BEARSAmateurRadioClub
Date: 2011-02-13 21:16:45 UTC
From: Randy
Topic: 1100  Message: 1100

Be aware, solar flux is up to 106 SFI... it has been a LONG time since it has been that high... Watch for the K index - if it is over 6 we could see Aurora in KS! (probably in a day or two)

Randy, N0LD

Every now and then. I only have a hand held and it doesn't always get great reception in my apartment but I'll make it a point to be monitoring at that time. I have an antenna I can set up on my balcony. My routes only take me 3 - 5 hours anymore so I'm usually off work around noon. But while on foot I always scan the repeaters.

Hand held radio antennas have negative gain. Radio Shack has mobile to car antenna adaptors or use a mag mount on the refrigerator if you have the height. Should improve both receive and transmitt. No help if you are below ground.

# 1115. Field Day 2011 preparations

Yahoo group: BEARSAmateurRadioClub
Date: 2011-03-04 07:08:48 UTC
From: Randy
Topic: 1115  Message: 1115
Attachments: 3 described; binary payloads are missing from this source WARC

These are some of the actions we took for Field Day 2011. Thanks for your kind volunteering for positions!

A couple of notes:

1. Thanks Derek Ramsey, KD0DNU, for inviting the American Legion Amateur Radio Club (of Derby) to the Greater Wichita Field Day!
2. Thanks George Pinick, WA0N, for volunteering to be the Wichita member of the Boeing Radio Club Prisoner exchange with St. Louis.
3. Thank you for everyone who volunteered as Field Day Focals and Captains!
4. Thank you to Harvey Jones, Jim Enix, and James Whitfield for once more volunteering to co-chair the Greater Wichita Field Day!
5. Ron Wing (my brother who lives in Iowa) will be participating this year! Welcome back, Ron.
5. I've attached draft Field Day plans...

Actions:

1. All Field Day Captain – find your worksheet in the attached spreadsheet, fill it out, and highlight the fields in yellow that you need club equipment, and return to Randy Wing (winger55552001@...) by 15 March 2011. Ask questions as you need to!

2. Jim Enix and James Whitfield ... discuss the V-Beam and its application to 10m and 15m SSB. Is this what we want or do we just want another tri-bander for 10/15?

3. Derek Ramsey to discuss with / persuade his wife (Robin Ramsey) to serve as the Get On The Air (GOTA) coach for the new / rare operators.

4. George Pinick to work the details of the Boeing Radio Club Prisoner Exchange with BEARS/St. Louis. Can we get a CW operator? After all, they are getting a darn good SSB operator.

5. Don Urban – are you willing to commit to being our chef this year?

6. Samantha Wing – are you willing to coordinate the Friday evening meal this year?

7. Dennis Gaskill – are you still willing to captain the CW stations? Do you still want those big antennas or could you go with something smaller?

8. Brandon Trube – are you still willing to be our network captain for this year's field day?

9. Jim Enix – please ask Ron Cowan, KB0DTI, if he can visit our Field Day site again this year?

10. Randy Wing – to invite the KFDI engineers to Field Day this year?

11. Dave Rayson – please help us find WARC members who’d like to operate during Field Day?

12. Derek and Robin Ramsey to identify members of the American Legion Amateur Radio Club who would like to participate in Field Day as regular participants or as GOTA participants.

13. Harvey Jones to coordinate with the Newton Amateur Radio Club to identify members who want to participate in this years Field Day.

14. Randy Wing to acquire Field Day Callsigns.

15. All members are encouraged to identify Field Day members to Randy Wing (winger55552001@...) so that we can include them in emails and the captains can plan them for field day.

16. All Captains are encouraged to coordinate with their teams and staff their station at least one, preferably two members deep during Field Day. Explicit assignments will help – a logging member and a contacting member are a good combination to keep the logging contacts moving.

17. All members – we are trying to operate 3 generators this year – with at least one backup generator. If you have a generator, would you please let me know?

Thanks in advance for your activate participation – let’s have a lot of fun and make this a great field day!

Randy Wing, N0LD
Greater Wichita Field Day Coordinator

3 generators this year – with at least one backup generator.  If
you have a generator, would you please let me know?

I have 2 generators... a 4KW Coleman extended run generator that will run my RV (air+ the HF rig. or will run multiple HF rigs with out air.

Reason I mention Air- is that Air can be run of Commercial AC mains with no operating penalty. Perhaps we can arrange AC mains for air.

I also have a 1KW 2 cycle generator that could be used in a remote spot for 1-2 stations. Still new in the box.

Larry W8LM

Randy, the Derby American Legion is located in the VFW building
Local 7253 until they raise the money to build their own lodge. so
if you can get a e-mail address of the VFW 7253 you can get it to
them . John in Derby member of 7253.

From: J.Dickerson
Topic: 1126  Message: 1129

Brandon, I had been led to believe that the American Legion Post 408
named after Vietnam vet West met in the VFW 7253 building on So.
Baltimore for the benefit of Derby/Haysville Legion Members. A past
member of American Legion in Mulvane had campaigned for years to
get a separate building for Derby/Haysville Legion members.
I believe that they met there when Dallas Love was the Commander
of that Post. Sorry I guess I had been told wrong. John in Ks

No problem. At this point the Legion is significantly larger than the VFW.

If you like to see it sometime let me know. I can give you the Nickle tour.
We meet for ALARC on the 3rd Sunday at 730pm following the nets. All are
welcome

# 1132. Field Day T-shirts

Yahoo group: BEARSAmateurRadioClub
Date: 2011-04-11 03:10:58 UTC
From: Randy
Topic: 1132  Message: 1132

If you'd like a field day t-shirt, please send me:

1. The size of the shirt ☐ (S, M, L, XL, 2XL)
2. Make out a check for $13.00 to the BEARS and mail it to me at:

Randy Wing
13038 SW 186th St.
Rose Hill, KS 67133-8559

or if you are at Boeing ☐ M/S K82-68

Please have it arrive by April 20, 2011.

Field Day this year will be held on 25-26 June 2011. Setup will take place starting at Noon on 24 June 2011. Please mark your calendars!

Thank you!

Randy, N0LD

# 1137. Field Day information

Yahoo group: BEARSAmateurRadioClub
Date: 2011-04-18 19:35:23 UTC
From: Wing, Randy
Topic: 1137  Message: 1137

http://bnn.ids.web.boeing.com/index.cfm?content=include/event_calendar_site.cfm?ion=5&site=153

For those of you at Boeing, I included a "Wichita events" entry for Field Day. It has a map attachment and a link to the ARRL Field Day locator page.

For those of you who are station captains - a gentle reminder to do some planning and let me know what your plan is... J I need to know early if you have any needs for the club to fulfill.

Randy

# 1138. Field Day - external to Boeing web site

Brandon Trube set up a web site for Field Day liaison that is outside our Boeing domain so that everyone works with us can share material.

Good book mark and thanks, Brandon!

# 1142. FW: Kathleen Callanan coming to Wichita

Yahoo group: BEARSAmateurRadioClub
Date: 2011-04-28 14:26:07 UTC
From: Wing, Randy
Topic: 1142  Message: 1142

Does anyone know Kathleen Callanan as a past BEARS member?

Randy

From: Marsha Meili<mailto:marsham507@aol.com>

Sent: Wednesday, April 27, 2011 10:29 PM

To: Randy Wing <mailto:winger55552001@yahoo.com>

Cc: 'Suzanne Moore'<mailto:suzmoore@aol.com>

Subject: Kathleen Callanan coming to Wichita

Randy,

Kathleen Callanan will be in Wichita in May for our annual SWE banquet on May 26. I don’t know if there are any BEARs members left at Boeing (or retired) that remember Kathleen. I think she retired in 1995 (golden parachute time). I thought you might ask around and we could bring up next week at the monthly meeting. She is planning to stay with Suzanne Moore and be in town a couple days before our banquet. I’m sure if there is anyone left, she would love to say ‘hi” while in town.

# 1147. BEARS meeting on Thursday night at 5 PM - Field Day preparation

Yahoo group: BEARSAmateurRadioClub
Date: 2011-05-03 13:40:23 UTC
From: Randy Friend
Topic: 1147  Message: 1147

I encourage everyone interested in field day to please attend the next BEARS meeting this Thursday at 5 PM.  If you need to know how to get there, send me an email note to winger55552001@....

I will be presenting at the WARC meeting on Field Day tomorrow night.

We need to finalize decisions on Station Captains – one for 40m digital and one for 80m. Please let me know if you'd like to captain these...  I'll be seeking WARC and the newly formed American Legion and the W0VFW for those captains.... if none of those organizations want to captain, I'll seek the BEARS on Thursday....

Thank you everyone, see you at the meetings!

Randy Wing, N0LD

Randy--- June 24 is my B'day and I took it off... I may just do the 80meters... provided you tell me is it cw-ssb-digital...

Obviously I'd do the same TS570-D and phased verticals....plus this time I'd add a double bazooka for near in..... The big thing is that I need a bit of help..as It will barely be a year since my aorta-valve replacement... If no help I could do the double bazooka...and take what we get...

40 digital is ok... but my favorite bands to operate is 80 and 20.

I was in joplin MO and bought a new TH3mk4 new in the box for $300... and a 5BTV vert... plus 3 2meter antennas from a guy getting out of ham radio.. I need to get the beam in the air... may be by FD....

I did buy tickets for Plano TX... national convention...

If I did 40 digital.. I would use my new FLEX 1500.....and a laptop...

# 1155. Greater Wichita Field Day 2011 schedule

Yahoo group: BEARSAmateurRadioClub
Date: 2011-05-05 21:17:34 UTC
From: Wing, Randy
Topic: 1155  Message: 1155

This would be good Field Day information to pass at tonight's WARC meeting and perhaps in the grid...

For the Greater Wichita Field Day 2011 we are in strong need of:

1. Field Day Captain/Station (and operators)

2. Operators! for our 9A GWFD

3. Setup and Tear down helpers

4. GOTA operators (especially girl and boy scouts, children, grandchildren, and new operators)

5. GOTA coaches

Please ask them to drop an email to n0ld@arrl.net<mailto:n0ld@...> so that I can get them added to our GWFD email list and include them in coordination meetings and emails.

GWFD setup begins at 1:00 PM at the Spirit Boeing Employees Association Lake (see attached map) on 24 June 2011.

FD operation kickoff, pictures, and familiarization begins at 10:00 AM on Saturday, June 25th.

FD Operation begins at 1:00 PM on Saturday, June 25th.

FD Supper begins at 5:00 PM on Saturday, June 25th.

FD operations end and Teardown begins at 1:00 PM on Sunday, June 26th.

To all:

Boeing has offered us the opportunity to setup a table to show off the BEARS Club at the Boeing Open House 21 May 2011. I need a volunteer to be event chairman to organize and find folks to man the table.

Does anyone wish to volunteer to be event chairman for the Boeing open house?

I need a volunteer by 11 May.

Thanks

# 1159. Solar Panels

Yahoo group: BEARSAmateurRadioClub
Date: 2011-05-13 19:25:36 UTC
From: tag@earthling.net
Topic: 1159  Message: 1159

Last year at Field Day we ran a 100 watts station on solar panels (and battery) from noon until a little after the sun went down. I expect to do this again this year.
The solar panel kit I used is on sale at Harbor Freight for about $180 (normal price is $230) but I have a coupon for $150 (limit of 4). I think I am going to buy another one.
The coupon expires in about a week.

If anyone else wants to buy one at $150 + tax, let me know ASAP and I will buy it for you on this coupon (up to three).

Go to
http://www.harborfreight.com/45-watt-solar-panel-kit-90599.html
to see what it includes.

Subject: [BoeingRadioClub] Solar Panels

Last year at Field Day we ran a 100 watts station on solar panels (and battery) from noon until a little after the sun went down. I expect to do this again this year.
The solar panel kit I used is on sale at Harbor Freight for about $180 (normal price is $230) but I have a coupon for $150 (limit of 4). I think I am going to buy another one.
The coupon expires in about a week.

If anyone else wants to buy one at $150 + tax, let me know ASAP and I will buy it for you on this coupon (up to three).

Go to
http://www.harborfreight.com/45-watt-solar-panel-kit-90599.html
to see what it includes.

# 1162. Call for help in Joplin

Yahoo group: BEARSAmateurRadioClub
Date: 2011-05-23 15:50:28 UTC
From: Randy Friend
Topic: 1162  Message: 1162

Jim Tuggle and I discussed in further detail Larry's (am_fm_radio@...) previous note to everyone regarding Joplin.

SATERN has indeed requested help in Joplin; but you need to be qualified as follows:

1.  Have a picture ID from one of:  SATERN, RACES, ARES

2.  Have had your background check through one of these organizations.

Some additional information that you need to know:

3.  Do not self deploy.  This is vital.  You must contact June Jeffers at KCSATERN@... before deploying.  You will not make it inside the disaster area without your picture id and by pre-contacting June Jeffers, SATERN representative.

4.  Be prepared.  Come ready to take care of yourself.  (including sleeping bag, clothes, money, full tank of gas, sunblock, hat, bug repellent, batteries, backup radios, etc.)

5.  They are in need of APRS radios/gps setups for the canteens.  Even if you aren't going to deploy - if you have one of these to loan, it might be worthwhile to contact Jim Tuggle at kc0nyk@... or the 145.130- Beaumont repeater (tone 156.7 hz).

There is an active SATERN net on 147.210- (Joplin local), 14.265 mhz, and 3.920 or 3.902 mhz.  Please give these frequencies a wide berth and listen to them for the latest information.

# 1170. BEARS Meeting - Field Day readiness

Yahoo group: BEARSAmateurRadioClub
Date: 2011-06-02 09:46:49 UTC
From: Randy
Topic: 1170  Message: 1170

I have Field Day T-shirts! If you ordered them, come to tonight’s meeting and pick them up! If you haven’t paid, yet, I will know and ask for it, so please come prepared with the right amount in cash or check. Shirts are $13 a piece. If you didn’t order T-shirts previously, there will not be spare shirts for you to purchase. Go to the ARRL web page if you still want one...

I would really encourage you to attend the BEARS meeting tonight – it will be our final Field Day readiness meeting in person.

Captain’s come with your final list of station needs so that we can document it and get you your help!

I want us to come away with each Captain knowing who his team will be... and who will help him setup and teardown.

Station members – please come prepared to commit to a schedule for Field Day operation (setup, operation, and teardown). It really helps Station Captains if they know they have a few others to help and rely on!

Thanks, everyone!

Randy, N0LD

# 1174. VHF/UHF Contest at 1 PM today

Yahoo group: BEARSAmateurRadioClub
Date: 2011-06-11 13:09:34 UTC
From: Randy
Topic: 1174  Message: 1174
Attachments: 1 described; binary payloads are missing from this source WARC

I've included a picture of the antenna stack – all aligned and ready to go for the ARRL June VHF/UHF Contest that starts at 1 AM today and lasts until 10 PM Sunday. That is Chelsea (my son Ben's girlfriend) and I at the top of the tower when we finished the work. (Chelsea is a rock climbing instructor at Butler County Community College who has been attending field day with us for the past two years.) Chelsea climbs like a pro and wanted to climb the tower to help.

If you are coming out, drop me a note! Lisa is making some snacks and I'm showing off the new ham shack. Operators would be a plus – we'll have a multi-operator limited station that includes three different radios (FT-847, IC-756 PRO II, and FT-736r) and four bands (6m, 2m, 1.25m, and 70cm). We have a 3 element 6m antenna at 25 ft, a 30 ft long 2m beam, a 33 ft long 1.25m beam, and a 33 ft long 70cm beam).

You are welcome any time today – we'll probably shut down around 9 PM today – and tomorrow from 9 AM to 10 PM.

I look forward to your visit and your help in the contest!

Randy Wing
13038 SW 186th St.
Rose Hill, KS 67133-8559
316-371-2293
winger55552001@...

You can get here by going to 47th street at Boeing and going east until Rose Hill Road. (47th turns into Butler 150th one mile west of Rose Hill Road). Continue east on 47th St (Butler 150th) 3 miles. You will cross Prairie Creek Road, then Meadowlark; when you get to Indianola (there is a house with a white picket fence), turn right on Indianola. It will be 3 1/2 miles to my house. (You'll cross 160th, 170th, and 180th – between 180th and my house there is a bridge that you should slow down to about 20 mph to cross) Look for the 100 ft tower on your right – with the blue house.

# 1185. Field Day "Proof"

Yahoo group: BEARSAmateurRadioClub
Date: 2011-07-01 07:01:15 UTC
From: Randy
Topic: 1185  Message: 1185

A few things we need to submit our Field Day entry to the ARRL:

1. I hope you are sending pictures to Harvey Jones and Brandon Trube (cc:ed on email)
a. County Commissioner Jim Skelton photo at field day
b. Judge Hoveter photo at field day
c. Solar Panel photo at field day
d. Salvation Army truck at field day
e. Other photos

2. I don’t know some of the kid’s names that were at field day – please send them to me.

3. If you brought someone to field day – let me know what their name is! We are up to 70 people!

4. Who were ALL the VEs at the testing session?

5. Who tested?

6. Deryk and Robin Ramsey – who were the people that visited you at Field Day?

Thanks, everyone!

Randy

I have a page up for Field Day with stuff from 2009 on. We will add future event info to it as well. Look at the Archive and Links page for photos, video, etc. Any pics sent to me will be posted there in the 2011 photo album.

Randy

Attached is a picture that Mary took of the Solar panel, DSCN2857.JPG . Didn't find one of the Salvation Army van, but I will double check.

Have 173 pictures on a CD. Perhaps I can get it to you or Harvey along with the coax that I repaired.

# 1199. N0W - Field Day Summary

Yahoo group: BEARSAmateurRadioClub
Date: 2011-07-21 21:30:09 UTC
From: Randy
Topic: 1199  Message: 1199

FYI - this is our field day entry form for the Boeing Employees Amateur Radio Society / Greater Wichita Field Day

We achieved 5780 total points this year compared to 5512 last year! 5% growth.

We achieved 1407 total QSOs this year compared to 1157 last year! 22% growth.

We achieved 909 total voice QSOs this year compared to 443 last year! 205% growth.

We achieved 310 total CW QSOs this year compared to 417 last year. That is a decline of 34.5%.

We achieved 188 total Digital QSOs this year compared to 297 last year. That is a decline of 60%.

We had a huge number of 6m QSOs this year – and that offset the declines in CW and Digital.

Randy Wing, N0LD

E-mail: winger55552001@...

Comments:
Harvey Jones, W0HGJ, was our dedicated GOTA Coach. Jim Skelton was the elected official (county commissioner) in attendance. The Salvation Army was our served organization - they provided refreshments on Saturday morning/lunch. We had a solar/battery array which we made over a dozen field day contacts on the attached radio! We've seriously considered building solar/battery arrays for all our field day stations to effectively double our qso points. We gave a demonstration on the solar/battery array thanks to Terry Gattis, K9TAG and on how to climb a backstop to install a dipole with minimal body damage - thanks to my son, Ben Wing, KC0YJI. We were pleased to have the generators operate flawlessly throughout field day! We had a 40m dipole coax malfunction that set us back many hours - but overcame that with a new dipole installation 7 hours into field day.

Band/Mode QSO Breakdown:
CW Digital Phone
QSOs Pwr(W) QSOs Pwr(W) QSOs Pwr(W)
160m
80m 38 100
40m 79 100 10 30 141 100

# 1200. Field Day "Soap Box" entry

Yahoo group: BEARSAmateurRadioClub
Date: 2011-07-21 22:05:09 UTC
From: Randy
Topic: 1200  Message: 1200

I'd like to create a composite Soap Box entry for all the Greater Wichita Field Day team captains...

Could each captain take a moment and write a paragraph and submit it to me? I mean station captains and responsibility captains such as food coordinators, elected official coordinators, communication coordinators, safety coordinators, finance coordinators, etc. I've included names/callsigns/assignments – it may help you remember who participated at your station.

Request that the paragraph contains –

1) who operated the station, who setup the station, who tore it down
2) the station inventory of radio, antenna, tuner, modes, etc.
3) things you are proud the team did
4) events that made field day memorable

If you have a picture of your setup, please include it.

Here is my example description of 20m – I encourage anyone to redline this and include their names and stories so we are inclusive:

20m Phone Station:

Our station was setup by a large team of people in 105 degree heat: Randy Wing, Ben Wing, Ron Wing, Mary Whitfield, Earl McIntyre, Steve Canfield, Andrew Martin, Alan Bruster, Jim Enix, James Whitfield, Harvey Jones, Ron Wing, and Brian Nicholas. Operators included Charlie Harris, Brian Nicholas, Randy Wing, Ron Wing, Jimmy Macionski, Jeff Francke, James Stafford, Andrew Martin, and Robert Bryant. Tear Down was accomplished by many of the operators. We used the BEARS ICOM 756 PRO III, an autotuner, a 20m filter, and a 3 element tri-bander up 30 ft. for an antenna. Memorable moments included: 1- trying to work Hawaii and then turning the beam right on him and working them first call! 2 – being able to run a frequency multiple times and run up our score instead of just searching and pouncing. 3 – the fact that we NEVER had to beg people to get on the air! They were right there ASKING to be operating!

# 1212. First personal sponsorship of a KS QSO Party Plaque

Yahoo group: BEARSAmateurRadioClub
Date: 2011-08-11 15:31:41 UTC
From: Wing, Randy
Topic: 1212  Message: 1212

Robert Johnstone, KD0FIP, is the first person to sponsor a KS QSO Party Plaque - the SINGLE PERSON NON-KANSAS QRP LOW POWER Plaque. Thank you, Robert, we appreciate your $30 sponsorship of this plaque. Robert is a staunch digital operator in the contest, we appreciate his participation and sponsorship!

We encourage others to sponsor one of the other 16 plaques - and we'd be happy to create new categories if there is an interest.

Our commercial and club sponsorships are in place this year - the Kansas QSO Party is a go!

I really encourage everyone to get online and register the county(s) they will be in - we are again shooting for 100% coverage of the 105 counties in Kansas!

Randy Wing, N0LD

# 1213. KS QSO Party

Yahoo group: BEARSAmateurRadioClub
Date: 2011-08-14 04:00:34 UTC
From: Randy
Topic: 774  Message: 1213

Many of you have asked about the KS QSO Party – so I thought I'd bring you up to date. www.ksqsoparty.org

All 105 counties are covered by someone on a mixed mode. We are now trying to get all the counties covered in SSB alone. All counties are currently covered in CW mode! Digital isn't as covered – but that is to be expected.

We are going to operate as W0A this year. I will also make available the KC0AHN call to someone who wants to operate it as a "special" callsign (bonus points to those who work either KC0AHN or W0A). These two calls will not be eligible for plaques – but they ARE fun to operate!

I would like to have at least one person work a band or two in Sedgwick County.

I'm going to make my shack available (Butler county as in the past) for those who'd like to come out and operate W0A voice on 20m or 40m. My new shack is available – I have two stations – but we'll probably only operate one at a time.

Robert Johnstone, KD0FIP, is going to operate digital from his home under W0A.

What is up with the 1x1 callsigns? Check out the website! We have about 30 operators on CW and Voice – each covering a letter in SUNFLOWER and in KANSAS. If a participant works either of these they will win a KS stamp (HAM RADIO STAMP!) from the 1960s! Bob Harder, W0BH (some know him as our intrepid CW operator during Field Day), is sponsoring this award and doing a yeoman's job of coordinating all the 1x1 calls to make it possible.

We have also been successful at getting 4 individual sponsorships for plaques. This will decrease the burden on the commercial sponsorships and club sponsorships in the future. We have added one plaque (for a total of 18) – a WORKED ALL COUNTIES award! It IS possible to work this plaque – and we are trying HARD to make it possible for the voice operators to win this plaque, too. If anyone wants to be mobile voice – please contact Bob Harder (see the cc: above) – he will set you up in some counties that are needed on voice.

We'll start at 9 AM sharp on August 27, 2011 – see you then!

Randy Wing, N0LD

A couple of corrections... Thanks, Bob!

Randy

From: Bob Harder
Sent: Saturday, August 13, 2011 11:12 PM
To: N0LD Randy Wing
Subject: RE: KS QSO Party

Randy,

1. A couple of corrections. We have all counties covered in SSB, still working on CW but that also seems likely. You got it backwards.

2. As per the rules, the Amateur Radio stamp goes to all First, Second, and Third place winners, and all participating 1x1 stations. In addition, those who spell both KANSAS and SUNFLOWER will have a chance to get a stamp .. don't have an unlimited supply, so the highest scoring get first chance. It's likely everyone who spells both will get one since I have quite a few stamps, but just in case. All others who follow the procedures outlined in the rules will get a certificate.

73, Bob, w0bh

# 1217. KS QSO Party and Hurricane Irene

Yahoo group: BEARSAmateurRadioClub
Date: 2011-08-25 16:54:12 UTC
From: Wing, Randy
Topic: 1217  Message: 1217

I am looking for a few people (who will not be active in the KS QSO Party this weekend) to monitor the Hurricane Watch Net on 14.325 Mhz and relay traffic as needed. You wouldn't and are not encouraged to call net control unless a radio relay is required. However, I would like to ensure that someone from the Wichita AREA be on constant vigilant watch.

We are going to post a note to the KS QSO Party participants to not utilize the frequencies from 14.320 through 14.330 Mhz - this area should be kept clear so that Hurricane Watch Net has a clear window to pass traffic. Indeed - LISTENING before you start using a frequency is even more important during a Hurricane or Disaster. Give the frequency that Hurricane nets are on plenty of room. There may be other frequencies that are not documented yet that we need to be aware of - as we know more, we'll post them.
www.ksqsoparty.org<http://www.ksqsoparty.org>

I will set up a list of people for the Hurricane monitoring activity. We can coordinate a constant watch in our area. No ONE person needs to be on constant watch. Please let me know if you can help.

# 1219. Hurricane Irene Net Schedule

Yahoo group: BEARSAmateurRadioClub
Date: 2011-08-27 13:38:55 UTC
From: Randy
Topic: 1219  Message: 1219

All KS QSO Party participants are encouraged to give hurricane nets a wide berth. Known hurricane nets include:

SATERN Net 14.275 mhz 14.265 mhz
Maritime Net 14.300 mhz
Hurricane Warning Net 14.325 mhz

This is going to make using 20m difficult at best.

Randy, N0LD

Randy

From: Bob Harder<mailto:w0bh@...>

Sent: Tuesday, September 06, 2011 7:43 AM

To: N0LD Randy Wing<mailto:winger55552001@...>

Subject: RE: 5 Sep 2011 end of day update...

Randy,

That is truly an amazing effort! I'll send my log in soon. I'm still double-checking the rebuild after 7 computer crashes. I currently have 52 requests for certificates, most of them having spelled both KANSAS and SUNFLOWER. I've been busy taking pictures and will start designing the certificate soon. In fact, the sunflowers are out in full force now, so am heading out to the pasture in a few minutes.

I did finally get my 3830 writeup out there. Since it's pretty long, I also made it into a pdf. Here are the links. Might I suggest to both you and Kent that instead of "filling up" the soapbox, you just put a link in the soapbox to the pdf. I'd be perfectly OK with that.

Here are the links:

http://lists.contesting.com/pipermail/3830/2011-September/230241.html

http://www.cs.hesston.edu/w0bh/ksqp/11ksqp_writeup.pdf

I notice that Connie also posted his run to 3830 .. it's right under mine.

Subject: 5 Sep 2011 end of day update...
Date: Tue, 6 Sep 2011 04:19:38 -0500

Kent and Bob,

I worked on the log scoring all day.

94% of the logs I have received to date are scored. That is 154 out of 163 logs.

Attached find the list of logs.

There are no Soapbox updates today.

Of the remaining 9 logs I need to do some surgical alteration of them to get them to be scored by the software or I need to import them into EXCEL and check them that way. A few of the logs didn't have counties submitted with them - so I have sent notes to them asking for an update. 2 have responded so far.

Of course we are still getting logs...

I will be on a business trip this week.... so I will try to let you know when I get a log for the callsign database as soon as I can - but from Wed thru Fri it won't be my priority.

I am proud to have so much done so early - the log checking software really helps, but there is still an astonishing amount of work to do to score the logs and set it up in the final summary sheet. That is why I'll need some help sanity checking it all when I'm done. That doesn't mean doing it from scratch to check it - but I might recommend a few spot checks.

73

Randy, N0LD

There are only three things you need to let go of: judging, controlling, and being right. Release these three and you will have the whole mind and twinkly heart of a child. ~ Hugh Prather

# 1231. 146.94 repeater requiring 103.5 hz tone

Yahoo group: BEARSAmateurRadioClub
Date: 2011-09-13 05:26:19 UTC
From: Randy
Topic: 1231  Message: 1231

Repeater News
The 146.34/146.94
Wichita Tec-Ni-Chat repeater will have a 103.5 tone access required by the end of the week. (Oct 18,2011)
Please update your radios to xmit the 103.5 Hz CTCSS tone, this will assure you will be able to open the repeater.
If you have questions on how to add a tone to your radio please consult your operators manual

For those of you who use the 146.940- repeater in town... please be aware of the changes above...

Randy, N0LD

# 1234. Interesting from the Air Force Magazine Online

Yahoo group: BEARSAmateurRadioClub
Date: 2011-09-22 14:59:38 UTC
From: Wing, Randy
Topic: 1234  Message: 1234

A Clear Signal without Political Machinations: There've been rumblings that some White House officials pressured Gen. William Shelton, head of Air Force Space <http://r.listpilot.net/c/afa/6jz9tmo/2sws3> http://www.airforce-magazine.com/SiteCollectionDocuments/Reports/2011/September%202011/Day21/pix092011sheltonMA-TH.jpg<http://r.listpilot.net/c/afa/6jz9tmo/2sws3><http://r.listpilot.net/c/afa/6jz9tmo/2sws3>Command, to alter his testimony before going before a House oversight committee in a classified session earlier this month to discuss LightSquared's proposed wireless broadband network and its interference with the GPS signal. The Daily Beast reported<http://r.listpilot.net/c/afa/6jz9tmo/2swt4>, for example, that Shelton was asked to make his testimony come across more favorably to the company. A reporter asked Shelton about this Tuesday afternoon during his media availability at AFA's Air & Space Conference in National Harbor, Md. "Anytime in the past or in the future that I am called to testify, I will do my best to present the facts as I know them," Shelton answered. "The real issue here, certainly from my perspective, is protecting the GPS service. We are stewards of GPS capability for the nation and literally for the world, and I believe that my first responsibility is to the users, not only military, but civil and others, to make sure that that service is continued." Shelton's been explicitly clear in his public comments on this topic: He presently sees no way for LightSquared to operate its network on the currently proposed frequencies without interfering with the GPS signal to unacceptable levels for users of precision GPS receivers (see LightSquaring a Circle?<http://r.listpilot.net/c/afa/6jz9tmo/2swu5> and No Room to Coexist<http://r.listpilot.net/c/afa/6jz9tmo/2swv6>). If that's toning down his views, we sure would have liked to have seen his original script.

-Michael C. Sirak

# 1235. A nice video on Field Day and a note about our next meeting

Yahoo group: BEARSAmateurRadioClub
Date: 2011-09-26 00:18:50 UTC
From: Randy
Topic: 1235  Message: 1235

http://www.youtube.com/watch?v=lE3r7yV3PF8

We worked W5JDX during our Greater Wichita Field Day 2011 event. Larry on 80m worked them on 80m.... The video of their field day is on the attached link to their You Tube video.

On 6 October 2011 our BEARS Meeting at 5 PM will feature a video that we acquired of the Oct 2011 QST article on page 58. It is a video of W3AO's 50A station back in 2004. The article says this is an interesting video – even for non-hams – it is professionally editted and Harvey noted that he found it a fun watch. I suppose we might even learn something, some bring a pencil and take notes!

Randy, N0LD

# 1236. Tonight the aurora might be visible in KS - if you have a sky free of light pollution and clouds

Yahoo group: BEARSAmateurRadioClub
Date: 2011-09-26 20:19:14 UTC
From: Wing, Randy
Topic: 1236  Message: 1236

Shows the aurora contacts being made right now!

http://www.vhfdx.info/spots/map.php?Lan=E&Frec=50&ML=M&Map=NA&DXC=N&HF=N&GL=N

The following site shows the K-Index... Currently a 6... some places are reporting an 8.

Anything over 5 is a good note that you might see aurora in KS - 7 indicates you will get aurora communications in KS... a 9 GUARANTEES visual sightings (if not cloudy).

http://www.dxsummit.fi/DxSpots.aspx

Randy, N0LD

P.S. by the way we have 208 logs completed and scored in the KS QSO Party. Great year for participation!

# 1237. Elections approaching - Election Chairman identified, but needs help

Yahoo group: BEARSAmateurRadioClub

# 1239. December Holiday Banquette

Yahoo group: BEARSAmateurRadioClub
Date: 2011-10-02 23:24:22 UTC
From: jones_hg
Topic: 1239  Message: 1239

To all:
The Holiday season is approaching. It is time to plan our December dinner and awards banquette. Every year a volunteer (or group of volunteers) steps up and helps plan the banquette. I need a volunteer this year to be the Awards Banquette committee chairman. Duties will be: to organize a small group of folks to research and identify a time and location to hold the banquette; coordinate the evening with location; take reservations from membership. If interested, please come to the BEARS meeting this Thursday.

From: Randy
Topic: 1249  Message: 1249

Harvey will be sending out detailed information about the JOTA weekend – but I thought I'd send out basic information and pictures tonight.

Pictures from this weekend's Jamboree On The Air at Camp Kanza in Hutchinson! Over 356 boy scouts and their parents/leaders attended! We had 7 sessions of 50 scouts each! Harvey had the following setup for the scouts:

Slow Scan TV – operated by Tim, Diane, and Josh Force
K-Link 70cm – operated by Cliff Craft and Dan Craft
HF Station – operated by Ron Cowan, Patrick (James and Mary Whitfield's grandson) and Randy Wing
Hutchinson Repeater and Simplex – operated by Brandon Trube and Mary Whitfield
Digital and CW Station – operated by James Whitfield
Walter Kronkite video and introduction – operated by Harvey Jones
Antenna and Ham Radio discussion – Dennis Gaskill

# 1252. RE: [BoeingRadioClub] US emergency alert system nationwide test on November 9

Yahoo group: BEARSAmateurRadioClub
Date: 2011-10-24 11:37:09 UTC
From: Steffens, Kerry W
Topic: 1251  Message: 1252

This test is a first time emergency broadcast that will be worked simultaneously on all radio and TV stations. The test will start with this is a TEST of the emergency broadcast station and will be conducted verbally across the US. In the past, a preamble was given, following with a tone was conducted by each station individually according to local and state emergency management requirements. It is a first time that a standardized test will be conducted of this nature. With so many new threats and imminent disasters lurking on the horizon, it is long over due. Some worry that there will be panic in the streets if they miss the first part of the test. Others think it is not enough. Wait and see I guess.

if you read near the bottom, it says that the "this a test" might not be included in the test, due to something about size of message.
this might cause a problem for people thinking it is not a test.

Band QSOs Zones Countries
------------------------------
160: 2 2 2
80: 8 6 7
40: 31 23 12
20: 29 25 25
15: 33 27 18
10: 114 57 27
------------------------------
Total: 217 140 91 Total Score = 133,518

Club:

Comments:

This is my first real attempt at participating in this contest. I didn't treat
it too seriously - my goal was to collect as many zones and countries as I
could - QSOs weren't as important a goal. Sunday, I operated just on 10m - it
was so darn good. 37 of 40 zones worked collectively. 78 unique countries -
many on several bands. I never thought I'd have so much fun contesting for so
long! I didn't even operate Friday evening and the overnights.

Good job, Randy... I don't actually contest myself since I'm limited to just a multi-band vertical and about 500W at the moment.

I concentrated on mainly looking for new countries to add to my DXCC total.. I managed to add about 15 new ones and several

of those were in the middle east just after day break Saturday morning on 15M. Only problem I have with my current set-up is trying

to bust through the east and west coast walls to make a contact with some of the rare DXCC countries.. Takes lots of persistence,

patience and lots of calling.... What was really cool was when some of the operators recognized me from my participation in county hunting

(USACA 1150) and would take the time to say, "Hi!"

# 1264. BEARS Ham Of The Year

Yahoo group: BEARSAmateurRadioClub
Date: 2011-11-14 15:58:02 UTC
From: jones_hg
Topic: 1264  Message: 1264

At our Christmas Party Dec 1st, we will be handing presenting the BEARS Ham Of The Year award. This award is for any Amateur Radio operator and is selected by the BEARS members.

I am looking for your input for BEARS Ham Of The Year. Please send me an email, directly, with the candidate information:

1. Name
2. Call Sign
3. Why they should be Ham Of The Year.

I will need all inputs by 26 Nov.

Thanks

Harvey Jones
President BEARS.

# 1272. BEARS Christmas Party 1 Dec

Yahoo group: BEARSAmateurRadioClub
Date: 2011-11-27 17:00:39 UTC
From: jones_hg
Topic: 1272  Message: 1272

To BEARS Members and Friends;

This is a reminder that the BEARS Christmas Party will be this Thursday (1 Dec) at Ryans Steak House, 3323 N Rock Rd, Wichita. All BEARS current, past and future members are invited. All friends of the BEARS are invited. We will start at 6:30 with a quick greet and allow folks to get their dinner from the buffet (dinner on attendees). After dinner we will be talking about last year, give out awards and talk about ideas for this next year.
We will be taking memberships for next year. Dues have not changed: Employee $10; Retiree $5; Family Membership $15; DX $4; Associate $10; Affiliate $10.

We will be announcing the BEARS officers 7 Dec, so if you haven't sent in your vote yet, the Christmas Party is the last chance to get your vote counted.

Hope to see you at the party.

Harvey Jones
President - BEARS
W0HGJ

# 1276. BEARS Christmas Party TONIGHT!

Yahoo group: BEARSAmateurRadioClub
Date: 2011-12-01 14:38:05 UTC
From: Wing, Randy
Topic: 1276  Message: 1276

A reminder that tonight is the BEARS Christmas Party at Ryan's steakhouse at just south of Highway 96 and Rock Road at 6:30 PM.

As usual dinner first and then a short program that includes:

1. Yearly awards,

2. Final scores for the KS QSO Party,

3. Results of this year's officers election.

4. Microwave Kit discussion

If you participated in a BEARS event, whether a member or not, we hope you to attend.

# 1279. Holiday Ham Radio Testing...

Yahoo group: BEARSAmateurRadioClub
Date: 2011-12-05 01:22:16 UTC
From: Am Fm
Topic: 1279  Message: 1279

The W0VFW Amateur Radio Club will be offering Amateur Radio Testing on it's usual 5th Saturday of the month. That happens 4 times a year. Reason to celebrate is this month it falls on NEW YEARS EVE. Since so many people will have time off during the Christmas week, this is a great opportunity to study for your license.

An Amateur Radio license allows you to participate effectively in SKYWARN as NWS ICT does have ham radio equipment active during storm times. Many Skywarn spotters are also Amateur Radio operators.

More information go to:
http://3115.vfwpost.us/vfwarc/license.php
http://www.arrl.org/licensing-preparation-exams

A $15 fee, and picture ID is required to test. Please email us if special accommodations are needed.

# 1280. Weekly BEARS 146.895- Net, 12/6/2011, 8:00 pm

Yahoo group: BEARSAmateurRadioClub
Date: 2011-12-06 22:57:34 UTC
From: BoeingRadioClub@yahoogroups.com
Topic: 1280  Message: 1280

Reminder from: BoeingRadioClub Yahoo! Group
http://groups.yahoo.com/group/BoeingRadioClub/cal

Weekly BEARS 146.895- Net
Tuesday December 6, 2011
8:00 pm - 8:15 pm
(This event repeats every week.)
Location: 146.895- Repeater

Notes:
The BEARS/Wichita, KS weekly on-the-air net takes place on the BEARS repeater located near the Boeing campus. Please tune to 146.895- mhz. for the net. All licensed amateurs are encouraged to checkin to the net. If you would like more information on the BEARS, please go to our club website: http://boeingradioclub.org/

Subject: The ARRL Contest Update for December 7, 2011

**********
The ARRL Contest Update

Published by the American Radio Relay League
**********

December 7, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- It's Alive! - The ARRL 10 Meter Contest
- Key Contest for Rookies - ARRL Rookie Roundup
- Don Rohn, Tower Pioneer - Silent Key
- Can You Place The States?
- CQ WW Photos from PJ4T
- ARRL UHF Contest Extended Results
- Franklin Array Antenna - An Original
- Height and Takeoff Angle by K5WMG
- Is There Ringin' In Your Ears?

NEW HF OPERATORS - THINGS TO DO

Check out those 10 meter conditions in the upcoming ARRL 10 Meter
Contest <http://arrl.org/10-meter>. As writeup author Scott K7ZO points
out in his "pre-writeup" on the contest's web page, good conditions
feed on themselves with increased activity so don't miss out! The
following weekend finds the second CW version of the ARRL Rookie
Roundup <http://arrl.org/rookie-roundup> for newcomers to ham radio -
will there be a three-peat winner?

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

My flying fingers miscombobulated the call sign of Midge K7AFO in the Nov 23rd issue - apologies! I hope I am not banned from the kitchen and her corn chowder...and Jim K1TN pointed out that CW, the mode, began in the 1920's while it was just the Morse, the code, that was devised in the early 1800's.

John W6BXQ reminds your editor that the 219-220 MHz allocation is limited to digital data messaging so CW is not allowed everywhere on the ham bands.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

December 10-11

- ARRL 10 Meter Contest
- 28 MHz SWL Contest
- UBA Winter Contest
- AWA Bruce Kelly QSO Party--CW
- NA High-Speed Meteor Scatter Contest--Digital
- SKCC Weekend Sprintathon--CW
- Great Colorado Snowshoe Run--CW
- NAQCC Monthly QRP Sprint--CW (Dec 14)
- CWops Monthly Mini-CWT Test (Dec 14)
- Russian 160 Meter Contest (Dec 15)

December 17-18

- ARRL Rookie Roundup--CW
- Feld-Hell Happy Birthday Sprint
- OK DX RTTY Contest
- RAC Winter Contest
- Lighthouse Christmas Lights QSO Party
- Croatian CW Contest
- Stew Perry Top Band Distance Challenge--CW
- Holiday Spirits Homebrew Sprint--CW
- Run For the Bacon--CW (Dec 19)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Don Rohn <http://www.wirelessestimator.com/breaking_news.cfm#Don_Rohn>, leader of Rohn Towers during its growth from a small TV-tower manufacturer to an industry giant, died on Nov 21st at the age of 72. Rohn towers are by far the most common in ham radio and set the standard by which towers are judged. (Thanks, Bill K3WA)

Array Solutions <http://arraysolutions.com/> has released some new models in the AS-300 ICE Surge Arrestor product line. The design applies a saturable inductor to help dissipate surge energy in the feed line as described in the device manual. There is a multi-arrestor version of the product for mounting on a single-point entry, as well.

The new Alpha 4040 auto-tuner by RF Concepts/Alpha Amplifier <http://www.rfconcepts.com/> is truly a heavy-duty product, rated at 4 kW maximum over the 1.8 - 30 MHz range. The tuner uses vacuum-variable capacitors and a new multiple-contact edge-wound inductor in a Tee configuration. The front panel features an LCD screen and can even display impedances in a Smith Chart <en.wikipedia.org/wiki/Smith_chart> format.

Keep your prefix list up-to-date - to celebrate the 75th Anniversary of the CBC/Radio Canada, Canadian amateurs may substitute the following prefixes between December 1-31, 2011:

- VG for VA
- VX for VE
- XJ for VO
- XK for VY

For example, VX3AT is really VE3AT. (Thanks, AMSAT www.amsat.org <http://www.amsat.org/>, newsletter ANS-338)

The previous issue's Conversation regarding prompt log submissions was in reference to those submitting logs electronically. There are plenty of good reasons that logs might not be ready to send right after the contest - for example, rovers and mobile stations usually keep paper logs that must be transcribed or a station on an expedition might be far from email. The point was - if in preparing your log you are changing the information to what you think you "should" have copied, that's going too far - nothing more.

Speaking of mobiles - if you operate your mobile station in the ARRL 10 Meter Contest <http://arrl.org/10-meter>, you must stay within one state or province. If your travels take you beyond that boundary, you must either change your operation to use a different call sign or submit your log as a checklog.

More plaque sponsors have stepped forward for the upcoming Stew Perry <http://jzap.com/k7rat/stew.html> contest on 160 meters:

- Sponsor - Category
- K7FL - Top Score 100% Search & Pounce
- N7UA - Top Score High Power
- N2KW - Highest rate for 1 hour w/o bust
- K6ND - K6SE Memorial-Top Score World
- NA0Y - Top Score USA
- F8BPN - Top Score EU- Low Power
- EI4HQ - Perhaps you were Irish and didn't know it (Top # of calls containing sequential "EI")
- N9ADG - Top Score Asia

(Thanks, Lew W7EW)

Here's a book that is definitely going on my to-read list: Wi-Fi and the Bad Boys of Radio by Alex Hills. The Wired magazine review

<http://www.wired.com/geekdad/2011/11/a-history-of-wi-fi/> definitely piqued my interest as it mentions Mr Hill's progressions from ham radio through college radio stations to field experience and finally to the development of Wi-Fi technology that we almost take for granted today. Until we can't get it...that's where the "Bad Boys of Radio" come in. I'll leave those acquaintances for you to discover!

Three great articles await you in the December issue of the Potomac Valley Radio Club Newsletter <http://pvrc.org/Newsletters/dec2011.pdf>: a report on the recent High Speed CW Championships by Ken KE3X, a recounting of the CQ WW SSB from Thailand by Fred K3ZO, and a wire beam design by Jim K4QPL. Good reading and photos, too!

The QRP ARCI web page <http://www.qrparci.org/> is now updated to list the entire roster of QRP ARCI 2012 contests through December of 2012. (Thanks, QRP ARCI Contest Manager, Jim K9JWV)

Web Site of the Week - Hams love maps and contesters are the mappiest of the lot - well, maybe next to DXers - so how well do you have the US states placed in your memory? Try this drag-n-drop online test <http://jimspages.com/States.htm> for fun! (Thanks, Bob N6TV)

WORD TO THE WISE

Listen - listen to the call sign the CQing station responds to and don't be a lid - stand by if it's not very close to your call. Too many stations just keep calling and calling, regardless of who the CQer comes back to. If you're transmitting, you're not listening and can't tell what the CQing station is doing. Give a couple of calls, then listen - it's a lot easier to get through that way.

==> SIGHTS AND SOUNDS

Diego LU8ADX recently participated as part of the PJ4T team in the 2011 CQ WW SSB Contest and has published an extensive photo album <https://picasaweb.google.com/116979053033309598589/PJ4Bonaire?authuser=0&authkey=Gv1sRgCP-C44HLhOboJA&feat=directlink>
of his experiences. Can you find the drempels?

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X reports that the 2011 ARRL August UHF Contest's extended writeup <http://www.arrl.org/contests> is now online. Sweepstakes log submissions total 1404 for CW and right at 1800 for Phone - no wonder it was so hard to hold a frequency! In addition, plaques and certificates for the 2011 ARRL RTTY Roundup are also now in the mails - an early present for the lucky recipients!

An updated version of the ARRL 160 Meter CW Log Analyzer <http://tinyurl.com/7xjxypc> is ready for your download, including the "One click" Cabrillo import feature. For fun and a good luck at the difference between the first and second halves of the contest, import your log for the first half of the contest into the worksheet labeled

"Position 1" and the second into "Position 2". (Thanks, Bob K0RC)

The 2011 Canada Day contest results and writeup are now posted online <http://www.rac.ca/en/rac/programmes/contests/> at the Radio Amateurs of Canada (RAC) web site. The results will also be published in the next The Canadian Amateur (TCA) magazine (Jan / Feb issue). (Thanks, Bart VE5CPU)

From the Pacific Northwest comes word that the Salmon Run log season has closed and the fish counted for a total of 290 logs. Results have been posted <http://www.wwdxc.org/images/stories/SalmonRun/2011%20results.pdf> and nets are being repaired for next year! (Thanks, Jim K7WA)

Kansas QSO Party results <http://www.ksqsoparty.org/> are now ready with lots of soapbox and information. The 33 stations using 1x1 call signs made 21,509 QSOs with 4,851 unique stations, an average of 652 contacts per operator. (Thanks, Cliff K0CA)

Results for the new August CW Open <http://www.cwops.org/cwopen.html> have been published. The sponsors report that participation met their expectations and the format of three separate operating periods was interesting. The sponsors have changed the contest date to September in 2012 to avoid conflicts with other contests and will make other adjustments to the format. (Thanks, Alan AD6E)

The Logs Received web page for the 10-Meter RTTY Contest <http://rttycontesting.com/the10meterrttycontest/logs.html> has been updated with logs received up to about an hour ago. 426+ logs have been submitted so far in the first 24 hours. Activity was good worldwide with lots of spots though run rates weren't high. The solar flux rose throughout the week and the contest started with an SFI of 160 and moved up to 164 during the contest with low A and K index numbers: The A dropped from 8 to 5 and the K from 2 to 0. There was a lot of interesting spotlight propagation that moved around the world as the ionosphere changed - a great warmup for the ARRL 10 Meter contest this weekend and ARRL RTTY Roundup in about a month. The contest picked up three new plaque sponsors and now has nine plaques sponsored. (Thanks, Don AA5AU and Ed W0YK)

The recent SKYWARN day sponsored by the National Weather Service also heated up the bands as reported by Deb N9SJ. From a portable vehicle station, she and Steve WD9CIR made 979 contacts hitting 46 states, at least 3 Canadian provinces and 3 DX stations not to mention 69 of the 105 NWS WFO's on the air.

Did you have a great experience in a recent ARRL contest? If so, while it's still fresh in your memory, share it with us and the writeup authors using the ARRL Soapbox web page <http://www.arrl.org/soapbox>. Photos are especially welcome!

Doug KR2Q gives the Pileup web site <http://pileup.ru/> by Valery, R5GA his "SUPER GREAT" rating. The website compiles claimed scores from sponsors and from 3830, presenting the information sorted in several useful ways. There are also sections for related comments, published videos, and side-by-side comparisons. Wow!

Another popular compilation, the 3830 CQ WW SSB Soapbox <http://www.eskimo.com/%7Emwdink/3830/> comment compilation is online as well! (Thanks, Dink N7WA)

OPERATING TIP

If you answer a CQing station and they respond with an error in your call, the most reliable way to be sure they have your call correct is to send only your call sign again and not the exchange. Don't send the exchange until the CQer responds with your correct call - then send your exchange.

==> TECHNICAL TOPICS AND INFORMATION

The Franklin array <http://www.aktuellum.com/circuits/antenna-patent/patents/242342.pdf> of half-waves in phase is common in ham radio VHF/UHF omnidirectional antennas but not many hams know that it was once popular, but difficult, in the AM broadcast industry <http://www.radiomagonline.com/media/ar/0701/107br0703lg.jpg>, as well. These required a serious amount of tower and property to put up and guy. (Thanks, Paul W9AC)

A recent online edition of EE Times included a nice EMC-basics design article <http://www.eetimes.com/design/analog-design> on battery charger designs from a standpoint of minimizing RFI. The article is a good introduction to EN standards, as well.

Don't toss those PL-259 backshells left over from removing a connector - put them to work! Cover and wrap the back end with tape or a plastic cap and you will have a nice screw-on water-resistant cover for an SO-239. It's not waterproof, but it sure helps!

The Case of the RF Disturbances <http://www.designnews.com/author.asp?section_id=1368&doc_id=235952&> is the latest tale of resolving radio-related rebellion from Design News magazine's Tales of Sherlock Ohms series. Get out the aluminum foil, Kenneth!

In a discussion of using external fans to provide extra cooling for amplifiers, it was pointed out that if the fan is in the exhaust (hot) air stream, avoid fans with blades that age or warp in the heat or that have oiled bearings.

One of the originals in the field, Radioshack <http://www.radioshackdiy.com/> is now selling DIY Arduino-based kits as part of "The Great Create" project for Do-It-Yourself projects. It is encouraging that so much attention is being paid to building

electronics and other gadgetry - an excellent pathway to ham radio if we can get the word out!

In the latest edition of QRP ARCI's QRP Quarterly I noticed a neat method of homebrewing large air-wound coils <http://www.ad5x.com/images/Articles/CoilRevB.pdf> by Phil AD5X. It uses flexible grommet strips as the support structure with the result very similar to the B&W Miniductor product. Whether you prefer QRP or QRO, every issue of QRP Quarterly is jam-packed with building ideas applicable to nearly every shack and their contests are fun, too.

Kevin KI8IR notes that while, "it may be common practice with a lot of hams to refer to the PL-258 as a 'barrel' adapter but in the RF Test/Measurement world <http://www.microwaves101.com/encyclopedia/connectors.cfm> an adapter that is female on each end, such as the PL-258, is referred to as a 'bullet' and the male-male same-series adapters are referred to as a barrel." We learn something new every day!

Technical Web Site of the Week - Mike K5WMG has written and published a good paper <http://radio.n0gw.net/radio12.pdf> illustrating the effects of height-above-ground on vertical takeoff angle for beam antennas. It shows why a good "first tower" height of 50 feet works well and why higher performance antennas need that extra vertical "oomph".

==> CONVERSATION

Rather than get into semi-hemi-demi-quaverings of year-end auld lang syne waves (next time, I promise) it seemed better to print a repurposing of a tune I'm sure you'll recognize. You might also enjoy the work of Peter K3ZM as he adapts "My Favorite Things <http://lists.contesting.com/pipermail/3830/2011-December/238491.html>" to the view of a contester - nice job!

Ringin' In Your Ears

Steelied from the Dan's "Reelin' in the Years" by Dr Beldar

Your chance to make the Top Ten
You can see it fading fast
So you grab a channel on a
Band you think is gonna last
You wouldn't know an Eimac
If you held it in your hand
The things you think are useful
I can't understand

(CHORUS)
Is there ringin' in your ears
Callin' away the time
Is the frequency now clear
Or are you stealin' mine?

You been tellin' me you're a winner
Since you were seventeen
In all the time I've known you
You still haven't won a thing
The weekend in Aruba
Didn't turn out like you planned
The things that pass for know-how
I can't understand

Is there ringin' in your ears
Callin' away the time
Is the frequency now clear
Or are you stealin' mine?

I've spent a lot of money
And I've worked a lot of guys
The trip we made to KH6
Is etched upon my mind
After all the things I've tried to teach
You search and pounce the band
The way you run a pileup
I can't understand

Is there ringin' in your ears
Callin' away the time
Is the frequency now clear
Or are you stealin' mine?

73, Ward N0AX

==> CONTESTS

7 December through 20 December 2011

An expanded, downloadable version of QST's Contest Corral in PDF format
<http://www.arrl.org/contest-calendar> is available. Check the
sponsor's Web site for information on operating time restrictions and
other instructions.

HF CONTESTS

ARRL 10 Meter Contest--Phone,CW, from Dec 10, 0000Z to Dec 11, 2400Z.
Bands (MHz): 28. Exchange: RS(T) and State/Prov or serial. Logs due:
Jan 11. Rules <http://www.arrl.org/contests>

ARRL Rookie Roundup--CW, from Dec 18, 1800Z to Dec 18, 2359Z. Bands
(MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX".
Logs due: See web. Rules <http://www.arrl.org/contests>

28 MHz SWL Contest--Phone,CW, from Dec 10, 0000Z to Dec 11, 2400Z.
Bands (MHz): 28. Exchange: Log ARRL 10 Meter Contest QSOs. Logs due:
Jan 31. Rules <http://swl.veron.nl/swlcontest.htm>

UBA Winter Contest--Phone,CW,Digital, from Dec 10, 1700Z - See website. Bands (MHz): 1.8-7. Multiple operating periods. Exchange: RS(T) and UBA section or serial. Logs due: 3 weeks. Rules <http://www.uba.be/en/hf/contest-rules>

AWA Bruce Kelly QSO Party--CW, from Dec 10, 2300Z - See website. Bands (MHz): 3.5,7. Multiple operating periods. Exchange: RST, Xmtr type, power, name. Logs due: 30 days. Rules <http://www.antiquewireless.org/>

SKCC Weekend Sprintathon--CW, from Dec 11, 0000Z to Dec 11, 2359Z. Bands (MHz): 3.5-28. Monthly on the second Sunday. Exchange: RST, S/P/C, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/>

Great Colorado Snowshoe Run--CW, from Dec 11, 2100Z to Dec 11, 2259Z. Bands (MHz): 14. Exchange: RST, S/P/C, class, CQC number or power. Logs due: 30 days. Rules <http://www.cqc.org/contests>

NAQCC Monthly QRP Sprint--CW, from Dec 14, 0130Z to Dec 14, 0330Z. Bands (MHz): 3.5-14.Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Dec 14, 1300Z - see website. Bands (MHz): 1.8-28. Multiple operating periods, twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Russian 160 Meter Contest--Phone,CW, from Dec 15, 2100Z to Dec 15, 2300Z. Bands (MHz): 1.8. Exchange: RS(T), serial, square ID (see website). Logs due: Jan 20. Rules <http://www.radio.ru/cq>

Feld-Hell Happy Birthday Sprint--Digital, from Dec 17, 0000Z to Dec 17, 2400Z. Bands (MHz): 3.5-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

OK DX RTTY Contest--Digital, from Dec 17, 0000Z to Dec 18, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and CQ Zone. Logs due: Jan 15. Rules <http://www.crk.cz/ENG/DXCONTE.HTM>

RAC Winter Contest--Phone,CW, from Dec 17, 0000Z to Dec 17, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and province or serial. Logs due: Jan 31. Rules <http://www.rac.ca/en/rac/programmes/contests/>

Lighthouse Christmas Lights QSO Party--Phone,CW,Digital, from Dec 17, 0001Z to Jan 2, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial or ARLHS number. Logs due: Jan 31. Rules <http://arlhs.com/>

Croatian CW Contest--CW, from Dec 17, 1400Z to Dec 18, 1400Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.9acw.org/>

Stew Perry Top Band Distance Challenge--CW, from Dec 17, 1500Z to Dec 18, 1500Z. Bands (MHz): 1.8. Exchange: 4-char grid square. Logs due: Jan 31. Rules <http://jzap.com/k7rat/stew.rules.txt>

Holiday Spirits Homebrew Sprint--CW, from Dec 18, 2000Z to Dec 18, 2359Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, ARCI number or Power. Logs due: Jan 3. Rules <http://www.qrparci.org/contests>

Run For the Bacon--CW, from Dec 19, 0200Z to Dec 19, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

ARRL Rookie Roundup--CW, from Dec 18, 1800Z to Dec 18, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See web. Rules <http://www.arrl.org/contests>

NA High-Speed Meteor Scatter Contest--Digital, from Dec 11, 0000Z to Dec 15, 0200Z. Bands (MHz): 50-222. Exchange: Both calls, grid square, acknowledgement. Logs due: Jan 15. Rules <http://www.ykc.com/wa5ufh>

RAC Winter Contest--Phone,CW, from Dec 17, 0000Z to Dec 17, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and province or serial. Logs due: Jan 31. Rules <http://www.rac.ca/en/rac/programmes/contests/>

Lighthouse Christmas Lights QSO Party--Phone,CW,Digital, from Dec 17, 0001Z to Jan 2, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial or ARLHS number. Logs due: Jan 31. Rules <http://arlhs.com/>

==> LOG DUE DATES

7 December through 20 December 2011

- December 10 - Wake-Up! QRP Sprint
<http://qrp.ru/modules/sections/index.php?op=viewarticle&artid=7&page=1>
- December 14 - JIDX Phone Contest
<http://www.jidx.org/jidxrule-e.html>
- December 15 - 10-Meter RTTY Contest
<http://www.rttycontesting.com/the10meterrttycontest/rules.html>
- December 20 - EPC PSK63 QSO Party
<http://eu.srars.org/index.php?option=com_content&task=view&id=66&Itemid=141>
- December 20 - LZ DX Contest <http://lzdx.bfra.org/rulesen.html>
- December 20 - ARRL EME Contest <http://www.arrl.org/eme-contest>

# 1282. BEARS Election Results

Yahoo group: BEARSAmateurRadioClub
Date: 2011-12-11 02:27:51 UTC
From: jones_hg
Topic: 1282  Message: 1282

To all interested parties:

Official results from the election chairman were announced at the last Tuesday's BEARS Net. Below are the results:

President - Harvey Jones, W0HGJ

Vice President - John Harford, KB0OPH

Secretary - James Whitfield, N5GUI (write-in)

Treasurer - Jeff Schiffel, AC0TC

The other members of the Executive Board remain unchanged. The Trustee term of office has not expired, Randy Wing, N0LD continues for 2012. Since the current President was re-elected for a second term, the office of Past President remains Jim Enix, KC0QIE.

Lets welcome the new officers and look to 2012 to be a successful year.

Harvey Jones
w0hgj

# 1288. BEARS 2012 Calendar

Yahoo group: BEARSAmateurRadioClub
Date: 2011-12-29 05:21:28 UTC
From: Randy
Topic: 1288  Message: 1288
Attachments: 1 described; binary payloads are missing from this source WARC

I put together a calendar for 2012... I put the State QSO Parties on it, I think many of you are frequenting them now that we are a primary sponsor of the KS QSO Party.

I hope everyone is having a good holiday!

Randy, N0LD

# 1289. Quadrantid Meteor Showers early on Wednesday morning 4 January 2012

Yahoo group: BEARSAmateurRadioClub
Date: 2012-01-02 20:43:51 UTC
From: Randy
Topic: 1289  Message: 1289

http://www.csmonitor.com/Science/2012/0102/Quadrantid-meteor-shower-won-t-have-to-compete-with-moonlight

For those of you who like to:

1) Stay Up Late
2) Observe Meteor Showers
3) Like to skip a 2m or 6m signal off of the ionization trail left by meteors...

This is your chance!

Happy New Year!

Randy, N0LD

# 1290. Calendar for 2012

Yahoo group: BEARSAmateurRadioClub
Date: 2012-01-03 16:50:03 UTC
From: Wing, Randy
Topic: 1290  Message: 1290

For those of you who may not have received my email over the holidays, I've put together a calendar for 2012 BEARS and amateur radio related activities. This calendar is located on the menu at our club web page:

www.kc0ahn.org<http://www.kc0ahn.org>

If you see events that you believe are of interest to other BEARS members, let me know and I'll update the calendar periodically. I've expressly put the other QSO parties on the calendar - 6 May 2012 is the big day - what a wonderful day to participate in dozens of state qso parties!

I'll see you on Thursday at the BEARS meeting!

We've had about half of our members sign the paperwork for 2012 to be a BEARS member. If you are someone that hasn't done this yet, I strongly encourage you to send in your membership (it is still a low/reasonable amount) - whatever the outcome of the Wichita site, we'll have at LEAST this entire year to operate as a club. If I were talking to each of you face-to-face I'd say, don't stop having fun and learning just because our Wichita site is facing an uncertain future.

Randy, N0LD

Trustee

# 1299. Bill Briles update

Yahoo group: BEARSAmateurRadioClub
Date: 2012-01-12 15:55:05 UTC
From: Wing, Randy
Topic: 1299  Message: 1299

For those of you who know Bill Briles, W0OQC, I thought you'd want to know about this.

Randy, N0LD

---
From: Briles, Mark A
Sent: Thursday, January 12, 2012 8:52 AM
To: Boorn, James D; Knight, Sharon K; Canfield, Stephen C; Wing, Randy; Matson, Pat; Wolff, Barry B; Cox, Deborah M; Gitchell, Daniel A; Holmes, Jon K; Labidi, Nacim
Subject: Thought I would provide an update on my dad

All,

Yesterday afternoon I had to leave quickly. My dad (Bill Briles) went into cardiac arrest, that's the bad news. The good news is he was at the hospital emergency entrance when it happened and was revived in under 90 seconds. He is currently at St. Francis under going hypothermia therapy (a standard protocol now). He had been home for a week after under going heart bypass surgery just before Christmas.

I may be in and out over the next couple of days and hard to reach at times so wanted to let you all know.

Date: Friday, January 13, 2012, 11:40 AM

As a reminder, the Central Kansas Amateur Radio Club offers Testing Every Month.
Second Wendesday, 7:00 PM at the  Saline County Sheriff's Office Classroom.
251 North 10th Street (Corner of 10th & Park Streets)
Salina, Ks.  67401
ARRL-VEC Session fee is still $15.00 for 2012
We always take Walk-in's.  The only time we ask for
pre-registration is for folks with "Special needs" like LARGE PRINT
Exams, or (like last night) needing to have the questions and answers read aloud.

Contact is Sid Ashen-Brenner N0OBM
785-823-6560 or

# 1308. Field Day 2012 Strategy: For your consideration

Yahoo group: BEARSAmateurRadioClub
Date: 2012-01-22 18:54:33 UTC
From: Randy
Topic: 1308  Message: 1308

I read an article in the CQ magazine (January 2012) and they said that working high power when there are more contesters gives you an advantage – you can run a frequency easier. Because you can run a frequency easier, you can make MORE contacts than enough contacts to make up for the lack of a 2x multiplier for contacts.

The downside of this is that we would have more interstation noise. Then I got to thinking... it might not take 1500 watts to run field day... I have a 600 watt amplifier that might be a good compromise.

Proposal: Amplifiers on 20m, 40m, and 80m voice. The other bands we can spread out on.... 10m and 15m are wide and are rarely FULL.

2011 Greater Wichita Field Day Score Summary:

CW Digital Phone Total
Total QSOs 310 188 909
Total Points 620 376 909 1905 Claimed Score = 3,810

If we took last year as an example (which has about 250 6m scores in it), we'd need to make 909 additional contacts on 20m, 40m, and 80m combined to make up the difference. So, let's imagine that we only make half as many 6m scores, but since we are running separate 10m and 15m voice bands that that more than makes up for it. That means we'd need to make about triple the contacts on 20m and 40m. Say 750 instead of 250 on each. I think this is really doable over a 24 hour period – that means we'd go from 10 QSOs an hour on these bands to 30 qsos per hour on the band.

This might mean that we'd have to separate 20m and 40m from the other stations by as much as we can. With some form of antenna directivity, we can push the signal away from the other stations. The band filters would need to be stepped up on the non-voice, high powered stations. I think this would make a difference.

Thoughts?

It is worth consideration. The problem will be antenna placement. I also recall that for two years in a row there was some intermod on CW transmitters, so station placement is also a concern.

What about compensating for the anticipated lower 6m scores with a Yagi?

my $.02 is if you can't hear em you can't work them either, when I go over 24 watts psk from here on my low mounted g5rv or my 5btv the psk reporter shows I am heard by lots of stations 1500+ miles out, but I don't hear or see them on my waterfall.  This makes me think I could work more if my sensitivity and adjacent signal rejection improved. BTU. Or perhaps they just don't want to talk to Kansas.

From: n5gui@cox.net
Topic: 1308  Message: 1311

Interesting suggestion Randy.

My immediate reaction is that raising power is the wrong way to go, but I realize that it may be a practical solution.

I would like to know what our "real" PEP output is for the bands that you are considering using an amplifier on. I know that we assume that full power on a typical transceiver is 100 watts. My personal impression is that we don't get that. Or if we do, it is only on voice peaks, and therefore not representative of the effective communications power we are sending.

Going from 100 watts to 150 watts, the amount of power allowed by the Field Day rules for qualification at the 2X multiplier level, is only 1.76 dB, where going to 1500 watts is nearly 12 dB. Going to 600 watts is about 8 dB.

The argument for boosting power seems very persuasive to me only in the case where you one or two transmitters. Even at the 600 watt level, I think you would deafen at least half of our stations, particularly in band. I also see it as devaluing any of the multi-op stations that don't rate the use of the few amplifiers we could get.

If it was a question of cost - say the choice of buying an amplifier versus buying a beam antenna for that station, I think the cost per dB math is strongly in favor of the antenna. That would be particularly true considering the antenna increases what you can hear as well as who can hear you. I don't work the stations in question, so I really don't know how many stations that we can now hear ( which should not change much if we add an amplifier ) that we cannot now work.

I suppose that I would feel better about the general idea of using amplifiers if we ran a test. Say we got two or four operators willing to run two contests. Half use an amp for the first contest, then the other half use amplifiers for the second contest. Maybe you would need to "level the playing field" by having all use the same antenna at each location. You might even need to run some sort of calibration by having all the operators participate in contests before and after the test periods to determine if they all get similar scores if they use the same power level.

Bottom line, this is at best a philisophical discussion. We don't have the resources to get either amplifiers or beams for our Field Day stations. Maybe one, or two. I don't see it significantly changing our score.

Well I thought I would let you all know, I have two HF beams just setting here doing nothing. I'm not sure what bands they cover, But I think they are tri-beam.They need a lot of work. They have been setting outside for years. They might not even be any good. If someone would like to look them over and maybe clean and get they working. I would let the club us them for field day. Someone would need to set up and check the antennas out, as I don't have the time. Let me know and I'll dig them out.

# 1313. BEARS February Monthly Meeing moving to Wed 1 Feb, March normal time

Yahoo group: BEARSAmateurRadioClub
Date: 2012-01-23 22:03:27 UTC
From: jones_hg
Topic: 1313  Message: 1313

BEARS February Monthly Meeting moving to 1 Feb to accommodate special presentation.

The meeting has been moved to Wed, Feb 1, 2012 at 5 PM
- To allow special presenters and participants to attend
- Regular monthly mtgs will resume in March 2012
- All hams or prospective hams are welcome to attend
- Rm E203 of 4501 E. 47th St. (1 block West of Oliver/47th)

Program:

- W0BH Contesting Station Design - Bob Harder, W0BH
- KS QSO Party 2012 Proposal ☐ Bob Harder, W0BH
> Del Sawyer, K0DDS ☐ Sante Fe Trail ARC KQP focal
> Kent Stutzman, KB0RWI ☐ KQP Web Page Designer
> Randy Wing, N0LD ☐ BEARS KQP focal

MORE INFO:

1. Bob Harder, W0BH, has volunteered to give a presentation on his DX contesting station ☐ which I consider to be very cleverly organized with some features that I think are extremely interesting! We've been trying to get Bob to do the presentation for 6 months now, but he teaches computer science at Hesston College and it has conflicted both this last semester and this semester with our regular club meetings. After asking him, he said he WOULD be open to giving a program on Wednesday, February 1, 2012. You may remember W0BH as the gentleman who augments our CW contacts during Field Day and helps organize the KS QSO Party.

2. Similarly, Del Sawyer, the spokesman for the Sante Fe Trail ARC (another KS QSO Party sponsor), has noted that he'd be willing to travel to Wichita. So AFTER the BEARS meeting, we will have a discussion of the future of the KS QSO Party for 2012 (Bob Harder has some really interesting KS QSO Party plans ☐ so I'd like to get everyone together for a face to face). Bob will be handing out some KS QSO Party awards at the meeting, too.

# 1317. FW: Moving BEARS February meeting to 1 Feb 2012

Yahoo group: BEARSAmateurRadioClub
Date: 2012-02-01 16:38:20 UTC
From: Wing, Randy
Topic: 1317  Message: 1317

Remember, today's the day for the BEARS meeting!

Randy

From: Wing, Randy
Sent: Monday, January 23, 2012 12:40 PM
To: Jones, Harvey G
Subject: Moving BEARS February meeting to 1 Feb 2012

To facilitate a special BEARS Program we are moving our February Monthly meeting to Wednesday, February 1, 2012. There will be no meeting on Thursday, February 2, 2012.

The club meeting will start at 5:00 pm in room E203 of the 4501 Bldg. on east 47th St. in Wichita, KS.

1. Bob Harder, W0BH, has volunteered to give a presentation on his DX contesting station - which I consider to be very cleverly organized with some features that I think are extremely interesting! We've been trying to get Bob to do the presentation for 6 months now, but he teaches computer science at Hesston College and it has conflicted both this last semester and this semester with our regular club meetings. After asking him, he said he WOULD be open to giving a program on Wednesday, February 1, 2012. You may remember W0BH as the gentleman who augments our CW contacts during Field Day and helps organize the KS QSO Party.

2. AFTER the BEARS meeting, we will have a discussion of the future of the KS QSO Party for 2012 (Bob Harder has some really interesting KS QSO Party plans - so I'd like to get everyone together for a face to face). Bob will be handing out some KS QSO Party awards at the meeting, too.

Please spread the word to anyone who might find this meeting interesting!

# 1321. BEARS Board call for volunteers to join Constitution Revision Committee.

Yahoo group: BEARSAmateurRadioClub
Date: 2012-02-04 17:05:41 UTC
From: jones_hg
Topic: 1321  Message: 1321

To Members:
The Boeing Employees Amateur Radio Society (BEARS) Board met last Thursday, 2 Feb. One of the resolutions of the Board was to convene a committee to revise the current BEARS Constitution and By-Laws to take into account the closure of the Wichita Boeing plant. Harvey Jones and James Whitfield are on the committee, but additional volunteers are requested.

The purpose of the Constitution Revision Committee is to draft two options:

1. Revise the current Constitution and By-Laws to be in line with the current Boeing directed template. This will allow greater participation of the Boeing retired and family members in club leadership, and other changes.

2. Revise the current Constitution and By-Laws to transition away from Boeing and become an independent club, allowing membership growth.

The first meeting of the Committee will be in the next 2 weeks. If you wish to be on the Committee, please send Harvey Jones (harvey.jones@...) or James Whitfield (n5gui@...) an email.

Harvey Jones
President BEARS

As one of the founding officers of the BEARS O our constitution is valid for all times, Later we included member employed by Spirit they were included in the BEARS O group. unless you want to include members outside of the two organizations there may not be a need to rewrite the current Constitution. Keeping the original charter under the existing Boeing may be the best. as a branch of St Louis or Oklahoma it may be the best result. John in Derby

I realize I am sorta on the fringe of the club these days but I think you may need to take a practical look.

Does Boeing now or will they in the future continue to provide funds to the club.

I think this is very important in light of the phase out of their presence in Wichita.

John,

Thank you for your comments. The Board reviewed the current Constitution and By-Laws and determined both need to change if the club is to survive the Wichita Boeing shutdown.

If you wish to be a part of the Revision Committee, let me know.

Thanks

Harvey Jones

Sam,

Thank you for the questions. Boeing support of Wichita local clubs will terminate when the Wichita plant is closed. According to Recreation, Boeing has no plans on providing recreational clubs money in the foreseeable future.

Harvey

I don't know how many people the club has currently or how it plans to get its funding in the future.

It makes it more important for old geezers like me to keep my membership current.

If the club is not currently a 501c3 I would recommend checking into that.

That would allow funding based upon several different methods and allow members some tax breaks for giving additional funding.

Just a thought from this guy hope it helps.

Please send me membership forms and I will try to be more diligent about keeping current.

Actually any conductive paint would radiate.... I would imagine metallic flake paint would exhibit "nano-capacitors"..  You can buy "Aluminum" paint... for painting chain link fences..50 years ago.. My father introduced me to the business end of that one teenage summer.

It's the same theory as the "wet String-spaghetti noodle antenna" demonstrated at many ham radio meetings over the years..

I beg to differ...

ANYONE that does not want to receive e-mails from a certain site can simply declare it SPAM it will be blocked from their inbox. It is not required to contact the origination site to attempt to assure you do not receive unwanted messages. We'd double traffic if we had to do that.

My mother always used to say, "God helps those who helps themselves"

- don't forget the W0VFW Amateur Radio Club meeting and Spaghetti dinner 1pm SUNDAY...donations for the Spaghetti dinner go to the ham club.

# 1338. What you doing this SUNDAY??? Guess who's coming to dinner?

Yahoo group: BEARSAmateurRadioClub
Date: 2012-02-24 15:05:01 UTC
From: Am Fm
Topic: 1329  Message: 1338

QST- Wichita Area Amateurs and all ships at sea....

- Don't forget the W0VFW Amateur Radio Club meeting and Spaghetti dinner
1pm SUNDAY...donations for the Spaghetti dinner go to the ham club.

You DO NOT have to be a member of the VFW to attend. The meeting is short. visit the club station. You can bring family. Beverage sales benefit VFW Post 3115. Enter through the patio-stockade fence gate in the parking lot. The meeting area will be smoke free and blocked off from the rest of the post.

Membership is open to all amateur radio operators and interested parties. If you can join the VFW or it's auxiliaries, it's recommended to support them as well. The mission is to support troops and their families. Amateur Radio is a great way to do that.

W0VFW Amateur Radio Club
VFW Post 3115
4801 Douglas
Wichita, KS
corner of Anna and Douglas, 2 blocks north of Town West Mall.

See you there....

# 1350. ADIF ERRORS IN HRD LOG

Yahoo group: BEARSAmateurRadioClub
Date: 2012-03-19 09:45:01 UTC
From: RobertJ
Topic: 1350  Message: 1350

After the recent PODX070 St Patrick's Day psk31 contest, it became apparent that the adif created by the HRD log had omitted some state data that was contained in the database. I corrected the omission with a program called ADIF master that allows you to easily see the columns and data in the adif and resubmitted it gaining over 200 points for the contest. So for those using the log in HRD (Ham Radio Deluxe beta5.0) you may want to double check your adifs before submitting for contacts and certificates as it might cost you that WAS you thought you had sent in. We kept all the archives that were in the cabinet in the old BEARS shack. I don't think anyone has done a complete inventory of these records. Or organized them. The cabinet had hanging folders, but not everything could be found easily. When the newsletter was discontinued due to cost, we lost a continual record – unless you count the Boeing Yahoo Groups as a record for the past 10 years.

We still have what ever was in the cabinet in the old shack; what we need is an archivist.

Would anyone like to volunteer? Many of our current board members – will be gone next year. This is usually the implicit job of the secretary – but if someone was to volunteer as an archivist, perhaps it would be done consistently – secretaries have a short term.

# 1359. 5 April Meeting Agenda and 9 April Field Trip Info

Yahoo group: BEARSAmateurRadioClub
Date: 2012-03-28 01:59:30 UTC
From: jones_hg
Topic: 1359  Message: 1359

To BEARS:

5 April The April meeting will still be at the normal time and location, 5 April. Topics at the meeting will include:

- Discussion on the proposed new club Constitution and ByLaws. See www.kc0ahn.org for more info

- Program still in work

- Field day discussions

9 April FIELD TRIP:
We have added an extra event for April. We will be going on a Field Trip to KAKE TV. We will meet at KAKE TV (Address to come later) at 5:30 PM on 9 April for the tour. Address 1500 N. West Street, Wichita, KS

All BEARS and Friends invited.

Please let me know if you will attend so I can get a rough count.

Thanks

P.S. Please forward to anyone who you think would be interested.

# 1365. BEARS NOTICE - Vote On New Constitution and ByLaws in May

Yahoo group: BEARSAmateurRadioClub
Date: 2012-04-07 16:58:25 UTC
From: jones_hg
Topic: 1365  Message: 1365

To BEARS:

The Boeing Employees Amateur Radio Society met on 5 April, with part of the discussion being the
presentation of the proposed new Constitution and ByLaws. The contents of the presentation are posted on www.kc0ahn.org.

Way Forward:

A vote will be held to accept the new Constitution and ByLaws at the May regular meeting. The rules to change the existing constitution are:

- Voting members are Regular members (Boeing employees currently assigned to the Wichita facility)
and retired members (previous Boeing employees who are eligible for, and receiving benefits from a qualified
pension plan of the Boeing Company) who are current in their dues.

- Proxy votes by email or US mail are allowed by voting members. Proxy votes must be received
prior to the May regular meeting. Send proxy votes to Harvey Jones, 9467 Wyncroft St., Wichita, KS 67205 or president@....

- A 2/3 majority vote in favor required to accept the new Constitution and ByLaws.

- If the new Constitution and ByLaws are accepted, they will be installed at the Aug 2012 Regular Metting.

Please direct any questions or comments to the undersigned.

# 1369. No BEARS Net Tonight. BEARS repeater not responding

Yahoo group: BEARSAmateurRadioClub
Date: 2012-04-17 22:12:40 UTC
From: jones_hg
Topic: 1369  Message: 1369

To all:

The BEARS repeater is not responding. The repeater is located on top of Spirit and may just be out of power, with parts of the rest of Spirit. When we learn that Spirit is back on with power we will try the repeater again. Worst case we may need to work with our Spirit members and friends to put a new antenna up.

No nets until our repeater is functional again.

Thanks

Harvey Jones

# 1371. Repeater Status and New Constitution Vote This Thursday

Yahoo group: BEARSAmateurRadioClub
Date: 2012-04-21 13:40:08 UTC
From: jones_hg
Topic: 1371  Message: 1371

☐Subject: Repeater Status and New Constitution Vote This Thursday

21 April 2012

To BEARS;

((((( Repeater News )))))

The 24th April BEARS Net is canceled.

Current known state of BEARS Repeater. The Spirit building the BEARS repeater is in was hit by the tornado. The BEARS Repeater antenna appears to be be down or missing. We did receive reports the repeater itself is still powered. We may have to wait a few weeks before we can truly assess the BEARS Repeater status and plan a way forward.

We will discuss options for continuing the net at our next BEARS meeting this Thursday. We do have an offer from WARC to use one of their repeaters until ours is returned to service.

((((( New Constitution Vote News )))))

The Boeing Employees Amateur Radio Society met on 5 April, with part of the discussion being the presentation of the proposed new Constitution and ByLaws.  The contents of the presentation are posted on www.kc0ahn.org.

A vote will be held to accept the new Constitution and ByLaws at the May regular meeting, 3 May at 5:00 PM.

The rules to change the existing constitution are:

-  Voting members are Regular members (Boeing employees currently assigned to the Wichita facility) and retired members (previous Boeing employees who are eligible for, and receiving benefits from a qualified pension plan of the Boeing Company) who are current in their dues.

- Proxy votes by email or US mail are allowed by voting members.  Proxy votes must be received prior to the May regular meeting.  Send proxy votes to Harvey Jones, 9467 Wyncroft St., Wichita, KS  67205 or president@....

- A 2/3 majority vote in favor required to accept the new Constitution and ByLaws.

- If the new Constitution and ByLaws are accepted, they will be installed at the Aug 2012 Regular Meeting.

# 1372. BEARS Net To Resume Tonight On New Frequency

Yahoo group: BEARSAmateurRadioClub
Date: 2012-04-24 11:51:14 UTC
From: jones_hg
Topic: 1372  Message: 1372

☐24 April 2012

Subject: BEARS Net To Resume Tonight On New Frequency

To BEARS and Friends;

The BEARS repeater sustained substantial damage in the April Tornado. We will need to work with Spirit to replace our antenna and get our repeater back on the air. In the mean time Wichita Amateur Radio Club (WARC) has graciously offered us use of their 146.79 repeater for our weekly net on Tuesday at 8:00 PM.

Starting 24 April 2012 at 8:00PM, the BEARS net will resume on the 146.79 repeater.

If you know a WARC member, thank them for the use of their repeater.

See you on the NET!.

Harvey Jones

From: n5gui@cox.net
Topic: 1376  Message: 1377

Harvey

Two things.

First, I will be meeting with Troop 895 on Monday. It is mostly to talk with the Scouts about the antenna building educational activity for the Field Day bonus, but I will be able to discuss more about the GOTA station as well. Unless there is a reason not to I was going to invite them to come to the BEARS meeting in the hopes that they will designate a GOTA station captain. Let me know if you have some specifics that you would like for me to bring up.

The second item is one that I would like to include as future or perhaps "other" planning. At the last White Buffalo District Roundtable, I spoke with Kelly Dixson about amateur radio at Encampment 2013. The Scout Council has reserved a building for amateur radio so that we will have a room bigger than the classroom we typically meet in. The building has a rollup vehicle door that faces onto an open area for our antennas. I would like to invite participation and planning ideas for the event which will be April 22, 23, 24. It will be primarily to have the activity for the Scouts on Saturday, but we will be able to setup Friday and can finish teardown on Sunday. If someone wants to operate from the site Friday and Saturday night, I am sure that will be possible, but there may not be much visitation by the Scouts.

# 1392. Equipment list for sale prior to the 16 June 2012 sidewalk sale

Yahoo group: BEARSAmateurRadioClub
Date: 2012-06-11 18:11:03 UTC
From: Terry
Topic: 1392  Message: 1392
Attachments: 1 described; binary payloads are missing from this source WARC

Attached is the Board approved surplus equipment list to be sold at or before the sidewalk sale on 16 June 2012.
This equipment is available to be sold to paid BEARS members prior to the sidewalk sale.
If you want anything on the list at the listed price, let me know ASAP.
First come, first served.

You may get a better price at the sidewalk sale if the item is still available.

Terry Gattis
K9TAG
Equipment Trustee

Terry, I am 82 years old and I haven't used my radio's in over
five years. I told my son living in Georgia to drive down here
when I pass away and take all this equipment back to Georgia.
he is a ham there in his residence. By the way I was one of the
first officers meeting in the open lot where the Tennis court
are there now, owned by Spirit now, there is a lot of history
in the places we held meetings over the years.

# 1399. Greater Wichita Field Day 2012

Yahoo group: BEARSAmateurRadioClub
Date: 2012-06-19 20:50:14 UTC
From: Wing, Randy
Topic: 1399  Message: 1399

SKYWARN Members:

Many of you have local amateur radio clubs that are participating in Field Day this year - if so, it might be nice for one of you from each Field Day event post the location and times for Field Day. For those of you who are NOT amateur radio operators but would like a great chance to see what it is all about... why not plan to drop into a local Field Day event this year?

For those of you interested, The Greater Wichita Field Day will be held at the SBEA Lake at 4226 S. Gold in Wichita, KS. There will be SKYWARN pictures taken at 11:00 AM on Saturday morning, June 23rd.

https://www.google.com/maps?q=4226+S.+Gold&hl=en&sll=37.555093,-7.081083&sspn=0.013609,0.019848&t=h&hnear=4226+S+Gold+St,+Wichita,+Kansas+67217&z=17

If you want to help setup we will be setting up from Friday, June 22, 2012 at 1:00 PM through Saturday, June 23, 2012 at 1:00 PM. Field Day starts at 1:00 PM on Saturday, June 23, 2012. Bring a friend, bring your family, bring your kids! There is a nice playground adjacent to our setup. Just tell them you are with the amateur radio group at the gate.

Randy Wing , N0LD

From: Terry
Topic: 1401  Message: 1401

Field Day is Coming!!
*Field Day is Coming!!*

And, we need to get the club FD stuff to the SBEA lake.

*The Plan-*
Meet at the storage shed (#204 Public Storage- (just north of Harry on Rock Road- West side of the road))
at 11 AM Friday 22June to load the stuff on James trailer.

*If you can help, please call or email me ASAP.*
*or just show up* at the storage shed if you want or at the lake to help unload.
If you know of anyone that wants to help and might not get this email, tell them about it.

*Setup begins* at 1 PM Friday at the lake.
Probably no rain but you can bet it will be very warm.

# 1411. Greater Wichita Amateur Radio Participants - We Won!!!

Yahoo group: BEARSAmateurRadioClub
Date: 2012-07-26 01:25:00 UTC
From: jones_hg
Topic: 1411  Message: 1411

To: Greater Wichita Amateur Radio Participants

We Won The BEARS Challenge with other Boeing sites!!!!

See note below and separate notice for attachment for the scores.

Harvey Jones
W0HGJ
President BEARS Wichita

---

OM's,

Here are the results of the 2012 Boeing Clubs' Field Day Challenge, based on the Claimed Scores that I have received.

Congratulations to the Wichita Club for their fine effort.

Also , welcome back to the Huntington Beach club (which is merging with the Anaheim club?).  We are all glad to see you QRV again.

I will have the Field Day Challenge 2012 placard engraved with the Wichita results, and get the plaque to Randy Wing.

Thanks to all clubs and all operators for participating.

73,

W0TT

Ahhh. Yes.

It will be good to make the announcement and display the plaque at a club meeting.

As we will not be a Boeing affilliated club any longer, we will also need to make arrangements to return it to them for the future competition.

Congratulations to the Wichita BEARS on a great field day 2012.
I am sorry that I was not able to hold up my week on the net Tuesday. I was unconscious due on meds to help fight off bronchitis. I hope that will pass soon.

I agree with James concerning the plaque. If Randy does bring the plaque to a club meeting I am sure he would be willing to take it to St. Louis upon his return. If not we could mail it back as a last act from the Wichita BEARS.

Again congratulations to all for a great Field Day 2012.

To: Boeing Employees Amateur Radio Society Members

Subject: BEARS Members Encouraged In Supporting WARC In Returning 146.82 To Service

See the attached note from John Lock, below. BEARS members are encoluraaged in supporting WARC in returning 146.82 to service.

73's

Harvey Jones
President BEARS
W0HGJ
---

From: John Lock <kf0m@...>
To:groundedgrid@...
Sent: Monday, July 16, 2012 10:26 PM
Subject: [Grid] WARC CH12 Tower Climb funding request

To the Grounded Grid mailing list:

The Wichita Amateur Radio Club is seeking donations from area Hams to fund the cost for a climb on the KWCH tower to install antennas and restore operation of the 146.82 repeater. We have been granted permission to use an existing feed line that goes to about the 350 foot level on the tower. We plan to install the existing club DB224 antennas for 146 MHz and a DB420 for 440 MHz. This installation should provide a fairly omni directional pattern for the repeater as well as allow linking on 440 MHz to the Kan-Okla Inter-tie System. This will help extend repeater coverage for Sedgwick county Storm spotting on the West side of the county.

What we need to fund is the purchase of Ice shields to protect the antennas and the professional climbers. We have a quote from Randy's Tower Service in Rolla KS of $3350 to provide the ice shields and install the antennas. We have an anonymous Donor who has offered to match dollar for dollar any fund donated from now through July. If 100 area hams would each give $15-20 dollars that would cover the cost of the climb.

Donations may be made at the WARC drop box in the Derby Ks Radio shack, by PayPal on the club website, or by mailing donations to
Wichita Amateur Radio Club, Inc.
PO Box 771227
Wichita, KS 67277-1227

As of July 16 2012 donations totaling approximately $900 have come in which with the matching funds gives us about $1800 which is over half way to the goal but still short. The matching fund donor offer is made with the goal of being able to sign the contract with the climber in August and conduct the climb while we still have good weather.

The club board has determined if the funding goal is not reached and the climb is canceled all donated funds designated for the climb will be returned to the donors.

Another way to look at it is the climb costs about $10 a foot so every ten dollar donation buys on foot of the climb and right now with the matching gift every ten dollar donation actually gets 2 feet. We are at 180 feet right now please consider helping the climb make it to the 350 ft mark.

Any funding received in excess of the amount needed for the climb will be used to help pay the $200 annual lease payment to Ch12 for the site.

WARC 2012 Board.

# 1415. Organizing BEARS Support For KS QSO Party

Subject: Organizing BEARS Support For KS QSO Party

The BEARS will be supporting the KS QSO party as a Bonus Station. We will be using call N0A for KS QSO party and need to have someone representing the club on the air most of the event because we will have many others looking for us to spell out KANSAS and/or SUNFLOWER.

Check out http://ksqsoparty.org for the rules and suggested frequencies.

Operating hours are 8/25/2012 from 9AM local to 9PM local and 8/26/2012 from 9AM local to 3PM Local.

I would like to take volunteers for bands, modes and times. Please send a signup request to the BEARS Yahoo Group or to me at president@.... I will respond if there are any conflicts and will add your entry in the Coverage_Plan.xls at www.kc0ahn.org on the right side of the page. Remember, you are not authorized to use N0A unless your name exists in Coverage_Plan.xls for the modes and times
identified or unless you receive a note from me that you are authorized.

# 1442. SKYWARN Recognition Day Support

Yahoo group: BEARSAmateurRadioClub
Date: 2012-11-14 02:28:11 UTC
From: jones_hg
Topic: 1442  Message: 1442

Looking for help from those interested in SKYWARN, The National Weather Service (NWS) and/or Ham Radio. Meet us at the NWS on 1 Dec after 9:00 AM and before 2:00 PM (preliminary times) to learn more about SKYWARN support of the NWS.

If you would like to setup, please contact me at harvey.jones@yahoo.com. We will be setting up after work on the 30th.

Take care

Harvey Jones
President BEARS
W0HGJ

# 1443. Services announcement: Sad to announce the silent key W0OQC - Bill Briles

Yahoo group: BEARSAmateurRadioClub
Date: 2012-11-15 14:53:46 UTC
From: jones_hg
Topic: 1441  Message: 1443

To all:

William "Bill" Briles
(June 15, 1932 - November 12, 2012)

DERBY ☐ Briles, William "Bill", 80, passed away suddenly Monday, November 12, 2012. Visitation 1-8pm Friday, November 16, with family present 4-6pm; funeral service 10am Saturday, November 17, both at Smith Mortuary, 1415 N. Rock Road, Derby. Interment to follow at Hillcrest Cemetery, Derby, KS. He was preceded in death by his parents, Ezekiel and Gertrude (Smith) Briles, and his brother Donald. A beloved husband, father, grandfather and brother, Bill was born June 15, 1932 in Buffalo, Kansas. He graduated from Kansas State University in 1959 with degrees in Electrical Engineering and Business Administration. Bill served his country honorably in the US ARMY during the Korean War. Bill retired from Boeing Military Aircraft a Technical Fellow Electromagnetic Compatibility (EMC) Engineer contributing to various Military and Defense programs over his 20+year career. A love of electronics and radio introduced Bill to amateur "Ham" radio at the age of 16, and the hobby became a lifelong passion. He was always ready to help, teach and learn, and both friends and family fondly listened for his call sign ☐ W0OQC. He is survived by his wife of 58 years, Virginia Lee (Van Cleave) Briles; sister, Louis Briles of Tucson Arizona; son, Mark and wife Gina; grandsons, Jake and Justin of Derby, KS; son, Scott and wife Carolyn; grandsons Conrad and Chase of Leesburg, Virginia. In lieu of flowers memorial donations may be made to the American Heart Association, 3816 Paysphere Circle Chicago, IL 60674.

Subject: Cast Your Vote On BEARS Ham Of The Year

To all:

At our Christmas Party Dec 6th, we will be handing presenting the BEARS Ham Of The Year award. This award is for any Amateur Radio operator and is selected by the BEARS members.

I am looking for your input for BEARS Ham Of The Year. Please send me an email, directly, with the candidate information:

1. Name
2. Call Sign
3. Why they should be Ham Of The Year.

I will need all inputs by 4 Dec.

Thank you

Harvey Jones
President BEARS.

Terry Gattis, K9TAG

Terry should be ham of the year because of his handling of the BEARS trusteeship, his help with Field Day, and his hard work to keep the club together over the year.

---

Harvey, I think YOU also qualify for Ham Of The Year, but it is a hard thing to give yourself the award...

John,

You probably haven't noticed, but I am no longer an officer in the BEARS since my rather forced move to St Louis.

I suggest you take this issue up with the officers.

# 1450. Re: [BoeingRadioClub] Cast Your Vote On BEARS Ham Of The Year

Yahoo group: BEARSAmateurRadioClub
Date: 2012-11-26 06:06:47 UTC
From: Terry
Topic: 1445  Message: 1450

BEARS Ham of the year:

It is hard to suggest just one person. I am tempted to nominate everyone
that has made a personal contribution to the club.
In a club environment such as ours, it is difficult to get anyone to
take leadership and/or responsibility for any particular thing (even a
place for the Christmas meeting!). Harvey knows. He did it anyway. Just
the way it is. Hams tend to be "independent" anyway and we all have many
demands on our time and energy.

We owe a lot to those that will accept the charge. That certainly
applies to those that have accepted to run for an office to lead the
club through this next year. This will be a time of big change. I thank you.

But, when it come to making a recommendation for this year, I choose the
following:
Harvey Jones
K0HGJ
Harvey filled the big shoes of our previous multi-year "spark-plug"
Randy Wing N0LD (not an easy job).
St Louis should be thanking their lucky stars. They had _better not
_have a better Field Day score than we do next year!

Harvey could have said "hey, I am not here for that long, either" and
just " phoned it in". But, he did not!
I think we owe Harvey big-time for carrying us through this
end-of-an-era time.
Of course, he didn't do it alone ( we did have a good slate of officers,
this year) but he was the organizer and pusher and often, the doer.

Terry Gattis
K9TAG

# 1474. Name change for BEARS yahoo group

Yahoo group: BEARSAmateurRadioClub
Date: 2013-04-04 04:27:17 UTC
From: tag@...
Topic: 1474  Message: 1474

A word of warning.

Since our recent club status change, we need to change the Yahoo Group name.

I am planning to do this about 15 April 2013.
The proposed name is BEARSRadioClub.

Think about it and let me know if there is interest in a different name.

After the change, all your pointers to this group will have to change.

I will notify all group members of the new name when it happens so you can change any e-mail addresses, etc.

Terry

# 1475. BEARS Radio Club meeting tonight

Yahoo group: BEARSAmateurRadioClub
Date: 2013-04-04 14:24:29 UTC
From: gaskilld
Topic: 1475  Message: 1475

Yet another meeting at the old 4501 building across from Boeing on 47th street.
I believe the building is being used by The Cowley County Community College for classes.
The meeting room will be on the 2nd floor. They move us around a lot, so you may need to search for us a little bit.
If you are interested in participating in the "Greater Wichita Area Field Day" this year, come join us tonight and sign up.
Field Day is always the fourth full weekend of June, beginning at 1800 UTC Saturday and running through 2059 UTC Sunday. Field Day 2013 will be held June 22-23, 2013.
If any of you know of VFW and WARC members or anyone else who would be interested , please bring them.

Dennis KC0IFQ

"Old BEARS Radio Club" would be more appropriate.

Besides the double entendre seems appropriate either way.

A little respect to our beginnings, and our charter and not so charter members.

I also think such a proposal should go to vote of the membership.

# 1480. [BEARSAmateurRadioClub] BoeingRadioClub group name/addresses have changed

Yahoo group: BEARSAmateurRadioClub
Date: 2013-04-30 04:13:52 UTC
From: notify@yahoogroups.com
Topic: 1480  Message: 1480

Hello,

The moderator of the BoeingRadioClub group has changed the group's name.
This means that both the group's email address and the group home page
location have changed.

The group email address:
BEARSAmateurRadioClub@yahoogroups.com

The group home page location:
http://groups.yahoo.com/group/BEARSAmateurRadioClub

If you have links which point to this group or an address book entry
for the group, you should update them, as the old addresses will no
longer work.

Regards,

Yahoo! Groups Customer Care

# 1481. Change of BEARS yahoo group name

Yahoo group: BEARSAmateurRadioClub
Date: 2013-04-30 04:40:24 UTC
From: tag@...
Topic: 1481  Message: 1481

Changes are usually painful but this one was necessary.

Not a large change in name but the web site URL and email address change and so you will need to change your pointers to the site.

http://groups.yahoo.com/group/BEARSAmateurRadioClub

This will keep us out of any legal problems and we should be able to keep this name for a long time.

Sorry for the trouble.

John,
I am sorry that the change upset you (and probably, others too).

One of the problems that the Board has had to deal with is the fact that we are no longer part of Boeing and are not eligible to use the Boeing name.
This is an effort to avoid getting a "cease and desist" letter from the lawyers.

If you know of a legal way to get around this, I am sure the Board would be open to hearing it.

Thanks for your interest in continuing with the BEARS. Looking forward to seeing you at a meeting.

# 1487. RE: [BEARSAmateurRadioClub] Change?

Yahoo group: BEARSAmateurRadioClub
Date: 2013-05-01 13:25:43 UTC
From: Steffens, Kerry W
Topic: 1485  Message: 1487

It should be noted that the Board did not just change the name. We talked about this in our monthly meeting for several months. The name change was put before the membership and all suggestions were talked about by the membership. We voted on the name change as Terry said to avoid any legal issues and the ability to keep our meetings where there are. We are no longer just a Boeing club and in reality have not been since Spirit came into being and were divided between the two companies. Even though we were divided between two companies, we were still one club. We went through some difficult times in order to stay funded. The Boeing presents is now gone and we need to continue to grow as a club together. For the first time, all members are voting members and any member can be an officer. John, not only are you one of the first members of BEARS0, but you are one of the first and oldest members of the BEARS Amateur Radio Club too as are we all. With your help and those currently active in the club we will continue to have a great club.

# 1488. surface wind map- moving

Yahoo group: BEARSAmateurRadioClub
Date: 2013-05-01 17:04:21 UTC
From: Terry
Topic: 1488  Message: 1488

If you weather watchers and storm chasers haven't seen this, you will want to look at it.
There may be others out there but this is the only one I know of showing a moving history of surface winds.
Shows what appears to be fronts, highs, lows, etc. even where radars are not showing anything yet.
You can see the cold wind whipping down from Canada today. It is about to hit us (noon 1May13).

http://hint.fm/wind/

"Surface wind data comes from the National Digital Forecast Database <http://ndfd.weather.gov/technical.htm>. These are near-term forecasts, revised once per hour. So what you're seeing is a living portrait. (See the NDFD site for precise details; our timestamp shows time of download.) And for those of you chasing top wind speed, note that maximum speed may occur over lakes or just offshore."

Works in Firefox and Chrome.
Does not seem to work in Internet Explorer. "Unzoom" button does show up but the wind map does not!!

# 1491. BEARS meeting tonight ; Thursday May 2nd

Yahoo group: BEARSAmateurRadioClub
Date: 2013-05-02 16:48:42 UTC
From: gaskilld
Topic: 1491  Message: 1491

Yet another meeting at the old 4501 building across from Boeing on 47th street.

Cowley County Community College
4501 E 47th St South
Wichita 67210
You will find us on the second floor in or near room E203

We will discuss the "Greater Wichita Area Field Day" some more.
We will have a short talk about the K9AY loop antenna.
Come and join us tonight.

Field Day is always the fourth full weekend of June,
beginning at 1800 UTC
Saturday and running through 2059 UTC Sunday. Field Day 2013 will be held June
22-23, 2013.

If any of you know anyone else who would be
interested , please bring them.

A comment about our club name:
I consider "BEARS" to no longer be an acronym! It just stands for BEARS ...

# 1495. Field Day Call

Yahoo group: BEARSAmateurRadioClub
Date: 2013-06-08 16:54:39 UTC
From: darthcruzr
Topic: 1495  Message: 1495

Still wondering why we decided to use the club call, KC0AHN, for field day. Went up to the 1 X 1 site and the only calls (for zero land) taken are N0W, N0I, and K0I. Yes, I know we lost our previous N0W call, but there are plenty to be had. It takes only a few minutes to get one and except for the letter "X" we have 'pick of the liter'. If we're not dead-set on using the club call, a 1 X 1 is a lot less cumberson in a contest environment.

Henry - W0IE

I agree. That is the reason that we started using the 1x1. If we can I ask whom ever to get a 1x1. There is still time before field day.

Subject: [BEARSAmateurRadioClub] Field Day Call

Still wondering why we decided to use the club call, KC0AHN, for field day. Went up to the 1 X 1 site and the only calls (for zero land) taken are N0W, N0I, and K0I. Yes, I know we lost our previous N0W call, but there are plenty to be had. It takes only a few minutes to get one and except for the letter "X" we have 'pick of the liter'. If we're not dead-set on using the club call, a 1 X 1 is a lot less cumberson in a contest environment.

I can still apply for a special event for the GOTA station. Last year's K0W
was still available when I last looked, or we can try for something else,
if that's the desire of the group.

I agree, even a x0xx is quicker and easier on the other stations to get correct,  I also like K0S. for kansas 0 Station.

Alan,

I got a call from Terry and he's checking with the board members. I've done it, some years past, for R66 OTR, but have not since 2006. I wnet up to see what was available and was surprised at how few nationwide were being used. Anyway Terry is running the traps on this one so you or I might suddenly be asked to get a 1 X 1. The GOTA came up in last night's meeting but I didn't get the jest of the conversation.

Alan,
Terry talked to the board and they requested N0B. Terry confirmed that there will be a GOTA and that you should get K0W again for the GOTA station. While you're up on the 1 X 1 site can you do both or do you want me to do N0B? Let me know.

Thanks Alan,

That'll teach me to search by "ARRL Field Day". I searched by date 6/21 - 6/24 and found 10, counting the momentarily not listed K0W, assigned leaving 65 to choose from. I'd better get this done ASAP. At the moment I favor W0N, the reverse of our call last year. I'll call Terry in the morning and get either approval for N0W or some other call the board prefers.

Thanks for trying,

Henry

# 1507. VE Exams and MAKERS FAIRE in KC

Yahoo group: BEARSAmateurRadioClub
Date: 2013-06-09 14:34:29 UTC
From: W8LM
Topic: 1507  Message: 1507

I was in KC yesterday and saw 3 billboards advertizing the MAKERS FAIRE there June 29-30..

W0VFW is having VE testing 8am on June 29th..
W0VFW always tests the 5th saturday of the month...about 4 times per year.
W0VFW Amateur Radio Club
VFW post 3115
4801 Anna
Wichita, KS..

ARRL VE testing $15 plus a picture ID required.. free coffee, bring cookies to share.

as posted on W0VFW yahoo group...

There is a makers faire in Kansas City the end of the month..

Makers faire's claim to be the Worlds largest show and tell...

http://www.makerfairekc.com/

VE testing June 29. I will go up for the June 30th...

If anyone wants to go.. Let me know..

W8LM Larry

316-308-0833

PS.. I am talking to the Derby Public Library regarding the use of their community room to start a local Makers group..
for Arduino and Raspberry PI etc..

PPS-I just got the Packet TNC board for my Raspberry PI..

Thanks, Henry

Too bad the other ones we wanted were taken already.
We will have to start sooner next year.
I like the sound of WON, anyway. I would like us to make enough points
to make that a true statement.

In any event, things seem to be shaping up to make this a good year for
fun and emergency prep.

Now, can you just produce a nice cool, dry weekend too?

Several of the 1X1 calls are used during the Kansas QSO Party...
Any of the 1X1 that has a last letter that would be one of the letters in KANSAS SUNFLOWER are always used then..
For instance, KØO has been used by me during the past couple of QSO Parties... KØW would be another one that would
be used during this time period....

Your talking about an August event (KS QSO) we're using them during Field Day in two weeks. What is the problem?? If you check the 1X1 database, the KS QSO calls have probably already been scheduled for 2013, I saw several listings for KS QSO Party. All 1X1 calls are issued for a maximum of 15 days, and all 1X1 calls are assigned on a first come-first served basis. They are never issued permnently to anyone.

Yes, I know we lost our previous N0W call, but there are plenty to be had. It takes only a few minutes to get one and except for the letter "X" we have 'pick of the liter'. If we're not dead-set on using the club call, a 1 X 1 is a lot less cumberson in a contest environment.

There is no problem..
Just making a statement on how easy they are to acquire..
I probably should have been more specific in my last post....
Sorry!!!!!

Your talking about an August event (KS QSO) we're using them during Field Day in two weeks. What is the problem?? If you check the 1X1 database, the KS QSO calls have probably already been scheduled for 2013, I saw several listings for KS QSO Party. All 1X1 calls are issued for a maximum of 15 days, and all 1X1 calls are assigned on a first come-first served basis. They are never issued permnently to anyone.

# 1524. BEARS meeting tonight 5:00 pm

Yahoo group: BEARSAmateurRadioClub
Date: 2013-08-01 15:13:24 UTC
From: gaskilld
Topic: 1524  Message: 1524

Yet another meeting at the old 4501 building across from Boeing on 47th street.

Cowley County Community College
4501 E 47th St South
Wichita 67210
You will find us on the second floor in or near room E203

Dave will review Field Day.

Marsha will talk about our finances.

If we have time and the cable I bought will connect my little Dell Mini up to the projector.
I will have a short talk about Ten-Tech's new little radio.
The Rebel-506 radio that has a 32 bit Arduineo UNO clone,
That you can program your self.

Dennis KC0IFQ

# 1525. SDR transceiver 30 to 6000 Mhz. $300 suggested retail.

Yahoo group: BEARSAmateurRadioClub

To all BEARS:

I will be on HF tonight about 9 PM... (after the 8 PM Wichita, KS local net on 146.895-) I invite any of you that are capable to join me!

Let’s set the time for this Tuesday, September 10, 2013 at 9 pm on or about 7.218 LSB voice. I will be working about 500 watts, so someone should hear me.

If it does work, and after we are tired of voice, we’ll coordinate the QSY to PSK31 via voice. If voice doesn’t work, we will meet up at 9:15 PM on 7.037 PSK31 or so... If that doesn’t work, 9:30 pm on 3.572 PSK31 or so...

For PSK that means set the radio at 7.035 USB and 3.570 USB and then look 2 khz up or so… If you don't currently have PSK31 capability, you could still MONITOR us on PSK31. All you need is to download a PSK31 program and setup a MICROPHONE on your computer to listen to the radio speaker... It should decode us just fine!

I will also be on winger55552001@yahoo.com IM and email if there is trouble.

Randy, N0LD

I guess I get the "LID" award for this week.  Just because your computer control software was told to change the mode of your radio does NOT mean it did.  An 857 may be tuned to a digimode frequency but It wants to try to transmit on the mode the radio is set to and recieves that way also.  I guess I could see the contestia signals because they are "wide".  Went ahead and worked a canadian special event station on 40 after I restarted the software and Radio all F.B.  Sorry we wasted so much time It was definitely my error.  Well can give it a shot next week I just have to make sure I am not on fm or LSB or AM. when trying to work psk31. Sorry agn. 73.

Well, I didn't do as well as that, even.
I didn't hear any body that I knew on SSB and hear a lot on PSK31 but
not any calls I recognized.
I will try again next week.

# 1531. Re: [BEARSAmateurRadioClub] RE: RE: BEARS September Meeting

Yahoo group: BEARSAmateurRadioClub
Date: 2013-09-11 17:14:37 UTC
From: Randy Wing
Topic: 1526  Message: 1531

We will try it again next week - same bat time same bat channel... :)  The voice contact was very solid.  Even at 43 watts from Robert, I could hear him 57 or so - and it was a noisy background night - lots of storms in the Rockies.  When he boosted his output to 70 watts, he was solid copy.  A 100 watt station in California came in strong enough for Robert to make a contact with Robert at 70 watts...

So, we ask everyone to join us next Tuesday!  Harvey and Steve get those antennas put up!

Randy, N0LD

Randy's Round Table net last night was quite successful.
I was copying Randy at 20db over and he had me at S9.
He was running 400watts and I had the old 706 cranked to 100 watts into a Butternut vertical.
I am not sure what he had for an antenna.
Jim Einix, Terry Gatis, Robert Johnstone all joined in. Hope I didn't forget anyone.
We also had QSO's with a guy running 20 watts, camping on a mountain in Colorado.and Dave K7DRT
was also on Mount Bigalow in Arizona. He was running 100 watts into a Windom at 8000 ft.

This all happened at 10:00pm on 7.218 Mega snertz.
Randy will do it again next Tuesday night !

Watch here and also check in to the BEARS net at 8:00 pm Tuesday night for updates.
WARK is loaning us time on their repeater, W0SOE.
It can be found at:
146.790 with a TSQL (Tone Squelch) set to 103.5 cycles.

When buying or selling something. There is a confidence you can have buying or selling to another ham. I have even bought an RV from ham and he threw in the HF radio.

So it's important to me to get the word out, because I've got something special for sale to share. A ham home would be welcomed. I have 8 AKC Boxer puppies. Been breeding them for over 35 years off and on.

# 1534. W0VFW NEWS and November Meeting report- All that's fit to print.

Yahoo group: BEARSAmateurRadioClub
Date: 2013-11-25 16:15:31 UTC
From: <am_fm_radio@...>
Topic: 1534  Message: 1534

Perhaps you missed yesterdays Luncheon meeting of the W0VFW radio club because of church.

Nominations for next years officers we held. All offices are currently nominated unopposed. Elections will be December meeting.

New Business- Membership voted to change the meeting dates to the 5th SUNDAY of the month. That happens 4 times per year. Next Meeting will be DECEMBER 29th at 1PM at the VFW. Meetings are always followed by a luncheon donations accepted. The move to eyeball meetings 4 times a year will not preclude membership participation via nets and yahoo groups where mundane club business and announcements can be carried out as needed. Belief is eyeball meetings 4 times a year will encourage larger attendance.

OLD BUSINESS- Since June we've been selling raffle tickets. Tickets are still available for the NEW CAR or TRUCK W0VFW is raffling off..The tickets sell for $10 each... All proceeds go to the W0VFW treasury. THIS IS NOT A JOKE. A NEW CAR-TRUCK The drawing is 11-DEC-2013... Very shortly.
The winner receives his/her choice (up to $25,000) towards a new or used car or truck, Can be more than 1 car even, at Rusty Eck family of dealerships .. Including MIDWEST KIA or MIDWEST TOYOTA in Huchinson. Should you not win..(what are the chances) the ticket stub is worth $250 off a new or used car purchase and/or Receive 10% off on parts or service visit. Any W0VFW member will sell you a ticket. or call Larry W8LM 316-308-0833.

UPCOMING EVENTS--- There is still time!!! This Saturday NOVEMBER 30th is VE EXAM TESTING at W0VFW. Starts at 8am. Thanksgiving and Black Friday will be good days to bone up for the exam!! Walk-ins Welcome! ARRL accredited examiners Welcome. Take the test, Upgrade or take the open book test for VE examiner. Bring $15 cash or check, A photo ID and current FCC License in you have one. VE open book test is FREE. Coffee available, donation to the VFW for hosting the test session.

W0VFW membership is $20 per year $5 per quarter. It includes a key to the shack, with HF gear and VHF-UHF repeater support.
W0VFW gives each new licensee/ upgrade at it's test session, 3 months free membership. You do not have to be a VFW member to belong, but we appreciate it if you can join.

As I write this Dennis Godsby KF0TG, VFW post 3115 Trustee and President of the Amateur Radio Club W0VFW, is going into surgery -quad bypass proceedure at St. Frances Hospital.

Many of you know him. This is at least a 4 hour procedure.

By the time of the BEARS meeting Later today. I will have an update. I hope to attend pending work related obligations. This is my 1st day back to work from Vacation and a 4000 mile trek through 14 states. Main lobster dinner was 2 lobsters for $9.99 in Kittery, ME.

Please do not mix up meetings of other ham groups on here.

The BEARS WILL meet tomorrow Thursday (6Feb2014) as scheduled and at our regular place-
2401 47th St. , upstairs at 5:30 PM

Everyone is welcome to come!
Be careful out there. It is still cold and slick.

We do not meet at Braum's. That is a separate group.
Thanks for your attention.

Everyone is welcome to come!
Be careful out there. It is still cold and slick.

We do not meet at Braum's. That is a separate group.

Thanks for your attention.

# 1546. EYEBALLS & HAM BBQ AFTERNOON

Yahoo group: BEARSAmateurRadioClub
Date: 2014-02-18 18:46:41 UTC
From: <am_fm_radio@...>
Topic: 1546  Message: 1546

W0VFW is having an open to all get together... flyer attached to this message.
30-MARCH Sunday.. Luncheon- Speaker will be Suzanne Fortin - Meteorologist in Charge, NWS ICT.
we will be serving a BBQ luncheon.. have a few demo's show off the shack, raise a little money 50/50 raffle.
If you'd like to show off any projects just let me know and bring them..
We are talking to Radio Shack and others- (you) to sponsor things like
CODER DOJO - it's groups of kids doing little makers projects... on simple computer projects.
Something for the future but the entry into ha radio is there. These kids love high altitude ballons with camera payloads and tracking..

There is a ROCKET group meeting at the VFW in Derby... I'll post when I know more..

From: <am_fm_radio@...>
Topic: 1548  Message: 1548

Since Wichita Area Hams have no news letter, I am posting a link to one of my old favorites.
2 note worthy items make it worth reading..
The Rochester NY Hamfest I first attended I would say 1970 or 71... Over the years I drove there from VA,WV and NH. Everybody came for 3-4-500 miles even Toronto Canada. I think it peaked at about 6-8000 attendees.
It was THE FIRST Hamfest the FCC examiners (from Buffalo Field Office) set up a testing session so you didn't have to travel during the week to an FCC office. That was the start of changes in FCC testing.
Well, looks as if they are going to fore go it this year.. Read about it..

SECONDLY---- In an article they compare Harbour Freight $5 Digital meter to a lab meter and a FLUKE 77..Is it worth a trip to Harbour Freight, Harry and Seneca...
read about it here...

It is in a cabinet on the mezanine of the mpf building. there is antenna on th roof and it is connected. there is a problem with a wireing harness between the repeater and controller. the antenna is on the north end of the mpf building, about 98 feet in the air. Thanks to my supervisor and lead for getting linder electric to install the antenna.
as soon as I get back to work, I will find the wiering problem. the repeater is woking, just no audio. I turned it off monday and was planning to check it out more this week, but the hospital got in the way.

-one advantage to the mpf building is that its an open building, no secret projects at all. and access to the repeater and antenna is very easy. there is a stair tower on the north end of the building that takes you to just east of the repeater, and a stair tower on the northwest corner that goes to the roof. a company badge is still required since it is inside the fence, but no other special access is necessary.----------

I am one of the BEARSØ that started the group in the empty park
on Oliver and 31st before they built the Reguration Club and the
Tennis lots, I're first field get together was in that park. I am now
holding a meeting in Braum's with retired members of Amateur
Radio Club groups on Thursday evening every week. I have seen
the Repeaters go down over the years. We still follow the old
members thru the group all over the county's from here to there
I will be glad to hear the Bears Repeater back on the air with
the others. John in Derby 83 yrs old.

Boeing brought us a long way thru our repeater.
Old Telephone books with old members gone from
years back. of members dropped out of the area.
Some still here and others gone. JMD

Great job and thanks for your perseverance. No apology needed. If it had been up to me I would still be looking for the repeater and then try to find someone to get it working.

There is VE testing this weekend at the VFW post 3115 at 8am.

Walk-in's are welcome.

It is Saturday at 8am...

Attention Volunteers--- Be sure to attend.

FYI - W8LM had surgery Monday but will be attending. Walking like an old man but not needing a walker yet.

Even if your are not a VE or testing, come on down and see how things are run.

If you want to test... it's $15 fee to the ARRL - cash or check and a picture ID.
If you currently have a license, bring that too or a copy.
2 #2 pencils and 2 ink pens. Calculator cannot be in your cell phone. or have any type of memory.

See you there..

Larry W8LM

# 1565. FCC to reinstate Morse Code test.

Yahoo group: BEARSAmateurRadioClub
Date: 2015-04-02 00:04:46 UTC
From: am_fm_radio@...
Topic: 1565  Message: 1565

*Washington, D.C. – April 1, 2015 – Today, the Federal Communications Commission (Commission or FCC) approved Report and Order 14- 987 which reinstates the Morse Code test for General Class and Amateur Extra Class licensees.

“It was a big mistake eliminating the Morse Code test,” admits Dotty Dasher, the FCC’s director of examinations. “We now realize that being able to send and receive Morse Code is an essential skill for radio amateurs. As they say, it really does get through when other modes can’t.”*

*Not only will new applicants have to take the test, but General Class licensees who have never passed a code test will have one year to pass a
5-wpm code test. Similarly, Amateur Extra class licensees that never passed a code test will have one year to pass a 13-wpm test. Those
amateurs that fail to pass the test will face revocation of their operating privileges. Materials for administering the examinations will be distributed to Volunteer Examiner Coordinators by the end of April, so that they can begin the testing on May 1, 2015.*

*“This isn’t going to be one of those silly multiple-choice type tests,” noted Dasher. “We’re going to be sending five-character random code groups, just like we did in the old days. And, applicants will have to prove that they can send, too, using a poorly adjusted straight key.”*

*Technician Class licensees will not be required to take a Morse Code test, nor will a test be required for new applicants. “We discussed it,” said Dasher, “but decided that since most Techs can’t even figure out how to program their HTs, requiring them to learn Morse Code seemed like
cruel and unusual punishment.”

*When asked what other actions we might see from the FCC, Dasher hinted that in the future applicants taking the written exam may be required to draw circuit diagrams, such as Colpitts oscillators and diode ring mixers, once again. “We’re beginning to think that if an applicant passes an amateur radio license exam it should mean that he or she actually knows something,” she said.*

*For further information, contact James X. Shorts, Assistant Liaison to the Deputy Chief of Public Relations for the FCC .*

lots of fun with those old transmitters, knobs to turn, meters to watch carefully, color of tube glow, more of an art then than now. now its just set for tune, push the button, and transmit when the tune light goes out. even more fun to get a six or two meter am on the air, had to tune all those multiplyers, then the driver and output stage. hopefully on the right harmonic usually with not enough test equipment to really be sure.

Yes it was.  As a novice, I got
my first FCC violation in the winter of 65.  I used the
wrong crystal in my Knight transmitter.  I fed a 100 ft

*Washington, D.C. – April 1, 2015 – Today,

the Federal Communications Commission (Commission or FCC)

approved Report and Order 14- 987 which reinstates the

Morse

Code test for General Class and Amateur Extra Class

licensees.

“It was a big mistake eliminating the Morse

Code test,” admits Dotty Dasher, the FCC’s director

of

examinations. “We now realize that being able to send

and

receive Morse Code is an essential skill for radio

amateurs.  As they say, it really does get through when

other modes can’t.”*

*Not only will new applicants have to take the

test, but General Class licensees who have never passed a

code test will have one year to pass a

5-wpm

code test. Similarly, Amateur Extra class licensees that

never passed a code test will have one year to pass a

13-wpm

test. Those

amateurs that fail to pass the

test will face revocation of their operating

privileges.

Materials for administering the examinations will be

distributed to Volunteer Examiner Coordinators by the end
of
April, so that they can begin the testing on May 1,
2015.*
*“This isn’t
going to be one of those silly multiple-choice type
tests,” noted Dasher. “We’re going to be sending
five-character random code groups, just like we did in
the
old days. And, applicants will have to prove that they
can
send, too, using a poorly adjusted straight key.”*
*Technician Class licensees
will not be required to take a Morse Code test, nor will
a
test be required for new applicants. “We discussed
it,” said Dasher, “but decided that since most Techs
can’t even figure out how to program their HTs,
requiring
them to learn Morse Code seemed like
cruel
and unusual punishment.”
*When asked what other actions we might see
from the FCC, Dasher hinted that in the future
applicants
taking the written exam may be required to draw circuit
diagrams, such as Colpitts oscillators and diode ring
mixers, once again. “We’re beginning to think that if
an

applicant passes an amateur radio license exam it should mean that he or she actually knows something," she said.*

# 1572. RE: [BEARSAmateurRadioClub] FCC to reinstate Morse Code test.

Yahoo group: BEARSAmateurRadioClub
Date: 2015-04-02 13:59:10 UTC
From: Steffens, Kerry W
Topic: 1565  Message: 1572

I had a voltmeter and a tube checker that I put together from a kit. That was it. My first 2 and 6 meter receiver was a superregen that I built from a manual. The transmitter I build on a TV chassis. Wound all my own coils, sometimes more than once. Several years later I got a SWR bridge and grid dip meter which made building a lot better. To know if I was tuned correctly I borrowed a general coverage receiver (SR-71) to listen for birdies. Learned very quickly which side of the oscillator to tune it for stability.

It was fun and that is why I like using vintage equipment today.

lots of fun with those old transmitters, knobs to turn, meters to watch carefully, color of tube glow, more of an art then than now. now its just set for tune, push the button, and transmit when the tune light goes out. even more fun to get a six or two meter am on the air, had to tune all those multiplyers, then the driver and output stage. hopefully on the right harmonic usually with not enough test equipment to really be sure.

Yes it was. As a novice, I got
my first FCC violation in the winter of 65. I used the
wrong crystal in my Knight transmitter. I fed a 100 ft
long line with
a single 14 awg wire 30 feet off one end. I found out
that not only does it load on all bands but it transmits on
all bands when you use a crystal with the wrong harmonics.
Scared to death and wasn’t nearly as funny back then. My
Elmer got me back on the
air again.

# 1574. RE: [BEARSAmateurRadioClub] FCC to reinstate Morse Code test.

Yahoo group: BEARSAmateurRadioClub
Date: 2015-04-02 15:51:20 UTC
From: Steffens, Kerry W
Topic: 1565  Message: 1574

I grew up on a Farm near Girard Ks which is close to Pittsburg Ks. I did not know there was a ham store other that Henry Radio in Butler Mo in the early days. I either built my equipment or modified military surplus for my station. I modified a 522 transmitter for 2 meter AM as it ran 30 watts. Also worked 145.35 and worked 15 states with a home brew 4 element antenna. Did a lot of trading with local hams and got my better equipment that way. Later I bought from Henry Radio, BA and Associated Radio after I moved to Kansas City. My first 6 meter transmitter was a modified CB set. Good days for radio.

Date: Thursday, April 2, 2015, 10:51 AM
the good old scr522, a lot of hams got their starton 2 with those. I started with a twoer and modified it till it was putting out about 9 watts, had a preamp, and a lot of other mods. my first 6 meter transmitter was the old dx35 heathkit, with cut up tank coil doubling the output.didnt make hardly any 6 contacts till my army days in mass. hilltoping ment something there. I had an old viehicle mount tranciever, a bc1206 I think it was, only worked n 80 and 40, am and cw. tried to use it on my first field day, no contacts at all. (not very many crystals) with a dynomoter putting out 450 volts dc or so and batteries. would wake the dead when you started it up.

I grew up on a Farm near Girard Ks
which is close to Pittsburg Ks.  I did not know there was a
ham store other that Henry Radio in Butler Mo in the early
days.
I either built my equipment or modified military surplus
for my station.  I modified a 522 transmitter for 2 meter
AM as it ran 30 watts.  Also worked 145.35 and worked 15
states with a home brew 4 element antenna.  Did a lot of
trading with local hams and
got my better equipment that way.  Later I bought from
Henry Radio, BA  and Associated Radio after I moved to
Kansas City.  My first 6 meter transmitter was a modified
CB set.  Good days for radio.

I starfted with a ht 17 hallicrafters I bought from a guy in reece ks, 6v6 807 with a bulb to indicate plate current. also had a heath dx35 that had been extensively modified by previous owner, boutght at amature radio equipment co on douglas, remember them?
couldnt get on 6 as a novice, but I got on 145.35 am with a heath twoer. my first fairly good reciever was a 8r40 halicraftes, a home entertainment version of an r40, with many modifications.My novice wall was wn0odu, it expired a little while before i took
the tech. Elmers are useful, mine was w0mqb, Otis Wrench who lived about 4 blocks from me, an old time navy operator who worked for ktvh as an engineer.

I had a voltmeter and a tube

checker that I put together from a kit.  That was it. My

first 2 and 6 meter receiver was a superregen that I built

from a manual.

The transmitter I build on a TV chassis.  Wound all my own

coils, sometimes more than once.  Several years later I got

a SWR bridge and grid dip meter which made building a lot

better.  To know if I was tuned correctly I borrowed a

general coverage receiver

(SR-71) to listen for birdies.  Learned very quickly which

side of the oscillator to tune it for stability.

It was fun and that is why I like

using vintage equipment today.

lots of fun with those old transmitters, knobs to turn,

meters to watch carefully, color of tube glow, more of an

art then than now. now its just set for tune, push the

button, and transmit when the tune light goes out. even
more

fun to get a six or two meter

am on the air, had to tune all those multiplyers, then
the

driver and output stage. hopefully on the right harmonic

usually with not enough test equipment to really be sure.

Yes it was.  As a novice, I got

my first FCC violation in the winter of 65.  I used the

wrong crystal in my Knight transmitter.  I fed a 100 ft

long line with

a single 14 awg wire 30 feet off one end.  I found out

that not only does it load on all bands but it transmits

on

all bands when you use a crystal with the wrong

harmonics.

Scared to death and wasn’t nearly as funny back then.

My

Elmer got me back on the

air again.

*Washington, D.C. – April 1, 2015 – Today,

the Federal Communications Commission (Commission or FCC)

approved Report and Order 14- 987 which reinstates the

Morse

Code test for General Class and Amateur Extra Class

licensees.

“It was a big mistake eliminating the Morse

Code test,” admits Dotty Dasher, the FCC’s director

of

examinations. “We now realize that being able to send

and

receive Morse Code is an essential skill for radio

amateurs.  As they say, it really does get through when

other modes can’t.”*

*Not only will new applicants have to take the

test, but General Class licensees who have never passed a

code test will have one year to pass a

5-wpm

code test. Similarly, Amateur Extra class licensees that

never passed a code test will have one year to pass a

13-wpm

test. Those

amateurs that fail to pass the

test will face revocation of their operating

privileges.

Materials for administering the examinations will be distributed to Volunteer Examiner Coordinators by the end of April, so that they can begin the testing on May 1, 2015.*

*“This isn’t going to be one of those silly multiple-choice type tests,” noted Dasher. “We’re going to be sending five-character random code groups, just like we did in the old days. And, applicants will have to prove that they can send, too, using a poorly adjusted straight key.”*

*Technician Class licensees will not be required to take a Morse Code test, nor will a test be required for new applicants. “We discussed it,” said Dasher, “but decided that since most Techs can’t even figure out how to program their HTs, requiring them to learn Morse Code seemed like cruel and unusual punishment.”

*When asked what other actions we might see from the FCC, Dasher hinted that in the future applicants taking the written exam may be required to draw circuit diagrams, such as Colpitts oscillators and diode ring mixers, once again. “We’re beginning to think that if

an

applicant passes an amateur radio license exam it should

mean that he or she actually knows something," she

said.*

After the converted rig I had a Clegg 99er on six until a bought a Gonset 6 meter Sidewinder and a 2 meter Sidewinder. Both had terrible drift and few folks could copy me. It wasn't until I got the Kenwood TS700 for two and the Yaesu 6 meter that things started to happen for me on both bands.

I never was sure that the battery would last long enough with the dynomotor running. I ran my first one on a 6 volt systems as that is what I had in the truck. As I remember it pulled about 50 amps or so and the whine was awful like you said. The truck generator was only good for 30 amps. No long QSOs for sure. I don't miss that. Still good memories.

some of those old radios would keep you warm in the winter.and light up the room enough to fill your log book. unlike most newer ones they will also tell you what not to touch, some quite vehemently.the older radios mostly sound a bit bettr than the newer ones, seem to have a lower noise level, and a 12 inch speaker beats a 3 inch speaker.

After the converted rig I had a
Clegg 99er on six until a bought a Gonset 6 meter Sidewinder
and a 2 meter Sidewinder.  Both had terrible drift and few
folks

lots of fun with those old transmitters, knobs to turn,

meters to watch carefully, color of tube glow, more of an

art then than now. now its just set for tune, push the

button, and transmit when the tune light goes out. even

more

fun to get a six or two meter

am on the air, had to tune all those multiplyers, then

the

driver and output stage. hopefully on the right harmonic

usually with not enough test equipment to really be sure.

Yes it was.  As a novice, I got

my first FCC violation in the winter of 65.  I used the

wrong crystal in my Knight transmitter.  I fed a 100 ft

long line with

a single 14 awg wire 30 feet off one end.  I found out

that not only does it load on all bands but it transmits

on

all bands when you use a crystal with the wrong

harmonics.

Scared to death and wasn’t nearly as funny back then.

My

Elmer got me back on the

air again.

wrote:

*Washington, D.C. – April 1, 2015 – Today,

the Federal Communications Commission (Commission or FCC)

approved Report and Order 14- 987 which reinstates the Morse Code test for General Class and Amateur Extra Class licensees.

“It was a big mistake eliminating the Morse Code test,” admits Dotty Dasher, the FCC’s director of examinations. “We now realize that being able to send and receive Morse Code is an essential skill for radio amateurs.  As they say, it really does get through when other modes can’t.”*

*Not only will new applicants have to take the test, but General Class licensees who have never passed a code test will have one year to pass a 5-wpm code test. Similarly, Amateur Extra class licensees that never passed a code test will have one year to pass a 13-wpm test. Those amateurs that fail to pass the test will face revocation of their operating privileges.

Materials for administering the examinations will be distributed to Volunteer Examiner Coordinators by the end of April, so that they can begin the testing on May 1, 2015.*

*“This isn’t

going to be one of those silly multiple-choice type tests," noted Dasher. "We're going to be sending five-character random code groups, just like we did in the old days. And, applicants will have to prove that they can send, too, using a poorly adjusted straight key."*

*Technician Class licensees will not be required to take a Morse Code test, nor will a test be required for new applicants. "We discussed it," said Dasher, "but decided that since most Techs can't even figure out how to program their HTs, requiring them to learn Morse Code seemed like cruel and unusual punishment."

*When asked what other actions we might see from the FCC, Dasher hinted that in the future applicants taking the written exam may be required to draw circuit diagrams, such as Colpitts oscillators and diode ring mixers, once again. "We're beginning to think that if an applicant passes an amateur radio license exam it should mean that he or she actually knows something," she said.*

So true. 100% in agreement. A funny with the 12 inch speaker. They use to have audio input transformers readily available everywhere. I attached one to my change over relay and used it as a mike until I could afford to buy a good mike. I was talking to a guy on the air and he said ya know you sound good but it sounds like you are talking into a speaker. So funny. Remember when we had to use tube number for things we could not say on the air. Only remember one now. Going to get an 806 was going out to get a beer.

some of those old radios would keep you warm in the winter.and light up the room enough to fill your log book. unlike most newer ones they will also tell you what not to touch, some quite vehemently.the older radios mostly sound a bit bettr than the newer ones, seem to have a lower noise level, and a 12 inch speaker beats a 3 inch speaker.

After the converted rig I had a
Clegg 99er on six until a bought a Gonset 6 meter Sidewinder
and a 2 meter Sidewinder. Both had terrible drift and few
folks
could copy me. It wasn’t until I got the Kenwood TS700
for two and the Yaesu 6 meter that things started to happen
for me on both bands.

I never was sure that the battery
would last long enough with the dynomotor running. I ran
my first one on a 6 volt systems as that is what I had in
the truck.
As I remember it pulled about 50 amps or so and the whine
was awful like you said. The truck generator was only good
for 30 amps. No long QSOs for sure. I don’t miss
that. Still good memories.

the good old scr522, a lot of hams got their starton 2 with
those. I started with a twoer and modified it till it was
putting out about 9 watts, had a preamp, and a lot of other
mods. my first 6 meter transmitter was the old dx35
heathkit, with cut up tank
coil doubling the output.didnt make hardly any 6 contacts
till my army days in mass. hilltoping ment something there.
I had an old viehicle mount tranciever, a bc1206 I think it
was, only worked n 80 and 40, am and cw. tried to use it on
my first field day,
no contacts at all. (not very many crystals) with a
dynomoter putting out 450 volts dc or so and batteries.
would wake the dead when you started it up.

I grew up on a Farm near Girard Ks

which is close to Pittsburg Ks. I did not know there was
a

ham store other that Henry Radio in Butler Mo in the
early

days.

I either built my equipment or modified military surplus

for my station. I modified a 522 transmitter for 2
meter

AM as it ran 30 watts. Also worked 145.35 and worked 15

states with a home brew 4 element antenna. Did a lot of

trading with local hams and

got my better equipment that way. Later I bought from

Henry Radio, BA and Associated Radio after I moved to

Kansas City. My first 6 meter transmitter was a
modified

CB set. Good days for radio.

I starfted with a ht 17 hallicrafters I bought from a guy
in

reece ks, 6v6 807 with a bulb to indicate plate current.

also had a heath dx35 that had been extensively modified
by

previous owner, boutght at amature radio equipment co on

douglas, remember them?

couldnt get on 6 as a novice, but I got on 145.35 am with a

heath twoer. my first fairly good reciever was a 8r40

halicraftes, a home entertainment version of an r40, with

many modifications.My novice wall was wn0odu, it expired a

little while before i took

the tech. Elmers are useful, mine was w0mqb, Otis Wrench

who lived about 4 blocks from me, an old time navy operator

who worked for ktvh as an engineer.

I had a voltmeter and a tube

checker that I put together from a kit. That was it.

My

first 2 and 6 meter receiver was a superregen that I

built

from a manual.

The transmitter I build on a TV chassis. Wound all my

own

coils, sometimes more than once. Several years later I

got

a SWR bridge and grid dip meter which made building a lot

better. To know if I was tuned correctly I borrowed a

general coverage receiver

(SR-71) to listen for birdies. Learned very quickly

which

side of the oscillator to tune it for stability.

It was fun and that is why I like

using vintage equipment today.

wrote:

*Washington, D.C. – April 1, 2015 – Today,

the Federal Communications Commission (Commission or FCC)

approved Report and Order 14- 987 which reinstates the

Morse

Code test for General Class and Amateur Extra Class

licensees.

“It was a big mistake eliminating the Morse

Code test," admits Dotty Dasher, the FCC's director of examinations. "We now realize that being able to send and receive Morse Code is an essential skill for radio amateurs.  As they say, it really does get through when other modes can't."*

*Not only will new applicants have to take the test, but General Class licensees who have never passed a code test will have one year to pass a 5-wpm code test. Similarly, Amateur Extra class licensees that never passed a code test will have one year to pass a 13-wpm test. Those amateurs that fail to pass the test will face revocation of their operating privileges.

Materials for administering the examinations will be distributed to Volunteer Examiner Coordinators by the end of April, so that they can begin the testing on May 1, 2015.*

*"This isn't going to be one of those silly multiple-choice type tests," noted Dasher. "We're going to be sending five-character random code groups, just like we did in the old days. And, applicants will have to prove that they

can

send, too, using a poorly adjusted straight key.”*

*Technician Class licensees

will not be required to take a Morse Code test, nor will

a

test be required for new applicants. “We discussed

it,” said Dasher, “but decided that since most Techs

can’t even figure out how to program their HTs,

requiring

them to learn Morse Code seemed like

 cruel

and unusual punishment.”

*When asked what other actions we might see

from the FCC, Dasher hinted that in the future

applicants

taking the written exam may be required to draw circuit

diagrams, such as Colpitts oscillators and diode ring

mixers, once again. “We’re beginning to think that if

an

applicant passes an amateur radio license exam it should

mean that he or she actually knows something,” she

said.*

I was able to work CW in flying B-29 in the forty's, now when I was
there I could send 25 words , then when I got my general I had a bad time
to 13 words after several weeks now at 85 I can't hear any of them, and
I still recognize the cypher's, I never understand them, glad to hear
the BEARS repeater back on the air, The signal now is weaker to me in
Derby in side of the house. need to put a outside antenna. ka0mow
I was one of the secretary when we met outside on a wooded park before
they build the Tennis and the reconsecration with all kinds of games and
meetings, it was a good place. JMD

# 1581. RE: [BEARSAmateurRadioClub] FCC to reinstate Morse Code test.

Yahoo group: BEARSAmateurRadioClub
Date: 2015-04-02 20:02:29 UTC
From: Steffens, Kerry W
Topic: 1565  Message: 1581

I believe you are right. 806 is mercury vapor and 807 is the final in some radios like a Harveywells band master.

wasnt that an 807?
maybe a 6L6 later on. .now you cant hardly use anything from a tv to build anything all the parts are getting so specialized. although the tuner usb dongels are getting pretty popular as sdr.

So true. 100% in agreement. A
funny with the 12 inch speaker. They use to have audio
input transformers readily available everywhere. I
attached one to my
change over relay and used it as a mike until I could
afford to buy a good mike. I was talking to a guy on the
air and he said ya know you sound good but it sounds like
you are talking into a speaker. So funny. Remember when
we had to use tube number for
things we could not say on the air. Only remember one
now. Going to get an 806 was going out to get a
beer.

some of those old radios would keep you warm in the
winter.and light up the room enough to fill your log book.
unlike most newer ones they will also tell you what not to
touch, some quite vehemently.the older radios mostly sound a
bit bettr than the newer ones,
seem to have a lower noise level, and a 12 inch speaker
beats a 3 inch speaker.

After the converted rig I had a

Clegg 99er on six until a bought a Gonset 6 meter
Sidewinder

and a 2 meter Sidewinder. Both had terrible drift and
few

folks

could copy me. It wasn’t until I got the Kenwood
TS700

for two and the Yaesu 6 meter that things started to
happen

for me on both bands.

I never was sure that the battery

would last long enough with the dynomotor running. I
ran

my first one on a 6 volt systems as that is what I had in

the truck.

As I remember it pulled about 50 amps or so and the whine

was awful like you said. The truck generator was only
good

for 30 amps. No long QSOs for sure. I don’t miss

that. Still good memories.

the good old scr522, a lot of hams got their starton 2
with

those. I started with a twoer and modified it till it was

putting out about 9 watts, had a preamp, and a lot of
other

mods. my first 6 meter transmitter was the old dx35

heathkit, with cut up tank

coil doubling the output.didnt make hardly any 6 contacts

till my army days in mass. hilltoping ment something
there.

I had an old viehicle mount tranciever, a bc1206 I think
it

was, only worked n 80 and 40, am and cw. tried to use it
on

my first field day,

no contacts at all. (not very many crystals) with a

dynomoter putting out 450 volts dc or so and batteries.

would wake the dead when you started it up.

I grew up on a Farm near Girard Ks

which is close to Pittsburg Ks. I did not know there
was

a

ham store other that Henry Radio in Butler Mo in the

early

days.

I either built my equipment or modified military surplus

for my station. I modified a 522 transmitter for 2

meter

AM as it ran 30 watts. Also worked 145.35 and worked 15

states with a home brew 4 element antenna. Did a lot of

trading with local hams and

got my better equipment that way. Later I bought from

Henry Radio, BA and Associated Radio after I moved to

Kansas City. My first 6 meter transmitter was a

modified

CB set. Good days for radio.

I starfted with a ht 17 hallicrafters I bought from a guy

in

reece ks, 6v6 807 with a bulb to indicate plate current.

also had a heath dx35 that had been extensively modified

by

previous owner, boutght at amature radio equipment co on

douglas, remember them?

couldnt get on 6 as a novice, but I got on 145.35 am with

a

heath twoer. my first fairly good reciever was a 8r40

halicraftes, a home entertainment version of an r40, with

many modifications.My novice wall was wn0odu, it expired

a

little while before i took

the tech. Elmers are useful, mine was w0mqb, Otis Wrench

who lived about 4 blocks from me, an old time navy

operator

who worked for ktvh as an engineer.

I had a voltmeter and a tube

checker that I put together from a kit. That was it.

My

first 2 and 6 meter receiver was a superregen that I

built

from a manual.

The transmitter I build on a TV chassis. Wound all my

own

coils, sometimes more than once. Several years later I

got

a SWR bridge and grid dip meter which made building a lot

better. To know if I was tuned correctly I borrowed a

general coverage receiver

(SR-71) to listen for birdies. Learned very quickly

which

side of the oscillator to tune it for stability.

It was fun and that is why I like

using vintage equipment today.

lots of fun with those old transmitters, knobs to turn,

meters to watch carefully, color of tube glow, more of an

art then than now. now its just set for tune, push the

button, and transmit when the tune light goes out. even

more

fun to get a six or two meter

am on the air, had to tune all those multiplyers, then

the

driver and output stage. hopefully on the right harmonic

usually with not enough test equipment to really be sure.

Yes it was. As a novice, I got

my first FCC violation in the winter of 65. I used the

wrong crystal in my Knight transmitter. I fed a 100 ft

long line with

a single 14 awg wire 30 feet off one end. I found out

that not only does it load on all bands but it transmits

on

all bands when you use a crystal with the wrong

harmonics.

Scared to death and wasn’t nearly as funny back then.

My

Elmer got me back on the

air again.

[BEARSAmateurRadioClub]<mailto:am_fm_radio@yahoo.com%0b%0b%0b

*Washington, D.C. – April 1, 2015 – Today,
the Federal Communications Commission (Commission or FCC)
approved Report and Order 14- 987 which reinstates the
Morse
Code test for General Class and Amateur Extra Class
licensees.
“It was a big mistake eliminating the Morse
Code test,” admits Dotty Dasher, the FCC’s director
of
examinations. “We now realize that being able to send
and
receive Morse Code is an essential skill for radio
amateurs. As they say, it really does get through when
other modes can’t.”*
*Not only will new applicants have to take the
test, but General Class licensees who have never passed a
code test will have one year to pass a
5-wpm
code test. Similarly, Amateur Extra class licensees that
never passed a code test will have one year to pass a
13-wpm
test. Those
amateurs that fail to pass the
test will face revocation of their operating
privileges.
Materials for administering the examinations will be
distributed to Volunteer Examiner Coordinators by the end
of
April, so that they can begin the testing on May 1,

2015.*

*“This isn’t

going to be one of those silly multiple-choice type

tests,” noted Dasher. “We’re going to be sending

five-character random code groups, just like we did in

the

old days. And, applicants will have to prove that they

can

send, too, using a poorly adjusted straight key.”*

*Technician Class licensees

will not be required to take a Morse Code test, nor will

a

test be required for new applicants. “We discussed

it,” said Dasher, “but decided that since most Techs

can’t even figure out how to program their HTs,

requiring

them to learn Morse Code seemed like

cruel

and unusual punishment.”

*When asked what other actions we might see

from the FCC, Dasher hinted that in the future

applicants

taking the written exam may be required to draw circuit

diagrams, such as Colpitts oscillators and diode ring

mixers, once again. “We’re beginning to think that if

an

applicant passes an amateur radio license exam it should

mean that he or she actually knows something,” she

said.*

I am sorry that it took so long for me to get the repeater back on the air. it checked out fine in the radio shop after cleaning it all up, and took me a bit longer than I wanted to to carry all the pieces up to the mezanine on the mpf building. I found out a lottle later after getting it running that I had a case of congestive heart failure, I gues that is what made those stairs and ladders so much fun. it was very nice of Spirit to have one of the contractors put the antenna on the roof for us. I am going to take pictures of where it is and how to get to it to make it easier for anyone wants to work on it in the future. I have put all the documentation on a thumb drive for convience also. the mpf is not military or have any black projects, so it will be easy to get to the repeater and antenna.
Cliff Craft WA0ROX

I was able to work CW in flying B-29 in the forty's,
now when I was
there I could send 25 words , then when I got my general
I had a bad
time

to 13 words after several  weeks now at 85 I can't
hear any of them,
and I still recognize the cypher's, I never
understand them, glad to
hear the BEARS repeater back on the air, The signal now
is weaker to
me in Derby in side of the house. need to put a outside
antenna.

wasnt it fun back then, 30 day wait and only
good for a
year,. got mine first in 65.

April Fools is in order.  See you

have had your call a while.  I got mine in
the summer of

64.  It was mailed in and didn’t know for
3 months.  50

years last

summer.

*Washington, D.C. – April 1, 2015 –
Today,

the Federal Communications Commission
(Commission or
FCC)

approved Report and Order 14- 987 which
reinstates the

Morse

Code test for General Class and Amateur
Extra Class

licensees.

“It was a big mistake eliminating the
Morse

Code test,” admits Dotty Dasher, the
FCC’s director

of

examinations. “We now realize that being
able to send

and

receive Morse Code is an essential skill for
radio

amateurs.  As they say, it really does get
through when

other modes can’t.”*

*Not only will new applicants have to take
the

test, but General Class licensees who have
never passed
a

code test will have one year to pass a

5-wpm

code test. Similarly, Amateur Extra class licensees that

never passed a code test will have one year to pass a

13-wpm

test. Those

amateurs that fail to pass the

test will face revocation of their operating

privileges.

Materials for administering the examinations will be

distributed to Volunteer Examiner Coordinators by the end

of

April, so that they can begin the testing on May 1,

2015.*

*“This isn’t

going to be one of those silly multiple-choice type

Problems of the old is enough, now they are talking about all the
repeaters in some kind of PL tones so we could all talk on all the
repeaters at the same time. now that's is a new problem. John in Derby

# 1594. Thursday 3Sep Club meeting

Yahoo group: BEARSAmateurRadioClub
Date: 2015-09-09 01:21:03 UTC
From: tag@...
Topic: 1594  Message: 1594

Lightly attended this time but a good meeting.
We discussed some club equipment questions, Field Day participation and support, budget, programs, etc.
All the usual stuff. Drinks and cookies. That is always a hit with me.
This was my first time to get to a meeting at the new location. Nice place, easy to get to and into.
